THE WEEK IN WASHINGTON

Attorney General Robert H. Jackson announced that the Justice Department would bring criminal procedure under the anti-trust law against ASCAP, BMI, NBC and CBS. Next day, at a press conference, Thurman Arnold indicated that others might be indicted, too. (p. 1)

The Wage and Hour Division says that weekly salaries can be stabilized by prepayment of overtime when salaried employees work less than their regular work week. (p. 5)

Paul Peter, NAB Research Director, told the American Marketing Association convention that advertisers should “put more in radio”. (p. 6)

A new plan for associate membership in the NAB has been approved by the Board of Directors. The country now has 50,100,000 receiving sets. (p. 7)

Radio engineers throughout the country are getting ready for the Ohio State University Engineering Conference starting February 10. (p. 8)

Neville Miller tells the country, in a broadcast, that the American System of Broadcasting is coming through the emergency period with flying colors. (p. 9)

The FCC has been asked to follow last year's procedure with regard to financial reports. The Commission sent its annual report to Congress without any recommendations for major broadcasting legislation. (p. 9)

Colonel Charles H. March has been elected chairman of the Federal Trade Commission for the coming year. The Commission discussed advertising at length in its report to Congress. (p. 11)

All proposed legislation affecting broadcasting dies with the adjournment of Congress January 3. Many of the bills listed in this issue will be reintroduced. (p. 13)

Starting with this issue, the page numbers of the NAB Reports will start with “one” with the start of each volume each January 1. This is to facilitate back reference.

BMI Developments

JUSTICE DEPARTMENT STEPS IN

Attorney General Robert H. Jackson announced December 26 that he had authorized Thurman Arnold, Assistant Attorney General in charge of the Antitrust Division, to institute criminal proceedings under the Sherman Act against the American Society of Composers, Authors and Publishers, Broadcast Music, Inc., the National Broadcasting Company, and the Columbia Broadcasting System. The proceedings, he said, will be brought in Milwaukee, Wisconsin, immediately after the first of January, and will be based on the following charges:

1. The illegal pooling of most of the desirable copyright music available for radio broadcasting in order to eliminate competition and to monopolize the supply.
2. Illegal discrimination against users of copyright music.
3. Illegal discrimination against composers who are not members of ASCAP or Broadcast Music, Inc.
4. Withholding music from publication in order to exact fees not permitted by the copyright laws.
5. Illegal price fixing.
6. Restraining composers in their right to bargain for the sale of their own music.
7. Requiring users of music to pay for tunes on programs in which no music is played.
8. Mutual boycotts by ASCAP and by the broadcasting chains (through Broadcast Music, Inc.) in an attempt by each of these conflicting groups to obtain for themselves control over the supply of music by depriving the others of control, which boycotts threaten to restrain and obstruct the rendition over the radio of about ninety percent of the desirable modern copyright music.

Explaining the Department’s decision to institute criminal proceedings, Assistant Attorney General Arnold said:

“For a number of years the Antitrust Division has received constant complaints against the activities of ASCAP. The original purpose of ASCAP was one which the Department recognizes to be legitimate, i.e., collective action to protect its members from piracy of their copyrights. Activities which further this purpose have not been questioned by the Department, and are not attacked in these proceedings. However, the Department for many years past has frequently called to the attention of ASCAP practices which went far beyond the necessity of protecting its members in their copyright privileges—practices which were designed solely for the purpose of eliminating competition in the furnishing of music, and securing a monopoly control over the supply.

“Recently, through Broadcast Music, Inc. (an association controlled by the major broadcasting chains), the National Broadcasting Company and the Columbia Broadcasting System have engaged in, and threaten to continue on a larger and larger scale, restrictive practices similar to those which the Department charges were illegally instituted by ASCAP. It is claimed that these activities were necessary to protect the broadcasting chains from the illegal activities of ASCAP. The Department is not concerned with the...
question as to which organization was the aggressor. Each of these groups today is charged with using illegal methods to wrest the control of copyright music from the other. The threatened conflict is already in its first stage. The mutual boycotts already begun will hamper and obstruct the rendition of all copyrighted music over the radio and deprive the public of the privilege of hearing that music except on terms dictated by the victor in the contest. In such a struggle the public is in the position of a neutral caught between two aggressive belligerents.

“This Department cannot sit by and see ASCAP and the broadcasters engage in a private war at the expense of the public, using violations of law as their weapons in order to fight fire with fire. We have tried to obtain voluntary agreement to form the basis of a working peace which would eliminate the illegal activities and allow the associations of composers to continue their legitimate function of protecting their members from piracy. Those efforts, which a few days ago appeared to be on the verge of success, have failed. Now we have no choice but to proceed with a criminal prosecution to protect the interests of the public in orderly competition in the distribution of music.

“It should be added that complaints have also been received against the Society of European Stage Authors and Composers, commonly called SESAC. These complaints are now being investigated.”

Neville Miller that night made the following comment on the Justice Department’s statement:

“The Department of Justice is on the right track in bringing criminal charges against the American Society of Composers, Authors and Publishers. For many years broadcasters have sought relief from the grip of this illegal monopoly. It is a fact that the Department has had pending an anti-trust suit against ASCAP for more than six years and it is also true that for many weeks now the Department has been dickering with ASCAP for a consent decree which would have eliminated the monopolistic practices of which the broadcasters complain. This consent decree would have established an open and competitive market for music which once more would give broadcasters access to the great supplies of music controlled by the Society in a monopolistic pool.

“It is significant of the justice of the broadcasters’ complaints against the Society and of the propriety of the Department of Justice’s pressing for a consent decree on the part of ASCAP that only two days ago three justices of the Federal Court in Washington unanimously held that ASCAP was an illegal monopoly in the restraint of trade.

“It is most unfortunate that the Department appears to have confused the illegal practices of ASCAP with the perfectly legitimate effort of broadcasters to create an alternative competitive supply of music. Broadcast Music, Inc., is not the creature of NBC and CBS. It was formed by mandate of the National Association of Broadcasters in open convention, and more than 600 stations are the owners of its stock and the users of its music. It was at the urging of many of these stations and of myself that the networks cooperated in the formation of BMI, of which they together own less than 20% of the stock. Broadcasters throughout the country set up BMI after they had found it impossible to deal with ASCAP on any basis other than paying a tax on all programs whether they used music or not. In forming BMI, we had competent legal advice and are confident that it is in no sense violative of the law.

“The statement issued by the Department of Justice shows that the Department does not understand the set-up of Broadcast Music, Inc. This is not surprising in view of the fact that the Department of Justice has made no attempt to discuss this set-up with broadcasters, nor has it pointed out to us any ways in which it believed we were violating the law. Certainly if it believes that broadcasters are attempting a boycott, it is completely misinformed. For weeks the Department of Justice discussed a consent decree with ASCAP and, when it failed to get one, it suddenly accuses practically the whole broadcasting industry, represented in BMI, of criminal practices without giving us any opportunity at all for a similar discussion. The reason for this unusual behavior is not at all clear to me, and I hope that before the Department carries out its announced plan, it will be willing to give at least as much consideration to the broadcasters as it has given to a society which it has itself branded as a law violator over an extended period of years.”

Neville Miller, President   C. E. Arney, Jr., Assistant to President
Edward M. Kirby, Director of Public Relations; Joseph L. Miller, Director of Labor Relations; Paul F. Peter, Director of Research; Russell P. Place, Counsel; Lynne C. Sraeby, Director of Engineering
cannot stand comparison with the music of ASCAP houses in public favor.

In the column next to their list of sheet music best sellers, the Enquirer carries news items on two new songs which are now being featured—Until Tomorrow, Good Night, composition by Sammy Kaye which the composer is featuring with his own band, and Monday's Wash, a new boogie-woogie instrumental by Erskine Butterfield, WOR entertainer and Decca recording artist. The Enquirer says, "Plans of recording managers indicate that record companies will go after these numbers in a big way."

Both of these promising numbers come under the BMI license. Sammy Kaye's music is published by the Republic Music Corporation and Monday's Wash is a publication of Joe Davis's Beacon Music Company. BMI has recently concluded agreements for the performing rights in music of both of these companies and also in the catalogue of Mayo Music Corporation, another Joe Davis company. Mr. Davis has been well known for many years in the music business and his catalogues are valuable additions to BMI.

As the old year ends, BMI has become practically identical with the radio industry in the United States. As we go to press, 658 stations (672 including non-commercials) are in the BMI membership list. We welcome additions to BMI.

BMI receives many letters which contain expressions of support. One recently received by Mr. Tompkins sums up the substance of so many that it merits quotation. It is from Bob Nolan of Miami, Florida:

"BMI, in my humble opinion, is destined to become the most powerful musical organization in the country. Any thinking person can reach this decision by simple deduction.

"You have an excellent staff of arrangers and composers. The printing layout is simple, clean cut and, therefore, perfectly legible.

"Your professional department is quick, courteous and never too busy to personally correspond.

"Taking all these attributes and adding them with executives who are thoroughly familiar with the trials and tribulations of broadcasting and musicians, you have the fundamental requisites of a top-flight organization that will bring a smile to the countenance of the musical world.

"I have been in radio for twenty-one years, and have spent a great many of those years in and out of this territory. . . . All of us down here are with you one hundred per cent. "Having spent so many years in the profession I have innumerable friends in ASCAP and, as you and I both know, there are among us many brilliant, intelligent men who, upon hearing similar reports to mine from all over the country (as they are bound to do), there can be little doubt will 'see the light.' "

The following wire was sent December 31st to all member stations:

THIS IS LAST MINUTE REMINDER TO BE VIGILANT IN AVOIDING COPYRIGHT INFRINGEMENT BUT NOT TO BE PANICKED BY BRINGING OF INFRINGEMENT ACTIONS AGAINST YOU BY ASCAP. THESE ACTIONS ARE USUALLY HARD TO PROVE, SUBJECT TO MANY DEFENSES, AND TAKE CONSIDERABLE TIME TO REACH COURT. IF CLAIM IS MADE ON WORK WHICH IS IN OUR CATALOGUE, PLEASE NOTIFY YOUR LOCAL COUNSEL SO THAT THERE WILL NOT BE A DEFAULT PENDING ADVICE FROM US AND SEND US COPIES OF COMPLAINTS OR WRITTEN CLAIMS OF COPYRIGHT INFRINGEMENT IMMEDIATELY. WE HAVE TAKEN OUT ONE MILLION DOLLARS OF COPYRIGHT INSURANCE COVERING OUR CATALOGUE AND PROTECTING OUR BROADCASTING STATIONS AND THEIR ADVERTISERS, ADVERTISING AGENCIES AND PERFORMING ARTISTS. DETAILS OF THIS COVERAGE WILL BE FURNISHED YOU LATER.

BROADCAST MUSIC, INC.

Tacoma Decision

Here is the text of the three-judge Federal District Court decision in Tacoma, Washington, denying ASCAP an injunction against enforcement of the Washington state copyright law:

Haney, Circuit Judge

This is a suit to enjoin enforcement of a Washington Statute on the ground of its unconstitutionality. The cause has been submitted on an application for a permanent injunction.

Briefly stated, the Statute attacked declares it to be unlawful for separate copyright owners to pool the copyrights in order to fix prices, collect fees, or issue blanket licenses for the use of such copyrights, except where the licenses are issued assessing rates on a "per piece" system of usage. The detailed provisions of the Statute need not be discussed.

The Bill prayed for a permanent injunction restraining defendants from taking any act or proceeding under the Statute, and for a decree declaring such Statute unconstitutional. It is alleged in the Bill that on February 13, 1914, a small group of composers, authors and publishers organized a voluntary unincorporated nonprofit association under the laws of New York, which they designated as the American Society of Composers, Authors and Publishers, hereafter called the Society, for the purpose of licensing to users of music throughout the country the right to publicly perform for profit the works of its members. It was further alleged that there are approximately 123 publisher members of the Society and about 1000 writer and composer members of the Society. . . . That such members assign their respective exclusive right of public performance for profit in their respective musical compositions . . . that similar organizations exist in foreign countries, and the Society has the exclusive right to and does license within the United States, the public performance for profit of the musical compositions copyrighted by all members of such foreign
societies . . . and that the Society’s blanket license permits the
licensee to use many hundreds of thousands of compositions
composed and written by more than 44,000 members of such
foreign societies.

It appears that the members assign to the Society the exclusive
right of public performance, and the Society then has the
exclusive right to permit by licenses, licensees to use or not to use
the compositions of the Society’s members, to fix the prices for
licenses, to sue for infringement, and in general, to manage the
right of public performance in the same manner as the owner of
the copyright.

The motion to dismiss on behalf of the defendants, was based
on several grounds, one of which was “That mere unconstitu-
tionality, even assuming it to exist, does not warrant injunctive
relief, but that the facts alleged must bring the case within the
recognized rules of equity relating to injunctions, and that com-
plainants have not done so.” The motion to dismiss filed by
intervener KMO, Inc., states a number of grounds, one being
that the plaintiffs are not entitled to equity because they were
a monopoly. Although no answers have been filed, we may treat
the motions to dismiss as answers. Intervener Lockhart argues
the monopoly question, but his motion to dismiss does not present
such question. We treat his motion as an answer and amended
so as to present the question.

Regarding the completeness of the monopoly of the Society,
it is said in Buck v. Swanson, D. C. Neb . . . J. 33 F. Supp.
377, 386 . . .

“Of the popular music necessary for the successful operation
of radio stations, dance halls, hotels and theaters, the Society has
control of about 85 per cent or 90 per cent and also has control
of from 50 per cent to 75 per cent of the standard or older music
that is played occasionally. All of the large and more influential
publishers of music in the United States are members of the
Society. The users of music in Nebraska can not successfully
carry on their business except they deal with the plaintiff Society
because there is no place where nor person or agency to whom
users of music in Nebraska may go in order to deal for public
performance rights and negotiate for music in any substantial
amount sufficient to meet the ordinary needs of music users in
the State, except the Society.”

Mr. Justice Black in Gibbs v. Buck, 307 U. S. 66, 81, says:

“This combination apparently includes practically all—probably
95 per cent—American and foreign copyright owners controlling
rendition of copyrighted music for profit in the United States.
Not only does this combination fix prices through a self-perpetuating
board of twenty-four directors, but its power over the business of
musical rendition is so great that it can refuse to sell rights
to single compositions, and can, and does, require purchasers
to take, at a monopolistically fixed annual fee, the entire repertory
of all members controlled by the combination.”

In the instant case the testimony of the operators of two of the
largest radio broadcasting stations in Washington was that
it would be impossible to operate such stations without the music
controlled by the Society. The Society has neither submitted
evidence, nor made argument to the contrary.

On the hearing for an injunction pendente lite, we dismissed
On appeal our decree was reversed with directions to take evi-
95. Subsequently, we referred the cause to a special master for
the taking of evidence on the question, and directed him to make
findings. The special master found facts disclosing jurisdiction
in the court below. Believing that the evidence supports such
findings, we sustain them as not being clearly erroneous.

Plaintiffs contend that the Washington Statute is unconstitu-
tional for a number of reasons, and rely on Buck v. Swanson . . .
34 F. Supp. 510, holding somewhat similar statutes unconstitutional.
Before passing on that question, it is necessary to determine
whether or not plaintiffs may invoke the aid of a court of equity.
If a party “has been engaged in an illegal business and has been
1 Wall. . . . 518, 529.

In other words, before plaintiffs may invoke the aid of a court
of equity, they must come into court with clean hands. Keystone
Co. v. Excavator Co., 290 U. S. 240, 244. If the Society exists
in violation of the Sherman Anti-Trust Act, it and the members
composing it, are not entitled to a decree for its benefit. Section
1 . . . 15 USC.A Sec. 1 . . . of the Sherman Anti-Trust Act pro-
vides in part . . .

“Every contract, combination in the form of trust or otherwise,
or conspiracy, in restraint of trade or commerce among the several
states, or with foreign nations, is declared to be illegal. Every
person who shall make any such contract or engage in any such
combination or conspiracy, shall be deemed guilty of a misde-
meanor . . . ”

Section 2 . . . 15 USC.A Sec. 2 . . . of such Act provides in
part:

“Every person who shall monopolize, or attempt to monopolize,
or combine or conspire with any other person or persons, to
monopolize any part of the trade or commerce among the several
states, or with foreign nations, shall be deemed guilty of a
misdemeanor . . . ”

Whatever the distinction between these two sections may be, the
supreme court has recently said that Congress, by the act in
question, “Extended the condemnation of the statute to restraints
effected by any combination in the form of trust or otherwise,
or conspiracy, as well as by contract or agreement, having those
effects on the competitive system and on purchasers and con-
sumers of goods or services which were characteristic of restraint
deemed illegal at common law.”

Apex Hosiery Co. v. Leader, 310 U. S. 469, 498. The “Effects
mentioned were “business and commercial transactions which
tended to restrict production, raise prices or otherwise control
the market to the detriment of purchasers or consumers of goods
and services.” Id., p. 493.

Such effects were brought about by “Contracts for the restric-
tion or suppression of competition in the market, agreements to
fix prices, divide marketing territories, apportion customers,
restrict production and the like practices, which tend to raise
prices or otherwise take from buyers or consumers the advantages
which accrue to them from free competition in the market.”
Id., p. 497.

There can be little question here that the Society has the power to
fix prices for the right to publicly perform compositions for profit.
Likewise, it has restricted substantially all competition in the sale
of such rights, because it has all such rights. Since the Interstate
Commerce feature is conceded to be present, the Society clearly
violates the Act in question . . . United States v. Socony Vacuum
Oil Co., 310 U. S. 150, 223 . . . unless the right to publicly perform
for profit is not embraced within the Act. Upon that point the
Act says nothing expressly about rights or commodities. The
statute is aimed at “Restraints” of trade and commerce, and
not at the “subjects” of the trade or commerce. Rights may be
and often are the subject of trade or commerce, and the Sherman
law limits restraints of trade in “rights” as well as commodities.
The restraint here is the power acquired by the assignments of the Society's members, to deal in a right acquired by copyrights and thus we have a contract or combination in restraint of trade. Straus v. Am. Publishers Assn., 231 U. S. 222, 234. Plaintiffs contend that if the activity of the Society "Affects trade or commerce, it promotes rather than restrains it." Here, we are not concerned with such questions. Congress has decided that if such a combination has acquired power to fix prices, it is an illegal combination in restraint of trade. Plaintiffs further contend that the power to fix prices, as here, is not the odious "price fixe" condemned by the Act in question. They say that while a gallon of oil is the same no matter who sells it, musical compositions are not gallons of oil, but each of them is different. All we have said before, it is immaterial what the subject of the trade or commerce may be. The fact is that the Society has acquired the power to fix the prices at which rights of a particular nature may be purchased by prospective users. We think that is sufficient under the statute.

Let the bill be dismissed.

**Labor**

**OVERTIME PRE-PAYMENT**

A great many broadcasters are failing to take advantage of the money-saving overtime prepayment plan that can be used to avoid extra cost under the Wage and Hour Act.

The plan is simple. Take the case of an announcer who regularly works 40 hours a week for $40. You need him only 36 hours one week. Pay him his usual $40, and credit yourself on your books with $4 overtime prepayment. Three weeks later (or at any later date) he works 44 hours. He is entitled to his regular $40, plus $6 overtime. However, he has been prepaid $4 of the $6, and so his payment that week will be only $42.

Time off for fishing trips, funerals, and the like can be used to the same advantage, provided that it is understood between the employer and employee that the regular salary is for a full week's work, and that any time off will be used to establish credit against future overtime.

Vacations, holidays, and sick leave could be used for the same purpose if it were similarly understood between the employer and employee. However, the NAB is of the opinion that it would be of doubtful wisdom, in the long run, to compel employees to make up time off for vacations, holidays and sick leave when this has not been the practice in the past.

Any broadcaster contemplating the use of the prepayment plan should notify in writing each employee involved how he will be affected. A copy of this notice should be retained in case it is requested by the Wage and Hour inspector.

The prepayment plan cannot be used in the cases of employees who customarily work an irregular number of hours. Their regular hourly rate for the purpose of determining overtime, must be determined week by week.

Here is the Wage and Hour Division's official statement on the prepayment plan:

**Salaried Employees**

Let us take the example of a salaried employee who earns $20.00 a week for a regular workweek of 42 hours and whose regular rate of pay is therefore 50 cents an hour. ($20 ÷ 40 hours.)

<table>
<thead>
<tr>
<th>Weeks</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hours</td>
<td>36</td>
<td>40</td>
<td>40</td>
<td>40</td>
<td>40</td>
<td>40</td>
<td>40</td>
<td>48</td>
</tr>
</tbody>
</table>

For the first week the employee will receive $20.00 although he earned and is entitled to only $18.00 (36 hours × 50 cents). The employer will credit himself with $2.00 as a prepayment of compensation for overtime to be subsequently worked. The employee will receive $20.00 during each of the next six weeks. For the eighth week the employee is entitled to $25.00. (140 hours × 50 cents) + (8 hours × 75 cents). He will thus have worked off the entire credit of $2.00 accumulated by the employer and will receive $24.00 in cash.

The validity of the plan as outlined depends upon the assumption that the employee is overpaid when he received $21.00 for the first week of 36 hours and that therefore the employer has loaned or advanced him $3.00. In addition to the criteria set forth under case I to determine whether the "loan" or "advance" is real or only a bookkeeping device an additional consideration comes into play with respect to the salaried employee who works a regular number of hours. If the employer, who contemplates adopting a "prepayment" plan is presently required by contract or agreement with the employee, express or implied, to pay him the fixed wage or salary even when the employee works less than the regular number of hours in some week or weeks, it cannot be said that the employee is paid in excess of what he earns or is entitled to when he receives the fixed wage or salary even when the employer works less than the regular number of hours in some week or weeks. *He has received no "loan" or "advance" and no amount therefore may be credited to the employer as a prepayment of compensation for overtime to be subsequently worked.*

For the same reason a prepayment plan cannot be applied to a salaried employee who works a fluctuating number of hours.

*It cannot be emphasized too strongly that the validity of the plan depends upon the assumption that when the employee receives $20.00 in the weeks when he works less than 40 hours, he is being paid in excess of what he earns or is entitled to and is therefore given a loan or advance which he may work out by subsequent overtime. . . . The determination of this question may depend upon what the parties understand will happen when an employee severs his relationship with the employer. If the employer still has some accumulated credits at that time, will some attempt be made to get back the amount of the "loan" or "advance" from the employee since there is no further possibility that it will be worked out by subsequent overtime? The fact that no attempt will be made by the employer to collect the amount due him either by deducting such amount from the employee's last check or by some other way, is some indication that the "loan" or "advance" is simply a fictitious bookkeeping device. Similarly the fact that at the end of the year or at the end of some shorter period credits accumulated by the employer are simply wiped off the slate and a new start is made, is some indication that there is no "loan" or "advance" in fact but simply a bookkeeping device. If there is no "prepayment" in fact and the plan is nothing but a bookkeeping device, the Act will have been violated. No one criteria may be sufficient to determine this question but all the criteria set forth herein will be given weight in deciding this question.*

January 3, 1941 — 5
Since the nature of such an employee's employment is that he will receive the fixed basic salary regardless of the number of hours worked it cannot be said that such an employee is paid in excess of what he earns or is entitled to in any week in which he receives the fixed salary even though such weeks may have been short weeks.

We have considered above the question of the conversion of a salaried employee working a fluctuating number of hours into an hourly rate employee.

The amounts paid to an employee while absent from work on a vacation, holiday, sick leave or other miscellaneous periods of leave, may not be considered by the employer as prepaid overtime compensation just as the time off during such periods may not be used to balance overtime worked within the pay period. Payment during holidays, vacations, etc., is not payment for overtime and may not be considered by the employer as compensation for the employee's overtime work under the Act.

In two respects a prepayment plan, if it may be properly applied to salaried employees, is not subject to the same restrictions as a “time off” plan. It is not confined, in its operation, to the pay period. Credits to the employer, i.e., amounts paid by him in excess of the amounts earned by the employee or to which the employee is entitled, may be carried over beyond the pay period until they are consumed by the overtime work of the employee. Secondly, a prepayment plan may be applied to employees who are paid weekly.

It need not be restricted in its application, as is the “time off” plan, to employees paid on a bi-weekly, semi-monthly, or monthly basis. Under a prepayment plan the employee is being paid the overtime compensation due him, either in advance or, at the latest, at the time of the regular pay period.

Where applicable, a “time off” and “prepayment” plan may be applied in conjunction with each other.

**Sales**

**PAUL PETER ADDRESSES MARKETING ASSOCIATION**

Paul Peter, NAB Director of Research, spoke Thursday, December 26, before the American Marketing Association in convention at Chicago. The convention session, at which Mr. Peter spoke, was titled “Advertising, 1941 Model—How to Get More For Your Advertising Dollar”. Mr. Vernon D. Beatty, Advertising Manager of Swift & Company, was chairman of the session and introduced the speakers as follows:

“Put More in Radio”—Paul F. Peter, Director of Research, National Association of Broadcasters.

Mr. Peter summarized his discussion as follows:

“Because the nation's largest advertisers are giving a greater share of their advertising appropriations to radio . . . greater than any other advertising medium.

“Because the 'super-advertisers', those spending a million dollars or more in the three major media, put the major share of their budgets in radio . . . more of them ‘major’ in radio than any other medium.

“Because the average American family is spending more money annually for radio listening (operations, ownership and upkeep) than for purchases of newspapers and magazines combined. Etc. . . . Etc. . . .”

**NRDGA ASSOCIATE MEMBERSHIP**

As a result of a conference with Joseph E. Hanson, manager of the Promotion Department of NRDGA, the solicitation of radio stations to take out associate membership in that organization will be held in abeyance. We are endeavoring to work out a plan with Mr. Hanson which we feel will be mutually beneficial to his organization, to the broadcasters and to NAB. Any contemplating membership in NRDGA are asked to communicate with us before taking any action.

**VOORHIS BILL**

The Voorhis Bill (H. R. 10720) to tax advertising expenditures in excess of $100,000 annually, has died with the close of this Congress. Presumably, however, it will be introduced again early in the new Congress.

If enacted, it would operate to prevent advertisers from deducting advertising expense,—over and above a basic exemption of $100,000 to each business,—from gross income in computing taxable net income under the Federal income tax and excess-profits tax laws. The effect of such enactment would be widespread, as there are several hundred advertisers whose expenditures for advertising in major media annually exceed $100,000.

The Voorhis Bill (Voorhis, D.—Cal.):

**A BILL**

To provide funds for the national defense; to prevent avoidance of taxes by unlimited investment in advertising; to control un-economic advertising expense engaged in by the liquor, tobacco, and luxury trades; to discourage advertising on the public highways and to derive revenue therefrom; and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

**SHORT TITLE**

Section 1. This Act may be cited as the “Advertising Tax Act”.

**FINDINGS AND DECLARATION OF POLICY**

Sec. 2. (a) Congress hereby finds (1) that some taxpayers are and for many years have been avoiding income taxes by making extravagant investments in good-will advertising; (2) that the graduated levies of the new defense taxes will be largely nullified if unlimited deductions for advertising expense are permitted in computing taxable net income; (3) that much of the advertising sponsored by the liquor, tobacco, and luxury trades is an economic waste not permitted in other countries; and (4) that advertising...
on the public highways is a partial use of the public domain and advertisers are fairly chargeable therefor.

(b) It is hereby declared to be the policy of this Act that the conditions hereinbefore referred to shall be corrected.

DEFINITIONS

Sec. 3. When used in this Act—

(a) "Advertising" means and shall include all expense incurred which publicize within the boundaries of the United States a business or its products and is for the purpose of promoting the business enterprise. It shall include all radio programs, publications, posters, and notices except items of office stationery and expense. It shall also include all legislative and lobbying expense and all attorney's fees directed toward the influencing of legislation.

(b) "Taxpayer" means and shall include any person, individual, trust, estate, corporation, or organization who files a return under the income-tax or excess-profits-tax laws of the United States.

(c) "Billboard" means and shall include all billboards, signs, posters, or posted advertisements fronting on and visible from a public highway. Each variation or change in subject matter shall constitute a different billing or billboard. "Billboard" within the meaning of this Act shall not include signs or posters which advertise a business conducted or a product sold on the premises and such signs or posters shall be exempt from the special license fee or tax imposed by section 4 of this Act.

(d) "License" means a suitable tag or label to be devised by the Commissioner and appended by the taxpayer to the lower left corner of each billboard to indicate payment of the tax.

(e) The "Secretary" means the Secretary of the Treasury of the United States.

(f) The "Commissioner" means the Commissioner of internal Revenue of the United States.

(g) The "United States", when used in a geographical sense, means and includes the several States, the District of Columbia, the Territories, and all possessions.

EXCISE, TAX, OR DUTY

Sec. 4. (a) There is hereby levied an excise, tax, or duty of $1 for each calendar year or part thereof on each billboard in the United States.

(b) Failure to pay the said excise, tax, or duty and affix a license to a billboard within ten days following the erection thereof shall subject both the advertiser and the creator to a fine of $100 for each such offense and the billboard shall be subject to destruction or sale at the discretion of the Commissioner.

(c) The revenue raised under this section shall be paid into the special fund established by title III of the Revenue Act of 1940 for the national defense.

DEDUCTIONS FOR ADVERTISING

Sec. 5. (a) All advertising expense of any taxpayer shall be taxed as net income under the income-tax and excess-profits-tax laws of the United States (titles I and II of the Revenue Acts of 1940). No deduction of advertising expense from gross income shall be allowed in computing taxable net income thereunder.

(b) A basic exemption of $100,000 a year shall be permitted each business. If two or more taxpayers constitute the ownership of a single business, they shall be entitled to only a single exemption to be shared between them. What constitutes a single business shall be governed by regulations to be issued by the Commissioner.

(c) The Secretary, the Commissioner and taxpayers shall have the same rights and duties hereunder as they have in regard to the income-tax law.

CONFLICTING LAWS

Sec. 6. All Federal Acts or parts of Acts in conflict with any of the terms of this Act are hereby expressly repealed to the extent of such conflict.

DATE

Sec. 7. This Act shall take effect upon its enactment.

Miscellaneous

NAB ASSOCIATE MEMBERSHIP

At its meeting last month, the Board of Directors approved a plan of Associate Membership submitted by the Board committee consisting of Messrs. John J. Gillin, Jr., Earl Gammons, and Eugene P. O’Fallon. The plan opens Associate Membership in NAB to Transcription Companies, Equipment Manufacturers, Station Representatives and News Services. Dues are based upon a classified schedule and have been worked out on a fair and equitable basis.

The new plan accords to Associate Members all rights of membership except voting and gives them official recognition at the NAB convention. Only those who are Associate Members in good standing will be permitted to conduct exhibits or establish their headquarters rooms in the hotel where the convention is being held. An official list of exhibitors will be published and the Association will stand a certain portion of the Associate Members’ exhibiting expense. The members of NAB are asked to assist in securing associate memberships from those companies which are eligible. Before the next copy of the REPORTS reaches you, the number one mailing piece in the associate membership campaign will have been gotten out to all prospects. Any assistance which any of the members can render us in rounding up these associate memberships will be greatly appreciated.

50,100,000 RADIO SETS

MEMO TO STATION EXECUTIVES:

It is suggested that the information below be included in an appropriate news show over your station and be used additionally where it will do the most good.

ARTHUR STRINGER.

The number of radio sets in use in the United States is estimated by the National Association of Broadcasters to be 50,100,000 as of January 1, 1941. This is a net increase of 6,100,000 receivers in use over the year previous.

Included are consoles of all types, portable sets, new “personal” radios and auto radios.

The figures of set ownership in the United States indicate that the country is well along on a program of a set in every room and in every automobile. This increasing availability to the instrument of program reception points to far more radio listening than was considered possible two or three years ago.

“50,000,000 Radio Sets by Christmas”, the radio industry’s special promotion, during the past December, played an important part in lifting set ownership to the new high figure.
NEW YORK TAX

The NAB-New York Tax Committee, appointed last week by Neville Miller to resist the proposed assessment of station operating equipment by the City of New York, met in New York last Friday. Decision was reached to employ local tax counsel at once and to urge New York City stations to give the committee their support. The City of New York Tax Department proposes to tax as real estate under the state law all radio, television and facsimile equipment. The committee contends such equipment is personal property and not taxable as real estate. The next meeting will be held in New York on January 3.

Those in attendance were: Emanuel Dannett, WOR; Howard Hausmann, CBS; Henry Ladner, NBC; E. C. Sanger, WQXR; and Russell P. Place, NAB.

FEATURE SPORTS SHOW

Ellis Atteberry, manager of KCKN, Kansas City, had an outstanding feature sports show on Christmas Day. His effort was ably supported by a four column spread in the Kansas City Kansan.

Greetings from members of the Kansas City Blues baseball team, 1939 American Association pennant winners, received from all parts of the United States, were read over the air. The program also featured interviews with:

Roy Hamey, secretary of the pennant-winning blues, and Walt Lochman, winner of the Minor League’s “most popular announcer” award; and included Christmas messages from the Mayor and City Manager, from five sports writers of Kansas City newspapers, from Ed Barrow, president of the Yankees, from Gabriel Paul of the World’s Champions Cincinnati Reds; and from Frank Colley of the American Association.

OHIO STATE CONFERENCE

The announcement of the full program for the Fourth Ohio State Broadcast Engineering Conference shows that an unusually interesting number of talks and lectures are to be given. Talks and lectures previously announced in the NAB REPORTS (p. 4819) are to be by E. K. Jett, Chief Engineer of the FCC; A. D. Ring, Assistant Chief Engineer of the FCC in charge of broadcasting; Harvey Fletcher, Bell Telephone Laboratories; Major Armstrong of Columbia University; W. R. G. Baker, Director of Engineering for the Radio Manufacturers Association and Peter Goldmark of the Columbia Broadcasting System.

Recent discussions on high fidelity in connection with FM have produced considerable interest in quality. Several sessions such as “Speech Input Systems” by C. M. Lewis and J. D. Colvin, “Studio Acoustics” by Paul J. Washburn, “Sound Reproduction from Recordings” by V. F. Hunt, “Loud Speakers” by H. F. Olson and “Hearing The Determining Factor For High Fidelity” by Harvey Fletcher will deal with the subject of faithful reproduction.

Kenneth A. Norton from the FCC, long noted for his scientific work on radio will deliver a lecture on transmission in the Ultra High Frequencies. Mr. Norton has done some outstanding work on UHF transmission and his talk should be of unusual interest. Andrew Alford, well known for his antenna work in connection with blind landing, has recently turned his attention to the application of some of his developments for other UHF services. His talk will be entitled “UHF Antennas and Transmission Lines.” Raymond F. Guy of the National Broadcasting Company, one of the keenest students on FM will deliver a talk entitled “FM Field Tests”. Mr. Guy’s talk will deal with the evaluation of the merits of AM and FM with various deviations. The talk will be illustrated with a set of test records recorded to demonstrate the various effects encountered under different conditions.

There will be a Round Table on FM problems under the Chairmanship of Paul deMars of the Yankee Network with E. J. Content of WOR and Dan Gallerup of WTMJ at the table. Those who have particular questions on FM that they would like to hear discussed at the Round Table, are requested to send the questions to the Director of Engineering of NAB.

Lynne C. Smeby, Director of Engineering for NAB will be Chairman of the “General Discussion and Question Box”, conducted by Andrew Ring of the FCC. Those who have questions on FCC engineering matters that they would like to have discussed during this session, are requested to send their questions to the Director.

Following is the complete schedule:

Speaker
Speech Input Systems, C. M. Lewis, J. D. Colvin, RCA; Studio Acoustics, Paul J. Washburn, Johns-Manville; Polyphase Broadcasting, Paul Loyet, Central Broadcasting Company; Round Table on Receivers, J. Kelly Johnson, Hazeltine Corp., E. B. Passow, Zenith Radio Corp., W. L. Dunn, Belmont Radio Corp.; Sound Reproduction from Recordings, F. V. Hunt, Harvard University; General Discussion and Question Box, Andrew D. Ring, FCC.

FCC ANNUAL REPORT

Following is the FCC's summary of its annual report to Congress, covering the year ended last June 30:

In an annual report which incorporates important developments since the close of the fiscal year, the FCC chronicles new milestones in the advancement of broadcasting, and cites augmented duties in supervising radio, telephone, telegraph, and cable in connection with the national defense program. This streamlined report is almost half the size of the one last year. To summarize some of its highlights:

NATIONAL DEFENSE—The Commission's particular role in the preparedness program is to "police" radio communications. In

January 3, 1941 — 9
consequence, it has added to its monitoring and other field facilities. Also, it must keep tab on the many persons who operate electrical apparatus capable of farflying and almost instantaneous communication. So it is requiring all radio operators (about 100,000 licensees— including commercial and amateur) to prove their capabilities. Commission inquiry revealed some similar data with respect to employees who engage in international communication. The Commission has banned amateur communication with foreign countries, and, further, prohibits the use of portable long-distance transmitters by amateurs. Such steps are precautionary rather than disciplinary. The Commission has also clarified its rules with respect to more than 450 special emergency stations. This class of station has demonstrated its ability to interfere with radio and wire communications any more than is necessary for the national protection. Individuals and industries concerned are collaborating in this common contribution toward the national security. The relationship of radio, wire, and cable facilities to the preparedness picture is being further coordinated in planning by the National Communications Board, created by Executive order in September.

Broadcasting (FM)—Last year, which marked the 20th anniversary of broadcasting, was notable because of Commission recognition of a new type of public service in frequency modulation, popularly known as "FM." The ensuing year will offer practical demonstration of FM's claimed clarity and staticless qualities. Also, by utilizing the high frequencies, FM promises to relieve the long congested standard broadcast band. Business will benefit by the new equipment, sets, and servicing which FM requires. And, by being generally limited to local coverage, this new service should have a stimulating effect on local programming. Distinctive call letters have been assigned. To date the Commission has authorized 25 FM stations to engage in full commercial operation.

Broadcasting (Standard)—This older type of broadcast (which uses amplitude modulation) should experience a marked improvement in the coming year by reason of the North American Regional Broadcasting Agreement, effective March 29th next. Mutual interference problems are expected to be eliminated or minimized as a result of this compact between Canada, Cuba, Mexico, and the United States. To make agreement possible, the Commission is effecting an orderly shift of frequencies without disturbing the general broadcast structure. A total of 846 standard broadcast stations were operating or under construction during the fiscal year. There were 79 new authorizations and 10 deletions. Increased use of directional antennas is necessary in coping with the interference problem. During the calendar year 1939 a total of 705 standard broadcast stations (including networks) reported total time sales approaching $130,000,000, making a net income of nearly $24,000,000. They also listed a payroll of nearly $2,000,000 for nearly 25,000 employees. The report of the Commission's special committee on chain broadcasting was the subject of oral argument in December in connection with its consideration by the full Commission. The committee was composed of ten members: 222 domestic stations broadcasting in about 30 foreign languages. Commission action in five broadcast cases was upheld by the United States Supreme Court.

Broadcast (International)—Broadcast service to Latin America was improved by reason of the Commission requirement of at least 50 kilowatts for international program service. In this country 13 international broadcast stations were operative.

Television—Television is now making substantial progress with the cooperative assistance of that industry and the Commission. More than a score of stations geographically distributed throughout the nation have been licensed to experiment with various types of transmission with a view to reaching early accord on uniform standards which will enable television to move forward on a full commercial basis. Participating stations have budgeted a total of $8,000,000 for this practical experimental work. In conjunction with such effort, a National Television Systems Committee, jointly sponsored by the Radio Manufacturers Association and the Commission, has made a thorough study of the engineering phases of the situation which should be helpful in arriving at a general agreement. The continued rapid evolution of television is attested by developments in color reproduction, large-screen projection, and new service demonstrations.

Miscellaneous Radio Services—Increased use of radio for miscellaneous services is noted. Police stations have increased to 6,300, aviation stations to nearly 2,000, and more than 1,000 stations are employed for forest conservation work. The Commission clarified its rules with respect to more than 450 special emergency stations. This class of station was designed to establish radio communication in time of emergency. The Commission completed its final report on a special study of radio requirements for safety purposes on the Great Lakes and Inland Waters, and gathered information with respect to possible like need on the Mississippi River system. There are 56,000 amateur stations in operation. Some 40,000 commercial operator licenses were handled during the year. Inspection was made of radio installation on more than 14,000 ships and at some 8,600 land stations.

Telegraph—As a remedy for many ills in the highly competitive telegraph industry, the Commission recommended merger of the domestic telegraph companies, and, further, urged consolidation of international communication carriers domiciled in the United States in the interests of defense and other national needs.

Telephone—Savings to telephone users aggregating $10,000,000 annually are indicated by tariff revisions filed with the Commission since its previous annual report. New construction amounting to more than $9,000,000 was authorized.

Cable—Some cable, as well as radio, circuits were disrupted as a result of the war, and the Commission speeded authorizations for new or temporary replacements.

Accounting—More than 23,000 tariff schedules were filed by common carriers. The Commission adopted a revised uniform system of accounts for telegraph and cable carriers, to become operative in 1942. The new system, which conforms to Government accounting principles, will supplant one in use since 1914.

Recommendations to Congress—None, other than those contained in the Great Lakes and telegraph merger reports.

FCC Appropriations

FCC officials will go before a subcommittee of the House Committee on Appropriations within the next few days asking for an appropriation of $2,100,000 for the 1942 fiscal year. The appropriation under which the Commission is now operating is for $2,176,340.

The breakdown of the money being asked by the Commission for the coming fiscal year includes: for the Legal Division, $281,285; Engineering Division, $840,000; Accounting, $379,227; Secretary's office, $534,767; and "other obligations," $271,296.

FCC Duties

FCC has announced that the work, business and functions of the Commission for the month of January have been assigned as follows:

Commissioner Case

Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Thompson

Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including all motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1,251 and 1,256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1,231 to 1,232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.
FROM THE FCC MAIL BAG

A Californian asked the Federal Communications Commission to do something about interference to his radio reception caused by a flasher on his neighbor’s Christmas lights. The Commission advised that under the law it has no authority itself to interfere in such local matters, but suggested that a number of states and municipalities do have ordinances intended to curb radio interference of this type.

Another Californian, who complains of interference from Mexican stations, is told that the Commission has no jurisdiction over broadcast stations in other countries, but is reminded that reallocations of frequencies under the North American Regional Broadcasting Agreement are scheduled to go into effect March 29 next, promise a general improvement in radio reception.

Though the Commission cannot pass upon individual radio programs, it refers a Schenectady man direct to a station which he complains is using the national anthem as part of a commercial continuity. By the same token, it bids a Philadelphia man write to networks which he feels are using programs that are “mob spirited” and “appeal to greed”. However, the Commission can’t oblige an Indianapolis music fan who would like to see a local station compelled to carry a certain concert program.

A Mount Vernon, N. Y., resident is informed that there is nothing in the Communications Act or regulations to prevent the solicitation of new bank accounts by radio. A Rhode Island woman is told that the Commission cannot undertake the collection of radio broadcast stations be equipped with sirens to warn of legal proceeding.

A Harvard law student who inquires about “res judicata” in Commission administrative proceedings is informed:

The doctrine of “res judicata” does not play a major part in the Commission’s action in granting or denying an application for a license to operate a radio station. If a person desires a license, he files an application which the Commission is under a duty to grant if public interest, convenience or necessity will be served thereby. The proceeding does not partake of a controversy between the applicant and existing licensees, but is an application to the licensing agency for the grant of a written instrument of copyright permitting the operation of transmitting equipment. Existing licensees, who will be competitors of the applicant, or who will suffer electrical interference, frequently do oppose the granting of a license. The Commission will consider such information from any source. Since there is no element of private controversy in the granting of a license, the Commission has not deemed it necessary or appropriate to apply the doctrine of “res judicata” to the granting of licenses.

Two carrier waves of different frequency, each modulated and carrying different signals, may be transmitted on the same pair of wires and they will not interfere with each other in any way. At the output of the circuit both carrier frequencies and both signal frequencies will be the same as were at the input and no additional waves or other frequencies which were not in the original waves will have appeared:

“Again, if a device with non-linear transmission characteristics, such as a square law detector, is inserted in the circuit, the situation is altered. The output wave is now the square of the sum of the two input waves and many additional waves of different frequency are produced. Among them will be the harmonics of the carriers, the beat note between the carriers and a large number of the so-called modulation products of the signals—not only those which were present in the original signals but others which were not, such as the sums and differences of the modulation frequencies, etc. With this phenomenon you are undoubtedly familiar from your experience with broadcast reception and your knowledge of radio receivers. The same principles apply in the case of radio waves of different frequency radiated to a receiver from two broadcast stations at different locations. Each wave reaches the receiver unaffected by the other unless there is some region of space through which both signals have passed which has non-linear transmission characteristics. While the conditions for such are not normal ones they do sometimes occur. Two examples will be given. The signals of one broadcast station may modulate the signals of another when under certain conditions—which are again unusual—both pass through portions of the ionosphere having non-linear transmission characteristics. A certain type of cross-talk interference is observed in broadcast reception caused by rectification of broadcast signals in the house wiring system. Thisyn may occur when the wiring leads are loose or in some cases broken. The signals of other broadcast stations beyond the tuning range of the receiver when rectified in these leads may then have components within the tuning range of the receiver, thus capable of causing interference.”

Federal Trade Commission

MARCH HEADS FTC

Colonel Charles H. March, a member of the Federal Trade Commission since 1919, has been elected by the Commission to serve as Chairman during the calendar year 1941, succeeding Judge Ewin L. Davis.

Col. William H. England has been appointed Chief Economist of the Federal Trade Commission, succeeding Dr. Francis Walker, who retires January 1, 1941.

FTC REPORTS TO CONGRESS ON ADVERTISING

Advertising matter as published in newspapers, magazines, catalogs, and almanacs and as broadcast over the radio is surveyed and scrutinized for false and misleading representations by the Federal Trade Commission through its radio and periodical examining staff on a continuing current basis, says the Commission in its annual report. This work includes duties devolving on the Commission with the enactment of the Wheeler-Lea amendment to the Federal Trade Commission Act. Discussing the radio and newspaper advertising work the Commission in its report to Congress says:

The survey of magazine and newspaper advertising was inaugurated by the Commission in 1929, and the surveying of commercial advertising continuities broadcast by radio was started January 3, 1941 — 11
in 1934. As expanded in 1939, this survey includes mail-order catalogs and domestic newspapers published in foreign languages. Apparent and probable misrepresentations detected through this survey are carefully investigated, and where it appears from the facts developed that the advertising is false or misleading and circumstances warrant, the advertisers are extended the privilege of disposing of the matters through an informal procedure, more fully explained at page 123, which permits their executing stipulations in which they agree to cease and desist from the use of the acts and practices involved. A large majority of the cases are adjusted in this manner. In those cases where this informal procedure is not applicable or does not result in the elimination of the misleading claims, and the facts so warrant, formal procedure is instituted.

In cases of advertising involving food, drugs, devices, and cosmetics, the Commission has directed the negotiation of stipulations with the advertising agencies which have disseminated those advertisements as well as with the advertisers in whose behalf the agencies acted.

In its examination of advertising, the Commission’s only purpose is to prevent false and misleading advertisements. It does not undertake to dictate what an advertiser shall say, but rather indicates what he may not say under the law.

The Commission believes that its work in this field contributes substantially to the improvement that has been evident in recent years in the character of advertising. In its Bulletin, Volume 1, p. 193, the Commission states that the persistently questionable character of the advertising has been evident in recent years.

Mail-order advertising.—In the subsequent examination of 15,208 pages of the mail-order catalogs and circulars containing an aggregate of 15,314 pages, the Commission observed an interested desire on the part of such broadcasters and publishers to aid in the elimination of false, misleading and deceptive advertising.

Source of radio and periodical cases.—Examination of current newspapers, magazine, radio, and direct mail-order house advertising, in the manner described, has provided the basis of 79 percent of the radio and periodical advertising cases handled by the Commission during the fiscal year ended June 30, 1940. Information received from other sources including information from other divisions of the Commission, and from other Government agencies, formed the basis of the remainder of this work.

Analysis of questioned advertising.—An analysis of the questioned advertising which was assembled by cases and given legal review discloses that it pertained to the following classification of 3,014 commodities in the proportions indicated:

### Classification of Products

</tbody>
</table>

In the item of drug preparations listed above, a substantial proportion of the related advertising contained positive misrepresentations or representations which encompassed possible injurious results to the public and for that reason were given preferred attention.
Number of cases handled.—During the fiscal year the Commission sent questionnaires to advertisers in 759 cases and to advertising agencies in 109 cases, and negotiated 190 stipulations, which were accepted and approved by the Commission.

A total of 532 cases were disposed of by the various methods of procedure. Of this number, 188 cases were considered settled upon receipt of reports of the appropriate technical agency of the Government for a scientific opinion. The remaining 344 cases were closed without prejudice to the right of the Commission to reopen if warranted by the facts: 333 of them for such reasons as no evidence of violation, lack of jurisdiction, and insufficienit public interest; 2 because the Post Office Department had issued fraud orders to the advertiser before the Post Office Department had accepted from the parties concerned affidavits of discontinuance of business.

In addition, the Commission, in 36 cases, ordered issuance of complaint: in 17 instances where advertisers failed to stipulate; in 3 cases in which the advertiser was not given an opportunity to stipulate because of gross deception, and in 18 involving violation of the terms of existing stipulations previously accepted and approved. In 41 cases field investigations were ordered, including 13 wherein existed appeared that application for injunction or criminal proceedings might be warranted. Also, 3 cases were referred to other governmental agencies as concerning matters more appropriately coming within their jurisdiction.

Seven hundred forty-three radio and periodical cases were pending on July 1, 1939, and 979 were pending on June 30, 1940. Commission has access to scientific services.—Effective cooperation with the Library of Congress and other departments and agencies of the Government. The Commission has access to the laboratories, libraries, and other facilities of Federal Government agencies, including the National Bureau of Standards, United States Public Health Service, and the Food and Drug Administration, Bureau of Home Economics, and Bureau of Animal Industry of the Department of Agriculture, to any of which it may refer a matter for scientific opinion.

Since the passage of the Wheeler-Lea amendment to the Federal Trade Commission Act, the Commission has had the services of a medical staff under the supervision of an experienced and highly qualified physician assigned to it by the United States Public Health Service, so that the therapeutic claims of advertisers can be competently and carefully examined. (See Medical Advisory Service, p. 145.)

When necessary, the Commission obtains medical and other scientific information and opinions from nongovernmental hospitals, clinics, and laboratories. Such material and cooperation are often particularly helpful in enabling the Commission to reach sound and fair conclusions with respect to scientific and technical questions which come before it, and especially so in connection with much of the work of the Radio and Periodical Division.

If the Commission, in any case in which it appears that a published or broadcast advertisement coming to the Commission's attention may be misleading, a questionnaire is sent to the advertiser, and request is made for a sample of the product advertised, if this is practicable, and the quantitative formula, if the product is a composite. If the advertiser does not respond within 30 days following the mailing of the questionnaire, and continuities broadcast during a specific period are also requested, together with copies of all booklets, folders, circulars, form letters, and other advertising literature used.

Upon receipt of these data, the claims, simple, and formula are referred to the Commission's Medical Advisory Division or to an appropriate technical agency of the Government for scientific opinion. Upon receipt of the opinion, a list of such claims as then appear to be false or misleading is prepared and sent to the advertiser, and request is made for a sample of the product advertised, if this is practicable, and the quantitative formula, if the product is a composite. If the advertiser does not respond within 30 days following the mailing of the questionnaire, and continuities broadcast during a specific period are also requested, together with copies of all booklets, folders, circulars, form letters, and other advertising literature used.

If, after a consideration of all available evidence at hand including that furnished by the advertiser, the questioned claims appear to be true, the division reports the matter to the Commission with the recommendation that the case be closed.

If it appears from the weight of the evidence before it that the advertising is false or misleading, the division refers the matter to the Commission with recommendation either that complaint issue or that the case be returned to the division for negotiation of a stipulation, provided it is one appropriate for stipulation procedure and the advertiser desires to dispose of it by such voluntary agreement to cease and desist from the use of the acts and practices involved. If the Commission so authorizes, the division prepares a stipulation and forwards it to the advertiser for execution. Should be object to any of its provisions, they may submit them by mail or in person. If and when he agrees upon the terms of the stipulation and signs and returns it, the matter is again reported to the Commission with recommendation that the stipulation be accepted and the case closed without prejudice to the right of the Commission to reopen the matter at any time the facts so warrant. If the Commission accepts and approves the stipulation, the advertiser is notified thereof within 30 days from the date of acceptance of the report in writing showing the manner and form in which he has complied and is complying with the provisions of his agreement.

Stipulation provides simplified methods.—The object of all Commission procedure is to prevent unfair methods of competition and unfair and deceptive acts and practices in commerce, and experiences have shown that this can be accomplished not only by cease and desist orders, but by the stipulation method, which is effective and speedy as well as inexpensive for both Government and advertiser.

RADIO LEGISLATION SLATE CLEAN AS CONGRESS ADJOURNS

The first session of the 77th Congress convened Friday. The third session of the 76th Congress has just adjourned, the longest session in history outlasting the 345-day session in the war days of 1917-1918. The third session of the 76th Congress convened on January 3, 1940. A number of attempts were made to adjourn the last session but there were always enough members who insisted that Congress should stay in session during the present emergency.

Following is a complete list and status of bills of interest to the broadcasting industry when the last session adjourned. The slate is now clean as far as all pending bills and resolutions are concerned. All the old ones "die" when the session of Congress adjourns:

**SENATE BILLS**

S. 517 (Sen. Johnson, Colo.) LIQUOR ADVERTISING—Same as H. R. 251. Referred to Interstate Commerce Committee. Hearings held. Reported to Senate.

S. 517 (Sen. Johnson, Colo.) LIQUOR ADVERTISING—Same as H. R. 251. Amendment (in the nature of a substitute) to amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio. Ordered to lie on the table and to be printed. No action.

S. 517 (Sen. Johnson, Colo.) LIQUOR ADVERTISING—Same as H. R. 251. Amendment (in the nature of a substitute) to the committee amendment to the bill (S. 517) to amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio. Ordered to lie on the table and to be printed. No action.

S. 547 (Sen. Long, Mass.) COPYRIGHT—To create renewal rights in author of articles in periodicals, encyclopedias, etc., when such articles are not separately copyrighted but were included in copyright of periodical or other composite work. Referred to Patents Committee. Passed by Senate. Reported to House.

S. 550 (Sen. Shepard, Texas) COMMUNICATIONS ACT.—To amend Section 303 by limiting the issuance of operators' licenses to citizens of the United States over the age of twenty-one, provided the Commission may waive the age limit with respect to amateur operators. Referred to Interstate Commerce Committee. The bill as introduced refers to Section 303 (c.), whereas the report of amendment is Section 303 (1). A corrected bill will be introduced. No action.

S. 575 (Sen. Capper, Kans.) LIQUOR ADVERTISING—Same as H. R. 924. Referred to Interstate Commerce Committee. No action.

S. 594 (Sen. Reynolds, N. C.) GOVERNMENT RADIO STATIONS—To establish marine schools in each state and other purposes, including the construction and operation by each school of one or more stations on "a wave-length and power prescribed by the Maritime Commission." Referred to Commerce Committee. No action.

January 3, 1941 — 13
S. 635 (Sen. SCHWELLENBACH, Wash.) COMMUNICATIONS ACT—To strike Section 315 of the Communications Act and to require each station to set aside regular and definite periods of desirable day and evening time for uncensored discussion on "non-profit objects and economic purposes and for educational purposes." Qualified candidates for public office are not covered by the amendment. Referred to Interstate Commerce Committee. No action.

S. 636 (Sen. SCHWELLENBACH, Wash.) COMMUNICATIONS ACT—To amend Section 315 with respect to candidates for public office the requirement that the station shall keep complete records open to public inspection. Referred to Interstate Commerce Committee. No action.

S. 637 (Sen. SCHWELLENBACH, Wash.) COMMUNICATIONS ACT—To amend Section 207(b) and substitute in lieu thereof a similar provision with respect to censorship by the Commission with the proviso that it does not exempt stations from liability for defamatory, profane, indecent or obscene language or action broadcast by any officer, employee, agent or representative of the station. Referred to Interstate Commerce Committee. No action.

S. 1095 (Sen. SHEPPARD, Texas) COMMUNICATIONS ACT—To amend Section 303 (1). Corrected bill in substitution for S. 550. Limits the issuance of operators' licenses to citizens of the United States over the age of twenty-one, provided the Commission may waive the age limit with respect to amateur operators. Referred to Interstate Commerce Committee. No action.

S. 1268 (Sen. WHEELER, Mont.) COMMUNICATIONS ACT—To reorganize the Communications Commission by creating a new agency to be known as the Federal Communications and Radio Commission, consisting of an administrative board of three members. Referred to Interstate Commerce Committee. No action.

S. 1520 (Sen. WHITE, Maine) COMMUNICATIONS ACT—To amend the Communications Act by creating an eleven-man commission and for other purposes. Referred to Committee on Interstate Commerce. No action.

S. 2058 (Sen. NYE, N. D.) PRIZE CONTESTS—Requires publication of prize winners and the prize winning entry in all promotion contests carried on through the use of the mails or any facilities of interstate or foreign commerce. Referred to Committee on Interstate Commerce. No action.

S. 2251 (Sen. CHAVEZ, N. M.) GOVERNMENT BROADCASTING STATION—Directs Secretary of Navy to construct, maintain and operate high frequency stations to broadcast programs to all nations in Western Hemisphere; to appropriate three million dollars for construction purposes and one hundred thousand dollars for operating expense during fiscal year ending June 30, 1940. To Committee on Foreign Relations. No action.

S. 2466 (Sen. SHEPPARD, Texas) COMMUNICATIONS ACT—Same as H. R. 5308. To amend the Communications Act of 1934 by adding Section 3071, which would prohibit licenses in excess of fifty kilowatts to any station broadcasting network program. Referred to Committee on Interstate Commerce. No action.

S. 2611 (Sen. WHEELER, Mont.) GOVERNMENT RADIO STATION—Authorizing the purchase of site and erection of buildings in Massachusetts for use as radio-monitoring station at cost not to exceed $30,000. To Committee on Interstate Commerce. Passed by Senate. Reported to House.

S. 2719 (Sen. O'MAHONEY, Wyo.) ANTITRUST LAWS—Same as H. R. 7035. To Committee on Judiciary. No action.

S. 2846 (Sen. WHEELER, Mont.) COPYRIGHT—Provides that in networks and television broadcasting originating station transcription manufacturer is solely liable for infringement. Referred to Committee on Patents. No action.

S. 3043 (Sen. THOMAS, Idaho) COPYRIGHT—To amend and consolidate the Acts respecting copyright. Referred to Committee on Patents. No action.

S. 3515 (Sen. BAILEY, N. C.) AMEND THE COMMUNICATIONS ACT OF 1934 IN ORDER TO PRESERVE AND PROTECT LIBERTY OF EXPRESSION IN RADIO COMMUNICATION—Prohibits Federal Communications Commission's taking adverse action for alleged program offenses; establishes for broadcast stations minimum license period of 3 years and maximum of 2 years. Referred to Committee on Interstate Commerce. No action.

S. 3515 (Sen. BAILEY, N. C.) TO AMEND THE COMMUNICATIONS ACT OF 1934 IN ORDER TO PRESERVE AND PROTECT LIBERTY OF EXPRESSION IN RADIO COMMUNICATION—Prohibits Federal Communications Commission's taking adverse action for alleged program offenses; establishes for broadcast stations minimum license period of 3 years and maximum of 2 years. Referred to Committee on Interstate Commerce. No action.

S. 3745 (Sen. BARBOUR, N. J.) COMMUNICATIONS ACT—To limit the jurisdiction of the Federal Communications Commission in certain cases. Referred to Committee on Interstate Commerce. No action.

SENATE RESOLUTIONS

S. Res. 94 (Sen. WHITE, Maine) COMMUNICATIONS COMMISSION—To authorize investigation of the acts, rules, regulations, organization and policies of the FCC with respect to censorship of communications, ownership of broadcasting stations and other matters. To Interstate Commerce Committee. No action.

S. Res. 251 (Sen. SHIELDS, Minn.) FEDERAL COMMISSIONS—The Federal Communications Commission on Feb. 29, 1940, issued an order permitting limited commercial sponsorship of television beginning Sept. 1, 1940; and Whereas television interests immediately launched a manufacturing and sales promotion campaign; and whereas the Federal Communications Commission on Mar. 22, 1940, rescinded its order of Feb. 29, 1940, with resultant confusion in the minds of the public and causing abandonment of manufacturing, advertising, and sales programs which had, in effect, been authorized by the Commission's earlier ruling: THEREFORE BE IT

Resolved, That the Senate Committee on Interstate Commerce is hereby requested to investigate the action of the Federal Communications Commission in connection with the development of television broadcasting, in particular, to ascertain whether the Commission has exceeded its authority, and whether it has interfered with the freedom of public and private enterprise. Referred to Committee on Interstate Commerce. No action.

S. Res. 300 (Sen. TOBEY, N. H.)—Resolved, That the Committee on Interstate Commerce, or any duly authorized sub-committee thereof, is authorized and directed to make a full and complete investigation with respect to (1) the existence, extent, formation, legality, and effect upon the public or any individual or group, of any monopoly in radio broadcasting or any phase thereof or in the production, sale, or distribution of radio receiving or broadcasting apparatus; (2) the administration by the Federal Communications Commission of those provisions of the Communications Act of 1934, as amended, which relate in any manner to radio communication; (3) the manner of exercise by licensees of the Federal Communications Commission of the privileges conferred upon them by their licenses from the Federal Communications Commission; (4) the effect upon the public interest of any contract pertaining to radio to which any such licensee or any broadcasting network is a party; and (5) any attempts made by any such licensee, broadcasting networks, or any person, company, or corporation, engaged in any business done to the public or by or on behalf of the Commission, or representative of any such licensee, network, person, company, or corporation to unduly influence any public official in the exercise of his duties with respect to any matter pertaining to radio. The committee shall report to the Senate, at the earliest practicable date, the results of its investigation together with its recommendations, if any, for necessary legislation. Referred to Committee on Interstate Commerce. No action.

HOUSE BILLS

H. R. 94 (Mr. MALONEY, La.) PAID TESTIMONIALS—To require announcement of paid "recommendations" (testimonials), if any at time of broadcast. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 251 (Mr. CULKIN, N. Y.) LIQUOR ADVERTISING—To prohibit radio advertising of alcoholic beverages. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 253 (Mr. CULKIN, N. Y.) LIQUOR ADVERTISING—Same as H. R. 251, except that it specifically defines "alcoholic beverage" as including "beer, ale, wine, gin, whiskey, or brandy." Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 253 (Mr. CULKIN, N. Y.) LIQUOR ADVERTISING—To prohibit the advertising in interstate commerce of intoxicating liquor, either by mail or otherwise by the use of radio broadcasting. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 253 (Mr. CULKIN, N. Y.) LIQUOR ADVERTISING—Same as H. R. 253, except that it pertains to "alcoholic beverages" and is not limited to "intoxicating liquor." Referred to Interstate and Foreign Commerce Committee. No action.
H. R. 926 (Mr. Daly, Pa.) COPYRIGHTS—To amend and consolidate acts respecting copyright, including the creation of a copyright in recording artists for renditions reproduced on phonograph records, disks, sound tracks, or any other substances. Referred to Committee on Patents. No action.

H. R. 1651 (Mr. Dickstein, N. Y.) IMMIGRATION OF PERFORMING ARTISTS—Denies admission to United States for professional engagement of actor, singer or dancer where country of origin does not grant, both in law and in fact, substantially similar privilege to citizens of the United States. Referred to Immigration and Naturalization Committee. No action.

H. R. 1664 (Mr. Lucy, Mass.) COPYRIGHTS—To create renewal rights in author of articles in periodicals, encyclopedias, etc., when such articles are not separately copyrighted. Same as S. 547. Referred to Patents Committee. No action.

H. R. 2981 (Mr. Celler, N. Y.) LIBEL—SLANDER—Exempts station from liability for libel or slander when station proves when such articles are not separately copyrighted. Same as S. 582. Referred to Committee on Patents. No action.

H. R. 2982 (Mr. Celler, N. Y.) GOVERNMENT RADIO STATION—To construct and maintain Government radio broadcasting station in vicinity of Washington by Secretary of Navy, with programs under direction of the United States Commissioner of Education. Referred to Naval Affairs Committee. No action.

H. R. 3752 (Mr. Lea, Calif.) COMMUNICATIONS ACT—To amend Section 303 (l), Limits the issuance of operators' licenses to citizens of the United States over the age of twenty-one, provided with respect to amateur operators. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4224 (Mr. Lea, Calif.) COMMUNICATIONS ACT—To reorganize Communications Commission. Same as S. 1268. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4433 (Mr. Lanham, Texas) COPYRIGHTS—To secure prompt deposit of copyrightable material and prompt registration of claims to copyright in the copyright office. Referred to Committee on Patents. Hearing held. Superseded by H. R. 5319. No action.

H. R. 4684 (Mr. McLeod, Mich.) COMMUNICATIONS ACT—To amend Section 307, subdivisions (d) and (e), by requiring that broadcasting licenses be issued for a period not less than three years nor more than five years and to provide against denial of renewal application because of political views expounded over station. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 4871 (Mr. Daly, Pa.) COPYRIGHT ACT—To amend the Copyright Act in various respects, including the creation of copyright in recording artists covering the rendition of their records when reproduced mechanically. Referred to Committee on Patents. No action.

H. R. 5319 (Mr. Lanham, Texas) COPYRIGHTS—To secure prompt deposit of copyrightable material with Register of Copyrights and prompt registration of claims to copyright. Referred to Committee on Patents. No action.

H. R. 5435 (Mrs. Norton, N. J.) WAGE AND HOUR ACT—To amend, to remove hours restrictions on employees making $200 or more a month, etc. Reported to House.

H. R. 5508 (Mr. Peterson, Fla.) COMMUNICATIONS ACT—To amend the Communications Act of 1934 by adding Section 307 1/2, which would prohibit licenses in excess of fifty kilowatts to an applicant for broadcasting network programs. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 5791 (Mr. Schulte, Ind.) COMMUNICATIONS—To prohibit recording for profit or gain any program without consent in writing of the performers. To Interstate and Foreign Commerce Committee. No action.

H. R. 6160 (Mr. McGranery, Pa.) COPYRIGHTS—To amend the Copyright Act of 1909 in many respects, including the creation of copyright in phonograph records, the extension of the duration of copyright to 56 years. Referred to Committee on Patents. No action.

H. R. 6219 (Mr. Dougherty, N. C.) ALCOHOLIC BEVERAGES—To amend the Federal Alcohol Administration Act so as to prohibit, among other things, the advertising of alcoholic beverages by radio. Referred to Committee on Ways and Means. No action.

H. R. 6243 (Mr. Moser, Pa.) COPYRIGHTS—Regulating use of copyright.worls. Authorizes Federal Communications Commission to grant licenses and fix the fees for use of copyrighted works when an agreement with the copyright owner cannot be reached. Referred to Committee on Interstate and Foreign Commerce. No action.

H. R. 6695 (Mr. McGovern, Pa.) COMMUNICATIONS ACT—To prohibit recording for profit or gain any program without consent in writing of the performers. Referred to Interstate and Foreign Commerce Committee. No action.

H. R. 6973 (Mrs. Lea, Calif.) GOVERNMENT RADIO STATIONS—Authorizing the purchase of site and erection of building in Massachusetts for use as radio monitoring station at cost not to exceed $30,000. Referred to Committee on Interstate and Foreign Commerce. Same as S. 2611. No action.

H. R. 7035 (Mr. House, Ala.) ANITTRUST LAWS—To amend Sec. 8 of the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies," and to provide additional civil remedies against violations. Referred to Judiciary Committee. No action.

H. R. 7188 (Mr. Cochran, Mo.) COMMUNICATIONS ACT—To abrogate FCC Rule 42.03(a), adopted by FCC May 23, 1939, requiring intercommunication between competitors in order to dominate an industry. Referred to Committee on Interstate and Foreign Commerce. No action.

H. R. 7192 (Mr. Fay, N. Y.) PATENTS—To provide for the compulsory licensing of patents which are granted in applications for patents wherein other patents are involved. Referred to Committee on Interstate and Foreign Commerce. No action.

H. R. 8509 (Mr. Ditter, Pa.) TO AMEND THE COMMUNICATIONS ACT OF 1934 IN ORDER TO PRESERVE AND PROTECT LIBERTY OF EXPRESSION IN RADIO COMMUNICATION—Provides that the damages for infringement of copyright of musical compositions played in hotels or restaurants when no entrance fee is charged, or cover or its equivalent charge made, shall not exceed $50 for each performance, unless greater damages are shown. Referred to the Committee on Patents. No action.

H. R. 8509 (Mr. Ditter, Pa.) TO AMEND THE COMMUNICATIONS ACT OF 1934 IN ORDER TO PRESERVE AND PROTECT LIBERTY OF EXPRESSION IN RADIO COMMUNICATION—Provides that the damages for infringement of copyright of musical compositions played in hotels or restaurants when no entrance fee is charged, or cover or its equivalent charge made, shall not exceed $50 for each performance, unless greater damages are shown. Referred to the Committee on Patents.

H. R. 9665 (Mr. Clason, Mass.) COPYRIGHT—To reduce the amount of damages for infringement of copyright of musical compositions in certain hotels and other places. Referred to the Committee on Patents. No action.

H. R. 10205 (Mr. Bland, Va.) COMMUNICATIONS ACT—To amend section 4(f) of the Communications Act of 1934, as amended, to provide for extra compensation for overtime of inspectors in charge and radio inspectors of the Field Division of the Engineering Department of the Federal Communications Commission. Referred to the Committee on Merchant Marine and Fisheries. Reported to House.

H. R. 10720 (Mr. Voorhis, Calif.) ADVERTISING—To provide funds for the national defense; to prevent avoidance of taxes; to committee; to control and eliminate advertising expense engaged in by the liquor, tobacco, and luxury trades; to discourage advertising on the public highways and to derive revenue therefrom; and for other purposes. Referred to the Committee on Ways and Means.
FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings and oral arguments will be held before the Commission during the week beginning Monday, January 6. They are subject to change.

Wednesday, January 8
WARM—Union Broadcasting Company, Scranton, Pa.—License to cover C. P., 1370 kc., 250 watts night, 250 watts day, unlimited.

Thursday, January 9
Oral Argument Before the Commission
Report No. B-115:
WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, 1510 kc., 100 watts night, 100 watts LS, unlimited time.

Friday, January 10

FUTURE HEARINGS

During the past week the Commission has announced the following dates for future broadcast hearings. They are subject to change.

February 4
To Be Held in the U. S. Court Building, San Juan, Puerto Rico
NEW—Puerto Rico Advertising Co., Inc., Arecibo, P. R.—C. P., 1200 kc., 250 watts, unlimited.
NEW—Puerto Rico Advertising Co., Inc., San Juan, P. R.—C. P., 1350 kc., 250 watts, unlimited.
NEW—Caribbean Broadcasting Association, Inc., San Juan, P. R.—C. P., 1500 kc., 250 watts, unlimited.
WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Renewal of license, 780 kc., 1 kW night, 2 1/2 kW day, unlimited.

February 17
NEW—Stephen R. Rintoul, Stamford, Conn.—C. P., 1370 kc., 250 watts, unlimited.

February 19
KFJ—KFJ broadcasters, Inc., Klamath Falls, Ore.—C. P., 600 kc., 500 watts night, 1 KW LS.

February 21
WMBQ—Havens & Martin, Inc., Richmond, Va.—Modification of license, 1350 kc., 5 kW, unlimited, DA night and day. Present assignment: 1350 kc., 1 kW night, 5 kW day, unlimited, DA night and day.

February 24

February 26
KGNO—The Dodge City Broadcasting Company, Inc., Dodge City, Kans.—Modification of license, 1340 kc., 500 watts night, 1 KW day, unlimited. Present assignment: 1340 kc., 250 watts night, 1 KW day, unlimited time.

MISCELLANEOUS

KFJY—South Dakota State College, Brookings, S. Dak.—Granted special temporary authority to remain silent on December 25, 1940, and January 1, 1941, in order to observe the holidays.
WRLS—State of Wisconsin, Dept. of Agriculture, Stevens Point, Wis.—Granted special temporary authority to remain silent December 25, 1940, due to closing Federal Marketing Offices.
WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Granted special temporary authority to operate from 1 a.m. to 2 a.m., EST, on December 25, 1940, in order to broadcast Midnight Mass only.
WIXK—Westinghouse Electric & Mfg. Co., Hull, Mass.—Granted special temporary authority to operate a high frequency experimental broadcast station on 42600 kc., 1000 watts power, special emission for frequency modulation, with the transmitter located at Hull, Mass., and described as: Westinghouse, Type HHE, maximum rated carrier power 1000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate station WIXK on a commercial basis.
WIXSN—Westinghouse Electric & Mfg. Co., E. Springfield, Mass.—Granted special temporary authority to operate a high frequency experimental broadcast station on 43600 kc., 1000 watts power, special emission for frequency modulation, with transmitter located at E. Springfield, Mass., and described as: Westinghouse, Type HE, maximum rated carrier power 1000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate station WIXSN on a commercial basis.

WIXSN—The Yankee Network, Inc., Paxton, Mass.—Granted special temporary authority to operate a high frequency experimental broadcast station on 43600 kc., 1000 watts power, special emission for frequency modulation, with transmitter located at Avon, Conn., and described as: Composite, maximum rated carrier power output 1000 watts, for period January 1, 1941, to not later than March 1, 1941.

W9XAO—The Journal Co. (The Milwaukee Journal). Milwaukee, Wis.—Granted special temporary authority to operate a high frequency experimental broadcast station on 43600 kc., 1000 watts power, special emission for frequency modulation, with transmitter located at Milwaukee, Wis., and described as: REL, Type 519, maximum rated carrier power output 1000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate station W9XAO subsequent to January 1, 1941, and until the new high frequency experimental broadcast station now being constructed is ready for operation; denied authority to operate station W9XAO under the new call letters assigned new construction permit; denied authority to operate station W9XAO on frequency 45300 kc.

WAXAO—The Yankee Network, Inc., Paxton, Mass.—Granted special temporary authority to operate a high frequency experimental broadcast station on 41800 kc., 50000 watts power, special emission for frequency modulation, with transmitter located at Paxton, Mass., and described as: Radio Engineering Laboratories, Type 521, maximum rated carrier power 50 kW, for period January 1, 1941, to not later than March 1, 1941.

W3XO—Jansky & Bailey, Washington, D. C.—Granted special temporary authority to operate a high frequency experimental broadcast station on 43200 kc., 250 watts power, special emission for frequency modulation, with transmitter located at Georgetown, D. C., and described as: Composite, maximum rated carrier power 1000 watts, for period January 1, 1941, to not later than March 1, 1941.

W3XH—WBNX, Inc., Columbus, Ohio.—Denied special temporary authority to operate a high frequency experimental broadcast station on 43200 kc., 1000 watts power, special emission for frequency modulation, with transmitter located at Columbus, Ohio, and described as: GE, Type 4GF1A1, maximum rated carrier power 250 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate station W3XH on a commercial basis.

W3XAD—WHEC, Inc., Rochester, N. Y.— Granted special temporary authority to operate a high frequency experimental broadcast station on 43200 kc., 1000 watts power, special emission for frequency modulation, with transmitter located at Rochester, N. Y., and described as: R.E.L., Type 519, maximum rated carrier power output 1000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate station W3XAD on a commercial basis.

W2XWG—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate a high frequency experimental broadcast station on 43200 kc., 1000 watts power, special emission for frequency modulation, with transmitter located at 350 Fifth Ave., New York City, and described as: RCA Modified, Type 100 FA exciter with an MI-7151 RF amplifier, maximum rated carrier power output 1000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate Station W2XWG on 43100 kc. with 1000 watts power for period of three months.

W1XPW—WDRC, Inc., Hartford, Conn.—Granted special temporary authority to operate a high frequency experimental broadcast station on 41100 kc., in order to continue experiment in rebroadcasting high frequency broadcast station W2XMN emissions which are to be rebroadcast by W1XOJ, 1000 watts power, special emission for frequency modulation, with transmitter located at Meriden, Conn., and described as: Composite, Type FM1, maximum rated carrier power 1000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority of Station W1XPW to operate on 46500 instead of 41100 kc.

WBNS, Inc., Columbus, Ohio.—Denied authority to operate a 3 KW GE transmitter on frequency 41500 kc., at 1035 Barnett Road, Columbus, Ohio, and a quarter-wave antenna on top of the present 382 foot WBNS antenna tower for the period December 26, 1940, to not later than January 24, 1941, in order to render FM broadcast service in the Columbus area pending completion of Station W4SCM.

W9XZK—Zenith Radio Corp., Chicago. Ill.—Granted special temporary authority to operate a high frequency experimental broadcast station on 129800 kc., 5000 watts, special emission for frequency modulation with transmitter located at 505 N. Michigan Ave., Chicago, and described as: Zenith & REL (using REL Modulation Unit), Type ZR-11 (494-B), maximum rated carrier power output 5000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate on 15100 kc., 5500 watts, at 135 S. LaSalle St., Chicago, with present transmitter; denied authority to operate for 90 days from December 20 with power of 5000 watts on 45100 kc. at 505 N. Michigan Ave., Chicago.

W2XMN—Edwin H. Armstrong, N. of Alpine, N. J.—Granted special temporary authority to operate a high frequency experimental broadcast station on 128000 kc., 4000 watts power, special emission for frequency modulation, with transmitter located at North of Alpine, N. J., and described as: Composite, Type RCA, maximum rated carrier power 4000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate Station W2XMN on a commercial basis.

W2XQR—John V. L. Hogan, Long Island City, N. Y.—Granted special temporary authority to operate a high frequency experimental broadcast station on 43200 kc., 1000 watts power, special emission for frequency modulation, with transmitter located at Long Island City, N. Y., and described as: Composite, maximum rated carrier power output 1000 watts; facsimile modulation may be employed in connection with the present research and experimentation (no authority is contained herein to conduct a facsimile broadcast service); authority granted for period January 1, 1941, to not later than March 1, 1941; denied authority to operate Station W2XQR on 48300 kc.

W2XCM—Bay Broadcasting Company, Inc., Bay City, Mich.—Granted petition for dismissal without prejudice of application for modification of license to increase nighttime power from 500 watts to 1 KW.

W5A—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Granted petition for dismissal without prejudice of application for modification of license to increase nighttime power from 500 watts to 1 KW.

WHRS—Daily Televising Co., Bluefield, W. Va.—Granted motion to dismiss without prejudice application for construction permit to install new equipment, increase power from 500 watts night, 1 KW day, to 1 KW night, 5 KW day.

WTNJ—WOAX, Inc., Camden, N. J.—Dismissed petition to intervene in the hearing on the application for renewal of license for WAC.

WTNJ—WOAX, Inc., Camden, N. J.—Same except in re application of WCAP.

WTNJ—WOAX, Inc., Camden, N. J.—Dismissed petition to intervene in the hearing in re application of Trenton Broadcast Corp., for a new station in Trenton, N. J., to operate on 1250 kc., 1 KW, unlimited time, D.A. and on its own motion the Commission consolidated the hearings on Trent Broadcast Corp., application and renewal for WTNJ.

The Gazette Co., Cedar Rapids, Iowa.—Granted motion for leave to amend application for new station so as to request frequency 1550 instead of 1170 kc., and 5 KW power instead of 100 watts, unlimited time.

January 3, 1941 — 17
WCBA—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted special temporary authority to operate from 5:30 to 6:00 p. m., to include engineering affidavit which proposes a new directional antenna (which is subject to construction permit no. 25322). Also granted authority to operate on 1310 kc. at 250 watts, unlimited time. Also granted authority to operate to comply with KFBC motion to accept amendments to application to increase power from 500 watts to 5 kw., to include engineering affidavit which proposes a new directional antenna (which is subject to construction permit no. 25322).

WSOC—Radio Station WSOC, Inc., Charlotte, N. C.—Granted special temporary authority to operate from 5:15 m., to 5:45 p. m., CST, December 23, 1940, in order to broadcast NBC nation-wide salute to affiliation of WEAU with NBC network, only.

WEAU—Central Broadcasting Co., Eau Claire, Wisc.—Granted special temporary authority to operate from 5:15 p. m., to 5:45 p. m., CST, December 23, 1940, in order to broadcast NBC nation-wide salute to affiliation of WEAU with NBC network, only.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted modification of construction permit (B5-P-2783) which authorized changes in equipment and increase in power, for extension of completion date from January 7 to March 8, 1941.

WMFD—National Broadcasting Co., Inc., Washington, D. C.—Granted modification of construction permit (B1-P-2475) authorizing installation of new transmitter, increase in power, etc., for extension of completion date from 1-27-41 to 3-27-41.

WMCA—Knickerbocker Broadcasting Co., Inc., New York City.—Granted license to cover construction permit (B1-P-2960) which authorized move of old Composite transmitter from Flushing, L. I., to site of new main transmitter, Bellevalle Turnpike, N. J., use power of 1 kw., emergency use only, employing directional antenna day and night.

WMFF—Plattsburgh Central Broadcasting Co., Plattsburg, N. Y.—Granted authority to determine operating power by direct measurement of antenna input.

WBM—WBM, Inc., Jackson, Mich.—Granted authority to determine operating power by direct measurement of antenna input.

W9XB—Balaban & Katz Corp., Chicago, Ill.—Granted modification of construction permit (B4-PVB-50) which authorized a new television station, for approval of antenna system and transmitter location at 190 No. State St., Chicago, Ill.

W9YN—Head of the Lakes Broadcasting Co., Superior, Wis.—Granted special temporary authority to operate a high frequency experimental broadcast station on 13000 kw., 1 kw. power, special emission for FM, with transmitter at 39th St. and Tower Ave., Superior, for period January 1 to March 1, 1941.

W3XMC—McNary & Chambers, Washington, D. C.—Granted special temporary authority to operate from site-off (January 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31) to conclusion of President's speech on January 1st, 1941, on 11100 kc., for a period of 30 days pending action on application to change frequency 12100 kc.

WXAD—Univ. of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 2 to 3 p. m., CST, January 7, 8, 9, 14, 15, 16, 21, 22, and from 2 to 3:15 p. m., CST, January 1, in order to broadcast New Years Celebration only.

WMO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate from 4:30 to 8 p. m., CST, December 27, and from 4:30 to 11 p. m., CST, December 28, in order to broadcast sectional basketball tournament games only.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted license to cover construction permit (B5-P-1339), which authorized a new station to operate on 1120 kw., 100 watts, 250 watts LS, unlimited time. Also granted authority to determine operating power by direct measurement of antenna input.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted license to cover construction permit (B2-P-3013), which authorized installation of new transmitter.

WTRR—Hot Springs Chamber of Commerce, Hot Springs Nat'l Park, Ark.—Granted special temporary authority to operate from 12 midnight, December 31, to 3 a. m., CST, January 1, in order to broadcast Christmas vacation and semester exams.

WNYE—Board of Education, City of New York, New York, N. Y.—Granted special temporary authority to continue to operate non-commercial educational broadcast station WNYE after January 1, 1941, on 11100 kc., for a period of 30 days pending action on application to change frequency 12100 kc.

WXAD—Univ. of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 2 to 3 p. m., CST, January 7, 8, 9, 14, 15, 16, 21, 22, and from 2 to 3:15 p. m., CST, on January 6, 13, 20, and 27, in order to broadcast educational programs; to remain silent from 8:15 to 9:15 p. m., CST, on January 1 and 29, and from 7:15 to 9:15 p. m., CST, on January 2, 23, 28, and 30, during Christmas vacation and semester examinations.

KGPF—Hugh J. Powell, Coffeyville, Kans.—To remain silent from 2 to 3 p. m., CST, on January 7, 8, 9, 14, 15, 16, 21, 22, and from 2 to 3:15 p. m., CST, on January 6, 13, 20 and 27, in order to broadcast educational programs; to remain silent from 8:15 to 9:15 p. m., CST, on January 1 and 29, and from 7:15 to 9:15 p. m., CST, on January 2, 23, 28, and 30, during Christmas vacation and semester examinations.

WTRR—Hot Springs Chamber of Commerce, Hot Springs Nat'l Park, Ark.—Granted special temporary authority to continue to operate non-commercial educational broadcast station WNYE after January 1, 1941, on 11100 kc., for a period of 30 days pending action on application to change frequency 12100 kc.

WXAD—Univ. of Oklahoma, Norman, Okla.—Granted special temporary authority to operate from 2 to 3 p. m., CST, January 7, 8, 9, 14, 15, 16, 21, 22, and from 2 to 3:15 p. m., CST, on January 6, 13, 20, and 27, in order to broadcast educational programs; to remain silent from 8:15 to 9:15 p. m., CST, on January 1 and 29, and from 7:15 to 9:15 p. m., CST, on January 2, 23, 28, and 30, during Christmas vacation and semester examinations.

GPF—Hugh J. Powell, Coffeyville, Kans.—To remain silent from 2 to 3 p. m., CST, on January 7, 8, 9, 14, 15, 16, 21, 22, and from 2 to 3:15 p. m., CST, on January 6, 13, 20, and 27, in order to broadcast educational programs; to remain silent from 8:15 to 9:15 p. m., CST, on January 1 and 29, and from 7:15 to 9:15 p. m., CST, on January 2, 23, 28, and 30, during Christmas vacation and semester examinations.

WTRR—Hot Springs Chamber of Commerce, Hot Springs Nat'l Park, Ark.—Granted special temporary authority to continue to operate non-commercial educational broadcast station WNYE after January 1, 1941, on 11100 kc., for a period of 30 days pending action on application to change frequency 12100 kc.
ministration of renewal applications, for the period January 1 to February 1, 1941:

WXOR—Bamberger Broadcasting Service Corp., New York, N. Y.—Granted special temporary authority to operate a high frequency experimental broadcast station on 43500 kc., with 1000 watts power, special emission for frequency modulation, with transmitter located at 444 Madison Ave., New York City, and described as Western Electric, Type D-151182, maximum rated carrier power output 1000 watts, for period January 1, 1941, to not later than March 1, 1941; denied authority to operate station WXOR on the frequency of 47100 kc., (which frequency was granted for new high frequency broadcast construction permit).

KFJZ—Tarrant Broadcasting Co., Fort Worth, Tex.—Granted modification of construction permit (B3-P-2497) which authorized new transmitter, increase in power, etc., for move of transmitter from northeast of Fort Worth to 1/2 mile northwest of Birdville, Tex.; extend commencement and completion dates from 11-17-40 and 5-17-41 to date of grant and 120 days thereafter.

APPLICATIONS FILED AT FCC

560 Kilocycles

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Authority to transfer 50 per cent of interest in corporation from Strawbridge & Clothier to Lit Brothers, 7100 shares common stock.

600 Kilocycles

WCAO—Monumental Radio Co., Baltimore, Md.—Construction permit to change power from 500 watts night, 1 KW day, to 5 KW day and night, install new transmitter, install directional antenna for day and night use, and move transmitter. Amended to make changes in directional antenna for day and night use.

930 Kilocycles

WDBJ—Times-World Corporation, Roanoke, Va.—Modification of construction permit (B2-P-2522) for installation of directional antenna for night use, increase in power, requesting approval of transmitter location at present licensed site and approval of directional antenna as specified under construction permit (B2-P-2522).

1050 Kilocycles

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Modification of construction permit (B4-P-2866) for change of hours of operation, power, move of transmitter, and installation of directional antenna day and night, requesting installation of new transmitter, increase power from 1 KW to 1 KW night, 5 KW day, using directional antenna night only, and extend commencement and completion dates. Amended to make changes in directional antenna for night use and move transmitter.

1200 Kilocycles

KFXD—Frank E. Hurt, Nampa, Idaho.—Authority to determine operating power by direct measurement of antenna power.

1210 Kilocycles

WGRM—P. K. Ewing, Greenwood, Miss.—License to cover construction permit (B3-P-3099) for new transmitter.

1220 Kilocycles

KPAC—Port Arthur College, Port Arthur, Tex.—Modification of license to increase power from 500 watts to 500 watts night, 1 KW day. Amended to request 1 KW day and night (using directional antenna night).

1280 Kilocycles

WORC—Alfred Frank Kleindienst, Worcester, Mass.—License to cover construction permit (B1-P-2563) for changes in equipment and increase in power.

WORC—Alfred Frank Kleindienst, Worcester, Mass.—Authority to determine operating power by direct measurement of antenna power.

1310 Kilocycles

KRJF—Star Printing Co., Miles City, Mont.—Modification of construction permit (B5-P-2533) for a new station, requesting approval of studio and transmitter sites at U. S. Highway No. 212, south near intersection of road to Miles City Country Club, Miles City, Mont., approval of antenna and change type of requested transmitting equipment.

WINX—Lawrence J. Heller, Washington, D. C.—License to cover construction permit (B1-P-2546) as modified for a new 50-watt amplifier.

1350 Kilocycles

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Modification of construction permit (B4-ML-386) to change power and install directional antenna for day and night use, requesting approval of directional antenna for day and night use.

1370 Kilocycles

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Construction permit to change frequency from 1370 to 1020 kc. (1060 kc. under North American Regional Broadcasting Agreement), increase power from 250 watts to 10 KW, install a new transmitter, install directional antenna for day and night use, and move transmitter. Amended: To change type of requested transmitting equipment.

1500 Kilocycles

KROD—Dorrance D. Roderick, El Paso, Texas.—Modification of construction permit (B3-P-2725) to install new transmitter, change frequency, and increase power, further requesting authority to change type of transmitter, and extend commencement and completion dates.

FM APPLICATIONS

NEW—Stromberg-Carlson Telephone Manufacturing Co., Rochester, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 45100 kc., coverage, 2240 square miles; population, 543,000.

NEW—FM Radio Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 48300 kc., coverage, 8600 square miles; population, 9,800,000.

NEW—Columbia Broadcasting System, Inc., Boston, Mass.—Construction permit for a new high frequency broadcast station to be operated on 41100 kc., coverage, 16230 square miles; population, 5,972,246.

NEW—Gordon Gray, Winston-Salem, N. C.—Construction permit for a new high frequency broadcast station to be operated on 44100 kc., coverage, 69400 square miles; population, 4,123,000.

NEW—The Gazette Company, Cedar Rapids, Iowa.—Construction permit for a new high frequency broadcast station to be operated on 41700 kc., coverage, 7400 square miles; population, 282,000.

MISCELLANEOUS

KLX—Tribune Building Co., Oakland, Calif.—Authority to determine operating power by direct measurement of antenna power. (Not signed or verified by an officer.)

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will

January 3, 1941 — 19
be given an opportunity to show cause why cease and desist orders should not be issued against them.

Copinol Company—Robert E. Overell, trading under the firm name of Copinol Company, 7th and Main Sts., Los Angeles, engaged in the distribution of a medicinal preparation designated "Copinol" and sometimes "Copinol Nasal Medicine," is charged in a complaint with false advertising.

The complaint charges that in advertisements distributed through the United States mails and other means in commerce, the respondent has represented among other things: "Secret Formula for Nose Catarrh Revealed at Last!" Special ingredient retains medication longer in nose—speeds relief in catarrh-choked nasal congestion, shrinks swollen membranes, and cures other ailments. New laws require that Copinol Company disclose its treasured formula and now the whole world knows that LANOLIN, blended with six other scientific ingredients, is the amazingly effective medication that insures such lasting relief from stuffy head colds, catarrh-choked nose and throat, nasal catarrh, and sinus congestion.

These representations, the complaint continues, are false and misleading; the preparation has no therapeutic value in the treatment of head colds, nasal catarrh, or sinus congestion in excess of furnishing temporary relief to congested nasal mucous membranes, and is nothing more than a mild antiseptic emollient and constrictor of the arteries.

The complaint further charges that respondent's preparation contains ephedrine and the preparation may be harmful to those suffering from heart trouble, high blood pressure, diabetes or thyroid trouble, and that use of the preparation over a long period of time is likely to produce such prolonged nasal constriction as to cause tissue damage from anoxemia with secondary inflammatory reaction.

The advertisements disseminated by the respondent, the complaint continues, contain no cautionary statements to the effect that this preparation should not be used by persons having heart trouble, high blood pressure, diabetes or thyroid trouble, and constitute false advertising in that they fail to reveal that use of the preparation under the conditions prescribed in the advertisements or under such conditions as are customary or usual, may result in injury to health. (4431)

Ethel Bellamy, Inc., 30 Elm St., Nutley, N. J., engaged in the sale and distribution of a cosmetic and drug preparation designated "Ethel Bellamy Eyelash Luxuriant," is charged, in a complaint with misrepresentation of the product.

In advertisements circulated in commerce, the complaint charges, the respondent has represented that the product is of substantial therapeutic value in the treatment of granulated eyelids; that its use promotes the growth of eyelashes, and that it supplies pungent to eyelashes and darkens eyelashes permanently.

These representations, the complaint continues, are exaggerated, misleading and untrue. (4242)

Food Service Equipment Industry, Inc.—Charging various members of the food service equipment industry with combinations and agreements to unlawfully restrict competition in the sale of their products and create monopolies, a complaint has been issued against Food Service Equipment Industry, Inc., Chicago. Its officers, directors, and (3) the industry association members of the some 75 or 80 of the country's leading dealers in food service equipment; corporations manufacturing such equipment; corporations manufacturing such equipment, who are representative of concerns holding "Honor Roll Certificates" from the industry association; Illinois Brass Mfg. Co., Chicago; Columbia Stampine and Enameling Company, Long Island City, N. Y.; American Vitrified China Manufacturers' Association, New Castle, Pa., two of its officers, and its member manufacturing companies.

The complaint alleges that each of the various respondents, in cooperation with one or more other respondents, either directly, or through Food Service Equipment Industry, Inc., or its officers or directors, or American Vitrified China Manufacturers' Association, or its officers, or by other means, entered into agreements, combinations, policies and practices which had the effect, among other things, of monopolizing in the respondent food service equipment dealers the resale and distribution of food service equipment to hotels, clubs, restaurants and other users; and in monopolizing in the respondent manufacturers the 75 or 80 of the country's leading dealers in food service equipment to sell their products through the industry association members and not directly to ultimate users, and that by means of agreements and understandings; (1) the distributors comprising the industry association membership, through the association required all manufacturers of food service equipment to sell their products through the industry association members and not directly to ultimate users, and pursued a general policy of reducing competition throughout the United States which tended to maintain a monopoly in the respondent dealers and manufacturers, such policies and practices having been accomplished through national and local association meetings, special committees, publications and by other means; (2) the industry association issued to respondent manufacturers "Honor Roll Certificates" recognizing that they had agreed, and by their agreement, not to sell through any but "recognized" dealers and to discontinue selling directly to hotels, restaurants, chain stores and similar users, the tendency and effect being to set up the respondent manufacturers Honor Roll Certificate recipients, as a "White List" of manufacturers to receive exclusively the industry membership, business, and (3) the industry association members entered into and carried out agreements with manufacturers of stainless steel and enamel cooking equipment, the china manufacturers' association member and three of the largest commercial gas range manufacturers, all respondents in the proceeding, to monopolize in the respondent industry association members the resale, and in the respondent manufacturers all purchases of these manufacturers' products by industry members.

The complaint alleges that Illinois Brass Mfg. Co. and Columbia Stampine and Enameling Co., although not recipients of Honor Roll Certificates, cooperated as manufacturers with the other respondents in effectuating the industry corporation members policies and practices.

The respondents officers of Food Service Equipment Industry, Inc. are: I. S. Anolf, chairman; M. P. Duke, St. Louis, vice-chairman; Mise L. E. Irwin, Chicago, secretary, and S. R. Spindler, New York, vice-chairman. The complaint charges that in advertisements disseminated by the respondent, the complaint continues, are exaggerated, misleading and untrue. (4242)

National Distillers Products Corporation, 120 Broadway New York, which conducts a distillery and factory in Cincinnati in which it prepares and from which it ships into various States a poultry feed supplement variously designated as "Produlac Brand Semi-Solid Distillers Grains Mash," "Semi-Solid Produlac" and "Produlac," is charged, in a complaint with misrepresentation of its product.
The complaint charges that the respondent corporation, in letters and circulars transmitted by mail and otherwise through the various States of the United States (except into and in certain States where the complaint has been compelled by requirement of statutes relating to poultry feeds to modify its representations), has represented and implied that poultry rations generally are inadequate and must be supplemented by the vitamins and nutritional factors represented and implied as being contained in sufficient quantities in the respondent's products. The complaint alleges that the respondent also represents and implies that the addition of its products as a supplement to a diet or ration already containing the necessary food elements and vitamins results in substantially increased egg production, better health, hatchability of eggs, decreased mortality and other advantages set forth in its representations.

The complaint alleges that these representations are unwarranted, grossly exaggerated and misleading, and that the respondent's product is merely one of a class of dried grain after-distillation remnants and does not have the qualities and efficacy claimed for it. (4425).

Powerine Company, Denver, Colo., engaged in the sale and distribution of petroleum products to retail dealers and jobbers, is charged, in a complaint with the use of lottery methods in the sale of its products, designated "Powerine" and "Powerlube".

The complaint charges that in connection with the sale of these products, the respondent distributed and sold to dealers a so-called "Right in the Palm of Your Hand" device for use in the sale and distribution of the products to the consuming public in a manner involving the operation of a game of chance, gift enterprise or lottery scheme. The devise consists of a booklet, the complaint alleges, containing pictures of sheep and lambs, with remuneratory tags and labels to be attached to the products. The petroleum products, services or cash awards to be awarded purchasers vary in value in accordance with each individual booklet, the complaint alleges, and are effectively concealed from purchasers until certain seals are broken and removed from the booklets, thus the prizes or awards are distributed to the purchasing public wholly by lot or chance.

The aforesaid acts and practices of the respondent, the complaint alleges, constitute unfair methods of competition in commerce and unfair and deceptive acts and practices in commerce in violation of the Federal Trade Commission Act. (4423).

Rosse Products Company—Edward C. Rose, trading under the firm name of Rosse Products Company, 2708 West Farwell Ave., Chicago, engaged in the advertising, sale and distribution of a medicinal preparation designated as "Rosse Rheuma Tabs", is charged, in a complaint with misrepresentation.

By the dissemination of advertisements concerning its preparation circulated by the United States mails and other means in commerce, the complaint charges, the respondent has represented that his product is a cure or remedy for rheumatism, rheumatic pains, and sensitive joints, and constitutes a competent and effective treatment therefor, and that it will relieve the pain attendant upon such conditions for a longer period of time than any other preparation.

The complaint charges that the product is nothing more than a laxative and diuretic having mild anthemic properties; has no curative action on the underlying factors that cause rheumatic pains; and has no therapeutic value in the treatment of rheumatism, rheumatic pains or sensitive joints, in excess of furnishing temporary relief from the symptoms of pain. (4428).

Ruth Gowns, Inc., 498 Seventh Ave., New York, engaged in manufacturing, selling and distributing various grades and types of dresses and other wearing apparel for women, is charged, in a complaint with falsely representing the constituent fiber or material of which its products are made. Such representations, according to the complaint, are made by the use of a number of labels, price lists and invoices, as well as in various advertising material circulated in commerce, through statements made to purchasers, and by the respondent's failure to disclose the rayon content of certain of its products.

The complaint alleges that an example of the respondent's representations is its placing on price lists and invoices and in various advertising circulars of the term "Tie Silk Taffeta Dress"; or other terms indicative of silk, thus representing that the fabrics so described are composed of silk, when in fact they consist in whole or in part of rayon.

In a large portion of the respondent's sales, the complaint alleges, no indication of the fabric content of its products is made by tag, label or invoice, in advertising, or by any other means, and a large portion of the respondent's products which have the appearance and feel of silk but are composed entirely of rayon, are therefore sold through wholesalers, jobbers and retail dealers to the purchasing public without any disclosure being made of their rayon content. (4426).

Siegel & Alenikoff—Joseph Henschel, Jacob Siegel and Philip Alenikoff, copartners trading as Siegel & Alenikoff, 5411 E. 62nd St., New York; H. M. Thorman and Alfred Schuster, trading under the name H. M. Thorman, 2101 Superior Ave., Cleveland; Joseph Bloomfield, trading as Bloomfield Company, 75 Kenwood St., Boston; Lou Littman, 153 East Grand River Ave., Detroit, and E. P. Feinberg & Frankel, 318 West Adams St., Chicago, are charged, in a complaint with unfair and deceptive acts and practices in commerce.

Respondents Joseph Henschel, Jacob Siegel and Philip Alenikoff, trading as Siegel & Alenikoff, have been engaged in the manufacture and sale of women's textile fabric coats and other garments manufactured for and shipped to them by Henschel, Siegel and Angell, 5411 E. 62nd St., New York;

The complaint charges that the respondents, in connection with the offering for sale and sale of their textile fabric garments, refer to and designate such textile garments through use of the word 'Rosse' and by the trade names "Galykurl" and "BABELAMM", and advertise the garments by means of trade journals, window display cards and other advertising matter which describe and refer to the garments as "Persian," "Genuine BABELAMM," and "Persian Fur Fabrics," together with the word "Imported," and other words or phrases like import and meaning, accompanied by pictorial designs of sheep or part of sheep and showing a woman wearing a coat having the appearance of fur.

The respondents also, the complaint continues, attach to the textile fabric garments certain tags and labels, some of which bear upon their faces pictorial designs of sheep or lambs and the trade names "Galykurl" and "BABELAMM." These garments, the complaint continues, are constructed so as to have the appearance of silky, tightly-curved and highly prized fur of the young of the Karakul breed of sheep, and convey the impression and induce the belief from their appearance that they are in fact made of the peltries of "Persian" lambs, the young of such Karakul sheep, or are made from silky hair or wool of peltries coming from such lambs.

The respondents also, the complaint charges, by use of labels and tags and other advertising matter, have created the impression in the minds of purchasers and prospective purchasers that the garments are made in whole or in part from the peltries of the young of the Karakul breed of sheep or from the wool taken from such sheep, and that the materials of which they are made are imported from Persia.

In truth, the complaint alleges, the garments are made in the United States of fabrics composed of wool and cotton, or of rayon, wool and cotton. The labels, tags and other advertising material employed by the respondents, the complaint continues, to describe, describe or refer to their products, do not disclose or indicate the presence of rayon or cotton in the garments, and the respondents, by furnishing such deceptive and misleading labels and tags and other advertising material to customers, and causing such labels and tags to be placed upon the garments for resale to the purchasing public, have placed in the hands of retail dealers a means and instrumentality whereby they might deceive or mislead members of the purchasing public. (4427).

Snap-On-Tools Corporation, Kenosha, Wis., engaged in the manufacture and distribution of tools, is charged, in a complaint with the use of lottery methods in the sale and distribution of its products.

In the conduct of its business, the complaint charges, the respondent corporation, in connection with the sale of its products, has sold its products to members of the public in accordance with a sales plan involving a game of chance, gift enterprise or lottery scheme, and has supplied the managers of its branch offices with sales posters and circular letters outlining the sales plans or methods by which its merchandise was to be and has been sold and distributed to the purchasing public. (4429).

Worthmore Sales Promotion Service, Inc., 221 East 20th St., Chicago, engaged in the manufacture and sale of a device

January 3, 1941 — 21
called "Rap-A-Pak," a novelty holder for cigarette packages, is charged, in a complaint with misrepresentation.

In magazines and periodicals having an interstate circulation, the complaint alleges, and to potential representatives, the respondent has represented that "A man should make $75 to $100 per commission weekly," and "Earn $75 to $100 commission weekly." Through use of the foregoing statements and others of similar import, the complaint continues, the respondent represented that agents and salesmen selling the respondent's device customarily earn from $75 to $100 per week in the usual and normal course of business.

The complaint alleges that these representations are grossly exaggerated, false and misleading, and that it is impossible for agents and salesmen selling the device to earn, in the usual and normal course of business, $75 to $100 per week or any amount approximate either of such figures. (4430)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Alfred Brothers Candy Company—Two North Carolina candy distributors have been served with orders directing them to cease and desist from the use of lottery methods in the sale of candy. The respondents are Jesse W. and Robert A. Alfred, trading as Alfred Brothers Candy Co., Charlotte, N. C.; and J. T. Tarlton, trading as J. T. Tarlton Candy Co., Marshallville, N. C.

The orders prohibit the respondents from selling or distributing any merchandise so packed and assembled that its sale to the public may be made by means of a lottery: from supplying others with assortments of merchandise, together with push or pull cards, punch boards or other lottery devices, or separately, which devices may be used in selling or distributing such merchandise to the public by means of a game of chance; and from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme. (4244-4256)

Augusta Knitting Corporation, manufacturer and distributor of knit garments, with its place of business in Utica, N. Y., and sales office at 180 Madison Ave., New York, has been ordered to cease and desist from certain misrepresentations concerning its products.

The Commission finds that the respondent has falsely represented the constituent fiber or material of which the various products sold and distributed are made, by means of false representations on labels attached to its products. Typical of such acts and practices, the Commission finds, is that the respondent represents that certain ladies' knit undergarments manufactured and distributed by it are composed entirely of silk and wool, by means of labels, tags and markers attached to the garments which designate and describe the products. One of such labels reads:

"50% SILK AND WOOL"

Another label reads:

"50% SILK AND WOOL 27% 27%"

The word and" on the above labels is printed in minute type and in such a manner as to be illegible to all practical intents and purposes. On the second label, beneath the words "silk and wool," in much smaller type than the "50%" appearing above the words "silk and wool." By means of the above labels, the Commission finds, the purchasing public are misled into believing that the undergarments so labeled are composed entirely of silk and wool, but contain a cotton content ranging from 45 per cent to 57 per cent.

In fact, the Commission finds that the knitted undergarments so labeled are not composed entirely of silk and wool, but contain a cotton content ranging from 45 per cent to 57 per cent.

In addition, the Commission finds, the respondent fails to disclose by appropriate labels all the fiber constituents from which its garments are made, and fails to disclose the existence of cotton as a substantial constituent of the garments.

The respondent is ordered to cease and desist from representing, in any manner or by any means, that its products are composed of fibers or materials other than those of which such products are actually composed; from using the term "silk" or the term "wool" or any other terms indicative of, either silk or wool to describe or designate any fabric or product which is not composed entirely of silk or entirely of wool, provided that in the case of a fabric or product composed in part of silk or wool in part of materials other than silk or wool, such terms or similar terms may be used as a descriptive of the silk or wool content, as the case may be, when immediately accompanied by a word or words accurately describing and designating each constituent fiber or material thereof in letters of equal size or conspicuousness in the order of its predominating weight, beginning with the largest single constituent.

The order further directs the respondent to cease representing in any manner or by any means that the fabrics or products offered for sale or sold by the respondent contain wool or silk in greater quantity or percentage than is actually the case and to discontinue representing that the respondents' products have longer wearing qualities than garments of equivalent price and quality ordinarily and customarily sold in the usual course of business; or that the quality, grade, material or character of the respondent's products are superior to or different from the actual quality, grade, material or character of such products. (4162)

Minetree Brokerage Company—T. A. Ward, Carr Ward and Wilma Ward, trading as Minetree Brokerage Company, Poplar Bluff, Mo., have been ordered to cease and desist from violation of the brokerage provision of the Robinson-Patman Act in the sale of merchandise, particularly foodstuffs.

Commission findings are that the Poplar Bluff Wholesale Grocery Company, Poplar Bluff, Mo., in which the respondents, T. A. and Wilma Ward own 88 per cent of the outstanding capital stock and of which they are officers, places orders for a substantial portion of its merchandise requirements, particularly foodstuffs, with sellers through the respondent brokerage firm of T. A. Ward, Wilma Ward and Carr Ward, trading as Minetree Brokerage Company.

Sellers delivering the goods ordered by Poplar Bluff Wholesale Grocery Company, the findings continue, transmit and pay to the respondent brokerage firm substantial brokerage fees or commissions averaging at a certain percentage, usually from 2 1/2 to 5 per cent, of the sales price of the grocery company's purchases. In all of these transactions, the findings continue, the respondents have acted for and on behalf of the Poplar Bluff Wholesale Grocery Company.

The Commission order directs the respondents, individually and trading under the firm name of Minetree Brokerage Company, to cease and desist from accepting or receiving from sellers, directly or indirectly, in connection with the purchase of commodities in interstate commerce, brokerage, in whatever manner or form they may be offered, paid or transmitted by sellers on purchases of commodities in interstate commerce by the Poplar Bluff Wholesale Grocery Company.

The Commission order directs the respondents, individually and trading under the firm name of Minetree Brokerage Company, to cease and desist from accepting or receiving from sellers, directly or indirectly, in connection with the purchase of commodities in interstate commerce, any brokers or commissions, or any allowance or discount in lieu of brokerage, in whatever manner or form they may be offered, allowed, granted, paid or transmitted.

The order also directs the respondents to cease and desist from accepting or receiving, directly or indirectly, any brokerage fees or commissions, or any allowance or discount in lieu of brokerage, in whatever manner or form they may be offered, allowed, granted, paid or transmitted by sellers on purchases of commodities in interstate commerce, by any person, partnership, firm or corporation where all or any of the respondents are subject to the direct or indirect control of such buyer or act for or in behalf of such buyer. (4285)

Patent Specialties Company—George W. Brenner and John M. Kurz, trading as Patent Specialties Company, 4020 Tenth Ave., New York, engaged in the manufacture and sale of two devices, the "Magic Wand Welder" and "Super Magic Wand Welder," intended for use in welding different kinds of metals, using electric current as the heating agency, have been ordered to cease and desist from certain misrepresentations of their products.

The Commission finds that in advertisements in trade publications and other media, the respondents represented that the Magic Wand welding device is a "genuine" heavy-duty device which, when connected with an ordinary automobile storage battery, will weld all base metals in any form, and that it is practical for such use in home tinkering and shop production, and that the respondents.
ents give each purchaser of the device a full kit of welding supplies "free" and as a gratuity. The Commission further finds that the respondents represented and implied that the "Super Magic Wand" device is a tool built in such a way as to be useful in heavy-duty welding, and particularly cylinder blocks and heavy parts of mechanical and farm machinery; that it will heat such metals to the extent that they will run so that a proper weld can be effected; that its construction is sturdy enough to withstand such hard use and the electric current necessary for such welding; that it is safe to operate on an ordinary AC or DC branch electric household circuit; that its operation will injure neither the operator nor the branch electric current to which it is attached, and that it is a safe and efficient device to use in obtaining a "sun tan" on the skin.

The respondents are ordered to cease and desist from representing, directly or by implication, that the "Magic Wand" welder is a heavy-duty welder which is of practical use in shop welding; that it will generate sufficient heat, when connected with an automobile storage battery, to prepare materials for welding; that the "Super Magic Wand" welder conforms to the standard method of design or construction for electrical devices, either as to the suitability of materials used or as to the proper guarding and spacing of "live" electrical parts; that it is a heavy-duty welder, or that it is useful in welding heavy mechanical and farm machinery, such as cylinder blocks; that the "Super Magic Wand" welder may be used on an ordinary AC or DC branch electrical household circuit without injury either to the operator of the welder or to the household circuit to which it is attached; that the "Super Magic Wand" welder may be used with safety and efficiency in "sun tanning" the skin, or that welding supplies offered regularly as part of a combination offer are free or a gift or gratuity. (4336)

**STIPULATIONS**

During the week the Commission has entered into the following stipulations:

**American Mattress Mfg. Company—Harry Malneck, trading as American Mattress Manufacturing Company, 1305 Larimer St., Denver, engaged in the manufacture and distribution of mattresses.**

The stipulation points out that in England there exists an outgrowth of the Guild System which requires that articles made of silver be submitted to Goldsmith Hall for assaying, and that articles found to be of the standard prescribed are stamped with hall-

**Already Farms Milling Company, 223 West Jackson Boulevard, Chicago, engaged in manufacturing various feed mixes for poultry, including a product known as "Wonder Live Milk Pellets."**

The respondent agrees to cease use of the term "Live Milk" as a trade name or designation for its products, and use of the words "Live Milk" or "Milk" in any way so as to imply that the products are composed of milk, that is, the fresh, clean, lactic secretion such as is obtained in the pure or native state from a milk-producing animal.

Under its stipulation, the respondent also agrees to desist from use of any statement or representation which implies that there are quantities of beneficial bacteria present in the respondent's products sufficiently large to have an observable effect or other effect otherwise than as a basis for the representation that putrefactive bacteria will cause all the dire consequences recited in certain advertising issued by the corporation, or that the presence of so-called beneficial bacteria will alleviate such conditions.

The respondent, according to the stipulation, advertised, among other things, that the presence of lactic acid and lactic acid producing bacteria in its products "prevent the development of putrefactive types of bacteria, which retards digestion, produces waste, develops poisonous putrefactive gases in the system, and retards all bodily functions . . . ." (3068)

**Cenol Company, Inc., 4250-56 North Crawford Ave., Chicago, engaged in selling two rat killing preparations designated "Cenol Squill Powder" and "Cenol Rat Destroyer," has stipulated to cease representing that "Cenol Squill Powder" will kill any species of mice except house mice, or that the effect of the barium carbonate content contained in "Cenol Rat Destroyer" will drive poisoned rats out of doors to die in the open. (02692)

The respondent agrees to desist from representing that "Cenol Rat Destroyer" will destroy any species of mice except house mice, or that the effect of the barium carbonate content is the same as that of the barium carbonate content in "Cenol Rat Destroyer" will drive poisoned rats out of doors to die in the open.

**Colorado Mattress Mfg. Company—Morris Stein and Morris Niemenberg, trading under the name Colorado Mattress Manufacturing Company, 2363 Larimer St., Denver, in connection with the labeling, tagging or other advertising of their products, agree to discontinue designating, describing or representing their products, which are made either in whole or in part of used or second-hand material, to be products made of or containing all new material; failing to clearly and unequivocally disclose that such products are composed, either in whole or in part, as the case may be, of used or second-hand material, and representing that the products are made in compliance with the laws of the State of Colorado, or of any other State, or that they or the materials used as filler therein have been subjected to a cleansing process so as to be free from dirt or other extraneous matter, when in fact the products are not so made as to conform to such laws and have not been cleaned as represents. (3006)

**Crown Silver Company, Inc., 62 Harvard St., Brookline, Mass., manufacturer of copies of reproductions of Sheffield silverware, has entered into a stipulation to cease and desist from certain representations in the sale of its products.**

The stipulation points out that there is an outgrowth of the Guild System which requires that articles made of silver be submitted to Goldsmith Hall for assaying, and that articles found to be of the standard prescribed are stamped with hall-

January 3, 1941 — 23
marks indicating the place and year of manufacture. The practice of using hall-marks in England dates back several centuries. These well-known and understood hall-marks, when impressed upon the silver, inform purchasers that the silverware is Old English and of ancient origin. Old English silverware and Sheffield plate that have been manufactured and imprinted with the genuine English hall-mark have for many years enjoyed widespread demand in the United States.

Crown Silver Company, Inc., in connection with the sale and distribution of silverware in commerce, agrees to cease and desist (1) from representing its product as "Hall-Marked" or causing to be used or aiding or abetting others to use upon or in connection with such silverware, an English hall-mark or any hall-mark, stamp, brand, label or other mark or device which simulates or imitates an English hall-mark, unless such silverware has been manufactured in England and has been submitted to Goldsmith's Hall of England and has met the standards prescribed thereby for use of the English hall-mark;

(2) from in any way using or causing to be used, or aiding or abetting others to use or cause to be used, upon or in connection with such silverware any mark, stamp, brand or other device which represents or indicates directly or by implication that such silverware has been manufactured in England or has been submitted to Goldsmith's Hall of England, or has met the tests or requirements prescribed by Goldsmith's Hall of England, or is silverware of a certain hall-mark, grade, quality, standard, design or manufacture, when such is not true in fact. (3005)

Fram Corporation, East Providence, R. I., engaged in selling a filter for the lubricating oil of internal combustion engines, designated "Fram Oil and Motor Cleaner," has stipulated to discontinue representing that by the use of the "Fram Oil and Motor Cleaner," motorists will be freed from all oil and mechanical motor trouble; that the product will double the possible length of service of an internal combustion engine, or that the possible length of service of such engine can be extended beyond any period not in accord with the facts, and that installation of a "Fram Oil and Motor Cleaner" will effect savings sufficient to equal its cost in instances where a motor is consuming excessive oil because of a need for mechanical repairs. (02684)

Gillespie Furniture Company, 3011 East Pico Boulevard, Los Angeles, a corporation engaged in the manufacture and sale of furniture, including mirrors, has stipulated that in connection with the advertisement, sale or distribution of its mirror products, it will cease using the words "copper plating on the back" as descriptive of the mirrors, and will cease using any other words of similar import, the effect of which tends to convey the impression that the mirrors are backed with genuine metallic copper applied by the electrolytic process, when in fact they are not so backed. (02684)

Lester Meyers, 112 East 17th St., New York, engaged in conducting an advertising agency which disseminated advertisements for a preparation designated "Lucone Herb Tonic" on behalf of Lucone, Inc., New York, has stipulated that he will cease and desist from representing, directly or indirectly, in future advertising, that the preparation is praised or recommended by eminent physicians and psychiatrists; that it strengthens the body; is beneficial for persons afflicted with fear, anxiety, restlessness, nervousness, failing physical processes and prevents chronic disorders. The respondent also agrees to cease otherwise representing that the preparation has any therapeutic value in the prevention of any ailment or disease; prevents fatigue; builds up the body; promotes formation of new blood, or is of any therapeutic value in the treatment thereof; strengthens the muscles, or promotes sleep; increases capacity for mental concentration; provides new reserves or imitates an English hall-mark, unless such silverware has been manufactured in England or is silverware of a certain hall-mark, grade, quality, standard, design or manufacture, when such is not true in fact. (3005)

Charles H. Lilly Co., Seattle, Wash., engaged in selling "Lilly's Dog Food," has entered into a stipulation in which it agrees to cease and desist from representing that its dog food is better than unskilled dog food; that it owns, operates or controls a laboratory; that its product prevents any skin disorder, aids in assimilating mineral matter, stimulates the glands, tones the digestive tract, or aids the luster or sleekness of the hair coat. (02690)

Newmark's Advertising Agency, Inc., 217 Seventh Ave., New York, which disseminated advertisements for a cosmetic product designated "Lucone Herb Tonic" on behalf of Lucone, Inc., New York, has agreed to cease and desist from disseminating any advertisements which represent, directly or by implication, that the product is an herb tonic, or from otherwise representing or implying that it is composed wholly of herbs, or from making any untrue statement regarding its composition; that the product contains no greasy substances; that it will promote, provide or assure a healthy or robust hair growth, or from otherwise representing or implying that it will cause hair to grow; that the product will prevent baldness, hair loss or dandruff, or will save hair or end falling or thinning hair or dandruff. (02693)

Rexbell Huntington Station—W. F. Hagel, doing business under the trade name Rexbell, Huntington Station, New York City, engaged in selling a preparation designated "French Love Drops," has stipulated to cease and desist from representing, by use of the word "French" as a part of the name of the product, that the product was manufactured or compounded in France, or by use of the word "exotic," as descriptive of the product, that the product was introduced from a foreign country. (02691)

Sears, Roebuck and Company, Chicago, in connection with the sale of electric fence controllers designated "Sears Thrifty," "Defance," "4 Star" and "Cross Country," has entered into a stipulation in which it agrees to discontinue representing that any electric fence controller offered for sale or sold by it has been approved by the Underwriters' Laboratories or any other laboratory, commission or authority, when such is not the fact; that any such controller has a value in excess of the current market price or has had a value in excess of the recent market price at which such controller was regularly sold; that an electric fence served by the respondent's controllers is "absolutely" safe; that purchasers can save more than half the cost of their electric fence controllers or any other sum in excess of the average difference in the current market prices of controllers of equal quality, efficiency and durability; that one or two wires will stop both large and small animals, including sheep and goats, or that an electric wire fence will assure protection of fields or crops. January 3, 1941 — 25
THE WEEK IN WASHINGTON

A C. E. Hooper, Inc., survey showed that the radio listening audience increased after the ASCAP music went off the air. Neville Miller said that the industry was "delighted with the way the radio stations all over the United States had been able to continue their excellent entertainment without ASCAP music." (p. 27)

The NAB-AAAA Conference Committee approved a new station facilities contract for the NAB to recommend to stations. Copies are included with this issue. (p. 28)

Another series of District meetings starts Monday, January 13, with a Sixth District meeting at Nashville. The NAB's Associate Membership campaign will get under way next week. Ed Kirby, NAB Public Relations Director, was appointed this week to the Army's General Staff where he will organize and administer a radio broadcasting division. Samuel J. Henry, Jr., resigned as Director of the Bureau of Radio Advertising. (pp. 29-30)

January 15 was the closing date for entries in the George Foster Peabody Radio Awards contest. Radio has placed 200,000 workers in National Defense jobs. (p. 31)

Senator Tobey has introduced a resolution to investigate the broadcasting industry and the FCC. (p. 31)

The Supreme Court held that an employer must reduce to the form of a written contract any agreement he reaches with a labor union at the union's request. (p. 33)

Neville Miller was elected chairman of the Domestic Broadcasting Committee of the Defense Communications Board. The FCC Budget Bureau estimates it will need $1,930,000 for national defense work during the next fiscal year. (p. 33)

A joint meeting of the NAB Executive Committee, the Board of Directors of Broadcast Music, Inc., and the Executive Committee of Independent Radio Net Work Affiliates was held in Washington, D. C., on January 7. At the close of the meeting Neville Miller issued the following statement:

"We had a general discussion of all phases of the music situation. Of course all of us were delighted with the way that radio stations all over the United States have been able to continue their excellent public entertainment without ASCAP music. In our opinion this means that radio has won its fight to break ASCAP's stranglehold on American music and creative talent."

BMI Developments

A special survey by C. E. Hooper, Inc., showed that the total audience listening to 21 programs was nearly five per cent greater on January 2, 3 and 4 than during the corresponding period in December. This was the answer to ASCAP's claim that the radio audience had decreased considerably since December 31.

Four out of the top fifteen sheet music best sellers throughout the nation for last week were BMI songs: There I Go, I Hear A Rhapsody, So You're The One, and I Give You My Word. In addition to these songs which are BMI's own publications, the number one song both among the sheet music best sellers in the nation and among the best selling records is Frenesi which is covered by the BMI license.

Stations, most of which have previously been pledged to BMI, have continued to swell the ranks of the BMI member stations. If any of the following have already been announced, we are still glad to welcome them twice. Here are the latest additions to BMI's family:

The Curtis Publishing Company, which maintains a large distributing organization to deal with news-stands, book-stores, and so forth, is about to launch a new make of phonograph records which will be sold on the news-stands. Known as Viking Records and manufactured by the Nu-Phonic Corporation, the new platters will be advertised under the slogan, “Two Hits—Two Bits.” Most, if not all, of the numbers recorded will probably be BMI tunes. The first two records to be offered for general sale will be played by Jack Teagarden’s orchestra. One will have Fresesi, as an instrumental, backed by Norman Weiser’s song, Here’s My Heart, with the vocal chorus by David Allen. The other record will have Ernest Gold’s Accidently On Purpose, with vocal chorus by Lynne Clark, backed by a new number from the Whitney-Kramer-Zaret combination—It All Comes Back To Me Now, with vocal chorus by David Allen.

It is expected that the first two records will be on the news-stands about February 5 and it is planned to release one record a week thereafter.

BMI is not only publishing house and licensing agency—it also does much of the work of a school. Otto Cesana, well-known teacher of theory and composition, one of whose pupils is Ernest Gold, has written BMI “as one teacher to another.” Mr. Cesana said: “I know that your method of paying your composers is what makes it possible for Ernest not only to support himself but to continue his studies as well. From working with him I know also that he profits greatly from his contact with your editors and from their comments and criticism... BMI’s attitude of taking a personal interest in the development of composers plus its plan of compensating them for the use of their material will do a great deal toward fostering the development of American composers who will some day produce the important, serious American music.”

Milton Rettenberg, chief of the editorial staff, hesitated to give publicity to this aspect of BMI’s work. He said, “If you tell what we’re doing in the way of working with young writers, you’ll have ten thousand swooping down on us and wanting interviews on their songs. Of course we can do it with only a few—the most promising one in a hundred maybe. But it’s worth while. There are so many of these kids with real talent who have never had a chance to study or if they have studied there’s still a flavor of the classroom and the exercise book in what they write. All they lack is a sort of professional polish and it is certainly true that we can help them in that way.”

Mr. Rettenberg, who might be said to head the BMI “faculty,” has a record of more than 3,500 radio performances as a pianist, has written the music for many radio shows, first became nationally famous when he took the late George Gershwin’s place as solo pianist with Paul Whiteman. The BMI board includes also Graham Harris, who has appeared as conductor with the New York Philharmonic, London Symphony, and other orchestras, and Arthur Gutman, whose compositions have been played by leading orchestras.

Sales

NAB RECOMMENDS NEW STATION FACILITIES CONTRACT

After meeting in New York last Monday, and jointly with the AAAA on Tuesday, the NAB-AAAA Conference Committee met again Tuesday evening and reported out unanimously a new station facilities contract for the NAB to recommend to stations. The committee’s action was taken pursuant to a resolution of the Executive Committee adopted December 5, 1940.

Although unable, after numerous conferences with the AAAA Committee, to reach agreement on several points, the NAB Committee reports that in its opinion the recommended contract is fair and equitable both to stations and to agencies and to advertisers. Both our Conference Committee and the Executive Committee have deemed it important that these recommendations be laid before stations at this time for their consideration. As directed by the Executive Committee, the NAB will upon request of member stations supply, free of charge, mats for the printing of the back of the contract.

The new contract, two copies of which are enclosed as...
a supplement to this issue of NAB Reports, is recommended to stations for use on new business. The committee has sought to recommend a contract that it believes is representative of the practices of the great majority of stations. It recognizes, however, that some of the recommended provisions may not be in accordance with the policy of some stations. Individual stations will, of course, make any changes necessary to adapt the contract to conform with their particular policies. It should be noted that the contract is so drawn as to be capable of use in selling time to a local advertiser as well as a recognized agency.

For convenience to all concerned it is suggested that all stations use size 8½” x 11” paper, and that the three copies be (1) white, (2) canary yellow, and (3) salmon pink.

Contracts submitted by agencies may be different from the NAB recommended contract. Stations should examine such contracts carefully to ascertain whether they conform to the recommended form, if station decides to adopt it.

Upon being advised of the committee’s action by Chairman Wilder, Neville Miller, in behalf of the membership, expressed his deep appreciation of the untiring efforts of the committee, the members of which have devoted an enormous amount of their time and energies to a difficult and tedious task.

Present at the joint meeting on the contract were: Ned Midgley, Batten, Barton, Durstine and Osborne, Chairman; C. T. Ayres, Ruthrauff and Ryan, Inc.; Carlos Franco, Young and Rubicam; William Fricke, AAAA; Fred Gamble, AAAA; John Hymes, Lord and Thomas; William Maileflet, Compton Adon, Inc.; and R. T. Turnbull, AAAA, of the AAAA Committee, and, Harry C. Wilder, WSYR, Chairman; R. L. Harlow, Yankee Network; Richard H. Mason, WPTF; Edward Petry, Edward Petry and Co., Inc.; Frank A. Seitz, WFAS; Dale Taylor, WENY; Lee B. Wailes, Westinghouse; and Paul F. Peter and Russell P. Place, NAB, of the NAB-AAAA Conference Committee.

The full NAB Committee was also in attendance at the Monday meeting and the Tuesday evening meeting.

The committee is still considering an invoice form. Considerable progress was made at the Tuesday meeting and definite recommendations will probably be reported by the end of this month.

Present at the joint meeting on the invoice were the members of the NAB Committee above-named and the following members of the AAAA Fiscal Committee: Mr. Bell, Ruthrauff and Ryan, Inc.; Mr. Beurmann, Campbell-Ewald; Mr. W. A. Fricke, AAAA; Mr. Fred Gamble, AAAA; Mr. R. T. Turnbull, AAAA; Mr. Van Utt, Erwin-Wasey; and, Mr. Vasoll, Kenyon and Eckhardt.

HIGHLIGHTS OF RECOMMENDED CONTRACT

Face of Contract:

The instrument is a contract and not an order. It should be signed in duplicate by both parties and doubtless a third copy will be found useful. If the contract is made with an advertiser, all references in the contract to agency apply to advertiser.

Back of Contract:

The “Conditions of Contract” on the back are part of the contract. The following highlights should be noted:

2. TERMINATION. Twenty-eight days of broadcasting is contracted for before termination can become operative; after fourteen days broadcasting, termination may be effected on fourteen days written notice.

3. INABILITY TO BROADCAST. Station is liable only for pro rata reduction in time charges irrespective of whether commercials are omitted or interrupted.

5. RATES. This is the portion of the contract that some stations may find not adapted to their use under their rate policies; it should be carefully studied. It is believed by the committee to represent the policies of the great majority of stations, and to be self-explanatory.

7. INDEMNITY. Station indemnifies for station material. Station material consists of (1) all material used in programs furnished by station except material furnished by agency in connection with such programs, and (2) copyrighted musical compositions performed under the BMI license. (This applies to such BMI material whether in live talent programs or on transcriptions. Station is in turn indemnified by BMI and has the benefit of the insurance policy taken out by BMI. The BMI license itself also runs in favor of agencies and advertisers.) Everything else is “agency material” as to which agency indemnifies station.

SALES PROMOTION CALENDAR

The sales promotion calendar issued annually by the National Retail Dry Goods Association can be obtained through the NAB Bureau of Radio Advertising at $2.50 a copy. The calendar lists all the important anniversaries, “weeks,” etc., useful for both programming and selling.

NAB

DISTRICT MEETINGS SCHEDULED

A continuation of the series of District meetings which took place prior to the first of the year will get under way next Monday, January 13, with a meeting of the broadcasters of Tennessee, Arkansas, Louisiana and Mississippi. Director Edwin W. Craig, WSM, of the Sixth NAB District, has invited all broadcasters, regardless of membership in NAB or BMI, to be on hand to review the music situation and to be brought up to date on other industry matters.

Ed Kirby, Public Relations Director of NAB, will discuss general industry problems and Association activities, while Carl Haverlin, Stations Relations Manager of BMI, will deal with the music situation.

The next meeting in point of time is that of the Six-

January 10, 1941 — 29
teenth District to be held at the Ambassador Hotel in Los Angeles at 10:00 a.m., Friday, January 17. Director Harrison Hollivvay, KFI-KECA, has also invited all Southern California, Arizona and New Mexico broadcasters, regardless of membership in NAB or BMI, to participate. This meeting will be covered for NAB by C. E. Arney, Jr., Assistant to the President, and by Carl Haverlin of BMI.

These two then proceed to San Francisco for a meeting on Saturday, January 18, where Director Howard Lane, KFBK, has invited the Northern California, Nevada, and Hawaii broadcasters to meet at the St. Francis Hotel at noon. A District Director’s election will be held in connection with this meeting.

The next stop on the tour is at Portland, Oregon, where on Wednesday, January 22, C. W. Myers, KOIN-KALE, Seventeenth District Director, has summoned the broadcasters of Oregon, Washington, and Alaska. A District Director’s election will be held in connection with this meeting.

Following the Portland meeting, Haverlin and Arney proceed to Omaha, Nebraska, to assist Director John J. Gillin, Jr., of WOW in bringing to the broadcasters of Iowa, Missouri, and Nebraska, information with relation to developments in the music situation and other industry matters, on January 25.

Gene O’Fallon, KFEL, District 14 Director, has called a meeting for January 27 at Denver. Messrs. Arney and Haverlin will attend.

This concludes the present setup for District meetings. When this tour is completed all but two of the NAB Districts will have been covered since the Board’s meeting in New York on December 6. Directors in these two remaining Districts are expected to call meetings early in February.

ASSOCIATE MEMBERSHIP CAMPAIGN

On next Wednesday, the first release to prospective Associate Members, under the new plan adopted by the Board, will be sent out from headquarters. Those to whom an invitation to become Associate members will be sent are: station representatives, broadcasting equipment companies, market research organizations, transcription companies, news services, and telephone companies and telegraph companies.

NAB members can materially assist in making this campaign a success by supplementing the invitation from headquarters with a personal invitation to those with whom they directly transact business.

If every member would write to his station representative and urge him to take out Associate Membership in NAB, we have no doubt but that it would do some good. Do the same thing to transcription companies, to those from whom you buy your equipment, to the news service which you are using, and the market research organizations.

Let us also remind you so you can pass the word along, that only Associate Members are going to be permitted to exhibit or maintain reception headquarters in the hotel where the NAB convention is held. Theirs will be official exhibits. The cooperation of members is urged.

KIRBY TO WAR DEPARTMENT

With the approval of the President, Secretary of War Henry L. Stimson last Tuesday appointed Ed Kirby, NAB Director of Public Relations, to a post on the General Staff of the Army where he will organize and administer a radio broadcasting division. Kirby will act as industry liaison between the industry and the War Department. He will serve as a “dollar a year man,” having been given an indefinite leave of absence by the NAB Board at the request of the War Department. It is expected that he will assume his new duties in about two weeks.

HENRY RESIGNS

Samuel J. Henry, Jr., has resigned as director of the NAB Bureau of Radio Advertising. Following are his letter of resignation and Neville Miller’s reply:

Mr. Neville Miller
National Association of Broadcasters
Washington, D. C.

DEAR MR. MILLER:

Please accept my resignation as director of the NAB Bureau of Radio Advertising, to become effective February 1, 1941.

It is with genuine regret that I leave the staff of the National Association of Broadcasters, with whom I have been privileged to work for some time. The associations which I have enjoyed here in Washington have been most pleasant, and it is my sincere hope that my future radio and advertising work will provide frequent opportunity to keep those associations alive.

While I have made no definite decision relative to connections, I have several matters in mind and I should like to feel free to conduct negotiations that may involve an earlier leave-taking.

Please convey to the entire staff of NAB my warmest personal regards and appreciation of their many courtesies. With best wishes to you and yours for the New Year.

Sincerely,

Samuel J. Henry, Jr.

Mr. Neville Miller
National Association of Broadcasters
Washington, D. C.

Mr. Samuel J. Henry, Jr., January 2, 1941.

My DEAR SAM:

This is an acknowledgment of your letter of January 2, submitting your resignation as Director of the NAB Bureau of Radio Advertising, effective February 1.

I want to express to you my sincere appreciation for the energy and ability which you have devoted to the Bureau’s work during the year and one-half in which you have nursed it from its infancy to its present respectable standing.

I sincerely hope that some of the prospects about which you told me develop satisfactorily and that you make a connection which befits your capabilities. In this connection I want to assure you that if in order to avail yourself of such connection it is necessary for you to leave before the first of February, we shall be very pleased to cooperate with you in that regard.

I know that I voice the sentiment of the entire staff when I extend you every good wish for a successful future.

My kindest personal regards,

Sincerely,

Neville Miller.
Promotion

PEABODY AWARDS

January 15 is the closing date for entries in the George Foster Peabody Radio Awards contest, sponsored by The University of Georgia in cooperation with the National Association of Broadcasters.

The procedure as set forth in a recent University bulletin, is as follows:

"Nominations of candidates for these awards shall be made in writing to the Dean of the Henry W. Grady School of Journalism, The University of Georgia, Athens, Georgia. Each nomination must be accompanied by complete and self-evident data setting forth clearly the claim to consideration of one of these awards. Program subjects, program outlines, program transcripts, recordings, letters and other pertinent data should be so presented as to comprise an exhibit which will be a faithful record of the station's particular contribution to public service offered for consideration in this connection.

"Competition for one of these awards will be limited to work done during the calendar year ending December 31 next preceding. The first award will be made in 1941, based on public service programs of 1940."

There are to be separate awards for small, medium-sized, and large stations, and for chain broadcasts.

Awards will be made at a date and place to be announced later, upon the recommendations of the Advisory Board, membership of which consists of:

Dr. S. V. Sanford, Chancellor, University System of Georgia, ex-officio.

Bruce Barton, President, Batten, Barton, Durstine, and Osborne, Advertising, New York City.

John H. Benson, President, American Association of Advertising Agencies, New York City.

Virginius Dabney, Editor, Richmond (Va.) Times-Dispatch.

Norman H. Davis, Chairman, American Red Cross, formerly Acting Secretary of State, etc., Washington, D. C.

Jonathan Daniels, Editor, Raleigh (N. C.) News and Observer.

Mark F. Ethridge, Vice President and General Manager, Louisville (Ky.) Courier-Journal and Times.

Alfred A. Knopf, Publisher, New York City.

Dr. John W. Studebaker, United States Commissioner of Education and Chairman, Federal Radio Education Committee, Washington, D. C.

Mr. and Mrs. Norman PI. Davis, Chairman, American Red Cross, formerly Acting Secretary of State, etc., Washington, D. C.

Miss Grace Moore, Metropolitan Opera Singer, New York City.

RADIO FILLS 200,000 JOBS

Up to January 1, 1941, through the help of radio, over 200,000 workers have been placed in National Defense jobs in the War Department and in the Navy Department.

"It's almost fantastic," an official declared, "to think that the broadcasting stations have been able to locate so many tens of thousands of qualified workers in less than six months time when, previously, they could not be found."

When broadcasters started to recruit workers, on July 24, 1940 doubt was expressed in some quarters that radio would prove equal to the job. But the skeptics were neither broadcasters nor Civil Service people.

Station executives from one end of this country to the other got behind the industry's own National Defense promotion from the word go. And so far they have been able to keep up with requirements.

Believing that broadcasters would be interested in learning exactly what these 200,000 workers are producing, Civil Service was queried. This is a partial list: naval guns—all sizes; small arms; torpedoes; other munitions of all kinds; armor plate; engines; tools; optical instruments; tanks; fighting ships; other defense ships; airplanes; airplane engines, and airplane instruments.

Monitoring officers and radio operators have also been secured. Inspectors of every kind have been put to work as have engineers for the procurement of materials.

WOW CLAIMS REMOTE RECORD

WOW, Omaha, is latest claimant for single station, long distance, remote control pick-up. Claim submitted by Bill Wiseman, publicity manager, is based on station's recent series of pick-ups from the Pacific Coast. Says Mr. Wiseman:

"I note in NAB Reports of December 13 some claims for honors for long-distance remote control broadcasts. WOW has both of these claims put to shame! "On January 6 a four-man WOW special events crew returned from a 5,000-mile automobile trip, on which it broadcast from Phoenix, Hollywood, Pasadena, Los Angeles, San Francisco, and several in-between points. "The expedition was sent out in connection with the University of Nebraska football team's appearance in the Rose Bowl. Included in the group were Foster May, news and special events editor, and Tom Dailey, sports editor."

Legislation

TOBNEY ASKS INVESTIGATION

Senator Tobey (R—N H) has introduced a sweeping resolution (S.R. 20) to investigate both the broadcasting industry and the FCC. We print it in full below. Representative Wigglesworth (R—Mass) has introduced a resolution for an investigation similar to the one introduced by him in the last Congress; a printed copy is not available as we go to press.
Mr. TOBEY submitted the following resolution; which was referred to the Committee on Interstate Commerce

RESOLUTION

Resolved, That the committee on Interstate Commerce, or any duly authorized subcommittee thereof, is authorized and directed to make a full and complete investigation with respect to (1) the existence, extent, formation, legality, and effect upon the public or any individual or group, of any monopoly in radio broadcasting or any phase thereof or in the production, sale, or distribution of radio-receiving or broadcasting apparatus; (2) the administration by the Federal Communications Commission of those provisions of the Communications Act of 1934, as amended, which relate in any manner to radio communication; (3) the manner of exercise by licensees of the Federal Communications Commission of the privileges conferred upon them by their licenses from the Federal Communications Commission; (4) the effect upon the public interest of any contract pertaining to radio to which any such licensee, broadcasting network, or any person, company, or corporation, engaged in any business relating to radio, or by any attorney, agent, or representative of any such licensee, network, person, company, or corporation to unduly influence any public official in the exercise of his duties with respect to any matter pertaining to radio. The committee shall report to the Senate, at the earliest practicable date, the results of its investigation, together with its recommendations, if any, for necessary legislation.

For the purposes of this resolution, the committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings, to sit and act at such times and places during the session and adjourned periods of the Seventy-seventh and succeeding Congresses, to employ such clerical and other assistants, to require by subpoena or otherwise the attendance of such witnesses and the production of such correspondence, books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of the committee, which shall not exceed $25,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.

COLORADO "ANTI-ASCAP" BILL

A so-called "anti-ASCAP" bill, similar to those previously introduced in other states, has just been introduced in the Colorado Legislature. The NAB Board of Directors went on record last December as opposed to the encouragement or support of legislation of this character.

FEDERAL LEGISLATION

HOUSE

H. R. 133 (CULKIN, R., N. Y.) LIQUOR ADVERTISING—To amend the Communications Act of 1934 to prohibit the advertising of alcoholic beverages by radio. Referred to Committee on Interstate and Foreign Commerce.

H. R. 125 (CULKIN, R., N. Y.) LIQUOR ADVERTISING—To prohibit the advertising of alcoholic beverages by radio, and for other purposes. Referred to Committee on Interstate and Foreign Commerce.

H. R. 126 (CULKIN, R., N. Y.) LIQUOR ADVERTISING—To prohibit the transportation in interstate commerce of advertisements of intoxicating liquors, and for other purposes. Referred to Committee on Interstate and Foreign Commerce.

H. R. 132 (CULKIN, R., N. Y.) LIQUOR ADVERTISING—To prohibit the transportation in interstate commerce of advertisements of alcoholic beverages, and for other purposes. Referred to Committee on Interstate and Foreign Commerce.

H. R. 983 (BEANS, D., Va.) COMMUNICATIONS ACT—To amend section 4 (1) of the Communications Act of 1934, as amended, to provide for extra compensation for overtime of inspectors in charge and radio inspectors of the Field Division of the Engineering Department of the Federal Communications Commission.

H. R. 999 (PETTENOE, D., Fla.) COMMUNICATIONS ACT—To amend the Communications Act of 1934 so as to prevent monopolies and to prohibit excessive duplication of broadcast programs in any area. Referred to Committee on Interstate and Foreign Commerce.

H. R. 1082 (DITTER, R., Penna.) COMMUNICATIONS ACT—To amend the Communications Act of 1934 in order to preserve and protect liberty of expression in radio communication. Referred to Committee on Interstate and Foreign Commerce.

HOUSE JOINT RESOLUTION

H. J. Res. 32 (DITTER, R., Penna.) COPYRIGHT—To define the principle of international reciprocity in the protection of American patents, trade-marks, secret formulas and processes, and copyrights by providing a method for assuring the payments of amounts due in the United States from users thereof in countries restricting international payments from their territories. Referred to Committee on Patents.

SENATE

S. 157 (CAPPER, R., Kansas) LIQUOR ADVERTISING—To prohibit the transportation in interstate commerce of advertisements of alcoholic beverages, and for other purposes. Referred to Committee on Interstate Commerce.

SENATE RESOLUTION

S. Res. 20 (TOBEY, R., N. H.) MONOPOLIES—Authorizing the Committee on Interstate Commerce to investigate possible monopolies in radio broadcasting, equipment, and communication. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

COLORADO:

H. 17 (CROWLEY, E. A.) COPYRIGHT REGULATIONS—To remove monopolistic abuses wrongfully practiced under copyrights in copyrighted musical compositions and dramatic-musical compositions, providing for licensing of the same, and levying a tax on the gross receipts from licensing of such rights. Referred to Committee on Constitutional Law.

H. 193 (SULLIVAN) RADIO NEWS GATHERER—Making it a crime to interfere with any news photographer reporter, or radio news gatherer or commentator or reporter, in the exercise of his calling. Referred to Committee on Constitutional Law.

H. 109 (SULLIVAN) RADIO AND TELEVISION—To create and protect the right of confidence in the profession of journalism, radio and television. Referred to Committee on Constitutional Law.

H. 307 (REP. CAMERON) PUBLISHED LIBELLOUS STATEMENTS—Making writers of published libelous statements civilly and criminally liable therefor. Referred to Committee on Constitutional Law.

H. 324 (RICHARD J. HATCHFIELD) COPYRIGHT—In aid of federal copyright laws. Referred to Committee on Constitutional Law.

STATE LEGISLATION REPRESENTATIVES

The persons whose names are listed below have been designated by the Directors of their respective Districts
to keep NAB informed of the introduction in state legislatures of any legislation affecting broadcasting. They will serve as a clearing-house for information obtained from broadcasters in their states and any other sources. The legislatures of 44 states will be in session this year.

Labor

WRITTEN CONTRACTS

The Supreme Court held this week that an employer must reduce to the form of a written contract any agreement he reaches with a labor union, at the union's request. "A business man who entered into negotiations with another (business man) for an agreement having numerous provisions, with the reservation that he would not reduce it to writing or sign it, could hardly be thought to have bargained in good faith," Mr. Justice Stone wrote. However, the court pointed out that the Wagner Act "while requiring the employer to bargain collectively, does not compel him to enter into an agreement." (H. J. Heinz Company v. N.L.R.B.)

FEDERAL COMMUNICATIONS COMMISSION

MILLER ELECTED CHAIRMAN OF DEFENSE COMMITTEE

Neville Miller, was elected chairman of the domestic broadcasting committee of the Defense Communications Board at an organization meeting on Monday. Andrew D. Ring of the FCC was elected secretary.

Complete list of officers elected by the various committees at Monday's meeting are as follows:

Industry Advisory Committee:
Mr. Walter S. Gifford, Chairman
(American Telephone and Telegraph Co.)
Dr. C. B. Jolliffe, Secretary
(Radio Corporation of America)

Labor Advisory Committee:
Mr. Robert J. Watt, Chairman
(American Federation of Labor)
Mr. Paul E. Griffith, Secretary
(National Federation of Telephone Workers)
I. Amateur Radio Committee:
   Mr. George W. Bailey, Chairman
   (American Radio Relay League)
   Mr. E. M. Webster, Secretary
   (Federal Communications Commission)

II. Aviation Communications Committee:
   Mr. Paul Goldsborough, Chairman
   (Aeronautical Radio, Inc.)
   Mr. Ford Studebaker, Secretary
   (American Export Airlines, Inc.)

III. Cable Committee:
   Mr. C. Mills, Chairman
   (Mexican Telexgraph Co.)
   Mr. J. A. Kennedy, Secretary
   (Federal Communications Commission)

IV. Domestic Broadcasting Committee:
   Mr. Neville Miller, Chairman
   (National Association of Broadcasters)
   Mr. A. D. Ring, Secretary
   (Federal Communications Commission)

V. Interdepartment Radio Advisory Committee:
   Mr. E. K. Jett, Chairman
   (Federal Communications Commission)
   Dr. J. H. Dellinger, Vice Chairman
   (Department of Commerce, c/o Bureau of Standards)
   Mr. Gerald C. Gross, Secretary
   (Federal Communications Commission)
   Mr. P. F. Siling, Assistant Secretary
   (Federal Communications Commission)

Note: IRAC did not meet on January 6. The names are those of the regular officers.

VI. International Broadcasting Committee:
   Mr. Walter Evans, Chairman
   (Westinghouse Electric & Mfg. Co.)
   Mr. P. F. Siling, Secretary
   (Federal Communications Commission)

VII. Radiocommunications Committee:
   Mr. E. M. Webster, Chairman
   (Federal Communications Commission)
   Mr. F. M. Ryan, Secretary
   (American Telephone & Telegraph Co.)

VIII. State and Municipal Facilities Committee:
   Capt. Donald S. Leonard, Chairman
   (International Association of Chiefs of Police)
   Mr. E. L. White, Secretary
   (Federal Communications Commission)

IX. Telegraph Committee:
   Mr. E. R. Shute, Chairman
   (Western Union Telegraph Company)
   Mr. W. J. Norfleet, Secretary
   (Federal Communications Commission)

X. Telephone Committee:
   Mr. Z. Z. Hugus, Chairman
   (American Telephone & Telegraph Co.)
   Mr. Clyde S. Bailey, Secretary
   (U. S. Independent Telephone Assn.)

XI. United States Government Facilities Committee:
   Mr. A. G. Simson, Chairman
   (Department of Agriculture)
   Mr. T. L. Bartlett, Secretary
   (Federal Communications Commission)

**FCC DEFENSE FUND**

FCC Budget Bureau estimates for 1942 provide a lump-sum appropriation to carry out the national defense program, which was begun the latter part of the year with $1,600,000 allocated by the President from the emergency fund given him. The bureau approved an appropriation of $1,930,000, an increase of $320,000, to carry on this work during the next fiscal year.

The fund is to be used to purchase land and equipment to establish monitoring stations in all parts of the country to guard the air waves from being used for subversive activities. The fund also is to be used for the employment of additional personnel, including radio inspectors and an attorney investigator, as well as the necessary clerical and administrative assistance.

The estimates also call for the use of 80 vehicles as mobile monitoring stations to be used in ferreting out unlicensed radio stations and stations alleged to be used in subversive activities. The cost of the operation of these vehicles is estimated at $7,000.

**882 STATIONS**

During the month of December, 1940, the Federal Communications Commission issued operating licenses to six stations and granted construction permits to six stations. A comparative table by months follows:

**WMCA DECISION**

FCC has dismissed a petition filed December 23, requesting it to reconsider its action of December 17, giving consent to a transfer of control of the Knickerbocker Broadcasting Company, Inc., licensee of Station WMCA, New York City, from Donald J. Flamm, to Edward J. Noble.

The decision and order of the Commission on petition to reconsider, with Commissioner Craven not participating:

This is a petition filed December 23, 1940, by Donald J. Flamm, New York City. It requests the Commission to reconsider its action of December 17, 1940, giving consent to a transfer of control of Knickerbocker Broadcasting Company, Inc., licensee of Radio Station WMCA, New York City, from Donald J. Flamm to Edward J. Noble, upon application filed December 2, 1940, by Donald J. Flamm, transferor, and Edward J. Noble, transferee, and upon such reconsideration, to dismiss the application.

In support of the petition it is alleged that the application for consent to transfer control of the Knickerbocker Broadcasting Company, Inc. (WMCA), through the transfer of all the stock from Donald J. Flamm to Edward J. Noble was filed December 2, 1940; that on December 14, 1940, petitioner's counsel received a letter from the Commission requesting further information, and stating that before action would be taken on the application it would be necessary to supply the Commission with such information; that on December 17, 1940, petitioner had prepared a petition to dismiss the application under Rule 1.73, "which was ready to be filed" when notice of the Commission's action of December 17, 1940, was received.

On December 30, 1940, Edward J. Noble, transferee, filed his answer to the petition filed by Donald J. Flamm, transferor.

Upon examination of the application filed December 2, 1940, by Donald J. Flamm, transferor, and Edward J. Noble, transferee, for consent to transfer control of the Knickerbocker Broad-
casting Company, Inc. (WMCA), it was found that full information was lacking, particularly as to the financial arrangements between the parties, the financial showing of the transferee, and the nature of an asset item in the licensee's balance sheet entitled “franchise”. On December 13, 1940, a request for additional information in regard to the transferee was made, and on December 14, 1940, the Commission received a response from the transferee to its inquiry of December 13, 1940.

Thereupon the application became available for action by the Commission, and upon consideration of the application and data submitted therewith by the transferor and transferee, the Commission, on December 17, 1940, found that the transferee was legally, technically, financially and otherwise qualified, and that the transfer requested was in the public interest. It, therefore, gave its consent to the transfer.

In so far as the instant petition requests a reconsideration of the action of the Commission granting consent, as applied for, to transfer of control of a licensee corporation, neither the Communications Act of 1934, as amended, nor any rule or regulation promulgated by the Commission pursuant to the Act either expressly or by implication makes provision for the filing by an applicant of a petition for reconsideration or rehearing following a grant of his own application as filed. Section 405 of the Communications Act of 1934 and Paragraph 1.271 of the Commission's Rules of Practice and Procedure provide for the filing of a petition for rehearing which may request reconsideration, hearing, or rehearing in any case wherein the Commission has entered a “person aggrieved or whose interest is adversely affected” by any decision, order, or requirement of the Commission. Petitioner has failed to make any showing that he is aggrieved or adversely affected by the action of the Commission taken pursuant to his request.

In so far as the petition requests a dismissal of the above-entitled application, petitioner's sole complaint appears to be that the Commission acted upon the merits of his application without awaiting a response from him as well as from the transferee to its communication of December 13, 1940, and while he was preparing to file a request for dismissal of the instant application. Petitioner does not claim that the information furnished by the transferee was in any way inadequate, improper or incorrect, nor does he allege that he had intended to furnish any additional information. On the contrary, it appears from his petition that his intentions were to ignore the Commission's request for information, and to petition the Commission to dismiss the application without giving any consideration whatever to its merits.

Petitioner's application was pending from December 2 to December 17, 1940, during which time he had ample opportunity to request a dismissal thereof pursuant to Paragraph 1.73 of the Commission's Rules. If petitioner found himself unable to have the necessary papers prepared formally requesting a dismissal of his application, he might have informally communicated his intentions to the Commission, and requested additional time within which formally to do so. In the absence of any contrary expression of intention by an applicant, the Commission necessarily presumes that the request contained in his application is a continuing one until such time as final action is taken thereon. Since the applicant in this case did not make his intentions known to the Commission prior to final action thereon, Rule 1.73 is no longer applicable. In view of the foregoing, we are of the opinion that the “Petition to Reconsider Action Approving Transfer of Control and to Dismiss Application in Accordance with Rule 1.73 of the Commission's Rules and Regulations” should be dismissed.

However, in accordance with our usual practice, we have examined the instant petition with particularity in order to determine whether it presents any matters upon which we should, on our own motion, take action. As heretofore indicated, after securing full information we found on December 17, 1940, that the transfer was legally, technically, financially, and otherwise qualified; that the transfer requested would serve the public interest, and gave our consent to the transfer. The petition for reconsideration does not allege that the transfer requested was in any way inadequate, improper or incorrect, nor does he allege that he had intended to furnish any additional information. On the contrary, it appears from his petition that his intentions were to ignore the Commission's request for information, and to petition the Commission to dismiss the application without giving any consideration whatever to its merits.

In connection with the request of the parties is not a mandatory order, but is a permissive consent to the proposal contained in the application. The petitioner, as transferor, was himself an applicant seeking our consent to that proposal. Our consent has been given, and the matter is now one of private contractual arrangements between the parties.

Accordingly, It Is Ordered, this 7th day of January, 1941, that the petition filed by Donald J. Flamm, transferor, “to reconsider action approving transfer of control and to dismiss application in accordance with Rule 1.73 of the Commission's Rules and Regulations” be, and It Is Hereby, DISMISSED.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following broadcast hearings are scheduled before the Commission during the week beginning, Monday, January 13. They are subject to change.

**Wednesday, January 15**

**WMJI—The Moody Bible Institute of Chicago, Chicago, Ill.—** Modification of license, 1080 kc., 5 kW, limited to WBT and KFAB. Present assignment: 1080 kc., 5 kW, limited to WBT, share WCBD.

**WAPI—Alabama Polytechnic Institute, University of Alabama and Alabama College (Board of Control), Birmingham, Ala. —** Renewal of license, 1140 kc., 5 kW night, 5 kW LS, simultaneous day KVOO, share KVOO night.

**Friday, January 17**

**WWL—Loyola University, New Orleans, La.—** Renewal of license, 500 kc., 50 KW night, 50 KW LS, specified hours.

**NEW—William H. Amesbury, Minneapolis, Minn.—** C. P., 630 kc., 1 KW night, 1 KW day, unlimited, DA night and day.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future broadcast hearings and oral arguments. They are subject to change.

**February 10**

**WGST—Georgia School of Technology, Atlanta, Ga.—** Renewal of license (main and auxiliary), 890 kc., 1 kw night, 5 kw LS, unlimited.

**February 13**

**Oral Argument Before the Commission**

Report No. B-115:

**WBAX—John H. Steger, Jr., Wilkes-Barre, Pa.—** Renewal of license, 1210 kc., 100 watts night, 100 watts LS, unlimited time.

**February 28**

**NEW—Park Cities Broadcasting Corp., Dallas, Tex.—** C. P., 940 kc., 500 watts, unlimited.

**KRBC—Reuter Broadcasting Co., Abilene, Tex.—** C. P., 940 kc., 1 KW, unlimited, DA night and day.

**TELEVISION BROADCAST**

**March 3**

**NEW—R. B. Eaton, Des Moines, Iowa.—** C. P., 66000-72900 kc., 46 watts night; 46 watts day—visual; 100 watts day—aural; unlimited.

**March 10**

**WARM—Union Broadcasting Company, Scranton, Pa.—** License to cover C. P., 1370 kc., 250 watts, unlimited.

January 10, 1941 — 35
APPLICATIONS GRANTED

Grenco, Inc., Greenwood, S. C.—Granted application for construction permit for new standard broadcast station to operate on 1450 kc., 250 watts power, unlimited time (B3-P-2930).

KFYR—Meyer Broadcasting Co., Bismarck, N. Dak.—Granted construction permit to install directional antenna for night use and increase night power from 1 kw to 5 kw; 550 kc., 5 kw LS, unlimited (B4-P-2576).

WJMC—Walter H. McGenty, Rice Lake, Wis.—Granted modification of license to change hours of operation from daytime only to unlimited, using 250 watts power day and night; frequency 1210 kc. (B4-ML-1025).

KDIY—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted construction permit to install directional antenna for both day and night use and increase night power from 1 kw to 5 kw; 550 kc LS; frequency 1250 kc., unlimited time (B5-P-2721).

KDTIH—Telegraph Herald, Dubuque, Iowa.—Granted modification of construction permit for new station (B4-P-960) for approval of transmitter site and directional antenna for night use; 1310 kc., 1 kw day and night, using directional antenna at night (B4-P-1096).

WKBI—WKBI, Inc., La Crosse, Wis.—Granted construction permit to increase power from 1 kw to 5 kw, move transmitter site from R. F. D, No. 1, LaCrosse, Wis., to Highway No. 33, Shelby Township, Wis., install new transmitter and directional antenna for night use; 1380 kc., unlimited (B4-P-2733).

Columbia Broadcasting System, Inc., New York City.—Granted construction permit for new high frequency (FM) broadcast station to operate on frequency 4870 kc., 8,500 square miles, 12,000,000 population (B1-PH-55).

DESIGNATED FOR HEARING

WXG—General Television Corp., Boston, Mass.—Construction permit for television station to install aerial transmitter and add 500 watts aural power and A3 emission to present authorization (B1-PVB-69).

WXG—General Television Corp., Boston, Mass.—Construction permit to change frequencies of television station to 5000-50000 kc. (B1-MLVB-14).

KMA—May Broadcasting Co., Shenandoah, Iowa.—Application for renewal of license; 930 kc., 1 kw night, 5 kw local service, unlimited time; designated for hearing because of alleged failure to file full information in connection with an application.

West Publishers, Inc., Houston, Tex.—Application for construction permit for new station to operate on 670 kc., 1 kw, directional antenna at night, unlimited (B5-P-2864).

MISCELLANEOUS

KAWN—A. W. Mills, Gallup, N. Mex.—Granted special temporary authority to remain silent for the period December 31, 1940, to January 29, 1941, during repairs necessitated by fire.

KMMJ—KMMJ, Inc., Grand Island, Neb.—Granted special temporary authority to operate until conclusion of Rose Bowl football game on January 1, in order to broadcast game in its entirety.

KGNO—Great Plains Broadcasting Co., North Platte, Neb.—Granted special temporary authority to operate from local sunset (January, 5:45 p.m., CST), to conclusion of Rose Bowl football game January 1st, in order to broadcast said game only.

KMA—May Morning Broadcasting Assn., Huntsville, Texas.—Granted extension of special temporary authority to remain silent for the period January 2 to February 1, 1941, pending Commission action on revocation order.

WLWO—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to operate the equipment of International Broadcast Station WLWO with power input to final stage of 100 kw, for a period not to exceed 30 days from January 1, 1941, in order to obtain data requested in connection with application for modification of license.

W2XBS—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate international broadcast station W2XBS with special emission in addition to A3 emission on Channel No. 1, in order to conduct experimental tests for National Television Standards Committee and NBC for the period January 1 to January 30, 1941.

WJDD—WJDD, Inc. Chicago, Ill.—Denied special temporary authority to operate from 8 to approximately 9:30 p.m., CST, December 31st and January 4, 18, 25, in order to broadcast basketball games.

W2XWG—National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to operate station W2XWG on 4870 kc., 1500 watts power, A4 and special emission, for the period January 1, 1941, to not later than March 1, 1941, pending final authorization and completion of construction of applicant's new high frequency broadcast station.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted petition for 30 days continuation of oral argument now set for January 9, 1941, in re application for renewal of license of Station WBAX (B2-R-378).

WTAL—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Granted motion for additional time of 60 days within which to submit proposed findings and conclusions in re application for renewal of license (B3-R-869).

William D. Hudson and Violet Hutton Hudson, Clarksville, Tenn.—Granted petition for order to take depositions in re hearing on application for construction permit for new station to operate on 1370 kc., 250 watts power, unlimited time (B3-P-2983).

Edward J. Doyle, Rochester, N. Y.—Granted petition for order to take depositions in re hearing on application for construction permit for new station to operate on 1340 kc., 1 kw, unlimited, directional antenna day and night (B1-P-2031).

Jamesstown Broadcasting Co., Inc., Jamestown, N. D.—Granted motion for continuance of 30 days of hearing now set for January 10, 1941, in re voluntary assignment of license of Station KRMC from Roberts Mac Nab Co. to Jamestown Broadcasting Co., Inc. (B4-AL-276).

KGIR—KGIR, Inc., West of Butte, Mont.—Denied petition to intervene in re hearing on application of The Dodge City Broadcasting Co., Inc., Dodge City, Kans. (KGNO), for modification of license to increase night power from 250 watts to 500 watts (B4-ML-998).

WCAM—City of Camden, N. J.—Granted motion to take depositions in re hearing on application for renewal of license of Station WCAM (B1-R-168).

WARM—Union Broadcasting Co., Scranton, Pa.—Granted motion to postpone to March 10, 1941, the hearing now set for January 8, 1941, in re application for license to cover construction permit to operate Station WARM on 1370 kc., 250 watts, unlimited (B2-L-1176).

WCHW—Arthur Fiske, Brooklyn, N. Y.—Granted special temporary authority to operate with power of 250 watts from 9 p.m. to 10 p.m. EST, January 6, 1941, in order to re-broadcast President Roosevelt's speech to greater area only.

WKBN—WKBN Broadcasting Co., Youngstown, Ohio.—Granted special temporary authority to operate simultaneously with Station WOSU from 2 p.m. to 3 p.m. EST, January 6, 1941, in order to broadcast President Roosevelt's address to opening session of Congress only.

KWJJ—KWJJ Broadcasting Co., Inc., Portland, Ore.—Denied special temporary authority to operate on 1010 kc., simultaneously with Stations WTIC and KLID from 7:15 to 9 p.m. PST, January 7, 8, 17, 21, 22, 24, and 31, 1941, and from 7:45 to 9 p.m. PST, January 10, 11, and 25, 1941, in order to rebroadcast series of intercollegiate basketball games, make announcements on station's own program and play sustaining music to start of games only.

KTRB—KTRB Broadcasting Co., Inc. Modesto, Calif.—Denied special temporary authority to operate January 3, 1941, from 8 p.m. PST. to conclusion of event—Modesto Junior College vs. Auburn Junior College basketball game; January 4, 1941, from 8 p.m. PST, to conclusion of event—Modesto.
Junior College vs. Visalia Junior College basketball game; January 18 from 7:30 p.m., PST, to conclusion of event—Modesto Junior College vs. University of California basketball game; January 24 from 7:30 p.m. to conclusion of event—Modesto Junior College vs. Marin Junior College basketball game; January 25 from 7:30 p.m. PST, to conclusion of event—Modesto Junior College vs. Santa Rosa Junior College basketball game; January 19 from 7:30 p.m., PST, to conclusion of event—Modesto Junior College Orchestra and A Capella Choir Recital, subject to condition that such programs are on sustaining basis only.

WWL—Loyola University, New Orleans, La.—Granted petition for reconsideration and grant of renewal of license for station WWL, cancelled hearing, and granted renewal of license to operate on 850 kc, 50 KW power, S.H. (KWKH).

Seaboard Broadcasting Corp., Tampa, Fla.—Denied petition for reconsideration and grant of renewal of license for station WWL, cancelled hearing, and granted renewal of license to operate on 850 kc, 50 KW power, S.H. (KWKH).

APPLICATIONS FILED AT FCC

KOA—National Broadcasting Co., Denver, Colo.—Denied petition to intervene in the hearing in re application of WIDH, and denied appeal of applicant, Matheson Radio Co., Inc., from the action of December 21, 1940, of Commissioner Craven presiding at the Motions Docket, extending the time for filing exceptions and requesting oral argument, and affirmed the action of the Commission. The Commission will receive briefs amici curiae from petitioners and others similarly situated within 20 days.

WMCA—Donald J. Flamm, New York City.—Denied petition filed on December 23, 1940, requesting the Commission to reconsider its action of December 17, 1940, giving consent to a transfer of control of Knickerbocker Broadcasting Company, Inc., licensee of station WMCA, New York City, from Donald J. Flamm to Edward J. Noble.

* * *

At the request of the Radio Committee of the Committee for the Celebration of the President's Birthday, the Commission suspended for the period 11 o'clock p.m. to 12 o'clock midnight, EST, January 25, 1941, the requirements of Section 3.92 of the Commission's Rules and Regulations with respect to station identification announcements applicable to all radiobroadcast stations carrying the "March of Dimes" program during said period.

APPLICATIONS FILED AT FCC

620 Kilocycles

KTAR—KTAR Broadcasting Co., Phoenix, Ariz.—License to cover construction permit (B5-P-2632) for a new transmitter, directional antenna day and night, increase in power, and move of transmitter.

KTAR—KTAR Broadcasting Co., Phoenix, Ariz.—Authority to determine operating power by direct measurement of antenna power.

740 Kilocycles

KMMJ—KMMJ, Inc., Grand Island, Nebr.—Authority to install automatic frequency control equipment.

880 Kilocycles

KX—Trumble Building Co., Oakland, Calif.—Authority to determine operating power by direct measurement of antenna power.

980 Kilocycles

KARK—Arkansas Radio and Equipment Co., Little Rock, Ark.—License to cover construction permit (B3-P-2570) for increase in night power.

KARK—Arkansas Radio and Equipment Co., Little Rock, Ark.—Authority to determine operating power by direct measurement of antenna power.

920 Kilocycles

WSPA—Spartanburg Advertising Co., Spartanburg, S. C.—Modification of construction permit (B1-P-2901) to install directional antennas for night use; change hours of operation from daytime to unlimited time, using power of 1 KW day and night; move transmitter, further requesting authority to install new transmitter, increase power from 1 KW to 1 KW, 5 KW local sunset, and move transmitter location from east side of Greenville Road and New Highway, 2.5 miles northwest of center of Spartanburg, Saxon Mills, S. C., to west side of County Home Farm Road, south of U. S. Route 176, near Lowe, S. C. Extend commencement date thirty days after grant and completion date 180 days thereafter. Amended to change type of requested transmitter.

WDAV—WDAV, Inc., Fargo, N. Dak.—Authority to determine operating power by direct measurement of antenna power.

WDAV—WDAV, Inc., Fargo, N. Dak.—License to cover construction permit (B4-P-2530) for increase in night power and installation of directional antenna for night use.

NEW—The Evening News Assn., Detroit, Mich.—Modification of construction permit (B2-PH-21) for approval of trans-
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

 Consolidated Book Publishers, Inc., Terminal Building, Chicago, engaged in publishing and selling an encyclopedia known as "Standard American Encyclopedia", and a dictionary called "Universal Dictionary of the English Language", is charged in the complaint that neither Oxford University nor any such educational institution sponsored or contributed in any way to the publication of the dictionary. (4440)

 De Forest's Training, Inc., 2533 North Ashland Ave., Chicago, conducting a vocational school in television, radio and motion picture sound equipment maintenance and manufacture, is charged in a complaint with misrepresentation. The complaint charges that in the conduct of its business and for the purpose of promoting the sale of its course of instruction, the respondent secures prospective students and purchasers of its course by means of circulars and sales literature distributed in commerce. In advertising matter supplied by the respondent and distributed by its agents, there appear, among others, the complaint charges, the following statements:

 "Sound, television, radio present world-wide opportunities. Television, a new branch of the Electronic field, is developing rapidly. After a man is trained the De Forest way, he is ready to enter the Electronic Industry and really go places. Our employment service is available to every enrolled no matter where he lives. Through this service we have helped scores of men obtain employment. Because we train our men well, manufacturers, dealers, and distributors are glad to consider our advanced students and graduates. What we have done for others we can do for you when you are properly trained. Start your preparation now so you can soon take advantage of our employment service."  (4441)

 The complaint charges that the respondent's representations are exaggerated, false and deceptive, and that the demand at the present time for men trained in the television field is not large enough to warrant the respondent's representations that graduates of the respondent's school may be readily placed in positions in the field. Moreover, the complaint continues, graduates of the respondent's school do not possess sufficient practical experience to qualify as skilled employees or craftsmen in the radio and television industry. (4441)

 Gly-Cas Medicine Company—Medora Whitney, individually and trading as Gly-Cas Medicine Company, and Robert B. Whin...
rey, an individual, Muncie, Ind., engaged in the sale and distribution of a medicinal preparation designated "Gly-Cas". Can be charged in a complaint with misrepresentation of their product.

The complaint charges that in advertisements disseminated in commerce the respondents have represented that the preparation is a cure or remedy for constipation, indigestion, gas bloated and sour stomach, rheumatic, and neuritis pains, sore and achings muscles, headaches, and other ailments therein named; that the disorders and conditions mentioned are typical symptoms of constipation or faulty elimination; that the existence of one or more of such symptoms indicates that constipation is the basic cause of such stipation or faulty elimination; that the respondents have represented temporarily relief afforded by causing a partial evacuation of the intestinal tract; that the disorders and conditions mentioned in advertisements disseminated by the respondents as typical symptoms of constipation or faulty elimination, but are often caused by other systemic disorders, and when so caused the use of the respondents' preparation will have no therapeutic effect.

Gordon Foods, Inc.—Alleging use of lottery methods in the sale of food products complaints have been issued against Gordon Foods, Inc., and H. W. Lay & Company, Inc., both of Atlanta.

The respondents, according to the complaint, sell to jobbers and retail dealers certain assortments of nuts so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes, when sold to the consuming public.

Charging that the respondents' practices have been of a sort which is contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondents 20 days for filing answer. (4438-4439)

Haskellite Manufacturing Corporation, 208 West Washington St., Chicago, which operates a factory in Grand Rapids, Mich., where it manufactures, among other products, wooden serving and lap trays, together with products designated as "Hasko De Luxe Bufet Trays" is charged in a complaint with misrepresentation.

The complaint charges that the respondent, in offering its trays for sale through advertisements in newspapers and other media, has represented, among other things, that the "Hasko De Luxe Bufet Trays" are "Hardwood with simulated Walnut grained surface", "Made of attractive simulated Walnut grained hardwood"; and "Selected wood construction ... available in Walnut or Mexican Copomo grains".

Through these representations, the complaint charges, the respondent has represented that the trays are manufactured of hardwood, and are of selected wood construction, and that the surface of the trays is composed of hardwood material finished to simulate walnut or Mexican copomo grains. These representations, the complaint continues, are false, misleading, and deceptive, and the trays are composed of a core of poplar soft wood material covered with a surface of paper which has been processed and printed to resemble walnut or Mexican copomo wood grains in appearance. (4442)

The Commission at the same time dismissed without prejudice a previous complaint filed in February, 1940, alleging violation of the Federal Trade Commission Act. (4030)

The new complaint also charges the respondent with violation of the Federal Trade Commission Act through practices having a tendency to create monopoly and unreasonably restrain manufacturers of competitive products in disposing of their merchandise to jobbers and wholesale distributors of automotive parts and equipment.

It is alleged that the respondent company, in attempting to sell its products, either directly or on consignment, to jobber customers, as an inducement to prospective jobber customers to discontinue handling and stocking products of the respondent's competitors and to sell the respondent's products instead, engaged in various advertisements and agreements for taking over and buying up the stocks of competitive products in the hands of jobbers, making loans to jobber customers upon their terminating business relations with competitive manufacturers and taking over the respondent's line of products, and making misleading representations concerning the efficacy of its "Steel Vent" plating as compared with competitive products.

The new complaint alleges that in violation of the Robinson-Patman Act the respondent discriminates in price between purchasers buying its commodities of like grade and quality in interstate commerce, through granting to some of them concessions and monetary considerations which are not granted to other of its purchasers.

The complaint alleges that in consideration of their taking on the respondent's line, some of the respondent's customers, who have not previously purchased its products, are given cash gifts often ranging above $1,000, such donations not being granted to other of the respondent's customers.

In consideration of some customers taking on the respondent's line for the first time, the complaint continues, the respondent pays them for the products of the respondent's competitors then owned by such customers, the payments being substantially in excess of the value of the product. Other customers do not receive such payments, according to the complaint. (4437)

G. Krueger Brewing Company, Newark, N. J., engaged in brewing and distributing beer under the brand name "Ambassador Beer", is charged, in a complaint, with misrepresentation.

In advertisements disseminated in commerce, the complaint charges, the respondent has represented: A custom brewed beer for cultured taste, Ambassador is designed to meet the present day demand for a lighter, milder, more delicately flavored beer. Only the finest best barley malt and hops are used in brewing this distinctly different product.

Through use of these representations, the complaint continues, the respondent has represented that its product is composed wholly of barley malt and hops. In fact, the complaint continues, Ambassador Beer is not wholly composed of barley malt and hops, but includes corn and other grains or cereals. (4434)

Wire Rope & Strand Manufacturers Association, Inc., Washington, D. C., three of its officers, and 16 member companies manufacturing about 95 per cent of the country's production of wire rope, have been charged with monopolization and conspiracy to eliminate competition, in a complaint.

Wire rope varies in size from airplane control wires to suspension bridge cables. It is used in the operation of elevators, power shovels and other heavy pulling and lifting equipment.

Respondent officers of the association are: Harry A. Leschen, St. Louis, president; George S. Whyte, Kenosha, Wis., chairman of the board; and George P. Lamb, Washington, executive secretary.

Organized to meet the requirements of the National Industrial Recovery Act, the respondent association, according to the complaint, continued to function after that act was declared unconstitutional and is still in operation, the respondents Leschen, Whyte and Lamb controlling and directing its policies and activities.

The complaint alleges that to the extent that the respondent association members act colloquially and collectively in the pricing and
distribution of wire rope in the United States; they are in a position to dominate and control the prices at which this product must be purchased by distributors, dealers and users, including federal, State and municipal agencies.

Pursuant to their agreement, combination and conspiracy, the complaint alleges, the respondent association members, acting between and among themselves, or through the association or its three respondent officers, have fixed and maintained uniform delivered prices, terms and conditions for the sale of wire rope in the United States; continued, in effect, by agreement and concerted action a uniform, delivered price system for sales made from a single point or points to a common freight destination, according to the complaint.

The complaint further charges that pursuant to their agreement the respondent manufacturers have maintained a system of delivered prices which prevent the differences in the cost of freight delivery between their respective places of business and those of intended purchasers from creating any advantage or disadvantage to such purchasers in delivery costs. This system of identical delivered prices is based on so-called basing points whereby all delivered prices are calculated as though shipments within a given area were made from a single point or points to a common freight destination, according to the complaint.

Pursuant to their combination and agreement, the respondents, according to the complaint, divided the United States into basing point areas so that purchasers in each area get the same delivered price regardless of their distance from the manufacturer; required distributors of their products to resell them according to the respondents’ price formula; adopted a uniform basic and chain discount system; defined what constitutes a recognized distributor and filed with the association the names of their distributors, and included in a uniform contract entered into by all the respondent members with their respective distributors, a provision forbidding such distributors from selling any wire rope other than that made by the particular respondent member with whom the distributor had a distributing contract.

In order to carry out the agreements and the acts and practices performed thereunder, the respondents, according to the complaint, held meetings, supervised and investigated the fulfillment and enforcement of the agreements, and coerced required recalcitrant manufacturers, distributors and dealers to conform to the agreements.

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

**Colorado Bedding Company**—Four Denver, Colo., mattress and bedding manufacturers have entered into stipulations to cease and desist from certain representations in the sale of their products.

The respondents are: Colorado Bedding Company; Sam Moskin, trading as Mountain States Mattress Manufacturing Company; Kindell Bedding Company; and Abe D. Penn, trading as National Bedding Company.

Each respondent agrees to cease designating, describing, or representing its products which are made, either in whole or in part, of used or second-hand material, to be products made of or containing all new material, and each agrees to cease and desist from failing to clearly and unequivocally disclose that its products are composed, either in whole or in part, as the case may be, of used or second-hand material.

The Colorado Bedding Company also stipulates that it will cease representing that its products are made in compliance with the laws of Colorado or any other State, when in fact the products do not conform to such laws, and the Kindell Bedding Company agrees to cease representing that its products are made in compliance with the laws of Colorado or any other State, when in fact the products are not subjected to a sterilization process.

Sam Moskin, trading as Mountain States Mattress Manufacturing Company, and Abe D. Penn, trading as National Bedding Company, agree to discontinue the use on or in connection with their products of any false, fictitious or misleading representation which purports to be the retail sales price of the products but which, in fact, is in excess of the price for which such articles are customarily sold.

**Kindell Bedding Company**—See Colorado Bedding Company.

**Kramer-Brandes, Inc.**—159 Madison Ave., New York, engaged in the manufacture and sale of neckties and other men's wear, has entered into a stipulation in which it agrees to cease and desist from use of the word "llama", or the picturization of a llama, either alone or in connection with any other word or words, so as to imply to purchasers that its merchandise is composed either in whole or in substantial part of llama wool or hair.

**Mountain States Mattress Mfg. Company**—See Colorado Bedding Company.

**Na-Pa Chemical Company**—D. R. Sterrett and Margaret H. Sterrett, trading under the firm name of Na-Pa Chemical Company, 1108 South Broadway, Leavenworth, Kans., selling a drug product designated "Na-Pa Balm", have entered into a stipulation in which they agree to cease representing that the product is a competent treatment or an effective remedy for colds; that it will break up colds, or that it provides protection or insurance against colds, will aid in their prevention, or do more than afford temporary relief from the symptoms and discomforts associated therewith.

The respondents also agree to cease representing that the product is a competent treatment or effective remedy for colds, or that it will provide protection or insurance against colds, will aid in the prevention of muscular aches and minor ailments, or do more than afford temporary relief from the pains associated therewith; that the product penetrates; that it acts as a barrier to keep out cold germs, or that it is a competent treatment or an effective remedy for throat infections or sinus irritations, or will aid in preventing those conditions.

The respondents also agree that in making comparisons of the absorbing power of goose grease or any other ingredient contained in the product, they will state the ingredient with which comparison is made, and that no such comparison will be made unless the statements are actually a fact.

**National Bedding Company**—See Colorado Bedding Company.

**Sur-Rid Products Company**—Chas. Denn, trading as Sur-Rid Products Company, 455 Paul Brown Building, St. Louis, engaged in selling a rat killing preparation designated "Sur-Rid Rat Killer", has stipulated to discontinue representing that he tests every lot of the product, or that he guarantees the killing power of the product, and further agrees to cease and desist from using the term "Sur-Rid" or any other similar term or words as a part of the brand name of the product, or from otherwise representing or implying that it is sure in action or that its use will rid premises of rats.

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

**American Crayon Company, Sandusky, Ohio, and Binney and Smith Company, 41 East 42nd St., New York, manufacturers of crayons, chalk, paint sets, educational supplies and allied products, have been ordered to cease and desist from violations of the Robinson-Patman Act.**

Commission findings are that the respondents sell their products of like grade and quality to all customers at one list price from which they allow a 30 per cent trade discount to customers buying solely in case lots, and that they grant to some customers further varying discounts in addition to this trade discount.

The American Crayon Company, according to findings, grants in addition to the regular trade discount, discounts ranging from 5 to 10 per cent to some customers, and varying discounts ranging from 15 to 25 per cent to 10 plus 10 per cent on certain sizes of "Prang" tempera only.

Binney and Smith Company, according to findings, had allowed additional 5 and to some customers 10 per cent discounts over

January 10, 1941 — 41
Kongo Chemical Company, Inc., 66 East 131st St., New York, engaged in the manufacture and distribution of a cosmetic preparation known as "Kongolene," intended for use on the hair, has been ordered to cease and desist from certain misrepresentations.

In advertisements circulated through the United States mails and in interstate commerce, the Commission finds the respondent has represented that "Kongolene is a purely vegetable product. * * * will straighten the crimpiest kind of hair, stops it from falling out, promotes a luxuriant growth of healthy hair, removes dandruff and keeps the hair soft and glossy. * * * It will benefit you and your offspring, if you are handsome, they will be likewise—all of which representations, the findings continue, are exaggerated, false and misleading.

The respondent is ordered to cease and desist from disseminating advertisements which represent that the preparation is a purely vegetable product, will straighten the hair, promotes a luxuriant growth of healthy hair, removes dandruff and keeps the hair soft and glossy; that it will benefit you and your offspring, if you are handsome, they will be likewise—all of which representations, the findings continue, are exaggerated, false and misleading.

Hall & Ruelle, Inc., 241 37th St., Brooklyn, N. Y., engaged in the distribution of a depilatory designated "X-Bazin," has been ordered to cease and desist from misrepresentation of its product.

The Commission finds the respondent has represented in advertisements, among other things, that "The special formula of X-Bazin is really purely vegetable, and when the regrowth of hair does come, it is much softer and less conspicuous than before; the skin is left smooth, soft and white. * * * Don't Be An Airedale. In the merciless slang of Hollywood, a girl with hair on arms or less is an 'Airedale.' That's why film stars take hair off and keep it off with X-Bazin, the safe, efficient, and reliable hair remover. * * * No other process of removing unwanted hair so successfully combines ease and thoroughness with perfect safety."

The Commission finds that the representations made by the respondent with respect to the properties, nature and effect of its product when used are exaggerated, false and misleading, and that the product does not contribute to the straightening of the hair in any way other than by softening the hair temporarily; will prevent hair from falling out or promote the growth of hair; will cure or permanently remove dandruff; that the preparation is the greatest discovery of the age, or that the use of the preparation will benefit the offspring of the user; that the preparation is safe or harmless; or that which advertisement fails to reveal that use of the preparation may result in severe caustic action upon the skin and scalp, with resulting burns. (4193)

Philip Morris & Co., Ltd., Incorporated, New York, has been ordered to cease and desist from a number of representations in the sale of cigarettes in commerce.

Commission findings are that the respondent company, a Virginia corporation, through its wholly owned subsidiary, Philip Morris & Company, engaged in the manufacture and distribution of a cosmetic preparation known as "Kongolene," intended for use on the hair, has been ordered to cease and desist from using the phrase "Kongolene," in its corporate name as set forth on certain labels, as compared to that given the word "Incorporated" or its abbreviation, Inc, in the corporate name of the corporation; "Player's Navy Cut" cigarettes are made in England and that its "Player's Navy Cut" are the same cigarettes as those generally referred to as "London W" and "By Special Appointment.

The Commission further finds that the sale of the respondent corporation's American-made "Player's Navy Cut" cigarettes in a package closely resembling the package in which its English-made cigarettes of the same name are sold, has a tendency to engender the belief that they are of English manufacture, in the absence of an explicit disclosure of the actual country of manufacture.

The Commission finds that the phrase "Established over 80 Years" as used by the respondent is not without justification; that although a number of English and American corporate entities have intervened between Philip Morris, the founder, who conducted a tobacco business in London as early as 1846, and the respondent, there has been an unbroken continuity in the commercial life of the enterprise.

The Commission order directs Philip Morris & Co., Ltd., Incorporated, to cease and desist from using the phrase "London W" or any other similar wording in connection with the advertising or packaging of cigarettes not made in England, and from using the word "English" or similar words to refer to the shape or blend of cigarettes manufactured when the respondent is engaged in interstate commerce.

The order also directs the respondent to cease using any depic-
tion or simulation of the British Royal Arms or the words “Special Appointment” or “By special appointment,” and to desist from use of the word “Limited” or its abbreviation “Ltd.” as part of the respondent’s corporate name or in any other manner, unless the word “Limited” or its abbreviation “Ltd.” is used in letters of the same size and boldness as do “Limited” or “Ltd.”

The order directs the respondent to discontinue representing that it operates factories or warehouses in any place in which it does not operate them and to desist from using the name “Player’s Navy Cut” as a designation of any cigarette not made in England, unless in immediate connection with such name the country of manufacture is set forth in letters of the same size or conspicuousness as is the trade name “Player’s Navy Cut.”

### Premium Candy Company

Premium Candy Company—Two candy distributors in Fayetteville, N. C., and one in Vincennes, Ind., have been ordered to cease and desist from the use of lottery methods in the sale of candy. The respondents are Joe L. Thompson, trading as Premium Candy Company, and Harry Yates, trading as Cumberland Candy Company and Dixie Candy Company, both of Fayetteville, N. C., and Robert V. and Edward G. Bierhaus, trading as E. Bierhaus & Sons, Vincennes, Ind.

The orders prohibit the respondents from selling or distributing any merchandise so packed and assembled that its sale to the public may be made by means of a lottery; from supplying others with assortments of merchandise, together with push or pull cards, punch boards or other lottery devices, or separately, which devices may be used in selling or distributing such merchandise to the public; and from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme.

The respondents are ordered to cease and desist from false advertising in connection with the sale of such products.

The Commission finds that in advertisements in newspapers, periodicals and other media, the respondents have represented that “The Alcoholic treatment is the result of years of work and experimentation by physicians, and represents the scientific method of treating Alcoholism, as it was developed through the knowledge of medicinal science, and a comprehensive understanding of the cause of ‘drink’, and its results on the organs of the body.” Through these and other statements, the findings continue, the respondents have represented that the preparation is a competent and effective treatment for alcoholism; that it removes the desire for alcoholic stimulants, and that it is safe and harmless.

The preparation is not safe or harmless, according to the findings, as it contains certain drugs in quantities sufficient to cause serious injury to health if the preparation is used under the conditions prescribed in the advertisements or under such conditions as are customary or usual.

The respondents are ordered to cease and desist from disseminating advertisements which represent that the preparation is a competent or effective treatment for alcoholism; that it is safe or harmless; that the preparation removes the desire for alcoholic stimulants; or which advertisements fail to reveal that use of the preparation may result in serious injury to the nerves, tissues and lungs, and may produce toxic conditions in the body.

### Walton Training Bureau

Walton Training Bureau—Milton S. Long, trading as Walton Training Bureau, 121 Ellison St., Paterson, N. J., has been ordered to cease and desist from misrepresentations in the sale of correspondence courses intended to prepare students for United States Civil Service examinations.

Commission findings are that in advertising matter circulated in various States, the respondent has represented or implied that United States Government positions are immediately available; that the respondent can obtain positions for students; that examinations will be held frequently; and that the starting salaries are greater than they are in fact. The Commission further finds that these representations and other similar assertions made by the respondent are misleading. Among positions which have been advertised, according to the findings, are railway postal clerk, city mail carrier, post office clerk, and rural mail carrier.

The order directs the respondent to cease and desist from representing: that United States Government positions are immediately available; that he can obtain positions for students or has any control over, or is in a position to obtain, appointments to Federal Government positions; that Civil Service examinations will be held frequently; that the starting salaries for any position advertised are greater than they are in fact; and that he obtains from the United States Civil Service Commission information with respect to examinations being held which is not available to students.

### FTC CASE CLOSED

The Federal Trade Commission has closed a case against Zisblatt Furniture Company, Inc., trading as Grand Rapids Furniture Show Rooms, and Morris, Meyer, Sam and Lillian Zisblatt, and A. Maccia, formerly of 4132 Park Ave., New York, without prejudice to its right to resume proceedings, should future facts so warrant.

The respondents had been charged in a Commission complaint with the dissemination of misleading representations in the sale of household furniture. According to information received by the Commission, the respondent corporation has become bankrupt and is no longer engaged in business. Three of the individual respondents have no permanent residences or places of business and their present locations are unknown.
NAB Convention May 12-15 In St. Louis

The NAB convention this year will be held May 12-15 at the New Jefferson Hotel in St. Louis.

This centrally located spot, within easy access of every broadcaster in the country, was finally selected this week by a committee consisting of Howard Lane, KFBK; Clifford Chafey, WEEU, and Frank M. Russell, NBC. This committee was appointed and authorized to make a final decision by the Board of Directors at its last meeting. The Board had carefully considered every proposal advanced by members and others.

The date of the convention was advanced this year in answer to the sentiment expressed by a great many members that it should not conflict with vacation season or the start of the broadcast year.

The New Jefferson Hotel was found to be ideally equipped to handle the convention and arrangements had been made with Carl Roessler, General Manager, to provide every convenience to the delegates and their guests.

The St. Louis broadcasters presented a united front in supporting St. Louis' invitation, and they have pledged their whole-hearted cooperation in their capacity as hosts. Every sign indicates that this 1941 convention, centrally located as it will be, will mark a high point in attendance.

In subsequent issues of the NAB REPORTS, complete details of the plans of the convention will be given.

Meantime put those dates, May 12 to 15, on your calendar. They are going to be red letter days for the radio broadcasting industry.

THE WEEK IN WASHINGTON

The BMI Board will hold its regular January meeting in New York next Tuesday, January 21. BMI last week had the top three tunes of the ten best sellers on coin machines. (p. 46)

Twenty-seven stations were represented at the District 6 meeting January 13 in Nashville. Five more District meetings were scheduled for January. The Research Committee met January 10 in New York. (p. 47)

Future policy to govern the present Bureau of Radio Advertising was discussed at length by the Sales Managers Steering Committee meeting January 10 in New York. A standard contract form, sent out last week, can be modified when a contract is made between a station and a local advertiser direct. (p. 48)

To speed the recruiting of students for intensive training schools and engineering colleges, the United States Department of Education is urging vocational-educational officials to assemble data on labor needs and the school's plan to meet those needs. Station WMBD, Peoria, claims the single stations remote record. (p. 48)

Several new bills affecting the broadcasting industry were introduced this week in Congress, and the state legislatures. (p. 48)

James Lawrence Fly, FCC Chairman, said at a press conference he knew of no reason "for a substantial delay" in FCC action on the "monopoly" report. (p. 49)
BMI Developments

BMI BOARD MEETS

The BMI Board will hold its regular monthly meeting next Tuesday, January 21, in New York City. Developments in the music situation since the last meeting will be discussed.

BMI FEATURE TUNES

January 20-27

1. HIGH ON A WINDY HILL
2. YOU WALK BY
3. HERE’S MY HEART
4. BUGLE WOOGIE
5. IT ALL COMES BACK TO ME NOW
6. MAY I NEVER LOVE AGAIN
7. I CAN’T REMEMBER TO FORGET
8. WISE OLD OWL
9. ACCIDENT’LY ON PURPOSE
10. KEEP AN EYE ON YOUR HEART
11. BECAUSE OF YOU
12. ALL I DESIRE
13. WALKIN’ BY THE RIVER
14. LET’S DREAM THIS ONE OUT
15. LITTLE SLEEPYHEAD
16. ANYWHERE
17. BREAKFAST FOR TWO
18. I LOOK AT YOU

For the first time in its short and eventful life, BMI had the three top tunes of the ten best sellers on coin machines. They were identical with the three top of the Lucky Strike Hit Parade—a number one, Frensi, number two, There I Go, and number three, I Give You My Word. In addition, I Hear A Rhapsody romped home as number eight and So You’re The One is listed as number four on “Disks Gaining Favor.” Frensi and There I Go in the order named also lead the list of the fifteen best sheet music sellers, while I Hear A Rhapsody, I Give You My Word and So You’re The One were among those present for the week ending January 14th. By the way, that week was a record breaker in BMI sheet music sales which exceeded 127,000, more than double the total for the previous week. There I Go is leading and has rolled up about 130,000 to date.

KASSEL RESENTS ASCAP TACTICS

Art Kassel, well-known orchestra leader and composer has submitted his resignation to ASCAP (American Society of Composers, Authors and Publishers) with a request for an unconditional release and ASCAP has refused. Gene Buck, president of ASCAP, in a reply dated December 18, 1940, wrote, “In the twenty-six years of our history, we have never accepted a resignation from any of our members, and if we complied with this request, we would be creating a precedent.”

Mr. Kassel, who is the composer of “Doodle-Doo-Doo,” “Hell’s Bells,” and “Around The Corner,” and has been a member of ASCAP since 1925, declared:

“I resent the fact that ASCAP is trying to spread the feeling that the band leaders are doing bad work. They ought not to try to tear down our business because they have made a wreck of their own.

“The demands which ASCAP made on broadcasters were equivalent to a declaration of war. If they were going to do that sort of thing, they ought to have consulted the members and the rest of the music industry. I am in one of the lower classifications in ASCAP, but I wasn’t calling for larger payments from radio stations to the Society.

“Radio has been the great opportunity for dance bands. It has given them a chance to be heard all over the country. There is no doubt but what radio has made me. If it’s a question between ASCAP and the radio, I will take radio for what it’s done for me. I used to get a song a week after it was recorded. I hope that all the bands which are now at the top will think of the matter in this light and will be willing to see that the other fellow gets his chance too.

“What I like about the situation is that we now all have the same chance. I used to get a song a week after it was recorded. The ASCAP houses gave preference to a few bands.”

Asked whether he had any difficulty in making up satisfactory programs without the use of ASCAP music, Mr. Kassel said:

“None at all. I find that the music which is available outside of ASCAP is perfectly adequate, and I resent some of the publicity which has been issued by ASCAP on that matter. Mr. Buck has been quoted as saying that the chains may as well tell the boys to throw away their instruments. When he says that he is telling the public that we are not going to be any good. Well, we are not in a position to quit, and we don’t need to anyway. Keep listening. That is my plea to the public—keep listening.

“It seems to me that the great trouble with ASCAP is that they have taken their slogan ‘Justice for Genius’ too literally. We may be dead before people know whether any particular writer is a genius. They’ve kidded themselves all the way through. Justice for work is something different, and that’s what we want. Most successful songwriters are good craftsmen. They write to suit situations. They can turn out good stuff on order. ASCAP has some good music. I wish that all music was available, ASCAP as well as the rest, but ASCAP ought not to be in a position to dictate as they have in the past. They ought to get down to earth and represent the musical workmen, the little fellows as well as the man with the big name, and forget the genius stuff.”

THEY LIKE OLD TUNES

Among the many comments reaching the BMI offices on the new music in the air, a surprising number express
preference for the old tunes, both for the classics and those
associated with American tradition. Some excerpts from
letters and editorials follow:

"The new order of things has developed, too, an amazing in-
geniuity in arrangement. Almost daily over some station or other
the 'Three Blind Mice' in novel rhythmic attire scamper away from
the farmer's wife; Daisy is entreated in new tempo to ride a bicycle
for two, and even other songs of the seventies, eighties and nineties
appear in streamlined costumes à la mode. Thus the air is full of
'the 'Three Blind Mice' in novel rhythmic attire scamper away from
the<Texture of life.

"The younger generation, always in a vast hurry for something
new, had not been hearing enough of this music. Strangely, they
like it, because to them, it's new. Soon they will like it because
they will come to realize that it is not merely music of today, but
of all times."

RICHMOND TIMES-DISPATCH, 1.11.41.

"As one of the vast radio audience in the United States, I wel-
come the break with ASCAP. Now one can hear the music of the
old masters without the interminable 'jazz,' 'swing,' or what have
you."

Murray C. Boyer.

"I have just listened to an half hour of old favorites and I enjoyed
the change."

GRETHEI1 STANLEY.

"Contrary to the general expectation, we persons beyond the
thirties have enjoyed very much again hearing some of the fine older
tunes, with their soft melodies and their meaningful lyrics and the
expertness of the new arrangements."

MARION P. CRAWSHAW.

"I have talked with many average radio listeners (and I am in
that category today) and almost without exception they express
themselves as 'liking the music they get now.'"

GEORGE SHACKLEY.

"I want to say a word in regard to the music that we have had
since the first of the year, and how much more soothing it is on
the nerves than so much of that fiery discord that has been played
so often."

GEORGE B. SMITH.

"Gratification was expressed the other night when Fred Waring's
glee club offered 'Just a Song At Twilight.' 'They had been neglect-
ing those good old melodies,' said one Amarillo listener. 'I got a
real thrill out of Waring's program that night.'"

WES IZARD, Amarillo News.

BMI ADDS 246 ORIGINAIS

By constantly adding to its reservoir of popular tunes, Broadcast
Music, Inc., has made available for radio use more than 227 original popular songs since Christmas.
Of the new numbers, forty-two were published by BMI
under its own imprint and the others are being cleared by
other publishers through BMI. M. M. Cole has made
available 102 new cowboy tunes and romantic ballads;
E. B. Marks 43 popular tunes and twelve originals are
from the subsidiaries of Southern Music.

In addition BMI has acquired the performing rights
of the music published by Republic Music Corp. The
transaction calls for the immediate transference of some
20 numbers, many of which are identified with Sammy
Kaye, and for the publication of not less than 2 composi-
tions each month for three years. BMI has also acquired
ten numbers and rights to future selections controlled by
the Mutual Music Society, Inc., publisher of Glenn Miller's
originals.

NAB

DISTRICT 6 MEETING

Twenty-seven stations were represented at the District 6 meeting Monday, January 13, in Nashville. Although
the music situation was the primary subject of discussion,
numerous other industry problems were talked over.
Ed Kirby represented the NAB and Carl Haverlin, BMI.
Those registered:

Fred Bugz, WDEF; J. T. Ward, WLAC; Jack M. Draughon, WSIX; Louis R. Draughon, WSIX; S. A. Cider, WGGC; Charles Lee Harris, WGHC; Fred Olh, WWKH-KTHS; F. C. Sowell, WLAC; Hugh O. Potter, WOSM; Earlie Winger, WWOD; Henry Duper, WWL; E. A. Alburty, WBBQ; Bill Reeves, WHUE; M. L. Medley, WHUB; G. E. Zimmerman, KARK; Hugh W. Smith, WAML; W. H. Summerville, WWJ; Rayburn K. Rose, WBJ; Joe Van Sandt, WMSM; Jimmie Barry, KFTS; J. K. Pepper, WJFR; F. A. Caver, WWL; Jess Swineord, WKPT; L. M. Seacum, WSL; Henry Hick, WHIL; J. C. Liner, KMLB; Hoyt B. Wooten, WREJ; Thomas J. Severin, WSNC; M. E. Butterfield, WHEL; Carl Haverlin, BMI; S. E. Adrock, WBOI; Ed Kirby, NAB; "CQ" Earlelo, LANG-WORTH; Bob McAnaney, WCHB; J. C. Liner, Jr., KMLB; John Cleghorn, WMC; Carter Parkham, WDIO; H. W. Slavick, WMC; Mr. M. E. Butterfield, WHEI; Edwin W. Craig, WSM; Harry Stone, WSJ; James C. Hannahan, WMFS.

DISTRICT MEETINGS SCHEDULED

Following is a list of District meetings now scheduled:

District 16 (Southern California, Arizona, New Mexico), Friday,
January 17, Ambassador Hotel, Los Angeles, California,
District 15 (Nebraska, Northern California, Hawaii), Saturday,
January 18, St. Francis Hotel, San Francisco, California.
District 17 (Washington, Oregon, Alaska), Wednesday, January
22, Heathman Hotel, Portland, Oregon.
District 10 (Iowa, Missouri, Nebraska), Saturday, January 25,
Fontenelle Hotel, Omaha, Nebraska.
District 14 (Colorado, Utah, Idaho, Montana, Wyoming),
Monday, January 27, Albany Hotel, Denver, Colorado.

RESEARCH COMMITTEE

The Research Committee meeting January 10 was held at
the Ritz Tower in New York City. Those in attendance were: William J. Scripps, Chairman, WWJ; H. M.
Beville, Jr., NBC; Arthur B. Church, KMBC; James D.
Shouse, WLT-WSAI; Frank N. Stanton, CBS; Theodore
C. Streibert, WOR-MBS; J. W. Woodruff, Jr., WRB. Guests: Messrs. Allen and Walker of MBS; Paul F. Peter,
ex officio. Absent: Lee B. Wailes, KYW.

The Committee heard a progress report on the broad-
cast advertising unit measurement and on the publication of
the Urban Survey which is to be released shortly. The
Committee met at luncheon with the Sales Managers' Committee and with representatives of the ANA Cooperate-
avie Analysis of Broadcasting, Paul West, President of
ANA, Frederic Gamble, Executive Secretary of the AAAA,
Wells Wilbar of the General Mills Company, and A. W.

January 17, 1941 — 47
Lehman, Manager, Cooperative Analysis of Broadcasting. Following the luncheon, Mr. Lehman presented and discussed with the Research Committee the research method employed by the CAB.

This presentation of research methods is the second in a series heard by the Research Committee incident to the preparation of a Research Manual on Audience Measurement for station use.

1941 DUES CLASSIFICATION

Enclosed with the regular monthly statement sent to all NAB members on January 1 was a 1941 dues classification blank.

Under the By-Laws, each NAB member is required to file this statement annually with the Secretary-Treasurer indicating the amount of dues to be paid for the ensuing year.

It will be greatly appreciated if this statement is executed and filed with NAB Headquarters as soon as possible.

Sales

SALES STEERING COMMITTEE

The Sales Managers Steering Committee which is in reality the executive committee of the Sales Managers group, met at the Ritz Tower, New York, on Friday, January 10.

In addition to Chairman E. Y. Flannigan, WSPD, Toledo, Ohio, the following were present: Eugene Carr, WGAR, Cleveland, Ohio; Charles Caley, WMBD, Peoria, Illinois; and Ellis Atteberry, KCKN, Kansas City, Kansas. William Way, vice president and general manager of KVOO, Tulsa, Oklahoma, attended in place of Willard Egolf. Craig Lawrence, KRNT, Des Moines, Iowa, was prevented from being in attendance by reason of engagements in the midwest. Ed Kirby, Public Relations Director, and C. E. Arney, Jr., of the NAB staff, also attended.

A complete discussion of the future policy to govern the present Bureau of Radio Advertising took place and an interesting announcement respecting this whole matter will shortly be made.

STANDARD CONTRACT FORM

We wish to clear up a misunderstanding which has come to our attention with reference to the application of the words "Less Agency Commission (15% of Net Station Time Charge):" appearing on the face of the NAB recommended station facilities contract (NAB Reports, January 10, 1941). When the contract is made between the station and a local advertiser direct, it is presumed that the station will "X" out such words in accordance with the usual practice of paying such commission only to recognized agencies. The form is designed to be used in dealing either with agencies or local advertisers, and thus obviate the necessity of printing two forms when one can serve both purposes.

Promotion

DEFENSE VOCATIONAL TRAINING

In order to speed the recruiting of students for intensive training courses in vocational schools and engineering colleges listed on pages 4880-4883 inclusive, of NAB Reports, December 13, United States Department of Education is urging vocational education officials to (1) assemble data on present and anticipated labor needs in their region and (2) the schools' plans to supply those needs.

As soon as the data becomes available scientific direction for training can be released in each individual community. At the completion of new plants or additions to present plants, graduates will have jobs, vital to national defense, waiting for them. The vocational education defense training program will prepare new workers for defense jobs and train those now employed for greater responsibilities.

LONG DISTANCE REMOTES

The long distances which broadcasting stations will extend lines in order to serve listeners has been brought out in recent issues of NAB Reports. WMBD, Peoria, through C. Russell Ehresman, merchandising and promotion, herewith says his station tops the last published, single station, remote long distance record. Claim is based on pick ups from the Pacific coast.

Here is the whole story as related by Mr. Ehresman:

"For the past three years, WMBD has broadcast all of the Bradley Tech basketball games regardless of where they were played. The team's travel has taken it from the east to west coast. This year, as in the past three years, we broadcast direct from the University of California, at Los Angeles, on December 31, 1940, and were the only station in this area carrying the game. Then, on January 3, 1941, WMBD broadcast by direct wire from Berkeley the University of California-Bradley game. This also was an exclusive coverage.

"Each year for the past three years we have broadcast direct from Madison Square Garden the games Bradley Tech has played with leading eastern teams. This coming Wednesday evening, January 15, we will have a direct wire broadcast of the St. Francis-Bradley Tech game being played at the Madison Square Garden, New York City."

DEFENSE JOBS

The steady flood of skilled workers which broadcast stations are bringing to national defense jobs is one of the bright spots in the employment situation. But careful
checks in all sections of the country convince U. S. Civil Service officials that there are thousands of qualified workers who have not yet been reached. They constitute a vast untapped reservoir to be drawn upon by radio.

Months in the future men taking apprenticeship courses in Navy Yards will be added to the supply of mechanics. All 45,000 U. S. Post Offices are currently displaying two colored posters which set forth the urgent need for skilled workers.

PROMOTION FOR CHILDREN

Not generally known until Major Edney Ridge of WBIG mailed a copy, is the fact that the story of radio was brought to vast numbers of school children throughout the land in "My Weekly Reader" for the week of November 25-29, 1940. "My Weekly Reader," widely syndicated, is highly regarded by educators and children alike. In simple language it told the whole story of radio. Here it is:

"RADIO HAS A BIRTHDAY

"The radio is 20 years old. It is having a big birthday party from November 11 to 30.

"Many people are helping with the birthday party.

"They are singing over the radio. They are telling how radio has grown in 20 years.

"Not many people had radios then. Not many people knew about radios. Today people everywhere have radios. There are radios in many schools.

"The radio brings news to people. It brings music, talks, and plays. The radio helps many people. It helps in many ways.

"The radio helps people in cities. It helps people in the country. It helps people in other countries.

"The radio helps policemen. It helps men working in forests. The radio helps airplane pilots. It helps people on big ships. It helps people everywhere. How does the radio help these people?

"Every year, the work of the radio grows and grows.

"Today some people have radios with television.

"Television is somewhat like moving pictures.

"People look into the radio. They see the people who sing and talk on the radio.

"Some people get radio newspapers. Their radios put news on paper."

With three pictures the story occupied the entire second page of the little newspaper. On the back page were eight questions which tested the children's understanding of the radio birthday story.

NEW MEXICO LEGISLATION

A. R. Hebenstreit, KGGM, Albuquerque, has accepted an appointment as legislative contact man at the New Mexico Capitol. (NAB Reports, p. 32.)

FEDERAL LEGISLATION

(New Bills)

HOUSE

H. R. 2074 (BLAND, D., VA.) COMMUNICATIONS ACT.—To amend section 353 (b) of the Communications Act of 1934, as amended. Referred to Committee on Merchant Marine and Fisheries.

HOUSE RESOLUTION

H. Res. 51 (WIGGLESWORTH, R., MASS.) COMMUNICATIONS—Authorizing an investigation of the Federal Communications Commission. Referred to Committee on Rules.

STATE LEGISLATION

COLORADO:

S. 310 (VETRE) RADIO INTERFERENCE CONTROL.—To prohibit the maintenance, use, or operation of any devices which create electrical interference with radio reception. Referred to Committee on State Affairs and Public Lands.

S. 211 (VETRE) RADIO INTERFERENCE CONTROL.—To prohibit the maintenance, use, or operation of any devices which create electrical interference with radio reception. Referred to Committee on State Affairs and Public Lands.

S. 231 (CROWLEY) COPYRIGHTS.—To aid in effectuating the Federal Copyright Laws by removing certain monopolistic abuses and activities practiced under guise of copyrights by price fixing combinations, monopolies and pools. Referred to Committee on State Affairs and Public Lands.

MASSACHUSETTS:

S. 193 (TOMBLEY) LIBEL AND SLANDER.—Relative to actions for libel and slander. Referred to Committee on Constitutional Law.

NEW YORK:

A. 107 (SAME AS S. 122) (REDUX) EMPLOYMENT AGENCIES.—Clarifies provisions relative to return of fees by employment agencies. Referred to Committee on Judiciary.

S. 222 (SAME AS A. 107) (FEINBERG) EMPLOYMENT AGENCIES.—Clarifies provisions relative to return of fees by employment agencies. Referred to Committee on General Laws.

FEDERAL COMMUNICATIONS COMMISSION

FLY DISCUSSIRES MONOPOLY REPORT

Asked at a press conference early this week about the status of the FCC's monopoly report, James Lawrence Fly, Chairman, said that it is under study by the Commission with a view to early action.

Mr. Fly told the newsmen that he had informed the House Appropriations Committee "that it may come out next month." However, the Chairman stated that that was merely a general observation "particularly since the Commission has a pretty heavy schedule." Asked if that meant the monopoly report might be made in February, the Chairman said "it might be in January." He said he knows of no reason "for a substantial delay."

Mr. Fly in further discussion of the monopoly report said that the Commission could do any one of three things: (1) It could adopt the Committee report, (2) write an addition to it, or (3) write an entirely new report.

Chairman Fly told the reporters that the members of the Commission are planning to witness demonstrations of new television developments in the New York area on January 24 and 25. He said he hoped that they would not have to go to Schenectady, and had requested that the trip be consolidated as much as possible.

Discussing the progress of FM authorizations, the Chairman said that there had been expeditious grants and a sizeable application list.
NEW ASSISTANT TO CHAIRMAN

The FCC announced the appointment of Robert G. Seaks of Harrisburg, Pa., as Assistant to the Chairman, James Lawrence Fly.

From 1934 until the present time Mr. Seaks was a member of the legal staff of the Tennessee Valley Authority, except for a period in 1936 and 1937 when he did graduate work at Yale Law School.

Mr. Seaks was graduated from Gettysburg College in 1931, after being elected to Phi Beta Kappa. Three years later he was first man in the graduating class at Duke Law School. He was admitted to the bar in Tennessee.

Mr. Seaks assumes his new duties today, filling the vacancy caused by appointment of Nathan H. David to the Commission's legal staff.

FILING INFORMATION AT FCC

The FCC on January 14 amended its Rules governing the filing of information, contracts, periodic reports, etc., as follows, effective immediately:

Amended Sections 43.51 and 43.52 by adding thereto the following:

"Upon compliance with the requirements of this section by one party to any such contract, agreement, or arrangement, the filing of a statement in writing duly sworn to by the other party or parties thereto identifying such contract, agreement, or arrangement, and adopting the filing thereof, shall be regarded as compliance with the requirements of this section by such other party or parties."

FCC RULE AMENDED

FCC on January 7 amended its Rules of Practice and Procedure, Part I, as follows, effective immediately:

Amended Section 1.356 to read as follows:

"Sec. 1.356. Forfeiture of construction permits; extensions of time.—(a) A construction permit shall be automatically forfeited if the station is not ready for operation within the time specified therein or within such further time as the Commission may have allowed for completion, and a notation of the forfeiture of any construction permit under this provision will be placed in the records of the Commission as of the expiration date.

(b) Any application for extension of time within which to construct a station shall be filed at least thirty days prior to the expiration date of such permit if the facts supporting such application for extension are known to the applicant in time to permit such filing. In other cases such applications will be accepted upon a showing satisfactory to the Commission of sufficient reasons for filing within less than thirty days prior to the expiration date. Such applications will be granted upon a specific and detailed showing that the failure to complete was due to causes not under the control of the grantee, or upon a specific and detailed showing of other matters sufficient to justify the extension."  

ENGINEERING CONFERENCE

A radio engineering conference convened here in executive session January 14 to harmonize the action of the radio administrations of Canada, Cuba, Dominican Republic, Haiti, Mexico and the United States so that the assignment of frequencies to broadcasting stations in the standard broadcast band will conform with the provisions of the North American Regional Broadcasting agreement signed at Havana on December 13, 1937. The provisions of this convention will become effective on March 29.

The following representatives attended the conference:

Canada—Mr. Donald Manson; Mr. J. W. Bain, Department of Transport; Mr. K. A. Mackinnon; Mr. W. G. Richardson, Canadian Broadcasting Corporation; Mr. Ronald Macdonnell, Canadian Legation, Washington.

Cuba—Mr. Francisco Suarez Lopetequi; Guillermo Morales; Alfonso Hernandez Cata; Armando Mencia, Director, Inter-American Radio Office.

Dominican Republic—The Honorable Andrs Pastoriza, Minister of the Dominican Republic.

Haiti—Mr. Haitie Elie Lescot, Minister of Haiti.

Mexico—Mr. Juan C. Buchanan; Mr. Salvador Tayabas.

United States—Department of State: Mr. Thomas Burke, Chief, Division of International Communications; Mr. Francis Cofte Wolf, Division of International Communications; Mr. Harvey B. Otterman, Division of International Communications; Mr. Edward Walles, Division of European Affairs; Mr. Phillip Bonsal, Acting Chief, Division of the American Republics; Mr. Guillermo Suro, Acting Chief, Central Translating Office; Federal Communications Commission: Commander T. A. M. Craven, Commissioner; Mr. E. K. Jett, Chief Engineer; Mr. Andrew D. King, Assistant Chief Engineer; Mr. Gerald C. Gross, Chief, International Division; Mr. Joseph L. Rauh, Jr., Assistant General Counsel.

FROM THE FCC MAIL BAG

Christmas has passed, but a Louisiana woman feels that many children of the nation are disillusioned about "Santa Claus" as a result of remarks made from time to time on the radio, and solicits the aid of the FCC in this connection. But the Commission is limited by statute from exercising power of censorship over radio programs. Inasmuch as station licensees have the initial responsibility for the selection of program material and are interested in the reaction of listeners to presentations, it is suggested that the woman convey her comments to the management of the network which carried the references to which she objects.

Because it has no authority to require broadcast stations to produce specific programs, the Commission has referred to an appropriate medium a suggestion and desire on the part of a university official to help develop programs to aid the national defense.

A New Yorker is advised that neither the Communications Act nor Commission rules and regulations specifically prohibit a radio announcer from repeating a story which appeared in a newspaper. However, a copyright question may be involved.

A Washington correspondent inquires about reported limitations upon facsimile broadcasting of typewritten matter. He is informed that facsimile broadcasting is provided for under Commission regulations and that there is no limitation of the type mentioned. It is possible that he may have in mind facsimile transmissions by point-to-point stations which might involve questions of a communications character.

A law journal, which asks about Commission "pre-trial" procedure, is informed:

In its regulation of communications by wire and radio under the Communications Act of 1934, as amended, the Commission has no regularly established "pre-trial procedure" which is directed toward determining whether sufficient grounds exist for filing a complaint against either the witnesses themselves or those with whom they are connected, nor do its rules provide for such procedure. The hearings held by the Commission in connection with its execution and enforcement of the Act are either informal or formal as provided for in its rules.

The Commission does apply pre-trial processes in the varying situations with which it has to deal. As an example, in a recent case information came into the possession of the Commission which, if founded on fact, would have properly
required a proceeding for revocation of a broadcast station license. The Commission invited the witnesses as well as representatives of the station involved to appear informally for a conference with representatives of its Law Department. The statements of the witnesses were summarized and reduced to writing and later signed by them. Counsel were present representing one group of witnesses and counsel representing the station was invited to participate. In this instance no question arose of incriminatory testimony.

The general conduct of hearings held by the Commission in connection with its regulatory and licensing functions under the Act is set forth in Sections 1.231 et seq. of its Rules of Practice and Procedure. Under certain conditions, relevant portions of affidavits or other recorded testimony derived from such preliminary conferences or preliminary hearings may be introduced in subsequent proceedings. Witnesses are furnished with copies of their testimony or statements. The Commission has never been engaged in litigation in which any issues arise by reason of any such preliminary procedures.

MORE "FM" GRANTS

Three additional FM (frequency modulation) broadcast station authorizations were announced January 15 by the FCC, two for Chicago and one for Pittsburgh. This makes about 30 such stations approved by the Commission to date for full commercial program service.

The Columbia Broadcasting System, Inc., has received a construction permit for a new high frequency station to serve the program service.

The FCC has made public the following complete list of FM stations as of January 1:

FCC FORM 324 APPROVED

The FCC has approved FCC Form 324 to be used by the licensees of standard broadcast stations and others in reporting their financial affairs for the year 1940 under the provisions of Section 1.361.

January 17, 1941 — 51
Following hearing is scheduled before the Commission in a broadcast case for the week beginning Monday, January 20. It is subject to change.

Wednesday, January 22

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearing. It is subject to change.

February 25

APPLICATIONS GRANTED

KGO—KGO Broadcasting Co., Fort Worth, Tex.—Granted construction permit to make changes in directional antenna and increase night power from 1 to 5 KW; 570 kc., 5 KW day (B5-P-2571).

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Granted modification of construction permit (B4-P-2886) to move transmitter site from 59th Street and Hollingsworth Road, near New Augusta, Ind., to across Hollingsworth Road from present site; install new transmitter; make changes in directional antenna; and increase day power from 1 to 5KW; 1050 kc., non-directional, subject to approval of antenna system (B4-MP-1100).

WBIR—KTRH Broadcasting Co. (a Delaware corporation), Assignee, and Albemarle Broadcasting Co., Assignee, Elizabeth City, N. C.—Granted modification of license to increase power from 500 watts to 1 KW; 1420 kc., unlimited time, exact transmitter site and type of antenna to be determined (B5-2933).

WBK¥—University of Kentucky, Beattyville, Ky.—Granted application for reinstatement of the construction permit for non-commercial educational broadcast station WBKY (construction was not completed within the time provided for in the permit, and the same automatically expired October 20, 1940), and change frequency from 11900 kc. to 12900 kc. to comply with Section 4.137, as revised; 100 watts day and night, unlimited; using amplitude modulation at present (B2-PED-17).

KGEI—General Electric Company, San Francisco, Calif.—Granted construction permit to make changes in antenna system and to move transmitter site from Treasure Island to near Belmont, Calif., of international broadcast station KGEI; frequencies 6190, 9530, 15330 kc., power 20 KW day and night, sharing time of operation with WGEO and WGEQ on 6190 and 15330 kc. and with WGEO on 9530 kc. (B5-PH-31).

NEW FM STATIONS GRANTED

WJJD, Inc., Chicago, III.—Granted construction permit for new FM broadcast station to operate on 14100 kc., with a coverage of 10,800 square miles, embracing 4,500,000 population (B1-PH-17).

Columbia Broadcasting System, Inc., Chicago, III.—Granted construction permit for new FM broadcast station to operate on 16700 kc., with a coverage of 10,800 square miles, embracing 4,500,000 population (B4-PH-37).

Westinghouse Radio Stations, Inc., Pittsburgh, Pa.—Granted construction permit for new FM broadcast station to operate on 17500 kc., with a coverage of 8,400 square miles, embracing 2,100,000 population.

DESIGNATED FOR HEARING

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Application for construction permit to make changes in transmitter; move transmitter site from Millhaven Road, Monroe, La., 4 miles north of center of city; change frequency from 1500 to 1140 kc.; increase power from 250 watts to 1 KW; and install directional antenna for night use (B3-P-2933).

KNOE, Inc., Monroe, La.—Application for construction permit to erect a new station to operate on 1120 kc., 250 watts, unlimited time, exact transmitter site and type of antenna to be determined (B5-P-2887).

KTSM—Tri State Broadcasting Co., Inc., El Paso, Tex.—Application for modification of license to increase power from 500 watts to 1 KW; 1250 kc., unlimited time.

Edward E. Reeder, Seattle, Wash.—Application for construction permit for new broadcast station to operate on 1420 kc., 250 watts, unlimited time, exact transmitter site and type of antenna to be determined (B5-P-2936).

Western Massachusetts Broadcasting Co., Pittsfield, Mass.—Application for construction permit for new broadcast station to operate on 1500 kc., 100 watts, unlimited time (B1-P-2988).

MISCELLANEOUS

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted modification of construction permit authorizing move of transmitter, increase in power, etc., for extension of completion date to July 15/41 (B2-MP-1131).

KFXJ—Western Slope Broadcasting Co., Grand Junction, Colo.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-627).

WSLJ—Standard Life Broadcasting Co., Jackson, Miss.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-569).

KGB—Don Lee Broadcasting System, San Diego, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-524).

KGK¥—L. L. Hilliard, Ruth D. Hilliard, & R. M. Stewart, d/b as Hilliard Company, Scottsbluff, Nebr.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-523).

KIP—San Juan Broadcasting Co., Durango, Colo.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-523).

KGKO—The Southwest Broadcasting Co.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-620).
WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Granted modification of construction permit which authorized changes in antenna and transmitting equipment, increase in power and move of transmitter, for change in type of transmitter; 100 kw; authorized construction of new transmitter and extension of completion date from December 29, 1940 to 10 days after grant and extension of completion date from June 29, 1941 to 90 days after date of commencement (B2-MP-1116).

Paducah Broadcasting Co., Inc. (area of Hopkinsville, Ky), Mobile.—Granted license to cover construction permit which authorized construction of a new relay broadcast station, frequencies 30820, 33740, 35830, 37950 kc., 15 watts, A3 emission (B2-PRE-370).

WAUV—Evansville on the Air, Inc. (area of Evansville, Ind.), Portable-Mobile.—Granted license to cover construction permit which authorized construction of a new relay broadcast station, frequencies 30820, 33740, 35830, 37950 kc., 20 watts, A3 emission (B4-LRE-333).

KGBX—Eaglefield Broadcasting Co., Inc., Bozeman, Mont.—Granted modification of construction permit which authorized installation of new transmitter, increase in power, and changes in directional antenna for night use, for changes in equipment; 1320 kc., 5 kw, unlimited (B4-MP-1137).

WNBH—Anthony T. Mack Radio Sales Company, New Bedford, Mass.—Granted license to cover construction permit authorizing installation of new transmitter and vertical antenna, increase in power, and move of transmitter; 1310 kc., 250 watts, unlimited (B1-L-1300).

WCMJ—Ashland Broadcasting Co., Ashland, Ky.—Granted license to cover construction permit which authorized installation of new antenna and move of transmitter; 1310 kc., 250 watts, unlimited (B2-L-1306).

WGRM—P. K. Ewing, Greenwood, Miss.—Granted license to cover construction permit which authorized installation of new transmitter and increase in power, and changes in directional antenna for night use, for changes in equipment; 1320 kc., 5 kw, unlimited (B4-MP-1137).

WEAF—National Broadcasting Co., Inc., New York, N. Y.—Granted construction permit to make changes in auxiliary transmitter and increase power from 50 to 50 kw; 650 kc., emergency use only (B1-P-3058). Also granted license to cover construction permit (B1-L-1305).

KENO—Geo. Penn Foster, Maxwell Kelch, and Calvert Chas. Applegate, d/b/a as Nevada Broadcasting Co., Las Vegas, Nev.—Granted license to cover construction permit which authorized erection of a new broadcasting station, frequencies 1330, 1350, 1370, 1410 kc., 250 watts, unlimited (B5-L-1281). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-577).

WGAN—Portland Broadcasting System, Inc., Portland, Maine.—Granted license to cover construction permit which authorized installation of new transmitter, changes in directional antenna for night use, change of frequency and hours of operation, and increase in power, to use directional antenna day and night; 560 kc., 5 kw, unlimited (B1-L-1304). Also granted authority to determine operating power by direct measurement of antenna input (B5-Z-615).

W2XCB—Columbia Broadcasting System, Inc. (area of New York City), Portable-Mobile.—Granted modification of construction permit which authorized new television relay station, for extension of completion date from January 7, 1941, to July 2, 1941 (B1-MP-1281).

KFXD—Frank E. Hurt, Nampa, Idaho.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-615).

W2XW—Allen B. DuMont Laboratories, Inc., New York City.—Granted modification of construction permit for new television broadcast station, to extend completion date from December 13, 1940, to February 13, 1941 (B1-MPVB-3).

KSCJ—Perkins Bros. Co. (The Sioux City Journal), Sioux City, lowa.—Granted modification of construction permit which authorized increase in power and installation of directional antenna for night use, for changes in equipment; 1310 kc., 5 kw, unlimited (B1-L-1113).

KDFN—Donald Lewis Hathaway, Caspar, Wyoming.—Granted license to cover construction permit which authorized increase in power to 1 kw and changes in equipment (B5-L-1303).

WKAT—A. Frank Katzentine, Miami Beach, Fla.—Granted license to cover construction permit which authorized change of frequency, increase in power, and installation of new transmitter and antenna; 1330 kc., 1 kw, unlimited (B3-L-1265).

KTMS—News-Press Publishing Co., Santa Barbara, Calif.—Granted license to cover construction permit which authorized changes in equipment and increase in power, using directional antenna day and night; 1220 kc., 5 kw, unlimited time, using directional antenna day and night (B5-L-1291).

KRN—Iowa Broadcasting Co., Des Moines, Iowa.—Granted modification of construction permit which authorized move of transmitter, installation of directional antenna for night use, installation of new transmitter and increase in power, for changes in equipment; 1320 kc., 5 kw, unlimited time, directional antenna night (B4-MP-1134).

KFEW—Pierce P. O’Dwyer, Seattle, Wash.—Granted modification of construction permit which authorized installation of directional antenna for day and night use, new transmitter and increase in power, for move of transmitter; 920 kc., 5 kw, unlimited time, directional antenna day and night (B3-MP-1128).

KROD—Dorrance D. Roderick, El Paso, Tex.—Granted modification of construction permit which authorized change in frequency from 1500 to 600 kc., increase in power from 250 watts to 500 watts night, 1 kw day, and installation of new transmitter, for authority to change type of transmitter and extend commencement and completion dates from January 26, 1941, and July 26, 1941, to 30 days after grant and 120 days thereafter, respectively (B3-MP-1135).

W2RZ—Zenith Radio Corp. (area of Chicago, Ill.), Portable-Mobile.—Granted license to cover construction permit for new relay broadcast station, frequencies 156750, 158400, 159300, 161190 kc., power 100 kw, special emission (B4-LRE-337).

WIXPW—WDRC, Inc., Hartford, Conn.—Granted special temporary authority to operate a high frequency experimental broadcast station on 16500 kc., 1000 watts power, special emission, in order to experiment with a new television relay station WIXOJ, with the transmitter located at Meriden, Conn., and described as Composite, Type FM1, maximum rated carrier power 1000 watts, for period January 8, 1941, to not later than March 1, 1941.

WMBC—The Moody Bible Inst. of Chicago, Chicago, Ill.—Granted motion for continuance of hearing on application for modification of license to use hours now being used by WCBD when that station is assigned a different frequency, for a period of 30 days.

WCAW—Appleton of Camden, Camden, N. J.; WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.; WTNJ—WOAX, Inc., Trenton, N. J.—Granted motion for continuance of hearing on applications for renewal of licenses of WCAW, WCAP and WTNJ, now scheduled for January 29 to March 10. The Commission on its own motion consolidated the hearing on the above renewal applications with applications of Trent Broadcast Corp. for a new station and application of WTNJ for construction permit to change frequency to 1320 kc., and increase time of operation.

Mack Radio Sales Company—Dismissed without prejudice petition to intervene in the hearing on applications for renewal of license of WCAP, WCAP and WTNJ.

Fred Jones Broadcasting Co., Tulsa, Okla.—Granted petition for leave to amend application for new station with regard to directional antenna; 650 kc., 50 kw, unlimited time.

Paducah Broadcasting Co., Inc., Clarksville, Tenn.—Granted motion for order to take depositions in re application for new station to operate on 1370 kc., 250 watts, unlimited time.

South Jersey Broadcasting Co., Vineland, N. J.—Dismissed with prejudice petition for construction permit to change frequency from 1310 to 1350 kc., increase in power from 100 to 250 watts, and hours of operation to unlimited.

WSAV—Brown Radio Service & Laboratory, Rochester, N. Y.; Edward J. Doyle, Rochester, N. Y.—Granted motion for continuance of hearing on applications for renewal of license of W3AV, now scheduled from January 27 to a date not before February 27, 1941, in re application to change frequency from 1210 to 1310 kc., increase power from 250 watts to 1 kw, unlimited time, DA.

January 17, 1941 — 53
APPLICATIONS FILED AT FCC

550 Kilocycles

WSVA—Shenandoah Valley Broadcasting Corporation, Harrisonburg, Va.—Modification of construction permit (B2-P-2578) as modified, requesting extension of required date of completion from January 28, 1941 to July 28, 1941.

590 Kilocycles

WKZO—WKZO, Incorporated, Kalamazoo, Mich.—Construction permit to increase power from 1 KW to 1 KW, 5 KW, local sunset, to 5 KW day and night.

610 Kilocycles

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Authority to determine operating power by direct measurement.

620 Kilocycles

WROL—Stuart Broadcasting Corp., Knoxville, Tenn.—License to cover construction permit (B3-P-2435) for a new transmitter, and directional antenna for night use, in power, change in frequency and mode.

RWS—Stuart Broadcasting Corp., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

880 Kilocycles

WJHL—WJHL, Incorporated, Johnson City, Tenn.—License to cover construction permit (B3-P-2565) as modified, for equipment changes, installation of D. A. for night use, increased in power, change in frequency and move of transmitter.

WJHL—WJHL, Incorporated, Johnson City, Tenn.—Authority to determine operating power by direct measurement.

1200 Kilocycles

WENY—Elmira Star Gazette, Inc., Elmira, N. Y.—Construction permit to install new transmitter, directional antenna for day and night use, change in frequency from 1200 to 590 kec., increase power from 250 watts to 1KW.

1210 Kilocycles

KGY—KGY, Inc., Olympia, Wash.—Construction permit to install new vertical antenna and change hours of operation to operate on television channel No. 6, and making final its conditional grant of June 18, 1940, of application of Hughes Productions Div. of Hughes Tool Co. for construction permit for television broadcast station in Los Angeles to operate on television channel No. 2 instead of channel No. 3 as requested, and (2) to withdraw request filed December 6, 1940, by Columbia Broadcasting System, Inc., for hearing on its own application for construction permit for television broadcast station in Los Angeles to operate on television channel No. 3 instead of channel No. 8 as granted by the Commission November 15, 1940.

The Commission has announced the following action:

WMBD—WMBD Broadcasting Co., Peoria, Ill.: WKEI—Portable mobile; WEPO—Portable mobile; WEXH—Portable mobile; WAIN—Portable mobile.—Granted petition to reconsider and grant without hearing the application for assignment of license of Broadcast Station WMXD and four associated relay stations from WMBD Broadcasting Co. to Peoria Broadcasting Company; dismissed motion to strike the second issue upon which said application was scheduled to be heard; set aside Commission action in designating said application for hearing; and granting the application as requested.

Applications Filed at FCC

The Commission has announced the following action: WMBD—WMBD Broadcasting Co., Peoria, Ill.: WKEI—Portable mobile; WEPO—Portable mobile; WEXH—Portable mobile; WAIN—Portable mobile.—Granted petition to reconsider and grant without hearing the application for assignment of license of Broadcast Station WMXD and four associated relay stations from WMBD Broadcasting Co. to Peoria Broadcasting Company; dismissed motion to strike the second issue upon which said application was scheduled to be heard; set aside Commission action in designating said application for hearing; and granting the application as requested.
from unlimited time except when KTW is operating to unlimited time.

1300 Kilocycles

KFH—Radio Station KFH Co., Wichita, Kans.—Modification of construction permit (B4-P-2462) as modified for new transmitter, increase in power, move of transmitter, installation of directional antenna for night use, requesting extension of completion date from February 18, 1941 to July 18, 1941. NEW—Findlay Radio Co., Findlay, Ohio.—Construction permit for new station on 1320 kc., 250 watts, unlimited operation. Class IV station. Amended: To request 1300 kc., daytime operation.

1310 Kilocycles

WCMJ—Ashland Broadcasting Co., Ashland, Ky.—Authority to determine operating power by direct measurement of antenna power.

WFHR—William F. Huffman, Wisconsin Rapids, Wisc.—Modification of license to increase power from 100 watts 250 watts Local Sunset to 250 watts day and night.

1340 Kilocycles

1360 Kilocycles

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Modification of construction permit (B3-P-3000) for changes in equipment, requesting further changes in equipment, change hours of operating from daytime to unlimited time using 500 watts night, 1 KW daytime, and extend commencement and completion dates from February 5, 1941 and August 5, 1941 to 10 days after grant and 30 days thereafter, respectively. Facilities of WTJS.

1370 Kilocycles

KVRS—Wyoming Broadcasting Co., Rock Springs, Wyo.—Authority to install automatic frequency control equipment.

NEW—Greensboro Broadcasting Co., Inc., Greensboro, N. C.—Construction permit for new station on 1370 kc., 100 watts, unlimited time. Studio and transmitter site to be located at Greensboro, North Carolina. Amended: Request 1250 kc., Class IV, 250 watts, day operation only, contingent on WAIR going to new frequency. Antenna changes.

NEW—Macon Telegraph Publishing Co., Macon, Ga.—Construction permit for a new station on 1370 kc., 250 watts, unlimited time. Transmitter site to be determined, in or near Macon, Georgia. Studio site to be determined, Macon, Georgia. Antenna to be determined. Amended: To change applicant from Martin Anderson (individual) to Macon Telegraph Publishing Co. (a corporation).

WDEF—Joe W. Engle, Chattanooga, Tenn.—License to cover construction permit (B3-P-2483) as modified for a new station.

WDEF—Joe W. Engle, Chattanooga, Tenn.—Authority to determine operating power by direct measurement of antenna power.

NEW—Roy G. Terry, trading as Terry Broadcasting Company, Tyler, Tex.—Construction permit for a new station to be operated on 1370 kc., 250 watts, unlimited time. Class IV.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Penn.—Authority to determine operating power by direct measurement of antenna power.

1390 Kilocycles

NEW—Vermont Radio Corporation, Inc., St. Albans, Vt.—Construction permit for a new broadcast station to be operated on 1390 kc., 1 KW, daytime operation. Requests facilities of WQDM.

1420 Kilocycles

WKMO—Kokomo Broadcasting Corp., Kokomo, Ind.—Modification of construction permit (B4-P-2842) for a new station, requesting approval of vertical antenna, approval of transmitter site at Southeast Corner Morgan and Ohio Streets, Kokomo, Indiana, and install a new transmitter.

NEW—Chattahoochee Broadcasting Co., Columbus, Ga.—Construction permit for a new station on 1420 kc. (Class IV station). 250 watts, unlimited time. Transmitter site to be determined, Columbus, Georgia. Studio site, corner of Front and 13th Streets, Columbus, Georgia. Amended: To change applicant from Arthur Lucas and Wm. K. Jenkins, d/b as Chattahoochee Broadcasting Co. (a partnership) to Chattahoochee Broadcasting Company (a corporation).

1460 Kilocycles

KSTP—KSTP, Inc., St. Paul, Minn.—Modification of license to make changes in directional antenna.

1500 Kilocycles

WERC—Presque Isle Broadcasting Co., Erie, Penn.—Modification of construction permit (B2-P-2251) as modified, for a new station, requesting installation of new type transmitter, and extend commencement dates from January 28, 1941, and July 28, 1941, to 60 days after grant and 180 days thereafter respectively.

WMRN—The Marion Broadcasting Co., Marion, O.—License to cover construction permit (B2-P-2862 as modified) for new broadcast station.

WMKF—The Marion Broadcasting Co., Marion, O.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATION

NEW—Frequency Broadcasting Corp., Brooklyn, N. Y.—Modification of construction permit (B1-P1-47) for a new high frequency broadcast station, requesting approval of transmitter and change population from 11,900,000 to 11,000,000. (W.E. 506-A1, Maximum 10 kilowatts).

TELEVISION APPLICATION

W9XMJ—The Journal Company (The Milwaukee Journal), Milwaukee, Wisc.—Modification of construction permit (B4-PVB-20, which authorized a new television station) requesting approval of transmitter site and antenna: 720 East Capitol Drive, Milwaukee, Wisc.

MISCELLANEOUS

WBOS—Westinghouse Electric & Manufacturing Co., Pittsburgh, Penn.—Modification of construction permit (B1-PIB-23, which authorized move of station from Pittsburgh, Penn., to Hull, Mass., increase power to 50 kilowatts and changes in equipment) requesting extension of completion from January 7, 1941, to June 7, 1941.

WEIX—Memphis Publishing Co., Portable-Mobile—Construction permit to increase power from 5 watts to 22 watts and install new transmitter (already constructed under B3-PRE-352 by former owners).

KRLM—Royal Miller, Area of Sacramento, Calif.—Construction permit to change frequencies from 30820, 33140, 35820, 37980 to 1622, 2638, 2150, 2790, increase power from 10 watts to 50 watts and make changes in equipment.

January 17, 1941 — 55
Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Fretted Instrument Manufacturing Corporation; United Guitar Corporation; John Garner, individually and as an officer of each corporation; Morris Brooks, individually and as an officer of Fretted Instrument Manufacturing Corporation; and Frank Solvino and Frank Maiello, individually and as officers of United Guitar Corporation, all of 45 Cornellson Ave., Jersey City, N. J., engaged in the manufacture and sale of various kinds of musical instruments including guitars and mandolins, are charged, in a complaint, with unfair and deceptive acts and practices in commerce.

The complaint charges that since 1928 various concerns in the United States have manufactured certain stringed instruments, such as guitars and mandolins, containing a resonating or amplifying device consisting of a delicate metal cone capped by a wooden bridge over which the strings are drawn. Stringed instruments equipped with this device produce, when played, a quality of tone alleged to be different from, more resonant than, and far superior to that produced by stringed instruments not so equipped. A perforated cover plate is affixed to the top of the body portion of the instrument as a protection for the resonating or amplifying device.

The complaint charges that with a view to capitalizing upon the acknowledged superior quality and excellent reputation of stringed instruments so equipped the respondents proceeded to manufacture, sell and place in the hands of various retail dealers for resale, mandolins and guitars which simulate in appearance but do not actually possess the superior resonating or amplifying device. In soliciting the sale of such products, the complaint continues, the respondents have caused advertisements to be placed in music magazines having a wide circulation in the various States, and that typical of such representations made by the respondents is:

"S$9.90 List
GUITAR OR MANDOLIN
DISC TOP
MARVELOUS TONE"

The complaint charges that through the use of the perforated disc or plate in the manner described and by constructing and finishing the interior of their instruments so as to have them simulate instruments equipped with the amplifying or resonating device, the respondents have represented directly or through implication to members of the purchasing public that their instruments are equipped with a resonating or amplifying device, when such is not the fact, and that by use of said perforated disc or plate in the manner aforesaid, the respondents have placed in the hands of unscrupulous dealers a means by which innocent purchasers may be led to believe they are acquiring an instrument equipped with a resonating or amplifying device, when such is not the fact.

In fact, the complaint charges, the stringed instruments manufactured and sold by the respondents are not and have not been equipped with an amplifying or resonating device, nor is such device part of their standard equipment. (4444)

Lincoln Chair & Novelty Company—Alleging unfair and deceptive practices in the sale of wooden furniture and allied items in violation of the Federal Trade Commission Act, a complaint has been issued against A. M. Druckman, doing business as Lincoln Chair & Novelty Co., 146 West 46th St., New York.

The complaint alleges that the respondent, a furniture distributor, offers and sells to retail dealers, furniture made in factories which he does not own, control or operate; that in advertising matter circulated in commerce he offers such merchandise under the name of the Lincoln Chair & Novelty Co. as the maker, and that such merchandise, shipped to purchasers by the factories which manufacture it on the respondent’s order, bears the labels and shipping tags of the Lincoln Chair & Novelty Co. and is shipped upon the respondent’s bill of lading.

Trade magazine advertisements of the respondent’s merchandise, according to the complaint, contain a list of “factories” purportedly located at Gardner, Mass., Jamestown, N. Y., Richmond, Ind., and Springfield, Mo., with “executive offices” at 146 West 46th St., New York.

The complaint alleges that the respondent’s representations are misleading and untrue in that the Lincoln Chair & Novelty Co. does not make the merchandise advertised; neither does the respondent own or control any furniture factories where such merchandise is made, nor are there any furniture factories maintaining their executive offices at the respondent’s New York business address. (4445)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Mendoza Fur Dyeing Works, Inc., 722 East 133rd St., New York, engaged in the dyeing of furs for fur coats and clothing, has been ordered to cease and desist from certain misrepresentations.

The Commission finds that in the course of its business and for the purpose of inducing customers to forward pelts for dyeing and processing, the respondent furnishes to some customers various sketches or designs for use in the manufacture of fur garments, and also labels to be attached to such garments designating them as “Mendoza Furs.”

To prevent further advertised, the Commission finds, in various circulars, newspapers and periodicals, that the sketches supplied by it are adaptations of designs by famous Parisian couturiers. The respondent also represented that furs processed by it have won a prize or award in a competitive competition in Paris, France. These various advertisements carry reproductions of the various labels which the respondent represented were won and which purport to be labels of Parisian couturiers such as Schiaparelli, Vionnet, Heim, Max and Jeanne Lavin, and others.

In truth, the Commission finds, the sketches and designs furnished by the respondent were not prepared by any Parisian couturiers, and the garments to which such labels are attached were not manufactured in Paris, France, and no garment of the respondent ever won a prize or award in a competition with garments of others in Paris, France, except that the respondent, in 1928, was awarded Grand Prix, a gold medal and diploma by the “Exposition d’Economie Domestique”, held at Paris, France, “for its excellent process of the imitation of skins of beaver, fox and other furs.”

The respondent is ordered to cease and desist from representing, through use of their names on labels, or in any other manner, that garments made of furs processed by the respondent are made or designed by Schiaparelli, Vionnet, Heim, Max and Jeanne Lavin, or any other couturier, when such is not the fact; using the names of well-known designers of women’s clothing on labels or in any other manner to designate, describe or refer to garments not in fact designed by the persons or persons whose names are used; representing that sketches or designs furnished by the respondent to its customers are sketches or designs prepared by Parisian couturiers, and that the labels supplied with such garments purport to be labels of Parisian couturiers such as Schiaparelli, Vionnet, Heim, Max and Jeanne Lavin, or other couturiers.

In fact, the Commission finds, the sketches and designs furnished by the respondent were not prepared by any Parisian couturiers, and the garments to which such labels are attached were not manufactured in Paris, France, and no garment of the respondent ever won a prize or award in a competition with garments of others in Paris, France, except that the respondent, in 1928, was awarded Grand Prix, a gold medal and diploma by the “Exposition d’Economie Domestique”, held at Paris, France, “for its excellent process of the imitation of skins of beaver, fox and other furs.”

The respondent is ordered to cease and desist from representing, through use of their names on labels, or in any other manner, that garments made of furs processed by the respondent are made or designed by Schiaparelli, Vionnet, Heim, Max and Jeanne Lavin, or any other couturier, when such is not the fact; using the names of well-known designers of women’s clothing on labels or in any other manner to designate, describe or refer to garments not in fact designed by the persons or persons whose names are used; representing that sketches or designs furnished by the respondent to its customers are sketches or designs prepared by Parisian couturiers, and that the labels supplied with such garments purport to be labels of Parisian couturiers such as Schiaparelli, Vionnet, Heim, Max and Jeanne Lavin, or other couturiers.

In fact, the respondent is ordered to cease and desist from representing, through use of their names on labels, or in any other manner, that garments made of furs processed by the respondent are made or designed by Schiaparelli, Vionnet, Heim, Max and Jeanne Lavin, or any other couturier, when such is not the fact; using the names of well-known designers of women’s clothing on labels or in any other manner to designate, describe or refer to garments not in fact designed by the persons or persons whose names are used; representing that sketches or designs furnished by the respondent to its customers are sketches or designs prepared by Parisian couturiers, and that the labels supplied with such garments purport to be labels of Parisian couturiers such as Schiaparelli, Vionnet, Heim, Max and Jeanne Lavin, or other couturiers.

Lincoln Chair & Novelty Company—Alleging unfair and deceptive practices in the sale of wooden furniture and allied items in violation of the Federal Trade Commission Act, a complaint has been issued against A. M. Druckman, doing business as Lincoln Chair & Novelty Co., 146 West 46th St., New York.

The complaint alleges that the respondent, a furniture distributor, offers and sells to retail dealers, furniture made in factories which he does not own, control or operate; that in advertising matter circulated in commerce he offers such merchandise under the name of the Lincoln Chair & Novelty Co. as the maker, and that such merchandise, shipped to purchasers by the factories which manufacture it on the respondent’s order, bears the labels and shipping tags of the Lincoln Chair & Novelty Co. and is shipped upon the respondent’s bill of lading.

Trade magazine advertisements of the respondent’s merchandise, according to the complaint, contain a list of “factories” purportedly located at Gardner, Mass., Jamestown, N. Y., Richmond, Ind., and Springfield, Mo., with “executive offices” at 146 West 46th St., New York.

The complaint alleges that the respondent’s representations are misleading and untrue in that the Lincoln Chair & Novelty Co. does not make the merchandise advertised; neither does the respondent own or control any furniture factories where such merchandise is made, nor are there any furniture factories maintaining their executive offices at the respondent’s New York business address. (4445)
ship is limited in number or time, when such is not a fact; that the sale or distribution of lists of names for the alleged purpose of promoting social intercourse, that they will cease and desist from entered into a stipulation in which they agree, in connection with the operating under the firm names of Nancy Jordan Club and American Exchange—

Vendol Company—David H. Fulton, trading as Vendol Company, 1 West Biddle St., Baltimore, engaged in the sale and distribution of a medicinal preparation known as “Vendol”, offered as a treatment for constipation and related conditions, has been ordered to cease and desist from certain misrepresentations, the findings continue, and descriptions of the products offered, in newspapers and periodicals having a general circulation, in continuities broadcast from radio stations, and in other printed matter distributed in commerce, has represented that the preparation is a cure and an effective remedy for constipation, stomach disorders, liver ailments, muscular or joint pains, and similar ailments; that in all cases it brings relief to sufferers from constipation, stomach and liver disorders, pains in muscles and back, and headache and rheumatism; that it assures good digestion and enables one to eat all kinds of food without fearing acid indigestion; that it prevents acidity, gas and similar ailments; is a tonic and benefits and tones the system, soothes the nerves and relieves and ends sleeplessness and insomnia; strengthens the stomach and digestive organs; is an appetizer; and will overcome or cure “irregularity” of the bowels.

The Commission finds that these representations are false and misleading in that “Vendol” has no therapeutic value in excess of that afforded by a laxative with mild diuretic and anti-acid effects.

The respondent is ordered to cease and desist from representing that the preparation is a cure or remedy for constipation, or constitutes a competent or effective treatment therefor, in excess of furnishing temporary relief for such condition; that the preparation is a cure or remedy for stomach disorders, liver ailments, skin disorders, dyspepsia, or that it constitutes a competent or effective treatment thereof, in excess of furnishing temporary relief when such conditions are due to constipation or the need of a mild diuretic; that the preparation is a cure or remedy for muscular or bodily pains, rheumatism, headaches, dizziness, excess acidity, indigestion, cramps, indigestion, bad breath, palpitation, bloating, stiffness or heart flutterings, or that it is a cure or remedy for any disease or malady of which such ailments may be symptoms, or that it has any therapeutic value in the treatment of such symptoms in excess of the temporary relief afforded by a laxative with mild diuretic and slightly anti-acid effects. (3805)

STIPULATIONS

Following stipulations have been entered into by the Commission during the past week:

American Exchange—Nancy Jordan and Samuel I. Turoff, operating under the firm names of Nancy Jordan Club and American Exchange, General Post Office Box 376, New York, have entered into a stipulation in which they agree, in connection with the sale or distribution of lists of names for the alleged purpose of promoting social intercourse, that they will cease and desist from representing that satisfaction is limited in number or time, when such is not the fact; that testimonials have been sworn to, when such is not the fact; that any fee is a complete fee, when any charge is thereafter made in connection with the sale of the lists.

Nancy Jordan and Samuel I. Turoff further agree to cease and desist from making claims with reference to the financial standing, character, education or social position of any person listed with them which are not in accordance with the known facts, and unless in direct connection therewith the source of their information is stated. They also agree to advise a prospective purchaser in writing that the transmittal of only one list of names is included in the membership fee, and that a charge is made for all lists which may be transmitted thereafter. They further agree to desist from misleading applicants or filling-in application blanks. (02700)

Ambola Products Company, Hastings, Neb., engaged in selling a preparation recommended for such conditions as dandruff, itching scalp and falling hair, designated as “Ambola Hair Tonic” and “Ambola Cream For Hair”, has entered into a stipulation in which it agrees to cease and desist from representing that the preparation will make hair healthy or will impart to hair its natural shade; will restore to hair its natural beauty, color or luster; will bring instant results; will stop, eradicate or get at, the cause of hair or scalp troubles or scalp infections; is of value for all scalp or hair troubles or is of value for any scalp or hair trouble unless such scalp or hair trouble is such that it may be benefited by the application of a mild antiseptic, rubefacient or emollient; will give life to the hair or aid in causing hair to become luxuriant; will kill dandruff germs or rid the scalp of or stop dandruff; is a competent and effective treatment for eczema of the scalp; will serve to prevent hair from falling out or fading; will stop itching scalp condition or will do more than afford temporary relief for itching scalp, or will relieve itching scalp within any definite period of time; is a “specific” treatment and is the result of years of research that any of its ingredients will penetrate the scalp; or, by the use of the name “Ambola Cream For Hair” or in any other manner, representing that the preparation is in the form of a cream. (02701)

Bair-Collins Co., Roundup, Montana, engaged in selling coal designated “Keene Coal”, has stipulated to discontinue representing that one-eighth inch of soot reduces coal efficiency 45 per cent; that the use of Keene Coal will get all of its heat value; that Keene Coal does not produce injurious gases and is free from sulphur; that Keene Coal does not contain destroying sulphuric acid, and is sootless, dustless or smokeless; that Keene Coal produces 96.45 per cent heat, and that after burning Keene Coal a stove is clean inside or free from soot. (02699)

Berlou Manufacturing Company—Bernhardt Peterson, trading as Berlou Manufacturing Company, Marion, Ohio, engaged in the sale and manufacture of an alleged mothproof preparation designated as “Berlou”, has entered into a stipulation in connection with the advertisement, sale or distribution of his product, to cease and desist from using the word “permanent” or “life-time”, or of any other words of similar implication as descriptive of the protection against moths alluded to that it will cease representing his product, and from use of the word “permanent” or “life-time” or other words or representations the effect of which may tend to convey the belief to purchasers that the moth immunizing effect of his product will last, continue or endure forever. (3016)

L. Buchanan Company, Inc., 24 Johnson Ave., Brooklyn, manufacturer of comforters and other related items containing feathers and down, has stipulated that in the advertisement or sale of its products it will cease and desist from using the words “Handcrafters”, “Hand-Makers”, or similar words the effect of which is to convey the belief that the products are hand-made or hand-stitched. The corporation also stipulates that it will discontinue selling or offering its products which are composed of or contain rayon without clear and unequivocal disclosure in all invoices, advertising or sales promotional matter of the fact that the products are composed of or contain rayon. (3019)

Carnation Company, Milwaukee and Seattle, has entered into a stipulation in which it agrees to cease and desist from certain representations in the sale of “Carnation Irradiated Evaporated Milk”.

The respondent corporation stipulates that it will cease representing, directly or by implication in its advertising, by use of such ex-
pressions as “Producers of Irradiated Carnation Evaporated Milk” or otherwise, that it produces the milk from which its product is processed.

In its stipulation the respondent corporation states that it does not produce the milk from which its evaporated milk is processed and also avers that “Irradiated Carnation Evaporated Milk” is cows’ milk which it produces from dairy farms which it inspects and which meet the sanitary requirements of the Federal Trade Commission that its product then is processed according to its own method in its own plants.

The respondent corporation further avers that the words “Producers of”, when used in the phrase “Producers of Irradiated Carnation Evaporated Milk”, were used by it with the intent to convey to the public that its product had been packed under the conditions above mentioned. (02703)

Chekit Company—Hogan G. Smith, trading as Chekit Company, 1710 First Ave., South, Minneapolis, packager and seller of a powder product for use in treating hosiery and other garments, in a stipulation entered into with the Commission, agrees to cease representing that use of his product as a treatment for silk or rayon hosiery or lingerie will (1) prevent runs, rips, snags or breaks in, or the shrinkage of fading of, such fabrics; (2) double or improve the wearing quality of hosiery or lingerie which has already been given a treatment of this character; (3) reduce the user’s hosiery expense by one-half, and (4) make such hosiery proof against rain spotting or do more than increase its resistance to spotting by rain. (3021)

Cole and Company, a corporation, Sterick Building, Memphis, Tenn., conducting an advertising agency which disseminated advertisements for a cosmetic preparation designated “Nix Deodorant Cream”, on behalf of The Nix Cosmetics Company, Memphis, has stipulated that it will cease and desist from disseminating any advertisements which represent that the application of Nix Deodorant Cream stops the flow of perspiration or stops perspiration odor for days; that Nix affects perspiration or perspiration odors in a new way or in a way different from that of other preparations; or that Nix neutralizes or has any other substantial effect upon perspiration acids.

The respondent further agrees to cease and desist from misrepresenting, by the use of misleading headlines or otherwise, that any girls are "wanted", or from otherwise representing that The Nix Cosmetics Company has any employment to offer. (02969)

Foley & Company, 945 George St., Chicago, engaged in selling a medicinal preparation recommended for the treatment of coughs, designated “Foley’s Honey & Tar Syrup,” has entered into a supplemental stipulation in which it agrees to cease and desist from representing that the preparation has any therapeutic action in excess of temporary relief for coughing due to irritation of the throat and respiratory tract when these symptoms are due to mild inflammation of the mucous membranes of these structures; that it stimulates the irritated tissues of the bronchial tubes, other than their mucous secreting glands, or that it will give continuous comfort to the user without continuous administration. (01454)

John E. Lucky Shoe Company, and Leonard & Barrows Shoe Company, 191 Center St., Middleboro, Mass., two corporations having the same officers and a single place of business, and engaged in the manufacture and sale of shoes, have stipulated with the Federal Trade Commission that they will cease and desist from representing, as through the use of the words “London, England”, or the word “British”, that their domestically made products are British products, and from the use of those words or other words of similar implication as a mark, stamp, brand or label for their products or in any other way so as to convey the belief that the products have been imported from London, England. (3015)

New Jersey Pulverizing Company, 205 West 34th St., New York, in a stipulation entered into with the Commission, agrees to desist from use of the coined word “Pummy” as a trade name for its product closely simulating pumice in appearance and designed for use in dental laboratories as a prophylactic or in the polishing of plates, the main ingredient of the product being sand. The respondent also agrees to desist from employing the word “Pummy” or “Pumice” or any artistic or other simulation of “Pumice”, the effect of which tends to convey the impression that the product is pumice, a volcanic ash or dust, as the term pumice is accepted and understood to mean. The respondent, according to the complaint, also sells other products, including pumice or pumice stone. (3020)

Newman Products Company—William Newman, trading as Newman Products Company and as The Newman Institute, 135 Lorimer St., Brooklyn, engaged in the sale and distribution of medicinal preparations designated “Williams KornX”, “Williams Foot Balm”, “Williams Foot Shampoo” and “Williams Foot Powder”, has entered into a stipulation in which he agrees to cease and desist from use of the word “Institute” as part of or in connection with his trade name; issuing any so-called “Certificate” or similar document in which representations are made that the bearer or any person whose name is written or inscribed thereon has completed a course of study, has received or passed an examination in chiropody or any other course, or is qualified to lecture or advise concerning foot health or care; representing, by use or display of signs or placards bearing the words “Foot Health Clinic” or “Foot Health Remedy”, or otherwise, that his salesmen or agents are conducting clinics or are qualified to conduct clinics or examine and treat patients, or that his products are the competent remedies for maladies, diseases or ailments of the feet generally; representing as the customary or regular price of his products prices which are fictitious and in excess of the prices at which such products are customarily sold; representing by direct statement or by reasonable inference, either in his advertising media or by statements by his canvassing salesmen or agents, that his commodities were manufactured by or purchased from J. B. Williams Company, that his business is connected with that of the J. B. Williams Company in any way, or that he or his salesmen or agents are employed by or otherwise connected with that company; that any of the preparations offered for sale by him is a competent remedy or effective treatment for athlete’s foot, swollen ankles or ingrown toenails, or for tired, achin, burning or swollen feet generally; that any of such preparations constitute a speedy, prompt or permanent cure or remedy for corns, callouses or warts and prevents their recurrence, relieves pain or soreness incident to bunions, ingrown toenails or ailments of the feet generally, and that use or application of the preparations will result in the relief or alleviation of headaches, backaches or fatigue, or the pain or discomfort incident thereto. (3017)

Lydia E. Pinkham Medicine Company, Lynn, Mass., engaged in selling medicinal preparations designated “Lydia E. Pinkham’s Vegetable Compound” and “Lydia E. Pinkham’s Vegetable Compound Tablets”, has stipulated that it will forthwith cease and desist from representing, directly or by implication:

(a) That either product is of benefit to, or an effective remedy for female functional disorders, menstural aberrations or menopause, in excess of relief of symptoms associated with and caused by menstrual aberrations and symptoms associated with and caused by menopause, and as a uterine sedative;
(b) That either product is of benefit for any symptoms, ailments or conditions that are due to organic disease;
(c) That either product will overcome melancholia, act as an aphrodisiac or enhance the attractiveness of the user;
(d) That either product is a general system tonic;
(e) That either product will afford permanent relief from nervousness;
(f) That the products are fully identical in purpose and effect.

The Lydia E. Pinkham Medicine Company further agrees that whenever reference is made to the brand name of the tablets in advertising, it will state, in direct connection therewith, in appropriate terms, that the product contains added iron.

The company further agrees not to publish or cause to be published any testimonial containing any representation contrary to the foregoing agreement. (02702)

Quill Club—Violet F. Bezirjian, operating as The Quill Club, 3503 South Broadway, Englewood, Colo., engaged in selling lists of names purporting to be names of members of The Quill Club, for the alleged purpose of promoting social intercourse, has agreed to
cease and desist from representing that The Quill Club is a permanently established organization, or an organization of any kind; that she guarantees or assures the introduction of applicants to congenial people of the ages specified, or issues guarantees; that her statements relating to the financial or other standing, education, character, age, occupation or profession of those whose names appear on lists, are other than the mere statements of those persons themselves in the absence of some reasonable investigation into the truth or falsity of such statements, or that her method is exclusive, unique, or different from the methods of others engaged in competition with her in promoting social intercourse. (02697)

E. A. Stephens & Company, Inc., 1843 Wazee St., Denver, Colo., engaged in the purchase of raw furs from trappers and dealers, has entered into a stipulation in which it agrees to cease and desist from the use in its advertisements, and advertising or printed matter, or in any other way, of the picturization of any building, either alone or in connection with its corporate or trade name, or in any other manner the effect of which may convey the belief to customers or prospective customers that it occupies or conducts its business from such building, when such is not the fact. (3014)

Trabulsi Textile Company, Inc., 387 Fourth Ave., New York, engaged in the sale and distribution of men's neckware, has stipulated that it will forthwith discontinue selling or offering for sale any silk product which contains any metallic weighting, without full and non-deceptive disclosure, in or on the labels, tags, or brands attached to the merchandise and in the invoices and all advertising matter, sales promotional descriptions or representations however disseminated or published, of the presence of such metallic weighting together with the proportion or percentage thereof, as, for example, "Silk with 55% Metallic Weighting," or "Silk, Weighted up to 55%," with the word "weighting" and the percentage thereof printed in conspicuous type. (3018)

Valortone Herb Company—The Julius Skinder, Clinton, Ind., operating under the trade names Valatone Herb Co. and Lavelle Sales Co., has entered into a stipulation in which he agrees to cease advertising that "Valortone," a cosmetic, restores natural luster and loveliness to hair; is an herbal hair treatment and achieves results not obtainable by use of any other preparation. Under his stipulation, the respondent further agrees to discontinue representing that the preparation is a color restorer; will enable users to regain natural color or health of hair, and will stop or banish dandruff or falling hair, or by any other terminology, that it is a competent treatment or an effective remedy for either of these conditions. The respondent also agrees to cease advertising that any offer is "special," unless it is for an expressly limited time, after which acceptances of the offer are refused. (02704)

FTC DISMISSES COMPLAINT

The Federal Trade Commission has dismissed a complaint charging the Robeson-Rochester Corporation, Rochester, N. Y., with unfair practices in the sale of pocket knives so marked as to indicate that they were approved by The Boy Scouts of America. The Commission was informed that the respondent corporation has been dissolved and is out of business.
October 1940 Broadcast Advertising Unit Report

Broadcast advertising volume, in terms of units, is presented on the following pages as reported by 200 broadcasting stations and the national networks. The report is complete for national networks, including the business of the Columbia Broadcasting System, the Mutual Broadcasting System and the National Broadcasting Company. Regional network, national non-network and local businesses are not completely Dealt with in this report; the figures represent the total of such business placed on the 200 stations reporting.

On the last page of this analysis, there appears a complete roster of the 200 stations reporting their October business. There is included also in the list five additional stations whose reports were received too late for inclusion in this tabulation.

Comparison with the list of stations reporting September business discloses that a majority of stations reported their business for both months. The total stations reporting October business is 200 as compared with 206 for September. However, some stations reporting October business had not submitted September business. The significance of this situation is that there is not a constant sample as between the two months which will permit of direct accurate comparison.

What Does It Show?

All stations having national network affiliation carried 3,058,101 program units of network business in the month of October. This represents a 58% increase over the 1,938,928 program units reporting for September. The percentage figures for national network business, the comparison is completely accurate. The increases in network business were as follows:

Political advertising rose from September program unit days of 28,863 to an October total of 460,091, an increase of 1,563.7%. Since political business is carried largely as a substitute for existing business, it is notable that there were other substantial increases which, by far, offset the expected decreases by business classifications. In general advertising, the building materials classification rose 180%; toilet requisites rose 71.9%; jewelry and silverware increased 69.2%; medical up 56.9%; groceries up 55.4%; automotive up 53.2%; publications up 77.6%. The most notable decreases were found in transportation with a decrease of 38.5%, wearing apparel down 20.6% and miscellaneous down 38.6%.

In the field of station business, exact movements of business between September and October cannot be given. However, it is obvious that station business increased upward of 9%. In retail advertising, station business held its own or possibly decreased slightly. National spot retail business rose sharply, but with small unit volume did not offset the material drop in locally placed retail advertising.

Station business in general advertising increased to the order of 12%. Some of this is due to a 170% increase in political advertising. In so far as unit volume is concerned, the increase is most largely to be accounted for in a 56% increase in toilet requisites advertising, wearing apparel increase of 46%, a 99% increase in the medical classification, a 67% increase in agriculture, and a building materials increase of 100%. These increases in program units were not without reference to announcement units. Announcement units rose approximately 20%; in retail classification the increase was approximately 11%, and in the general classification an increase of approximately 33%.

To Review

A program unit equals one minute of program time. An announcement unit is equal to one announcement, unless the time consumed is one and one-half minutes or longer, in which case the units are calculated to the nearest number of minutes.

Advertising business placed in radio is classified under two major headings—"Retail" and "General." Retail advertising is defined as business placed by businesses which sell direct to consumers. General is that advertising placed by businesses which sell for resale and not direct to consumers.

In retail advertising the analysis presented here classifies retail businesses according to their principal retail line. No attempt is made to classify according to specific product advertised. This classification is most useful to the broadcasting industry since advertising is sold to that line of business where such buying units as have similar business are grouped together.

In general advertising the classification is primarily an analysis of the products advertised by businesses engaged in selling to others for resale. The significance of this to the radio industry is that advertising campaigns are carried for individual products and in this analysis similar products are grouped together. Also included in the general classification are such service businesses as financial, insurance, professional and service, and transportation which, because of their nature, could not properly be considered retail.

There appears on the following page Table I of the October, 1940 Broadcast Advertising Unit Report. The unit analysis and announcement units are presented for retail and general advertising with a total of the two showing the source of such business by national network, regional network, national non-network and local placement. The tables which follow present: Table II—program and announcement units by type of business for retail advertising first for retail and then for general advertising. Table III presents program and announcement units by type of sponsoring business by class of station, first for retail advertising and then for general advertising. Table IV presents program and announcement units by type of sponsoring business and by station metropolitan district or city population, first for retail, then for general advertising.

How to Use It

In the September unit report, it was pointed out that the value of this analysis could be found in the comparison of your station’s business with that of the industry as a whole or with the business of stations like yours—same power, same Commission classification, etc. Furthermore, with stations located in cities of approximately the same size as the one in which your station operates. The purpose of such comparison is to determine whether you have succeeded in selling all of those types of business which are using radio advertising. For example, if drug stores are using radio advertising anywhere in the United States and continue over a period of time to do so, your logical conclusion would be to approach the drug stores in your city fortified with this report which shows that drug stores are using radio advertising.

Going beyond the suggestions made in the September report, the October report furnishes new clues of value in your sales activity. Look again at your first year’s and two-years figures for all advertising, which is largely locally placed, amusements are making a greater use of radio. One encouraging aspect of this increase is that program units are completely accountable for the increase since there was a slight decrease in announcement units. In theatre advertising both program units and announcement units are up. In miscellaneous program units are materially up and announcement units down. There’s a double clue—go after your local theatre and amusement people to place advertising. And, if you already have them as announcement accounts, use this material to convert their business to programs. Building supplies and contractors show an increase of 12% of their business placed in October. Plumbing and heating program units increased more than 150%.

In general advertising, agriculture is up; building materials more than 100% up; hotels and restaurants materially increased; housing equipment and supplies 50% up. Industrial advertising, though small in volume, increased more than six times in units. Medical up almost 100%. Public utilities increased more than 50%; toilet requisites and wearing apparel rose sharply.

There is another side to examine in this analysis. Where business is dropping off, there is an indication for sales effort and service to hold accounts. Automotive advertising, both retail and general, declined in non-national network business. True enough this is largely due to auto show advertising in the month of September which did not repeat in October, but the automotive field is a large one and the station will want to make every effort to hold the business. Professional and service advertising dropped sharply. The business placed by doctors and dentists and chiropractors accounts largely for the decreases, although dentists placed materially more ads than in September.

It is realized that there exists serious limitation in the use of the unit report since only two months’ analyses are available. However, with each successive month, the value of the report increases.

Future Reports

The NAB Research Committee at its meeting January 10th heard a report of the unit plan operation. The Committee was pleased with the cooperation of the stations interested in this undertaking. It is realized that a sufficient number of stations are reporting to enable industry projection at this time. However, they were particularly reluctant to attempt estimates of industry totals on a sample of cooperating stations which changes constantly each month.

In the near future the unit analysis will be presented in summary form in the Broadcast Advertising Unit Report. And the complete analysis will be sent to only those stations cooperating.

The reference file by advertiser is receiving special attention at this time and work is progressing rapidly. Where possible, the reference file is complete, reference work will be done for cooperating stations on a cost basis.

The value of the broadcast advertising unit analysis is dependent upon the cooperation of the industry. By all means, see to it that your station is included.

January 17, 1941 — 75
THE WEEK IN WASHINGTON

FRENESI led the list in a popularity poll of top tunes of the day staged last week by a Detroit theater. BMI tunes were 1-2-3 last week on the coin machines. Seven of the first ten best sellers in the sheet music field were BMI. (p. 77)

NAB Code Committee will meet in New York, February 4-5. (p. 79)

District meetings were held this week in Los Angeles, San Francisco and Portland with banner attendance at each. (p. 80)

The networks reached new agreements with the A. F. of M, covering musicians employed in New York and Chicago. (p. 81)

Technical representatives of parties to the Havana Treaty reported progress in ironing out problems incident to reallocation of frequencies. Ohio State's Broadcast Engineering Conference opens at Columbus, February 10. (p. 82)

The study of how to sell the laundry business has gone out to all members from the NAB Bureau of Radio Advertising. (p. 82)

Senator Johnson (D.-Colo.) reintroduced his bill to prohibit the advertising of alcoholic beverages by radio. (p. 83)

The FCC renewed the license of Station WAAB, Boston, saying that stations should not express their own editorial opinion on controversial issues to the exclusion of others. The FCC will meet with the National Television Systems Committee on Monday, January 27. The licenses of Stations WTM&C and WDLP were revoked because of false testimony and concealment of ownership.

Despite the fact that the great majority of motion picture theatres are not playing BMI music, due to the bans that have been put into effect by Loew's and other prominent theatrical chains, Frenesi led the list in a popularity poll of top tunes of the day staged last week in the Fox Theatre in Detroit to determine what selections Kayser's band should play during his week's engagement there. In addition to the poll, the theatre conducted a survey of radio audience preferences on two Detroit stations—CKLW and WMB-C—which carry both BMI and ASCAP music. The audiences, both theatrical and radio, after having ample opportunity to hear ASCAP's best product, not only gave Frenesi the top position by a wide margin, but picked BMI's There I Go as number four, BMI's I Give You My Word as number five, and BMI's I Hear a Rhapsody and So You're The One as eight and nine respectively.

The ten best sellers of the week on coin machines include Frenesi, There I Go and I Give You My Word as one, two and three. I Hear A Rhapsody, said by the BMI Sales Department to be the fastest rising song in the country, landed as number six, and So You're The One as number ten.

National sheet music sales for the past week, as revealed in Billboard's popularity chart, show seven out of the first ten are BMI. In the east, on the west coast and in the

(Continued on page 78)
Director of Labor Relations; Director of Research; Paul F. Peter, 1626 K St., N. W.

west coast and south. /.../ The first six are BMI (though not identical) on both the east, mid-west, and south. Among the best selling retail records, *I Hear A Rhapsody* carries away second and third positions; the interpretation by Charlie Barnett leading that by Jimmie Dorsey by a small margin; Artie Shaw's *Frenesi* is the top in every record classification, east, mid-west, west coast and south.

**BMI**

*(Continued from page 77)*

BMI's list of affiliated publishers now includes 111 organizations ranging from catalogues containing a few dozen selections to those numbering in the tens of thousands. There are thirty-four publishers of popular music; eight of Latin-American and foreign; ten of hill-billy, racial and traditional American music; nine of patriotic and band music; ten of operatic, standard and classical music; thirty-nine of sacred, gospel and spiritual music; and one of the original music of the American Indian, known as the Redskin Publishing Company. Redskin was formed by Chief Truhart to popularize and preserve the original music of the American Indian. Two of the numbers with dance band arrangements are *Allegheny Mountain Swing* and *Ski-Ga-Gi-Wa-Gi*. They are both by the Supreme Prince of the Sun, a descendant of an Inca chieftan and a colorful character in Tin Pan Alley. One category of BMI compositions has been replenished rapidly since the first of the year. It is that of swing music, and the acquisition of the Benny Goodman catalogue—Regent Publishing Company—the Glenn Miller and the Sammy Kaye catalogues in addition to the Jimmy Lunceford and Larry Clinton books gives BMI a position in this field second to none. Originals are available now by Benny Goodman, Count Basie, Eddie Sauter, Fletcher Henderson, Jimmie Mundy, Cab Calloway, Lionel Hampton, as well as by members of the Glenn Miller and Sammy Kaye bands. So much rich material is available for performance in the newly acquired BMI catalogues that it is probably safe to say that the reservoir of popular tunes has been increased by 60% since the first of the year. These new acquisitions and the wealth of unexplored material in the E. B. Marks, the Peer catalogues, and others, are bringing many performing artists to BMI on treasure hunts. Many hours are spent there in the Research and Copyright Departments going over new material. E. B. Marks, in the current issue of Variety, lists fourteen new popular tunes which have just been released, and hundreds of standards and "unforgettable old timers" now available for licensees of BMI. It is worth noting that the works of many prominent composers are available through the Marks and Peer catalogues as well as through those of SESAC and AMP. A hasty glance at the Marks list in Variety reveals numbers by Rodgers and Hart, Oscar Strauss, Franz Lehar, Ernesto Lecuona, Xavier Cugat and Eliseo Grent. Ralph Peer is calling attention to three Hoagy Carmichael songs—*Georgia On My Mind*, *Lazy River*, and *Rockin' Chair*, written by Hoagy before he became a member of ASCAP, which have been transferred to Peer International and thus made available to BMI.

**Band Leaders Have No Complaint**

A survey by the BMI Public Relations Department of the music situation, as reflected in interviews with band leaders, shows no decrease in fan mail since January 1st. These interviews revealed that about 60% of the requests for tunes these days are for numbers published or cleared through BMI. *I Hear A Rhapsody* is running close to *Frenesi* in current requests. Leaders reported no serious complaints regarding the new music and offered several constructive suggestions, among them, that the broadcasters reinforce the rule to allow at least two hours between the performance of a given song and restrict the performance of certain public domain numbers. Several leaders just under top recognition said that they liked the "new set-up" better than the old, as they are getting an even break as regards new music. They noted more interest in the interpretation given a number than had formerly been the case. All of the leaders (in particular those who are "on the way up") said that it was very important for them to retain their radio wires and that they are making every effort to do so. Several had selected BMI numbers for special treatment in regular performances and had been encouraged by the reception received. Executive managers of leading New York City hotels during the survey reported that business was quite good at the dinner and supper dance periods and that their orchestras are playing an increasing proportion of BMI music.

**What Is ASCAP’s Policy?**

The following letter from Leon de Costa, prominent composer of musical comedies, is offered as a sequel to the statement by Art Kassel, composer and band leader, published in last week’s Reports:

"According to press releases dated January 15, 1941, Mr. Gene Buck, president of ASCAP, defends his refusal to accept Mr. Art
Kassel's resignation from ASCAP by stating: 'that in the 26 years of ASCAP's existence no member has ever sought to resign.'

"Mr. Gene Buck's statement constitutes a deliberate falsehood: after a membership of twelve years I resigned from ASCAP as a writer-member a little over three years ago and refused to renew the radio royalty contracts between ASCAP and myself, having found its policies and the organization extremely unsatisfactory, disagreeable and humilitating.

"Upon request I will furnish an affidavit to that effect.

"I am leaving behind about 200 songs published by T. B. Harms. H. H. Remick and other ASCAP affiliates, numbers used in my musical scores of The Bold Stuter, Kenny Kitty Kelly, etc., and am now publishing with BMI, Associated Music Publishers, and SESAC firms. The musical score of my forthcoming Danny will also be published by a non-ASCAP firm.

"Thought you might like to have this data.”

(Signed) Leon de Costa.

Change of Heart

Many editorials are being received by BMI favoring the broadcasters’ cause, but it was a red letter day when the following comment came in from the Hollywood Citizen of January 11th:

"Childish.

"Some persons are trying to make a complex situation out of ASCAP's battles to get more of the profits of radio broadcasting. There is nothing involved that isn't very simple. ASCAP has something to sell to the radio stations. The radio stations will be willing to buy what ASCAP has for sale when they can buy it at the price they think it worth to their business.

"Appeals of ASCAP for the public to help it get more money than the broadcasters are willing to pay are childish. ASCAP has been getting four and a half million dollars a year of radio broadcasters' money. That makes it a big business institution. It needs no help from the public in a purely selfish scramble for money.

"Anyway, what does the public know about whether ASCAP is entitled to one million dollars a year or nine million dollars a year?"

The Hollywood Citizen ran the columns by Morton Thompson which were strongly pro-ASCAP. Mr. Thompson has left the Citizen to take charge of ASCAP's publicity on the west coast. And while we are out on the west coast, we believe you would be interested in reading the following from the Citizen's editorial columns:

"Persons with ASCAP money are said to have persuaded U.C.L.A. students to stage a purported protest against the radio networks for refusing to pay the price ASCAP demands for the use of its music on the radio.

"ASCAP money is said to have bought quantities of old radios while the newspapers told their readers that the radios were contributed by university students for burning in connection with the so-called protest.

"Let's not censure the U.C.L.A. students for falling for this. If one will note carefully some of the stories appearing in some of the newspapers of the city he will determine that a lot of newspaper readers are being betrayed as a result of ASCAP influence.

"U.C.L.A. students merely wanted a little fun. They are youths. Newspapermen don't betray their readers for fun. They are seasoned with years of experience in the world."

And just opposite under the heading, "Town Meeting," which publishes letters to the editor, we read:

"Too bad the students and others who burned up some old radio sets a few days ago didn't realize that there are a lot of shut-ins like the veterans at hospitals and myself who would have been glad to have old radio sets to use."

Support from Canada

The Canadian Association of Broadcasters at a meeting in Montreal at which practically every station in Canada was represented, decided to join the National Association of Broadcasters in supporting Broadcast Music, Inc. The resolution as passed and released to the Canadian press reads as follows:

"Unanimously resolved that the CAB congratulate BMI on its spectacular success; and stands wholeheartedly behind BMI in its efforts to get a fair deal for broadcasters and the public in musical copyright matters. The CAB members pledge their full support to this great effort."

With more than 15,000 pieces of mail coming into BMI weekly, it is highly desirable that the mail intended for a particular department be sent to that department.

BMI is now divided into the following departments:

Station Relations Department
Logging Department
Cataloguing Department
Professional Department
Arranging Department
Production Department
Editorial Department
Sales Department
Agency Relations Department
Research Department
Continuity Department
Public Relations Department

Statement of John G. Paine, General Manager of ASCAP, before the Committee on Patents, House of Representatives, March 26, 1936, page 564, of "Copyright Hearings":

"You can tune in any night—this is not a question of my personal observation but it is the observation, I am sure, of every single member of this committee—and you will be able to hear in your own parlor ways and means of keeping yourself from smelling bad. Ways and means of regulating your bowels and the bowels of your family, ways and means of keeping your scalp from becoming scurry, and recommendations that you eat fungus of some kind to keep yourself from having a pimply skin.

"I admit that you think I am crude and coarse and crass and vulgar because I have said that. But that is radio.

"Radio does not have in its own business operation, in that which it has created itself, one feature which will make it acceptable in your home or my home, one feature that lends a single degree of respectability except what is created by the men and women that you have heard down here opposing the bill. That is what makes radio acceptable and that alone."

That in a word is what ASCAP's General Manager thinks of the American system of broadcasting . . . Thus Mr. Paine informs advertisers, their agencies and the listening audience that Jack Benny, Fred Allen, Helen Hayes, Lowell Thomas, Raymond Gram Swing, Walter Winchell and Elmer Davis must use ASCAP music before they can even be called "acceptable" . . . that the Metropolitan Opera broadcasts, the programs of the New York Philharmonic, "Great Plays," "Invitation to Learning" are without "a single degree of respectability" without the creations of ASCAP composers!

NAB

CODE COMMITTEE TO MEET

Featured by a luncheon to be attended by outstanding national and state officers of leading women’s and parents’
organizations, and by a luncheon-conference with representatives of the New York advertising agencies, the NAB Code Compliance Committee will hold one of its most important sessions since the inauguration of the Code, Edgar Bill, WMBD, Chairman of the Committee announced today. The meeting will be held at the Hotel Roosevelt, New York City, February 4 and 5.

The women's luncheon is by way of fulfillment of a promise made at a similar luncheon in the fall of 1939 when the Code Committee promised the organized women of the country that it would conduct research and surveys leading the way to improved standards for children's programs, both commercial and sustaining. Since that time, the Radio Council on Children's Programs has been organized by the women, and, in cooperation with the NAB, a nationwide survey has just been completed. Mrs. Dorothy Lewis, vice chairman of the Council, who conducted the field work for the Council, will present the findings.

The conference with New York advertising agency people will be held in conjunction with the regular weekly Broadcasters Ball Session at the Stouffer's Restaurant at 12:30 P. M., Wednesday, February 5. Filling in the spot usually occupied by the regularly scheduled weekly guest speakers will be Mr. Bill, and Ed Kirby, retiring secretary of the Code Compliance Committee, who will talk briefly on a War Department policies governing the origination of commercially sponsored programs from Army posts. A general discussion of the Commercial Section of the NAB Code, with particular reference to time limitations, will follow the usual luncheon period.

Paul Peter, NAB Director of Research, and Russell Place, NAB Counsel, who will serve as Secretary of the Code Compliance Committee during Mr. Kirby's leave of absence at the War Department—both of whom have been conferring with the AAAA on the development of new types of time-contract—will be present to take part in the discussions.

Members of the Code Compliance Committee as recently appointed by Neville Miller, NAB president, are:

Edgar L. Bill, WMBO, Pocia, Illinois—Chairman
Hugh A. L. Halli, WOAI, San Antonio, Texas
Earl J. Gobrecht, KSL, Salt Lake City, Utah
Henry P. Johnston, WSGN, Birmingham, Alabama
Gilson Gray, CBS, New York City
J. O. Maland, WHO, Des Moines, Iowa
Frank Mullen, NBA, New York City
Calvin J. Smith, KGAC, Los Angeles, California
Theodore C. Stiebert, MBS, New York City
Russell P. Place, NAB, Washington, D. C.—Secretary

PEABODY AWARDS

The University of Georgia faculty committee which will make the preliminary selections for the George Foster Peabody Radio Awards has been announced by Dean John E. Drewry of the Henry W. Grady School of Journalism, as follows:

Willett Main Kempton, assistant professor of journalism; Miss Carolyn Vance, head, department of speech; Edward C. Crouse, department of drama; Michael A. McDowell, assistant professor of music; Dr. B. O. Williams, professor and head of sociology department; and Dr. Merritt B. Pound, professor of history and government.

The recommendations of this faculty group will be presented to the Advisory Board, which will make the final selections and announcements at a time and place to be decided upon by its members, probably New York in March.

The Peabody Radio Awards were set up by the Regents of the University System of Georgia with the cooperation of the National Association of Broadcasters as a means whereby the oldest chartered state university would recognize and encourage the social responsibilities of the youngest of the media of communication—and also honor a distinguished American.

Members of the Advisory Board are Chancellor S. V. Sanford, University System of Georgia, ex officio; Bruce Barton, president, Batten, Barton, Durstine, and Osborn, advertising, New York City; John H. Benson, president, American Association of Advertising Agencies, New York City; Virginius Dabney, editor Richmond (Va.) Times-Dispatch; Norman H. Davis, chairman, American Red Cross, formerly acting secretary of state, etc., Washington, D. C.; Jonathan Daniels, editor, Raleigh (N. C.) News and Observer; Mark F. Ethridge, vice president and general manager, Louisville (Ky.) Courier-Journal and Times; Waldemar Kaempfert, science editor, New York Times; Alfred A. Knopf, publisher, New York City; Grace Moore, Metropolitan Opera Company, New York City; Dr. John W. Studebaker, United States Commissioner of Education and chairman, Federal Radio Education Committee, Washington, D. C.; Mrs. Marjorie Peabody Waite, daughter of George Foster Peabody, "Yaddo," Saratoga Springs, New York; and Edward Weeks, editor, Atlantic Monthly, Boston, Mass.

1941 NAB REPORTS BINDERS

Binders for the 1941 NAB Reports were sent to all NAB members on January 1. Additional binders may be secured from NAB headquarters at a price of $1.00 each postpaid.

**District Meetings**

**DISTRICT 15**

The broadcasters of the Fifteenth District—Northern California, Nevada and Hawaii—met in San Francisco, on Saturday, January 18. Forty-four persons, representing 21 stations, were in attendance.
The NAB Staff was represented by C. E. Arney, Jr., and Harry Engel, Pacific Coast Manager of BMI, was in attendance.

It was an enthusiastic meeting devoted for the most part to a discussion of the music situation. The public reaction to the transition from ASCAP music was reported by all present as extremely gratifying. Full confidence was expressed in the ability of BMI to fulfill the music requirements of the stations.

A brief discussion of the Code was had and it was agreed that legislative proposals or proposed initiatives or referenda as well as recall proceedings came within the definition of Controversial public issues until they had been qualified for the ballot in full accordance with State law.

The election of a District Director for the ensuing two-year term resulted in the unanimous endorsement of Howard Lane and he is returned to the Board.

Those registered:

William B. Smullin, KIEM; Alvor Olson, KIEM; Lee Goldsmith, KSAN; Harold H. Meyer, KYA; C. L. McCarthy, KGW; Robert W. Dunn, KSFO; Wilt Gunzendorfer, KSKO; Howard Lane, KFBK; Clyde F. Coombs, KARM; F. Wellington Morse, KSL; Lou Keplinger, KSAN; R. V. Bence, KFRC; Eddie Calder, KSHU; A. E. Nelson, KGO-KPO; Howard V. Walters, KDON; Charles P. Scott, KTKC; Preston D. Allen, KLX; Arthur Westlund, KRE; M. L. Bertsch, KHUB; Orel Phillips, KDON; Kay Barr, KGO-KPO; Carl E. Wiemninger, KGO-KPO; Frank N. Cope, KJBS; Fred Ruegg, KOW; Ray Lewis, KOW; John Brunton, KOW; H. H. Wickersham, KJBS; Florence Crowell, KGO-KPO; W. B. Ryan, KGO-KPO; Clare Patrick, KPO-KGO; Glenn R. Dolfberg, KGO-KPO; Will Thompson, Jr., KROY; Keith Kerby, KROW; Edward K. House, KROW; S. H. Patterson, KSAN; Don Hamby, KRE; Clifton Howell, KSFO; Wallace A. God, KJBS; Walter H. Conway, KMYC; Harry Engel, BMI; and M. McKinley Sillerman, SESAC.

DISTRICT 16

The Sixteenth District meeting in Los Angeles on Monday, January 20th, attracted over 50 representatives of 17 broadcasting stations and incidental industries. Many CBS, NBC and NBS officials attended.

In addition, Carl Haymond, KMO, Tacoma, Washington; John Patt of WGAR, Cleveland, Ohio, and Leo Fitzpatrick of WJR, Detroit, participated.

Present, too, was Harry Engel, Manager of BMI's West Coast office; McKinley Sillerman, Station Relations Manager of SESAC; Ralph Peer of Peer International; Gerald King of Standard Radio; Pat Campbell of World Broadcasting Service, as well as representatives of NBC Thesaurus.

Carl Haverlin, Station Relations Manager of Broadcast Music, Inc., outlined the present status of BMI catalogs and music availabilities.

A thorough discussion of methods by which broadcasters may avoid complications and continue to serve public interest with good music was had.

C. E. Arney, Jr., of the NAB staff, detailed other NAB activities.

Don Thornburg of KNX made a stirring appeal for 100 per cent membership, stating that NAB has demonstrated its effectiveness and was entitled to the universal support of Broadcasters.

The following Resolution was adopted at the conclusion of the meeting:

"Resolved: That the NAB members of the 16th District express full and complete confidence in Broadcast Music, Inc., and commend it for the manner in which it has provided an adequate supply of acceptable music for the use of broadcasters. The evidence of the acceptability of the music made available is testified by the public acceptance which the musical programs, since January 1, 1941, have received."

The newspapers of Hollywood and Los Angeles where ASCAP propagandists have been unusually active gave unusually fine and fair treatment to the publicity emanating from the Broadcasters meeting.

In addition, Los Angeles Advertising Club invited Mr. Arney to speak at its regular Tuesday noon meeting on the 21st. His presentation of the Broadcasters' side of the music controversy was enthusiastically received.

Those registered:

S. D. Taylor, Don Otes, KFAC; Harrison Hollaway, John L. Edwards, Glen Heisch, Ernest Felix, Theresa Aeger and Bernie Smith, KFI-KECA; L. W. McDowell, KFOX; Leah McMahon and John Babcock, KFSO; Hal Lea, KFVD; Gene W. Lee, KFXM; Lee Wynne and Helen Smith, KGER; Ben S. McGlashan, H. D. Hancock, and Thelma Kinchener, KGFI; R. A. Sheperd, KHB; L. W. Peters and Wally McLain, KJVE; Carl E. Raymond, KMO; Leo Fitzpatrick, Leo B. Tyson, Alan Cameron, and Bill Conrad, KMPC; Vic Dalton and Lyman Smith, KMTR; D. W. Thornburgh, Hal Locke, Ben Paley, Harry W. Witt, KNX; L. A. Schamblin, KPM; John Austin Driscoll and Hazel Ryan, KRKD; Ernest L. Spencer, KYOE; John W. Swallon, Lew Frost, Alexander Petry, W. L. Marshall, Max Hutto, Don E. Gilman and Sam Hayes, NBC; John F. Patt, WGR.

Harry Engel, Ralph Peer, Artie Mehlinger, Rudy Block and Eddie Jones, BMI; Pat Campbell, World Broadcasting System; Don Allen and Gerald King, Standard Radio; W. H. Beltz, RCA; Dave Glickman, Broadcasting Magazine; A. J. Schrade, Transco; F. S. Kollenberg and W. B. Hupple, Best Drug and United Cigar; M. McKinley Sillerman, SESAC; and Speed Kendall, Los Angeles Times.

DISTRICT 17

Seventeenth District Broadcasters elected Harry R. Spence of Aberdeen, Washington, to a two-year term as District Director at a meeting January 22 in Portland, Oregon. This was largest meeting in District's history with over 60 in attendance. Charles Couche, Sales Manager of KOIN, Portland, was named chairman of this District's Sales Managers group. A Resolution of appreciation for constructive service rendered by C. W. Myers, Retiring Director, was unanimously adopted.
ing musicians at the network key stations in New York and Chicago.

The New York agreements will continue in effect until January 31, 1944. They provide, among other things, that CBS will employ a minimum of 65 staff musicians; NBC, 130 (115 during three consecutive months of the year), and WOR, 40.

"Regular Hourly Rate"

There still seems to be some confusion in the industry about how to determine the "regular hourly rate" of employees covered by the Wage and Hour law.

The regular hourly rate of salaried employees is determined two ways.

1. For those employees who work a regular number of hours each week and whose salary, by custom or agreement, covers those hours. Divide the weekly salary by the number of hours in the regular work week. These employees are entitled to one and one-half times this rate, extra, for each hour they work above 40 each week.

2. For those employees whose hours fluctuate each week, or nearly every week, and who were hired with the understanding that their regular weekly salary was to cover a fluctuating number of hours. Each week, divide the weekly salary by the number of hours worked that week. These employees are entitled to that rate for each hour they work, plus one half of that rate for each hour they work above 40.

Any further questions about this will be answered gladly by the NAB Labor Relations Department.

FREQUENCY REALLOCATION

The chief technical representatives from Canada, Cuba, Haiti, the Dominican Republic, Mexico and the United States, who are attending a regional broadcasting conference in Washington announced Wednesday that the technical committee of the conference, which is meeting at the Federal Communications Commission, is making very satisfactory progress in the solution of the engineering details arising from the radio frequency notifications of the various Governments which are parties to the North American Regional Broadcasting Agreement, Havana, 1937. While some rectifications of a minor character are required in the various notifications by reason of unavoidable conflicts of an engineering nature, all delegates are most optimistic of an early solution.

The work of the technical committee involves the assignment of frequencies in the standard broadcast band to nearly 1300 radio broadcasting stations in the North American region, so that these stations may operate simultaneously with a minimum of interference to their respective services.

This constitutes an engineering problem which requires consideration of each separate frequency assignment. Obviously, no valid statement of frequency assignments can be made until the work of the committee has been completed and referred back to the conference as a whole which holds its plenary sessions at the Department of State.

The FCC notified the State Department last September that the reallocation of frequencies in this country would go into effect March 29, 1941 (NAB Reports, 1940, p. 4571).

OHIO STATE CONFERENCE

Indications are that there will be a record attendance at the Fourth Ohio State Broadcast Engineering Conference to be held at Ohio State University at Columbus, February 10-21.

Dr. Everitt, Director of the Conference, has assembled an unusually fine group of speakers and lecturers for the Conference.

Those who would like to submit questions concerning FCC engineering matters to be discussed at the conference are asked to submit the questions in advance. The questions will be discussed during the "General Discussion and Question Box" conducted by Andrew D. Ring, Assistant Chief Engineer of the FCC in charge of broadcasting, on Wednesday and Thursday, February 12 and 13.

Engineers are also asked to submit in advance questions on FM which they would like to hear discussed during the "Round Table on FM Problems" to be held on Thursday and Friday, February 20 and 21. The Chairman of this Round Table will be Paul deMars of the Yankee Network. E. J. Content of WOR and Dan Gel- lerup of WTMJ will also be at the table.

Engineers who would like to submit questions for discussion during either of these two periods, are asked to submit them to the Director of Engineering at NAB headquarters.

Further information and details concerning the Engineering Conference can be obtained by addressing Dr. W. L. Everitt, Director of the Conference, Ohio State University, Columbus, Ohio.

TRADE STUDY ON LAUNDRIES

"Results from Radio," Vol. 2, No. 1, has gone out to all members from the NAB Bureau of Radio Advertising.
The current study, which is the eleventh to be released by the Bureau since its inception a year and a half ago, tells the success story of the Model Laundry in using radio extensively over WIOD, Miami.

With 65% of its total ad budget devoted to radio, Model reports sales up 95% in four years. In a letter to Mr. Richard Porterfield, Carlton-Porterfield Agency, in charge of the account, Model states, "... we firmly believe radio has done the job for us." The letter and full details of Model's extensive use of radio are included in the study.

Extra copies of the "Results from Radio" folders are available to NAB members on request.

Legislation

JOHNSON BILL

Senator Johnson (D.-Colo.) on Thursday reintroduced his bill (S. 517) which would amend the Communications Act to prohibit the advertising of alcoholic beverages by radio.

The broadcasting industry was very much interested in this bill at the last session of Congress and undoubtedly will be at the present session. At the last session the bill was favorably reported by the Senate Committee on Interstate Commerce and was on the Senate Calendar. The Johnson Bill, which has the same number that it had at the last session of Congress, has been referred to the Committee on Interstate Commerce.

FEDERAL LEGISLATION

HOUSE

H. R. 2526 (WATER, D., Penna.)—To govern practice before Federal administrative agencies. Referred to Committee on Judiciary.

STATE LEGISLATION

CALIFORNIA:

A. 229 (Voigt) BOOKING AGENTS AND AGENCIES—An act regulating and licensing booking agents and booking agencies. Referred to Committee on Labor and Capital.

A. 435 (Maloney) CHILD LABOR—Permits minors to work at night in theatrical and radio productions. Referred to Committee on Labor.

A. 436 (Maloney) CHILD LABOR—Permits minors to work at night in theatrical and radio productions. Referred to Committee on Labor.

A. 437 (Maloney) CHILD LABOR—Permits minors to work at night in theatrical and radio productions. Referred to Committee on Labor.

A. 508 (Cronin) EMPLOYMENT AGENCIES—Requires a $2,000 surety bond for all employment agencies. Referred to Committee on Labor.

A. 509 (Cronin) EMPLOYMENT—Requires a $100 fee for all employment agencies and labor contractors. Referred to Committee on Labor.

S. 311 (Biggar) LABOR—MINORS—Permits minors to work evenings in theatrical and radio productions. Referred to Committee on Labor.

S. 332 (Biggar) LABOR—MINORS—Permits minors to work evenings in theatrical and radio productions. Referred to Committee on Labor.

S. 333 (Biggar) LABOR—MINORS—Permits minors to work evenings in theatrical and radio productions. Referred to Committee on Labor.

COLORADO:

S. 276 (Hirschfield) LIBEL—Relating to libel and slander. Referred to Committee on Judiciary.

S. 292 (Hirschfield) LIBEL—Relating to libel, protecting citizens in their legal rights, fixing penalties and establishing cause of action. Referred to Committee on Judiciary.

S. 293 (Hirschfield) LIBEL—Relating to libel, protecting citizens in their legal rights and fixing penalties and establishing cause of action. Referred to Committee on Judiciary.

S. 294 (Hirschfield) LIBEL—Relating to libel, protecting citizens in their legal rights and fixing penalties and establishing cause of action. Referred to Committee on Judiciary.

S. 584 (Elder) MUSIC COMPOSERS LICENSES—An act concerning the regulation and use in public performance of vocal and instrumental music and provides for the licensing of authors, composers and publishers.

GEORGIA:

MICHIGAN:

H. 35 (M. O'Brien, et al.) EMPLOYMENT AGENCIES—Amends C. L. 1863 by limiting employment agencies fees from an employee to 10 per cent of first month's salary. Referred to Committee on Labor.

NEW YORK:

A. 204 (Crews) EMPLOYMENT AGENCIES—DISCRIMINATION—Prohibits discrimination by employment agencies on account of race, color or religion and authorizes suspension or revocation of license for violation. Referred to Committee on Judiciary.

A. 214 (Schwartz) EMPLOYMENT AGENCIES—Regulates private fee-charging employment agencies and appropriates $40,000 to labor dept. Referred to Committee on Ways and Means.

S. 175 (Phillips) PROPAGANDA—Prohibits dissemination, circulation or publication of propaganda or statements by book, newspaper, speech, radio or other means of communication, to create hatred, violence or hostility against people of this state by reason of their race, color, religion or manner of worship, and fixes penalties for violations. Referred to Committee on Codes.

NORTH CAROLINA:

H. 11 (Same as S. 11) (Bryant) REVENUE ACT AMENDMENTS—Amends and supplements the Revenue Act of 1939. Chap. 158. Amends following taxes: Inheritance, License, Franchise, Income, Sales, Intangibles, Compensating Use, General Administration. Referred to Committee on Finance.

H. 36 (Same as H. 11) (McBryde) REVENUE ACT AMENDMENTS—Amends and supplements the Revenue Act of 1939, Chap. 158 of the Public Laws. Amends following taxes: Inheritance, License, Franchise, Income, Sales, Intangibles, Compensating Use, General Administration. Referred to Committee on Finance.

OKLAHOMA:

H. 14 (Mekovskv, et al.) SALES BELOW COST—To prohibit the selling of items of merchandise below cost as a trade leader. Referred to Committee on Labor and Arbitration.

TENNESSEE:

S. 201 (Headden, et al.) TAX—RADIO STATIONS—Provides for 3 per cent gross receipts tax on radio stations.

FEDERAL COMMUNICATIONS COMMISSION

"The public interest—not the private—is paramount" in radio broadcasting declared the FCC in renewing the
license of the Yankee Network, Inc., station WAAB at Boston with a reprimand for past practices and, at the same time, denying the application of the Mayflower Broadcasting Corp., for a new station in the same city to take over WAAB's present operating facilities of 1410 kilocycles with power of 500 watts night and 1 kilowatt day, unlimited time.

"Under the American system of broadcasting," says the Commission in its decision and order (B-107), "it is clear that responsibility for the conduct of a broadcast station must rest initially with the broadcaster. It is equally clear that with the limitations in frequencies inherent in the nature of radio, the public interest can never be served by a dedication of any broadcast facility to the support of . . . partisan ends. Radio can serve as an instrument of democracy only when devoted to the communication of information and the exchange of ideas fairly and objectively presented. . . . Freedom of speech on the radio must be broad enough to provide full and equal opportunity for the presentation to the public of all sides of public issues."

The Commission by unanimous decision (Commissioner Thompson absent), affirmed its Proposed Findings of Fact and Conclusions of May 31 last, which held that the Mayflower Broadcasting Corp. was not shown to be financially qualified and, moreover, made misrepresentations in its application, but observed with respect to the Yankee Network station in the light of subsequent oral argument:

"The record shows without contradiction that beginning early in 1937 and continuing through September, 1938, it was the policy of Station WAAB to broadcast so-called editorials from time to time urging the election of various candidates for political office or supporting one side or another of various questions in public controversy. In these editorials, which were delivered by the editor-in-chief of the station's news service, no pretense was made at objective, impartial reporting. It is clear—indeed the station seems to have taken pride in the fact—that the purpose of these editorials was to win public support for some person or view favored by those in control of the station.

"The material in the record has been carefully considered and compels the conclusion that this licensee during the period in question has revealed a serious misconception of its duties and functions under the law. Under the American system of broadcasting it is clear that responsibility for the conduct of a broadcast station must rest initially with the broadcaster. It is equally clear that with the limitations in frequencies inherent in the nature of radio, the public interest can never be served by a dedication of any broadcast facility to the support of his own partisan ends. Radio can serve as an instrument of democracy only when devoted to the communication of information and the exchange of ideas fairly and objectively presented. A truly free radio cannot be used to advocate the causes of the licensee. It cannot be used to support the candidacies of his friends. It cannot be devoted to the support of principles he happens to regard most favorably. In brief, the broadcaster cannot be an advocate.

"Freedom of speech on the radio must be broad enough to provide full and equal opportunity for the presentation to the public of all sides of public issues. Indeed, as one licensed to operate in a public domain the licensee has assumed the obligation of presenting all sides of important public questions, fairly, objectively, and without bias. The public interest—not the private—is paramount. These requirements are inherent in the conception of public interest set up by the Communications Act as the criterion of regulation. And while the day to day decisions applying these requirements are the licensee's responsibility, the ultimate duty to review generally the course of conduct of the station over a period of time and to take appropriate action thereon is vested in the Commission.

"Upon such a review here, there can be no question that The Yankee Network, Inc., in 1937 and 1938 continued to operate in contravention of these principles. The record does show, however, that in response to a request of the Commission for details as to the conduct of the station since September, 1938, two affidavits were filed with the Commission by John Shepard, 3rd, President of The Yankee Network, Inc. Apparently conceding the departures from the requirements of public interest by the earlier conduct of the station, these affidavits state, and they are uncontradicted, that no editorials have been broadcast over Station WAAB since September, 1938, and that it is not intended to depart from this uninterrupted policy. The station has no editorial policies. In the affidavits there is further a description of the station's procedure for handling news items and the statement is made that since September, 1938, 'no attempt has ever been or will ever be made to color or editorialize the news received' through usual sources. In response to a question from the bench inquiring whether the Commission should rely on these affidavits in determining whether to renew the licenses, counsel for The Yankee Network, Inc., stated at the second argument, 'There are absolutely no reservations whatsoever, or mental reservations of any sort, character or kind with reference to these affidavits. They mean exactly what they say in the fullest possible amplification that the Commission wants to give to them.'"

"Relying upon these comprehensive and unequivocal representations as to the future conduct of the station and in view of the loss of service to the public involved in the deletion of this station, it has been concluded to grant the applications for renewal. Should any future occasion arise to examine into the conduct of this licensee, however, the Commission will consider the facts developed in this record in its review of the activities as a whole."

Adds the Commission:

"One further point must be dealt with in view of certain contentions made in the course of this proceeding. It has been pointed out that The Yankee Network, Inc., is also the licensee of a second regional station in Boston, Station WNAC, and the contention has been made that the applications for renewal for WAAB should, therefore, be denied. This argument raises a serious and troublesome question of policy to which the Commission has given considerable attention and which is presently under consideration in connection with the Commission's investigation into chain broadcasting. The question is peculiarly one which cannot be effectively and fairly dealt with by singling out individual instances for treatment. It should be understood, therefore, that the grant of these applications of The Yankee Network, Inc., for renewal is without consideration of the question of dual ownership. The Commission will reserve its decision on that point until such time as it is prepared to consider a more general policy for application on a country-wide basis."

The renewal grant includes WAAB's main and auxiliary transmitters.
FCC TELEVISION REPORT

The FCC will meet with the National Television Systems Committee on Monday, January 27, at which time the latter will make a progress report on its study of the television situation.

The conference, which is not in the nature of a hearing but will be open to the public, will be held in Hearing Room A of the Interstate Commerce Commission Building, starting at 10 a.m. The various panels assigned to specific studies will report through their respective chairmen.

The National Television Systems Committee, comprising engineers representative of the industry, was created July 31, 1940, by the Radio Manufacturers Association in cooperation with the Commission for the purpose of exploring existing television systems with a view to developing and formulating standards which would be acceptable to the industry as a whole and so expedite the inauguration of a basically sound national television system.

As a preliminary to receiving this over-all report of the National Television Systems Committee, members of the Commission will visit New York Friday, January 24, for the purpose of witnessing various demonstrations of late television developments.

INTERNATIONAL BROADCAST STATIONS

The FCC has extended to July 1 next the time in which international broadcast stations in this country must operate on power of at least 50 KW. This is the minimum power deemed necessary by the Commission to render satisfactory international service, particularly to South America.

This extension has been granted in view of the fact that 11 of these stations have construction permits authorizing installation of new equipment but plead that time has not permitted completion of the work. The single exception is WCAB, Newton Square, Pa., licensed to the WCAU Broadcasting Co., which will be deleted upon erection of a new international broadcast station by the Columbia Broadcasting System to supplant WCAB.

All international stations will be expected to conform to the minimum power requirement during this period, as no further extension of time is contemplated.

LICENSE REVOCATIONS

The FCC has authorized issuance of orders to revoke the licenses of radio broadcast stations WTMC and WDLP, in Ocala and Panama City, Florida, respectively.

False testimony and concealment of ownership are charged.

Investigation disclosed that in both cases the actual operator is John H. Perry, of New York and Florida, who owns the Panama City News-Herald, the Pensacola News-Journal, and the Jacksonville Journal.

Inquiry was instituted when applications were made to transfer control of these stations to Perry properties. Station WTMC, which operates on 1500 kilocycles with 100 watts power, is licensed to the Ocala Broadcasting Co., Inc., of which John T. Alsop, Jr., of Jacksonville, was declared to be the principal owner. Transfer was sought to the Pensacola News-Journal Co.

Station WDLP, operating on 1200 kilocycles with 250 watts power by day and 100 watts at night, is licensed to the Panama City Broadcasting Company, which sought transfer to the Bay County Publishers, Inc., a wholly owned subsidiary of the Pensacola News-Journal Company which publishes the Panama City News-Herald.

The revocation orders allege that the real party in interest from the outset in the present licensees has been Perry, and that his interest in the licensees has been deliberately concealed from the Commission.

UNLICENSED OPERATOR CAUGHT

Field inspectors of the FCC's Huntington, W. Va., office, acting in cooperation with the local United States Marshal, apprehended at Hubbell, that state, a youth who is alleged to have engaged in unlicensed broadcast which caused interference to authorized radio programs.

Using the non-existent call letters WBIB, this offender transmitted entertainment that "collided" with regular services. Amateurs, particularly, complained of the resultant interference.

The illegal station, which used a transmitter of approximately 25 watts and a steel vertical radiator, was located by means of the Commission's new direction finding equipment.

The operator has been charged with violation of Sections 301 and 318 of the Communications Act.

FROM THE FCC MAIL BAG

A doctor inquires about requirements that broadcast program continuity regarding feeds be submitted to medical authorities prior to transmission. The Federal Communications Commission has no such regulations. Existing legislation places the initial responsibility for the selection of program material upon the individual stations. The Commission, however, will consider specific complaints regarding broadcast material in connection with a station's renewal of license. The National Association of Broadcasters has a code of ethics for the guidance of broadcasters, and many of its provisions deal with advertising. The Federal Trade Commission is the Government agency vested with authority to consider matters involving misrepresentations or fraudulent methods of competition in interstate commerce.

Various inquirers are informed that there is no provision in the Communications Act, nor has the Commission promulgated any rule or regulation, specifically concerning the solicitation of new bank accounts by radio, or the broadcast of grain price quotations.

A New York firm wants to know whether an additional charge may be made for broadcasting a program by means of FM simultaneously with the same program over standard broadcast facilities. The provisions of the Communications Act which authorize the Commission to pass on the amount of charges for communications service relate to common carriers only. A person engaged in radio broadcasting is not deemed a common carrier under this statute. Hence the Commission has no say in individual program rate charges.

A letter requests "forms" to be used in making complaint concerning alleged violations of law by a radio station. The Commission does not have or supply forms for this purpose. The person is told that he may summarize and submit to the Commission, in an affidavit executed before a notary public, any facts in his possession to support his complaint. Such affidavit should, among other things, state the type of station referred to, its call letters and location; the name of the owner and operator; the various dates and, as nearly as possible, the definite time the alleged violations were committed. This information should be accompanied by the names and post office addresses of witnesses, together with a brief summary of the facts to which they would testify.

A lawyer who asks about the effect of designating applications for broadcast facilities for hearing on the same day is advised:

Such action does not in and of itself operate to consolidate the hearings on these two applications, nor does it have the effect of making each applicant an intervenor in the hearing on the other's
application. Section 1.194 of the Commission's Rules of Practice and Procedure provides:

"The Commission, upon motion, or upon its own motion, will, where such action will best conduce to the proper dispatch of business and to the ends of justice, consolidate for hearing (a) any cases which involve the same applicant or arise from the same complaint or cause, or (b) any applications which by reason of the privileges, terms or conditions requested present conflicting claims of the same nature."

Where the Commission orders a consolidation of the hearing on two or more applications, such order has the effect of permitting the respective applicants to participate in the hearing on the other application or applications. If participation is desired by either applicant in the hearing on another's application, a petition to intervene or a motion to consolidate the hearings may be presented to the Commission. If it is proposed to file a petition to intervene, attention is called to Section 1.102 of the Commission's Rules of Practice and Procedure and to the Commission's decision dated September 29, 1939, interpreting this rule. (In re Hazlewood, Inc., Docket No. 5698.) In the event of intention to file a motion to consolidate these hearings, the motion should show wherein these applications "present conflicting claims of the same nature," and, also, that consolidation "will best conduce to the proper dispatch of business and to the ends of justice."

It should be pointed out that neither intervention in nor consolidation of hearings on conflicting applications is necessary to a comparative consideration of such applications by the Commission. Comparative consideration can be given by the Commission in such cases notwithstanding the fact that separate hearings are held and the applicants do not intervene in each other's hearing. Nor does consolidation of hearings necessarily mean that simultaneous action on the conflicting applications will be taken by the Commission where a proper dispatch of business and the ends of justice require separate action.

Reply to a number of inquiries states that as of January 1 there were 8,111 standard broadcast stations licensed and 51 outstanding construction permits.

**BROADCAST MEASUREMENTS**

During December FCC experts measured 720 broadcast stations with 155 not measured.

Of the 720, 669 stations showed a maximum deviation within 0-10 cycles; 49 stations a maximum deviation of 11-25 cycles; 2 stations with a maximum deviation within 26-50 cycles. No stations showed a deviation over either 20 or 50 cycles.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following broadcast hearings are scheduled to be heard by the Commission during the week beginning Monday, January 27. They are subject to change.

**Monday, January 27**

NEW—Edward J. Doyle, Rochester, N. Y.—C. P., 1310 kc., 1 KW night; 1 KW day; unlimited, DA day and night.

**Thursday, January 30**

NEW—William D. Hudson and Violet Hutton Hudson, Clarksville, Tenn.—C. P., 1370 kc., 250 watts, unlimited time.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future dates for broadcast hearings. They are subject to change.

**FEDERAL COMMUNICATIONS COMMISSION ACTION**

**APPLICATIONS GRANTED**

Farnsworth Television and Radio Corp., Fort Wayne, Ind.—Granted construction permit for a new research and experimental television broadcast station to operate on frequencies 66000-73000 kc. (Channel No. 3), 1 KW aural and visual power, A3 and A5 emission (B4-PYB-48).

KGW—Oregonian Publishing Co., Portland, Ore.—Granted construction permit to install directional antenna for day and night use and increase nighttime power from 1 to 5 KW; 620 kc., 5 KW day, unlimited time (B5-P-2954).

WSUN—City of St. Petersburg, St. Petersburg, Fla.—Granted modification of license to change hours of operation from specified hours to unlimited time; 620 kc., 5 KW, using directional antenna at night (facilities of WFLA) (B3-ML-1045).

WBZ—Westinghouse Electric & Manufacturing Co., Boston, Mass.—Granted reinstatement of construction permit (B1-P-2161 as modified) to install new transmitter and directional antenna system for day and night use and to move transmitter to a new site about 12 miles southeast of Boston (B1-P-2908).

WMZ—Southwestern Broadcasting Co., Inc., Macon, Ga.—Granted modification of license to change hours of operation from L-KOB to unlimited and power from 1 KW night, 5 KW to local sunset, to 5 KW day, 1 KW from local sunset to 250 watts after sunset KOB; and 250 watts after sunset KOB; 1150 kc. (B3-ML-1037).

KWL—Luther College, Decorah, Iowa.—Granted construction permit to change frequency from 1270 to 1210 kc.; increase hours of operation from daytime only share KGCA, to daytime; increase power from 100 to 250 watts; install new transmitter and move transmitter site locally to 0.146 mile from present site.

WTM—Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted construction permit to move transmitter site; install new equipment; install directional antenna for night use; change frequency from 1210 kc. to 1200 kc.; increase power from 250 watts to 1 KW, unlimited time (B3-P-2985).

WEB—Head of the Lakes Broadcasting Co., Duluth, Minn.—Granted construction permit to increase night power from...
DESIGNATED FOR HEARING

WLAK—J. P. Marchant, D. J. Carey, Melvin Mayer (Transferor), The Tribune Company (Transferee), Lakeland, Fl.—Application for construction permit to move transmitter southeast of Lakeland, from 1310 kc., unlimited time, to 1300 kc., 5000 watts, unlimited time, 1300 kc., unlimited time; to conduct tests, for the period January 18 to February 9, 1941, in order to broadcast a variety program.

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Denied special temporary authority to operate from midnight to 1 a.m., EST, for a period not to exceed 30 days, in order to broadcast a variety program.

WKBK—Balaban & Katz Corp., Chicago, Ill.—Granted extension of special temporary authority to operate two transmitter units to be installed and operated from the State-Lake Bldg., Chicago, Ill.; Link Transmitter Type No. 50-UTX with 100 watts power for visual and Link Transmitter Type No. 25-UBX 25 watts power to be used for aural; transmission of steel tower to be used on roof of said building, in order to conduct tests, for the period January 19 to February 17, 1941, in accordance with construction permit (File No. B4-PYE-50).

WJJO—O. E. Richardson and Fred L. Adair, Hammond, Ind.—Application for authority to transfer control of corporation for a consideration of $40,000; William Wyse 49.9%, Wesley E. Brown, 0.1% of capital stock, for a cash consideration of $12,500 (B3-TC-251).

KLOY—The Associated Broadcasters, Inc., San Francisco, Calif.—Application for construction permit to change frequency from 560 kc. to 140 kc. (under NARBA); increase power from 1 KW night, 5 KW day, to 50 KW; move transmitter site locally to southwest of Alvarado, Calif.; install new transmitting equipment and directional antenna for both daytime and nighttime use (B5-P-3028).

KIDW—Lamar Broadcasting Co., Lamar, Colo.—Granted special temporary authority to operate from 1800 to 1900, Monday to Saturday, from 1800 to 2200 on Sunday, from 1700 to 1900, Monday to Saturday, from 1700 to 2000 on Sunday, from 1700 to 1900, Monday to Saturday, from 1700 to 2000 on Sunday.

WJNO—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Granted special temporary authority to operate from 1700 to 1900, Monday to Saturday, from 1700 to 2000 on Sunday, from 1700 to 1900, Monday to Saturday, from 1700 to 2000 on Sunday.

WCBX—Broadcasting Co., Inc., licensee of station WLAK, to The Tribune Company; frequencies 1633, 3658, 3150, 3796 kc., unlimited time, 1300 kc., unlimited time, 1310 kc., unlimited time, 5 KW day (B1-MP-117).
National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to transmit to Cuban Station CMQ for rebroadcast by that station Spanish Program entitled “Life of Desi Arnaz with Songs and Music” transmitted by International Broadcast Station WRYC from 9:15 p. m. to 9:30 p. m., EST, on January 21, 1941.

Puerto Rico Advertising Co., Inc.—Denied petition to intervene in the hearing on the application of Caribbean Broadcasting Assn., Inc., San Juan, for a new station to operate on 1500 kc., 250 watts, unlimited time, and on its own motion the Commission consolidated the hearing on the Caribbean Broadcasting Assn. application with the application of Puerto Rico Advertising Co., Inc., for a new station in San Juan, requesting the same facilities.

KMBC—Midland Broadcasting Co., Kansas City, Kans.—Granted motion to accept appearance filed late in re application for construction permit to change frequency from 1550 to 630 kc., and increase power to 50 KW.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted motion to accept appearance filed late in re application for construction permit to change frequency from 1550 to 630 kc., and increase power to 50 KW.

KFJII—KFJII Broadcasters, Inc., Klamath Falls, Ore.—Granted petition for continuation of hearing now scheduled for February 19 for a period of 30 days, on application for construction permit to operate on 600 kc., 500 watts night, 1 kw. day, unlimited time.

WSAY—Brown Radio Service and Lab., Rochester, N. Y.—Granted petition insofar as consolidation and continuance of hearing in re application of Edward J. Doyle, for a new station in Rochester, N. Y., to use 1340 kc., 1 kw., unlimited time; dismissed petition in re intervention, and ordered date for consolidated hearing be fixed at February 15 on Doyle application and WSAY's application for same facilities, and that separate hearing hereofetore scheduled be cancelled.

WTJS—Sun Publishing Co., Inc., Jackson, Tenn.—Adopted order denying joint petition for reconsideration and grant without hearing filed by The Liberty Life Insurance Co., transier, and John M. Rivers, transferee, for transfer of control of South Carolina Broadcasting Co., Inc., licensee of Station WCSC (Docket No. 5922).

WBLK—The Nation’s Center Broadcasting Co., Inc., Hutchison, Kans.—Denied modification of construction permit (which authorized a change in the transmitter site, changes in equipment, and increase in power from 100 to 250 watts), for completion of terms of the construction permit (B4-TC-231).

APPLICATIONS FILED AT FCC

570 Kilocycles

WWNC—Asheville Citizens-Times Co., Inc., Asheville, N. C.—Construction permit to install new transmitter, directional antenna for night use, increase power from 1 kw to 5 kw, and move transmitter from 20 Battery Park Place, Asheville, N. C., to Emma and Maple Crest Road, Near Emma, N. C. Amended to request power of 1 kw; 5 kw-local Sunset, change antenna system to vertical antenna and transmitting equipment.

620 Kilocycles

WAN—University of Oklahoma, Norman, Okla.—Construction permit to install new antenna system, change frequency from 1010 to 610 kc., and move transmitter .35 mile from Engineering Building, University of Oklahoma, Norman, Oklahoma to East Stadium, Norman, Oklahoma. Amended: To request change in hours of operation from specified hours to unlimited time.

780 Kilocycles

WTAR—WTAR Radio Corporation, Norfolk, Va.—License to cover construction permit (B2-P-27/7) for authority to make changes in directional antenna system, and increase power to 1 kw.

WTAR—WTAR Radio Corporation, Norfolk, Va.—Authority to determine operating power by directional measurement of antenna power.

1050 Kilocycles

KNX—Columbia Broadcasting System, Inc., Los Angeles, Calif.—Authority to determine operating power by direct measurement of antenna power on 1070 kc., under North American Regional Broadcasting Agreement.

1120 Kilocycles

WTAW—Agricultural & Mechanical College of Texas, College Station, Texas.—Modification of construction permit (B3-
MP-1096 for a new transmitter, and increase in power, requesting extension of commencement date from December 22, 1940 to March 29, 1941.

1210 Kilocycles
WKOK—Sunbury Broadcasting Corp., Sunbury, Penna.—Authority to determine operating power by direct measurement.

1310 Kilocycles
WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—Authority to transfer control of corporation from J. P. Marchant (63 shares), D. J. Carcy (25 shares) and Melvin Meyer (10 shares) to The Tribune Co.
KOCY—Plaza Court Broadcasting Co., Oklahoma City, Okla.—Authority to determine operating power by direct measurement of antenna power on 1340 kc. under North American Regional Broadcasting Agreement.
WIZE—Radio Voice of Springfield, Inc., Springfield, Ohio.—Modification of license to increase power from 100 watts to 250 watts.

1370 Kilocycles
WBLK—The Exponent Co., Clarksburg, W. Va.—Voluntary assignment of license from The Exponent Co., to Charleston Broadcasting Co.
WTCM—Midwestern Broadcasting Co., Traverse City, Mich.—License to cover construction permit (B2-P-2565) as modified for a new station.
WTCM—Midwestern Broadcasting Co., Traverse City, Mich.—Authority to determine operating power by direct measurement of antenna power.
KRKO—Lee E. Mudgett, Everett, Wash.—Voluntary assignment of construction permit (B5-P-2027) from Lee E. Mudgett to The Everett Broadcasting Company, Inc.
WCOU—Carolina Advertising Corp., Columbia, S. C.—Authority to transfer 49 percent of common stock, of Carolina Advertising Corporation, from A. B. Langley (24½ percent), and Ames Halliwanger (24½ percent), to Carolina Life Insurance Company.
WHRQ—Broadcasting Station WHRQ, Inc., Memphis, Tenn.—Construction permit to install new transmitter and increase power from 100 watts to 250 watts.

1380 Kilocycles
NEW—A. M. Burton, Nashville, Tenn.—Construction permit for new station on 1380 kc., 1 KW, unlimited. Studio site to be determined. Transmitter—near Nashville, Tennessee. Directional antenna day and night use.

1420 Kilocycles
WPAR—Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—Transfer of control of corporation from The Exponent Co., to Charleston Broadcasting Co., 47 shares common stock.
KTRI—Sioux City Broadcasting Co., Sioux City, Iowa.—Authority to determine operating power by direct measurement of antenna power on 1440 kc. under North American Regional Broadcasting Agreement.

1440 Kilocycles
WMBD—WMBD Broadcasting Co., Peoria, Ill.—Construction permit to install directional antenna for night use and increase power from 1 KW; 5 KW day to 5 KW day and night; make changes in vertical antenna. Amended to change name from Peoria Broadcasting Co. to WMBD Broadcasting Co.

1500 Kilocycles
KPLC—Calcasius Broadcasting Co. (T. B. Lanford, R. M. Dean and L. M. Sepaugh), Lake Charles, La.—Authority to determine operating power by direct measurement of antenna power.

1530 Kilocycles
WALB—The Herald Publishing Co., Albany, Ga.—Modification of construction permit (B3-P-2774) as modified for a new station, requesting authority to install a new transmitter and extend commencement and completion dates from December 22, 1940, and March 19, 1941, to thirty days after grant and 90 days thereafter, respectively.

1550 Kilocycles
WRGA—Rome Broadcasting Corp., Rome, Ga.—Authority to install automatic frequency control equipment.

1560 Kilocycles

FM APPLICATIONS
NEW—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Construction permit for new high frequency broadcast station. Frequency, 148300 kc.; coverage, 9,600 square miles; population, 2,900,000. Amended to change population from 2,900,000 to 3,900,000.

TELEVISION APPLICATIONS
NEW—Babban & Katz Corp., Chicago, Ill.—Construction permit for new television broadcast station. Frequencies, 381000-389000 kc.; power, 10 watts; emission, A3 & A5; location, 12237,173. Location: Portable-Mobile, area of Chicago, Illinois.
NEW—Babban & Katz Corp., Chicago, Ill.—Construction permit for a new television station. Frequencies, 381000-396000 kc.; power, 10 watts; emission, A3 & A5; location, 190 North State Street, Chicago, Illinois.

MISCELLANEOUS APPLICATIONS
KEHS—WDAY, Inc., area of Fargo, N. Dak.—License to cover construction permit (B4-PRE-372, which authorized change in frequencies, increase in power, and new equipment).
WDAC—State of Wisconsin, University of Wisconsin, area of Madison, Wis.—License to cover construction permit (B4-PRE-227) for a new relay station.
NEW—Philo Radio & Television Corp., area of Philadelphia, Pa.—Construction permit to increase power from 15 watts to 25 watts, and install new equipment.
KFDB—Amarillo Broadcasting Corp., area of Amarillo, Tex.—License to cover construction permit (B3-PRE-229, which authorized a new relay broadcast station).

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS
Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be
given an opportunity to show cause why cease and desist orders should not be issued against them.

Drug Profits, Inc.—Alleging misrepresentation in the sale of medicinal preparations designated “Phalene” and “Burtone”, a complaint has been issued against J. H. Camp, their distributor, trading as J. H. Camp and as Drug Profits, Inc., Ravenswood, W. Va.

In radio advertisements the respondent represented, according to the complaint, that “Phalene” is a liver tonic; that its use will help remove poisons which cause premature aging; that it is a competent treatment for sick headache, nausea, appetite loss, aching muscles and joints, restless sleep, rundown condition, indigestion and acid condition, and that “Burtone” is effective for treating bilious attacks, stomach nausea, headaches, indigestion and tired-out feeling, and that it will correct faulty habits of elimination, produce free organic action of liver and lower bowel, and free the body of toxic poisons.

Alleging that the respondent’s representations are exaggerated and untrue, the complaint charges that “Phalene” is primarily an irritant laxative; that its effect on the liver would be limited to tending to increase bile secretion, and that it has no therapeutic effect in treating the conditions mentioned in excess of affording temporary relief when such conditions are due to constipation.

The therapeutic property of “Burtone”, the complaint continues, is limited to that of a laxative and mild cholesteric. The complaint alleges that this preparation has no therapeutic value in treating the conditions mentioned in excess of affording temporary relief when due to constipation. (4446)

Milk Cap Statistical Bureau, Philadelphia, and 12 manufacturers representing more than 75 per cent of the total business of the paper disc milk bottle cap industry, are charged with conspiracy to prevent price competition and restrain trade in violation of the Federal Trade Commission Act in a complaint.

Included also as respondents are George J. Lincoln, Jr., Philadelphia, manager and executive secretary of the bureau, and the bureau’s executive committee consisting of Ray W. Blodgett, Belvidere, Ill., George W. Rohrbeck, Detroit, and Robert H. Schulte, Piqua, Ohio.

All the respondent manufacturers except Standard Cap and Seal Corporation are members of The Milk Cap Statistical Bureau, a trade association known until 1937 as National Association of Bottle Cap Manufacturers.

Approximately 21 concerns, composing the milk bottle cap industry, including the 12 respondent manufacturers, sell approximately 10,000,000,000 caps annually, valued at approximately $4,500,000, to jobbers and dairies.

The Commission complaint alleges that the respondent bureau, its executive committee, manufacturer members and Standard Cap and Seal Corporation carried out understandings, agreements, combinations and conspiracies pursuant to which the respondent manufacturers fixed minimum prices, maintained uniform prices, and fixed and maintained uniform discounts and other conditions for the sale of their products; fixed and maintained, with dairies, uniform contract terms providing for the dairies’ actual yearly requirements of bottle caps at a price dependent upon the quantity contracted for, and furnished the bureau with lists of such dairies under contract.

Pursuant to the agreements, the respondent bureau, according to the complaint, issued a “Jobber Rating Book” for use of the respondent manufacturers, classifying and rating all jobbers purchasing 350,000 or more paper disc milk bottle caps annually, and the respondent manufacturers allegedly abided by the Jobber Rating Books in determining prices and discounts allowed jobbers.

A “Dairy Rating Book”, and supplements thereto, classifying and rating the approximately 50,000 dairies in the United States, were issued from time to time by the respondent bureau, accord-
Summit St., Toledo, to cease and desist from misleading representations in the sale of "Bowen's Tablets".

Advertisements disseminated by the respondents, according to Commission findings, represented that some 20 ailments, including ulcers of the stomach, duodenum and intestines, are caused by, or persist because of, hyperacidity or the presence of excess acid in the body, and that the respondents' preparation is a cure or remedy for hyperacidity and consequently for the ailments mentioned.

The Commission order directs the respondents to cease and desist from disseminating advertisements representing that ulcers of the stomach, duodenum or intestines, gas on the stomach, associated with colic, indigestion, heartburn, constipation, breath around the mouth, muscular pains, nervousness, melancholia, colds, headaches, dizziness, fatigue, lack of appetite, bad breath, or insomnia, are caused by, or persist solely because of, hyperacidity; that the respondents' preparation constitutes a cure or remedy for any of these ailments or conditions; or that their sale, or the sale of such merchandise to the public, may be made by means of a game of chance, gift enterprise, or lottery scheme.

The order also directs the respondents to cease representing that they are manufacturing pharmacists or that they manufacture the preparation they sell. (4373)

Pioneer Specialty Company—An order has been issued directing Harry A. Greenberg, trading as Pioneer Specialty Company and as The Candyland Company, 38 Crosby Ave., Brooklyn, to cease and desist from lottery practices and certain misleading representations in connection with the sale of candy to the consuming public through wholesalers, jobbers and retail dealers.

The Commission order directs the respondent to cease and desist from selling and distributing any merchandise so packed and assembled that sales of such merchandise to the public may be made by means of a game of chance, gift enterprise or lottery scheme; supplying to or placing in the hands of dealers packages or assortments of any merchandise which may be used to conduct a lottery; supplying dealers with lottery devices, either with assortments of merchandise or separately, which devices may be used in selling or distributing such merchandise to the public; packing or assembling in the same package or package of candy or other merchandise for sale to the public at retail, pieces of candy of uniform size and shape having centers of a different color, together with larger pieces of candy, or other merchandise, or separately, which larger pieces or other merchandise may be given as prizes to purchasers procuring a piece of candy having a center of a particular color; and selling or otherwise distributing any merchandise by means of a game of chance, gift enterprise, or lottery scheme.

The Commission order also directs the respondent to cease using the word "Factory" in connection with his trade names, or otherwise representing that the respondent owns or operates a manufacturing plant, or manufactures his products. (4381)

Purex Corporation, Ltd., 112 Southgate, Calif., has been ordered to cease and desist from making misleading representations in the sale of "Purex", a chemical preparation intended for use as a germicide.

The Commission order directs the respondent corporation to cease and desist from representing that a solution containing any amount less than 10 per cent of its preparation is a competent or effective germicide for the treatment of surface cuts or sores; that a solution containing two tablespoons of Purex to each gallon of water used is a competent or effective disinfectant or "disinfectant bath" for use on metal or wood surfaces, except in cases where the surface is already covered with a protective coating, or that a solution of these proportions is capable of killing all forms of bacterial life. (4074)

W. E. Robinson & Co., Inc., Bel Air, Md., has been ordered to cease and desist from violation of the brokerage provision of the Robinson-Patman Act.

The respondent, according to findings, has been engaged in the business of field broker, acting as the agent of sellers in transactions of sale and purchase of canned fruits and vegetables between sellers thereof and jobbers, wholesalers, retail chain stores and other purchasers.

Commission findings are that the respondent has effected sales for the sellers both by direct transactions with the purchasers and through corresponding or local brokers employed by the respondent; that for its services to the sellers the respondent has received from the sellers a brokerage fee or commission, usually four per cent of the price paid by the purchaser, and that in instances where such sales are effected through the aid and assistance of local brokers a portion of this brokerage fee is paid by the respondent to such local brokers for such sales assistance.

Further findings are that the respondent has offered sales for the sellers directly with the purchasers, an allowance or discount in lieu of brokerage is to such purchasers by the respondent, such allowance and discount usually being the equivalent of the brokerage paid by the respondent to local or corresponding brokers when sales are effected through them. This allowance or discount, according to the findings, usually amounts to 50 per cent of the brokerage fees or commissions paid by the sellers to the respondent.

The Commission finds further that in connection with the respondent's purchase of canned products for its own account for resale to jobbers, wholesalers, retail chain stores and other purchasers, it has received and accepted from the sellers and has granted and allowed to the purchasers on resale, substantial brokerage fees and commissions or allowances and discounts in lieu thereof.

The order directs that the respondent cease granting or making any allowances or discounts in lieu of brokerage to any purchaser by selling commodities to any such purchaser at a price reflecting a reduction from the prices at which sales of the commodities are currently being effected by the respondent to other customers, such reduction being an amount representing, in whole or in part, brokerage currently being paid by the respondent to corresponding or local brokers for brokerage services or sales assistance rendered to the respondent in effecting sales of such commodities to other purchasers.

The order also directs that the respondent cease granting or allowing, in any manner, directly or indirectly, any commission, brokerage or other compensation or allowance or discount in lieu thereof to any purchaser in such transactions.

The order further directs that the respondent cease and desist from making purchases of commodities for its own account at a price or on a basis which reflects a deduction or reduction, or is arrived at or computed by deducting or subtracting, from the prices at which sellers are selling commodities to other purchasers thereof, any amount representing or reflecting, in whole or in part, brokerage currently being paid by sellers to their brokers on sales of commodities made for such sellers by, or by such sellers through, their brokers.

The order also directs the respondent to cease accepting from sellers in any manner any commission, brokerage or other compensation or allowance and discount in lieu thereof on purchases of commodities made for its own account. (4294)

United Factories, Inc., 13th and McGee Sts., Kansas City, Mo., has been ordered to cease and desist from misleading representations in the sale of oil burners for installation and use in stoves and furnaces.

The Commission order directs the respondent to cease and desist from making misleading representations of oil burners, including the term "air seal" and the terms and conditions are such that they may reasonably be complied with. (4379)

U. S. Air Seal, Inc., Niles, Ohio, formerly of Girard, Ohio, has been ordered to cease and desist from making misleading representations in the sale of "Air Seal", an automobile accessory compound designed to prevent blow-outs in tires.

Commission findings are that use of the respondent's product will neither cause tires to be immune from blow-outs, nor accomplish the similar results claimed by the respondent; and that the terms and conditions are such that they may reasonably be complied with. (4379)

January 24, 1941 — 91
safe stopping; that its use will eliminate friction, extend the life of the tube, preserve rubber, or produce a 25 per cent or other appreciable increase in tire mileage, or that the product is superior to similar products used to prevent the escape of air from tubes. (4387)

White King Soap Company—An order has been issued directing White King Soap Company, Los Angeles, to cease and desist from making misleading representations in the sale of a laundry soap and a toilet soap manufactured by its parent company, the Los Angeles Soap Company.

Commission findings are that in advertisements the respondent represented, among other things, that “White King Granulated Soap” is the only soap with which fabrics can be satisfactorily washed in cool water; that cool water washing causes fabrics to be brighter and whiter than hot water washing, and that the use of this soap for washing textiles makes it unnecessary to use bleaching and bluing.

According to Commission findings, “White King Granulated Soap” is not the only soap with which fabrics can be satisfactorily washed in cool water; some fabrics are preferably washed in cool and some in hot water, and washing of textiles with the respondent’s soap does not make unnecessary the use of bleaching and bluing.

The Commission’s order directs that the respondent cease and desist from these representations and that it also discontinue representing that the use of a jelly made from “White King Granulated Soap” will remove all spots or stains from fabrics; that this soap is superior to other similar soaps; that all fabrics fade or shrink when washed in hot water, and that the use of the respondent’s laundry soap prevents fabrics from fading or shrinking.

Concerning its “White King Toilet Soap”, the respondent is directed to discontinue representing that this product will keep the skin fresh or supple, or prevent or remove wrinkles in the skin. (3928)

Zone Company—Misrepresentation in the sale of medicinal preparations and devices for use in so-called feminine hygiene, is prohibited under an order issued against Harry S. Benham, 620 Orleans St., Chicago, who trades under the names The Zone Company, Active Merchandisers, Active Medicine, Nu-Mode Company, and American Medicine Company.

The Commission order directs the respondent to cease and desist from disseminating advertisements representing that “Nu-Mode Vaginal Jelly” (also known as “A. M. Vaginal Jelly”), “Nu-Mode Hygiene Tablets”, “Vaginal Suppositories and Douche Tablets”, and “Speed Nu-Mode Hygiene Douche Tablets” form safe and effective prevents against conception or are a guaranteed method of preventing pregnancy; and that “Nu-Mode Ladies Womb Supporter” is comfortable, efficient, or sanitary, or has therapeutic value.

The order further directs the respondent to cease and desist from representing that “Athlete’s Foot Salve” is a cure or remedy for athlete’s foot or has therapeutic value in its treatment in excess of temporarily relieving symptoms of itching and in some cases destroying superficial fungi; that “A. M. Wonder Salve” is a cure or remedy for eczema or other forms of itch or rash or has therapeutic value in their treatment in excess of affording temporary relief from symptoms of itching, or that the preparation has any properties effective in preventing infection or in treating ulcers, old sores, leg sores, acne or pimples. (4352)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Albert Laboratories, Inc., 2535 North California Ave., Chicago, has entered into a stipulation in which it agrees to cease advertising that “Respirine” is the only medicinal preparation which formerly contained potassium iodide and is an effective remedy for asthma, bronchial coughs, bronchitis or whooping cough; that it will do more with respect to these conditions than afford temporary relief from accompanying symptoms; that it relieves symptoms accompanying hay fever or constitutes a treatment for hay fever, and that the preparation promotes healing; increases the flow of mucus from the nasal cavity, provides instant relief, is unique or distinctly new, represents a discovery, or is safe.

Relative to its agreement to cease representing that its product is safe, the respondent corporation avers that Respirine does not now contain potassium iodide; that that ingredient has not been used since February 1, 1940, and that when Respirine contained potassium iodide it was sold with a proper warning on the label concerning safety. (02709)

Chasers, Inc., 155 East 44th St., New York, stipulated that it will cease advertising that its product “Chasers”, a breath lozenge, is the one effective tablet; that it will hastily kill or permanently overcome bad breath due to tobacco, onions, alcohol or garlic or when due to organic derangements, infections and other conditions, or that it will do more than temporarily disbelieve such breath odors. The respondent corporation also agrees to cease representing that its product will kill or effectively overcome or mask all types of unpleasant breath. (02710)

Magay Corporation, 41 East 57th St., New York, stipulated that it will cease advertising “Q-Loid”, a medicinal preparation, as being capable of accomplishing results similar to those obtained by treatments administered to patients at the Veterans Administration Hospital, Bronx, N. Y., or by injections of colloidal sulphur; that Q-Loid is an effective arthritis remedy or has any therapeutic value in treating that condition in excess of the possibility of affording temporary symptomatic relief in some forms of arthritis when there is a sulphur deficiency, and that the sale of Q-Loid at any specified price represents a special offer, unless the offer is actually limited to purchasers under certain specified conditions. (02707)

Mitchell Battery Company, 1309-11 West Lake St., Minneapolis, a manufacturer of automobile batteries, has entered into a stipulation that in advertising its products it will cease using an amperage rating as descriptive of its batteries when in fact such rating indicates an electric current strength in excess of the batteries’ capability to produce.

The respondent corporation also stipulates that it will discontinue using an amperage rating or any statement concerning, or method of representing, the electric current productive capacity of its batteries, the effect of which tends to convey the impression that the batteries have such capacity in excess of that actually possessed. (3023)

Paragon Worsted Company, Providence, R. I., a manufacturer of cloth fabrics, entered into a stipulation in which it agrees to cease and desist from selling in commerce any fabric or product composed partly of wool and partly of rayon or other fiber without making complete disclosure of the fiber content on invoices and advertising matter.

Such disclosure, the stipulation continues, is to be made by stating the true names of the fibers present, in the order of their predominance by weight, and their percentages.

The stipulation provides that the respondent need not state the percentages of rayon or fiber other than wool, if the rayon or fiber other than wool are used solely for decoration, are plainly visible as a decoration, and are not more than five per cent of the whole fabric or product by weight. (3022)

S. & M Tire Company—A stipulation to cease certain representations in the sale of automobile batteries has been accepted from Phil Sieff, Maurice Sieff, Minnie Sieff, and Ann Sieff, co-partners trading as S. & M Tire and Auto Supply Company, 1215 Hennepin Ave., Minneapolis. The respondents agree that in advertising matter they will cease using an amperage rating as descriptive of batteries when in fact such rating indicates an electric current strength in excess of the batteries’ capability to produce.

The respondents also stipulate that they will desist from using an amperage rating or any statement concerning, or method of representing, the electric current productive capacity of batteries, the effect of which tends to convey the impression that the batteries have such capacity in excess of that actually possessed. (3023)

St. Joseph Sales Company.—J. B. Buller, trading as St. Joseph Sales Company, St. Joseph, Mo., entered into a stipulation in

92 — January 24, 1941
which he agrees to cease advertising that hosiery sold by him is knitted from pure silk fiber when in fact certain portions are knitted from fibers other than silk; that hosiery is crepe silk when the twist of the silk fiber does not conform to the standard twist for crepe silk; that the fiber used is lisle when it does not conform to the standards of lisle fiber, and that the regular price is any amount greater than it is in fact. (02705)

Union Oil Company of California, Los Angeles, in a stipulation entered into, agrees to cease representing that by the use of its "Triton Motor Oil" the carbon ping in motors will be removed within 2,000 to 3,000 or any specified number of miles; oil consumption will decrease by 42 or any other percentage, and that conditions causing sticking valves or rings in automobiles will be eliminated or substantially improved. (02706)

Viobin Corporation, 155 North Clark St., Chicago, has made a stipulation in which it agrees to cease certain representations in the sale in commerce of "Rex Wheat Germ Oil".

According to the respondent's stipulation, it referred in advertising matter to a Government bulletin and accompanied the reference by a purported facsimile of "Table No. 1, Public Health Service Reprint No. 1990", when in fact certain words appearing in the original table had been deleted from the purported facsimile with the effect of changing the meaning conveyed by the original table.

The respondent agrees to cease representing, directly or inferentially, by use of "Facsimile" or similar words, that any tabulation or representation is a true or identical copy of the purported original thereof, unless such copy is a facsimile or identical copy of the original without additions or deletions.

The respondent further agrees to cease referring to any authority, governmental or otherwise, in a manner tending to cause the impression that any representation or claim made by the respondent corporation is based upon or supported by such authority, when such is not a fact.

Statements or representations to the effect that its product is superior to all similar products sold in competition therewith, also are to be discontinued by the respondent, according to its stipulation. (3024)

Warwick & Legler, Inc., an advertising agency, 230 Park Avenue, New York, has entered into a stipulation to cease and desist from certain representations in the advertisement of "Tangee Lipstick" and "Tangee Theatrical Lipstick" on behalf of its client, The George W. Luit Company, Long Island City, N.Y., distributor of these cosmetics.

In its stipulation the advertising agency agrees to cease disseminating advertisements representing that Tangee Theatrical Lipstick ends a painted look; cannot make one look painted; contains no pigment or paint, and was created at the request of America's most prominent actresses; and, that either of the lipsticks is permanent. (02708)

FTC CLOSES CASES

The Federal Trade Commission has closed, without prejudice to its right to resume proceedings, should the facts so warrant, its case against Crowell-Collier Publishing Company and its subsidiary, P. F. Collier & Son Corporation, both of 250 Park Ave., New York, and 24 officers and directors of the corporations. These respondents had been charged in a Commission complaint issued in 1940 with violation of the Federal Trade Commission Act in the sale of books and encyclopedias with yearly supplements or revision services.

The respondents had petitioned for dismissal of the Commission complaint, their petition reciting that they had not engaged in the unfair practices alleged for a considerable time prior to issuance of the complaint; that the two corporate respondents had executed agreements to abide by the trade practice conference rules for the Subscription and Mail Order Book Publishing Industry promulgated by the Commission on September 3, 1940, and that they have complied with the rules since the promulgation thereof.

The Commission has also closed its case against P. F. Collier & Son Corporation, 250 Park Ave., New York, which was charged in the complaint with unfair methods of competition in connection with the sale of encyclopedias through sales crews.

The respondent corporation has been dissolved, and the Commission, having considered the matter, has closed the case growing out of the complaint without prejudice to its right, should the facts so warrant, to reopen the case.

January 24, 1941 — 93
THE WEEK IN WASHINGTON

BMI signed a consent decree in the United States District Court for the Eastern District of Wisconsin, in which BMI agreed not to engage in activities which the Justice Department alleged would constitute violations of the Sherman Act. The Department then announced it would proceed criminally against ASCAP under the antitrust laws. (p. 95)

NAB and AAAA committees are continuing their efforts to compose any differences remaining between the two groups in respect to recommended station facilities contract. (p. 98)

FCC officials and members of the National Television Systems Committee on January 24 and 25 saw demonstrations of recent television developments. (p. 100)

District meetings were held in Districts 10, 14, and 17. (p. 102)

The Attorney-General's Committee on Administrative Procedure made public its report last Saturday. (p. 103)

The House of Representatives appropriated $4,259,729 for the FCC for the fiscal year starting next July 1. (p. 105)

---

BMI Consent Decree

The Department of Justice announced last Monday that Broadcast Music, Inc., had signed a civil decree in the United States District Court for the Eastern District of Wisconsin, in which it agreed not to engage in activities which the Department alleged would constitute violations of the Sherman Act. Following is the Department's statements:

"In order to avoid placing Broadcast Music, Inc., at a competitive disadvantage, the decree will take effect only when similar restraints have been imposed upon the American Society of Composers, Authors and Publishers either by way of consent or litigation.

"In the light of this voluntary action, the Department will withdraw its previously announced prosecution against Broadcast Music, Inc., the National Broadcasting Company and the Columbia Broadcasting System. There is no change in the Department's announced intention to proceed criminally against the American Society of Composers, Authors and Publishers. Negotiations looking to a settlement in that case ended abruptly in late December.

"Under the decree signed Monday, Broadcast Music, Inc., agrees, when the decree becomes effective, not to engage in the following practices which the Department deems to be in violation of the antitrust laws:

1. BMI agrees not to exercise exclusive control, as agent for any other person, over the performing right of music of which it does not own the copyright.

2. BMI agrees never to discriminate either in price or terms among the users of copyrighted music. All BMI compositions will be offered for performance to all users on the same terms and conditions.

3. BMI agrees to license music on a pay-when-you-play basis. That is, broadcasters will be enabled to buy BMI music either on a per piece or per program basis, if they desire, and in no case will a broadcaster be required to pay a fee which is based on programs which carry no BMI music.

4. BMI will never require a license from more than one station in connection with any network broadcast. Licenses will be issued to networks or originating stations.

5. Manufacturers of electrical transcriptions, or sponsors, or advertisers on whose behalf such electrical transcriptions are made, will, if they so desire, be able to obtain licenses for the use of such transcriptions for broadcast purposes.

6. BMI agrees never to engage in an all-or-none policy in licensing its music. That is, motion picture exhibitors, restaurants, hotels, radio stations, and all commercial users of BMI music will be able to obtain the right to perform any BMI compositions desired without being compelled to accept and take the entire BMI catalogue.

7. BMI agrees that it will not attempt to restrict the performance rights of its music for the purpose of regulating the price of recording its music on electrical transcriptions made for broadcast use."

Neville Miller issued the following statement in Washington after the Justice Department had issued the above statement:

"The provisions of the voluntary civil decree signed by BMI today embody both the spirit and intent behind the original organization of BMI. BMI was formed after the broadcasters of America had vainly struggled for ten years to induce the American Society of Composers, Authors and Publishers to discontinue its monopolistic practices. These practices compelled broadcasters to buy popular music as a whole, regardless of how little of it they need.

(Continued on page 96)
BMI CONSENT DECREE

(Continued from page 95)

individual broadcaster might want to use, and to pay whatever percentage ASCAP might demand on the receipts of all programs, whether those programs used ASCAP music, other music or no music at all.

"BMI, both in its original resolutions and in all of its contracts, committed itself to offering music to broadcasters on a 'per piece' or 'per program' basis, and also to clearing music at the source, when the termination of the ASCAP monopoly made this course feasible. Having so announced its intentions ever since its inception, BMI has now formally agreed with the Department of Justice to carry out these commitments when the Department of Justice is able to compel ASCAP to adopt similar policies.

"BMI is owned by the broadcasting stations of America. Over 80 per cent of its stock is owned by approximately 670 broadcasting stations, and approximately 20 per cent of its stock is owned by the leading networks. Under the terms of the decree, broadcasters who do not wish to pay for music on a 'per piece' or 'per program' basis are not forced to do so, but may obtain another basis of payment if they so desire. The decree specifically provides that it does not constitute an admission or finding of any violation of law on the part of BMI."

Following is text of the decree:

IN THE DISTRICT FOUR OF THE UNITED STATES FOR THE EASTERN DISTRICT OF WISCONSIN

January Term, 1941

United States of America, Plaintiff,

v.

Broadcast Music, Inc., Defendant.

Civil Action File No. ———

CONSENT DECREE

This cause came on to be heard on this ——— day of January, 1941, the plaintiff being represented by Thurman Arnold, Assistant Attorney General; J. B. Hustig, United States Attorney for the Eastern District of Wisconsin; Victor O. Waters, Special Assistant to the Attorney General; and Warren Cunningham, Jr., Special Attorney; and the defendant being represented by its counsel, and having appeared and filed its answer to the complaint herein.

It appears to the Court that defendant, Broadcast Music, Inc., has consented in writing to the making and entering of this decree, without any findings of fact, upon condition that neither such consent nor this decree shall be construed as an admission or adjudication that said defendant has violated any law.

It further appears to the Court that this decree will provide suitable relief concerning the matters alleged in the complaint and directed hereunder, and that by reason of the aforesaid consent of defendant, Broadcast Music, Inc., and its acceptance by plaintiff it is unneces-
on which such compositions or any of them shall be performed; provided, however, that nothing herein contained shall prevent said defendant from licensing a radio broadcaster, on either or both of the foregoing bases, if desired by such broadcaster, or upon any other basis desired by such broadcaster.

With respect to any existing or future performing license agreement with a radio broadcaster, defendant, Broadcast Music, Inc., shall not, if required by such broadcaster, refuse to offer either or both of the following bases of compensation which may be specified by the broadcaster:

(i) in respect of sustaining programs a per program license fee, expressed in terms of dollars, requiring the payment of a stipulated amount for each program in which musical compositions licensed by said defendant shall be performed;

(ii) in respect of commercial programs, a per program license fee, either expressed in terms of dollars, requiring the payment of a stipulated amount for each program in which musical compositions licensed by said defendant for performance shall be performed, or, at the option of defendant, the payment of a percentage of the revenue derived by the licensee for the use of its broadcasting facilities in connection with such program.

In the event that defendant shall offer to license the public performance for profit of a musical composition or compositions for radio broadcasting upon one or more of the foregoing per program bases, and shall also offer to license such performance on a basis of compensation which shall not vary in direct proportion to the number of programs on which musical compositions licensed by defendant shall be performed, defendant shall establish, in good faith, a relationship between such per program basis and such other basis, justifiable by applicable business factors, so that there will be no frustration of the purpose of this sub-paragraph to afford radio broadcasters alternative bases of license compensation.

(4) Defendant, Broadcast Music, Inc., shall not license the public performance for profit of any musical composition or compositions except on a basis whereby, as network radio broadcasting is concerned, the issuance of a single license, authorizing and fixing a single license fee for such performance by network radio broadcasting, shall permit the simultaneous broadcasting of such performance by all stations on the network which shall broadcast such performance, without requiring separate licenses for such several stations for such performance.

(5) With respect to any musical composition in defendant's catalog of musical compositions licensed for radio broadcasting and which is or shall be lawfully recorded on an electrical transcription or other recording intended for broadcasting purposes, said defendant shall not refuse to license the public performance for profit by designated radio broadcasting stations of such composition by a single license to any manufacturer, producer, or distributor of such transcription or recording or to any advertiser or advertising agency on whose behalf such transcription or recording shall have been made who may request such license, which single license shall authorize the broadcasting of the recorded composition by means of such transcription or recording by all radio stations enumerated by the licensee, on terms and conditions fixed by said defendant, without requiring separate licenses for such enumerated stations.

(6) Defendant, Broadcast Music, Inc., shall not, in connection with any offer to license by it the public performance for profit of musical compositions, refuse to offer a license, at a price or prices to be fixed by said defendant, for the performance of such individual musical compositions or catalogues of musical compositions the use of which shall be requested by the prospective licensee.

(7) Defendant, Broadcast Music, Inc., shall not assert or exercise any right or power to restrict from public performance for profit by any licensee of said defendant any copyrighted musical composition in its licensed catalogue in order to exact additional consideration for the performance thereof, or for the purpose of permitting the fixing or regulating of fees for the recording or transcribing of such composition; provided, however, that nothing in this sub-paragraph shall prevent said defendant from restricting performances of a musical composition in order reasonably to protect the value of the public performance for profit rights therein or to protect the dramatic performing rights therein or as may be reasonably necessary in connection with any claim or litigation involving the performing rights in any such composition.

III. The terms of this decree shall be binding upon, and shall extend to each and every one of the successors in interest of defendant, Broadcast Music, Inc., and to any and all corporations, partnerships, associations and individuals who or which may acquire the ownership or control, directly or indirectly, or all or substantially all of property, business and assets of defendant, Broadcast Music, Inc., whether by purchase, merger, consolidation, reorganization or otherwise. None of the restraints or requirements herein imposed upon the Defendant shall apply to the acquisition of or licensing of the right to perform musical compositions publicly for profit outside of the United States of America, its territories and possessions.

IV. For the purpose of securing compliance with paragraph II of this decree, and for no other purpose, duly authorized representatives of the Department of Justice shall, on the written request of the Attorney General or an Assistant Attorney General and on reasonable notice to defendant, Broadcast Music, Inc., made to the principal office of said defendant, be permitted (a) reasonable access, during the office hours of said defendant, to all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of said defendant, relating to any of the matters contained in this decree, (b) subject to the reasonable convenience of said defendant and without restraint or interference from it, and subject to any legally recognized privilege, to interview officers or employees of said defendant, who may have counsel present, regarding any such matters; and said defendant, on such request, shall submit such reports in respect of any such matters as may from time to time be reasonably necessary for the proper enforcement of this decree; provided, however, that information obtained by the means permitted in this paragraph shall not be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Department of Justice except in the course of legal proceedings in which the United States is a party or as otherwise required by law.

V. The provisions of sub-paragraph (4) of paragraph II of this decree shall not become effective until the Court shall have determined that such restraints and requirements are substantially identical with those imposed herein, and shall apply to the Court within 20 days after receipt of a certified copy of said decree, for a determination of that question, no provision of said paragraph II shall become effective until the Court shall have determined that such restraints and requirements are substantially identical with those imposed herein.
VI. Jurisdiction of this cause is retained for the purpose of enabling any of the parties to this decree to make application to the Court at any time after the delivery to the defendant of a certified copy of a decree against American Society of Composers, Authors and Publishers complying with the provisions of Paragraph V hereof for such further orders and directions as may be necessary or appropriate in relation to the construction of or carrying out of this decree, for the modification hereof upon any ground, for the enforcement of compliance herewith and the punishment of violations hereof. Jurisdiction of this cause is retained for the purpose of granting or denying such applications as justice may require and the right of the defendant to make such application and to obtain such relief is expressly granted.

United States District Judge.

We hereby consent to the entry of the foregoing decree.

For the complainant:

(Signed) B. J. Huston.
United States Attorney.
Eastern District of Wisconsin.

(Signed) Thurman Arnold,
Assistant Attorney General.

(Signed) Victor O. Waters,
Special Assistant to the Attorney General.

(Signed) Warren Cunningham, Jr.,
Special Attorney.

For the defendant: Broadcast Music, Inc.

Godfrey Goldmark,
Counsel.

THE ROCK BOTTOM ISSUE

The consent decree which BMI signed in Milwaukee is of such a nature that no doubt can be left in the minds of the public as to the fundamental issues in the controversy between ASCAP and the broadcasting industry.

In spite of the printed statement on the BMI license contracts that NBC and CBS “have declared their approval of the principle of clearance at the source,” ASCAP speakers have insisted vehemently even up to the last few days that opposition of the networks to this principle was the real basis of the difficulty. In light of the consent decree it will be impossible for them to squirm out that particular smoke screen any longer.

ASCAP propaganda has sought to minimize the importance of the question of a per-use form of contract and has challenged the sincerity of the official BMI statement, printed on its license contracts, “that such a basis of payment was the ultimate objective of BMI” and that BMI would offer that form of contract when the establishment of a free competitive market in the field of popular music made it possible. Following the refusal of ASCAP in December to sign a consent decree embodying an agreement to offer such a form of license, the signature by BMI of the present decree sets forth clearly the fundamental difference between ASCAP and the broadcasters on this issue.

The great underlying issue also becomes unmistakable, even to the general public. The changes which ASCAP has sought to avoid are only changes which would deprive it of the monopolistic control which it has exercised over the popularization of music, but the broadcasters in working for “freedom of music” are in fact fighting for an even greater goal—the freedom of radio.

It is obvious, even to the ignorant, that the American system of broadcasting as a private enterprise can continue only if the broadcasters are permitted to make a fair profit and that the only alternative would be some form of government operation such as they have in Europe. The general public, however, has been slow to grasp the fact that this larger issue is involved in the present controversy. Every broadcaster has known that the ASCAP monopoly was in cold fact a continuing threat to his existence. The present status of the affair with the Department of Justice must at last awaken every man in the street to the real significance of the fight which BMI and the broadcasters are making.

There has been a tendency to say, “I can’t believe that ASCAP really wants to wipe out the broadcasting industry.”

The broadcaster could only reply, “Well, their policies certainly worked in that direction.”

Now BMI has accepted for itself terms which make monopoly impossible, terms even more stringent than those which ASCAP refused to accept in December.

And ASCAP, as if to remove any lingering doubt, is making clear the fundamental nature of the struggle in the words of one of its most influential members, Irving Caesar, president of the Song Writers Protective Association and a member of the ASCAP Board of Directors. Last summer Mr. Caesar was quoted in a short newspaper item as pointing with favor to the position of the song writers under the British radio system. This month he returned to the same attack in a big way with a vitriolic, vituperative indictment of BMI and the radio industry delivered before a meeting of the Song Writers Protective Association.

Mr. Caesar has been quoted as saying, “For my own part I’ll take my chances on government-run, non-commercial radio.”

There lies the basic substance of the matter. Freedom of radio is the stake.

The radio is not only a means of entertainment; it is also one of the most important means for the spread of information and the expression of opinion. It will remain a fair and open forum only so long as it remains a private enterprise. In fighting for the existence of their industry,
the broadcasters are fighting for a principle which is as vital to American democracy as freedom of speech and freedom of the press.

BMI FEATURE TUNES
February 3-10
1. HIGH ON A WINDY HILL
2. YOU WALK BY
3. HERE'S MY HEART
4. BUGLE WOOGIE
5. IT ALL COMES BACK TO ME NOW
6. MAY I NEVER LOVE AGAIN
7. I CAN'T REMEMBER TO FORGET
8. WISE OLD OWL
9. ACCIDENTLY ON PURPOSE
10. KEEP AN EYE ON YOUR HEART
11. BECAUSE OF YOU
12. ALL I DESIRE
13. WALKIN' BY THE RIVER
14. LET'S DREAM THIS ONE OUT
15. LITTLE SLEEPYHEAD
16. ANYWHERE
17. BREAKFAST FOR TWO
18. I LOOK AT YOU
19. SHADOWS IN THE NIGHT

The records of sheet music sales, phonograph record sales, and the records earning the biggest money in the coin machines all give the answer to ASCAP's propaganda which has sought to turn the public against BMI tunes. These records prove the influence of radio in popularizing music. They also prove that the music furnished by BMI is more pleasing to the public than the music of any other publishing house. Among the fifteen best sheet music sellers listed by Variety the top nine contain seven of BMI's own publications and two others licensed through BMI. On the coin machine list "Frenesi" ranks No. 1 and songs published by BMI appear at 2nd, 5th, 6th, and 10th places. No other publisher is represented by more than one song. BMI's "There I Go" and "I Give You My Word" are credited with having been on the list for eight and seven weeks respectively, a longer time than that shown by any other number. Among the ten best selling records as shown by Billboard six are records of BMI's publication or of music licensed through BMI.

BMI's sheet music sales are running around 130,000 copies a week. The leaders at present, together with their sales up to the end of last week, are "There I Go" (140,000), "I Hear a Rhapsody" (120,000), "I Give You My Word" (72,000), and "So You're the One" (60,000).

Notice

M. E. Tompkins, Vice President and General Manager of Broadcast Music, Inc., sends the following memorandum to all BMI member stations:

"We are informed that some stations are refraining from playing stock orchestrations of works in our catalogue of E. B. Marks compositions because of the fact that these works have been arranged or orchestrated by persons who are now members of ASCAP. These stock orchestrations are covered by Marks' indemnity to us and by our indemnity to you, and we see no reason why stations should avoid their performance. In all cases we are advised by E. B. Marks & Company that these orchestrations were made for hire and are the sole property of Marks, and our investigation discloses that this is the fact."

Coin Operators Support BMI

The BMI booth was a conspicuous landmark in the annual exhibition of the Coin Machine Industries held recently at the Hotel Sherman in Chicago. The operators of coin phonographs, music dealers, record distributors, and the proprietors of restaurants, grills, and other amusement places which rely upon coin phonographs for entertainment thronged the booth. They expressed warm and practically unanimous support of BMI. Several hundred added their names to the already impressive list of those who have requested notice of all new records of BMI music.

The automatic phonograph industry has two reasons to support BMI in its effort to establish an open market for music:

1. ASCAP's efforts to obtain a revision of the copyright law which would permit it to tax coin phonographs and its announced intention of levying a sixty-dollar-a-year tax on the machines;
2. The number of taverns and small night clubs which use phonographs or employ small orchestras one or two nights a week or for other circumstances are brought, even under the present law, within the range of ASCAP persecution.

Next to radio, the hundreds of thousands of coin phonographs are probably the most important means of popularizing music and the support of this industry is of great importance to BMI. The fact that BMI music is popular with the patrons of the phonographs has been well demonstrated by the number of records of BMI music which have appeared week after week on the lists of the biggest money makers in the coin machines.

BMI's exhibition at the coin machine show was welcomed by all parts of the industry as a demonstration of BMI's good will toward the phonograph operators. The number of delegates and visitors who requested releases of BMI records and printed music, the number who read the BMI and NAB pamphlets, and especially those who came back to ask for more of the pamphlets so that they might distribute them among their friends—all gave evidence that the automatic phonograph industry reciprocates BMI's good will in a very practical way.

January 31, 1941 — 99
Thus Saith the Preacher

Local minister wrote ASCAP that he had seen statement in newspaper that ASCAP would make no charge for use of its music in church services and was also willing to permit such services to be broadcast even though radio stations had no ASCAP license. ASCAP replied that church was at liberty to use ASCAP music and have same broadcast, but, of course, the minister was to announce during the service that music was being used by courtesy of ASCAP. Minister called manager of radio station on telephone to read him ASCAP letter. Said the dominie, "I'm going to write those fellows and tell them what I think. I'm going to give them hell''.

Which illustrates ASCAP's failure in its efforts to use sacred music as a commercial shillelagh.

75 Per Cent Non-ASCAP

According to a report from WIS, in Columbia, S. C., the average South Carolina music lover is 75 per cent non-ASCAP. This was proved on January 22nd by no less a personage than the world famous pianist, Alec Templeton. Templeton played a concert with the Southern Symphony on that date.

During the course of Templeton's part of the program, he asked the audience to name four selections for him to use in a special improvisation. These selections were to include a popular number, a piano solo, a semi-classic, and a classical number. Immediately the audience shouted, "Frenesi—Frenesi!" This indicates the way the radio industry can popularize a tune. For the classical selection Templeton used music from Tannhauser, which is in public domain and was broadcast over WIS on January 18th from the Metropolitan Opera.

The semi-classic number was the Blue Danube Waltz—also in PD. The only ASCAP number in the group was the piano solo, "Nola," made familiar by Vincent Lopez over a period of many years. Thus, three out of four or 75 per cent of this particular group of songs were non-ASCAP tunes.

Sales

STATION FACILITIES CONTRACT

Numerous meetings, both joint and separate, of the NAB and AAAA committees will have been held by the end of this week in a final effort to compose any differences remaining between the two groups in respect of the Station Facilities Contract recommended by the NAB January 7. Col. Harry C. Wilder, WSVR, Chairman of the NAB committee, reports that it now seems likely that some alternative provisions may be recommended to stations for the purpose of meeting certain agency views.

Col. Wilder added that the meetings of time-buyers and station managers this week revealed a spirit of harmonious cooperation.

It is believed that where on local accounts stations bill weekly or have special terms of payment, a separate local contract form might be desirable. The current AAAA negotiations pertain only to a station contract form for national spot business placed by agencies. The negotiations may result in making it advisable for stations to print a separate contract form for use on local business.

After a number of joint meetings, much progress has been made on the standard invoice form. The Fiscal Committee of AAAA and the Accounting Committee of the NAB will shortly confer on final details.

Engineering

TELEVISION DEMONSTRATIONS

Recent television developments were demonstrated to FCC officials and members of the National Television Systems Committee on January 24 and 25. Visits were made to the New York television laboratories of Du Mont, Bell Telephone, CBS, RCA and Scophony. Besides Chairman James L. Fly, the FCC officials present were Commissioners Norman Case, Paul Walker, William H. Bauer, head attorney, E. K. Jett, Chief Engineer, A. D. Ring, Assistant Chief Engineer, Nathan David of the legal staff and George Gillingham, director of information.

The Du Mont laboratories demonstrated their 629 line 15 frames per second transmission received on a 20-inch tube.

RCA demonstrated a new large screen home receiver. The screen on this receiver was 18 x 13½ inches. The picture was produced by a new 5-inch projection tube. The image of the tube was passed through a lense to a mirror on the cover of the receiver and from there was reflected to the screen standing perpendicular at the front of the receiver.

RCA demonstrated in the New York Theatre, television reproduction an a screen 15 x 20 feet. RCA also demonstrated relay television from camp Upton, 68 miles from New York. The scenes at Camp Upton were passed through 2 relay points.

The Bell Telephone Laboratories demonstrated the relay of television programs by means of coaxial cable. The programs were relayed from the Bell laboratories to Philadelphia and back again, a total distance of approximately 200 miles. The receiver was switched between the direct line and the picture relayed to Philadelphia in order to show the amount of quality lost in the transmission.
Columbia Broadcasting System demonstrated their color television both direct pick-up and pick-up from film. Scophony, one of the leading television companies of England, demonstrated its mechanical system of reception on a 4-foot screen and on a larger screen of 9 x 12 feet. The Scophony mechanical system employs a system of revolving mirrors for moving a beam of light over the reception screen.

This series of demonstrations was a prelude to the report to be given the FCC by the National Television Systems Committee on January 27.

As reported in the NAB Reports for September 13 on page 4394, it will not be necessary to file an application for license renewal until after the provisions of the North American Agreement have been carried out.

**NTSC REPORT**

The report of the National Television Systems Committee was given to the FCC on Monday, January 27.

Chairman James L. Fly and Commissioners T. A. M. Craven, Paul Walker and Norman Case received the report. Chairman Fly opened the procedure by saying that former hearings on television found the industry's opinion divided on various significant standards. This division of opinion was enough to throw doubt on the adequacy of standards which could then be formulated and it seemed that further experimentation and study was necessary. Chairman Fly continued that Mr. James S. Knowlson and Mr. W. G. R. Baker of RMA took the lead in forming the National Television Standards Committee. Chairman Fly said he thought that the industry could justly take pride in the manner in which it turned to the solution of the problem of forming television standards. Chairman Fly continued that a hearing would be scheduled later at which argumentation and cross examination would be allowed on the various ramifications of television standards, and that today the reports of the NTSC would be received without argument or cross examination.

Chairman Fly then called on Mr. Baker, Chairman of the NTSC to render the television report. Dr. Baker outlined the organization of the NTSC and outlined its rules of procedure. He said that 60 meetings were held by the various panels of the NTSC and that approximately 5,000 man-hours had gone into carrying out the work of the Committee. Dr. Baker then called on the nine panel chairmen in turn to give a report on the work of their panels. Dr. Baker then turned over to the FCC the main report of the NTSC. At the end of the Conference, Chairman Fly complimented the NTSC on its work.

The report of the NTSC to the FCC reveals that the standards recommended are very little different from the old RMA standards. The main difference seems to be that Frequency Modulation is recommended for the sound channel rather than Amplitude Modulation. Following is the report of the NTSC to the FCC:

The National Television System Committee recommends here-with transmission standards for commercial television broadcasting. The Committee recognizes the coordinate importance of standardization and the commercial application of technical developments now in the research laboratories. These standards will make possible the creation, in the public interest, of a nationally coordinated television service and at the same time will insure continued development of the art.

Monochromatic transmission systems other than those embodied in these standards should be permitted to operate commercially, when a substantial improvement would result, provided that the transmission system has been adequately field tested and that the system is adequately receivable on receivers responsive to the then existing standards.

This Committee believes that, although color television is not at this time ready for commercial standardization, the potential importance of color to the television art requires that—

(a) A full test of color on the Group A channels be permitted and encouraged, and that

(b) After successful field test, the early admission of color to the Group A channels on a commercial basis coexistent with monochromatic television be permitted employing the same standards as are herewith submitted except as to lines and frame and field frequencies. The presently favored values for lines, frame and field frequencies for such a color system are, respectively: 343, 50, and 150.

These transmission standards are recommended for commercial television broadcasting on the following channels:

<table>
<thead>
<tr>
<th>No.</th>
<th>Frequency (Mc)</th>
</tr>
</thead>
<tbody>

<td>90-102</td>
</tr>
<tr>
<td>7</td>
<td>102-108</td>
</tr>
</tbody>
</table>

I: The Television Channel

1. The width of the standard television broadcast channel shall be six megacycles per second.
2. It shall be standard to locate the picture carrier 4.5 megacycles per second lower in frequency than the unmodulated sound carrier.
3. It shall be standard to locate the unmodulated sound carrier 0.25 megacycles per second lower than the upper frequency limit of the channel.
4. The standard picture transmission amplitude characteristics shall be that shown in Drawing I.

II: Scanning Specifications

5. The standard number of scanning lines per frame period in monochrome shall be 441, interlaced two to one.
6. The standard frame frequency shall be 30 per second and the standard field frequency shall be 60 per second in monochrome.
7. The standard aspect ratio of the transmitted television picture shall be 4 units horizontally to 3 units vertically.
8. It shall be standard, during the active scanning intervals, to scan the scene from left to right horizontally and from top to bottom vertically, at uniform velocities.

III: Picture Signal Modulation

9. It shall be standard in television transmission to use amplitude modulation for both picture and synchronizing signals, the two signals occupying different amplitude ranges.
10. It shall be standard that a decrease in initial light intensity cause an increase in radiated power.
11. It shall be standard that the black level be represented by a definite carrier level, independent of light and shade in the picture.
12. It shall be standard to transmit the black level at 75 per cent (with a tolerance of plus or minus 2.5 per cent) of the peak carrier amplitude.

January 31, 1941 — 101
IV: Sound Signal Modulation

13. It shall be standard to use frequency modulation for the television sound transmission.
14. It shall be standard to pre-emphasize the sound transmission in accordance with the independence-frequency characteristics of a series inductance-resistance network having a time constant of 100 microseconds.

V: Synchronizing Signals

15. It shall be standard in television transmission to radiate the synchronizing waveform shown in Drawing II.
16. It shall be standard that the time interval between the leading edges of successive horizontal pulses shall vary less than one half of one per cent of the average interval.
17. It shall be standard in television studio transmission that the rate of change of the frequency of recurrence of the leading edges of the horizontal synchronizing signals be not greater than 0.15 per cent per second, the frequency to be determined by an averaging process carried out over a period of not less than 20, nor more than 100, lines, such lines not to include any portion of the vertical blanking signal. (See Note A.)

VI: Transmitter Ratings

18. It shall be standard to rate the picture transmitter in terms of its peak power when transmitting a standard television signal.
19. It shall be standard in the modulation of the picture transmitter that the radio frequency signal amplitude be 15 per cent or less of the peak amplitude, for maximum white. (See Note B.)
20. It shall be standard to employ an unmodulated radiated carrier power of the sound transmission not less than 50 per cent nor more than 100 per cent of the peak radiated power of the picture transmission.
21. It shall be standard in the modulation of the sound transmitter that the maximum deviation shall be plus or minus 75 kilocycles per second.

VII: Polarization

22. It shall be standard in television broadcasting to radiate horizontally polarized waves:

Note A: It is recommended that as progress in the art makes it desirable, the maximum rate of change of frequency of the transmitted horizontal synchronizing signals for studio programs be reduced and that limits be set for transmissions originating elsewhere than in the studio.

Note B: It is the opinion of the N.T.S.C. that a picture transmitter not capable of a drop in radio frequency signal amplitude to 15 per cent or less of the peak amplitude would be unsatisfactory since it would not utilize to the best advantage the available radio frequency power. At the same time the N.T.S.C. is aware of the practical situation that it may not be possible for all of the first picture transmitters to meet this standard. It should be possible in picture transmitters for the lower frequency channels in Group A to meet this standard, although it may not be possible for picture transmitters for the higher frequency channels in Group A to meet it at first. After the first operation on the higher frequency channels in Group A to meet this standard, although it may not be possible for picture transmitters for the lower frequency channels in Group A to meet this standard. It should be possible in picture transmitters for the lower frequency channels in Group A to meet this standard, although it may not be possible for picture transmitters for the lower frequency channels in Group A to meet this standard.

The broadcasters of the 17th NAB District, embracing stations of Washington, Oregon and the territory of Alaska in official session at Portland on this 22nd day of January, Nineteen Hundred and Forty-one resolve:

Whereas, for the past three years, C. W. “Chuck” Myers (KOIN-KALE), Portland, has served this district in the capacity of District Director on the Board of the National Association of Broadcasters, and whereas, at Mr. Myers’ specific request that he be relieved of further duties in this connection, a new Director for the 17th District has this day been selected to succeed Mr. Myers for the ensuing two-year term and whereas, Mr. Myers during the term of his membership upon the Board, and prior thereto, in other industry capacities has faithfully, constructively, able and diligently served the interests of this District and has contributed in a large measure to the solution of industry problems of a national character, and has at all times evidenced a deep personal interest and given attention to problems of individual broadcasters within this District, now therefore, be it resolved by the broadcasters of the 17th NAB District that we hereby express to “Chuck” Myers our deep personal and official appreciation for his splendid service and express for him our hope of continued success and well-being.

Seconded by: John G. Bairiedel (KUIN), Grants Pass, Oregon.

Unanimously carried.

The following registered at the Seventeenth District meeting in Portland, January 22:

James C. Wallace, KAST; Frank H. Loggan, KBND; J. Elroy McCaw, KELA; W. Carey Jennings, H. Q. Cox, Abe Bercooth, Paul H. Connet, Chester L. Blomness, Bob Pizgmore, James A. Mount, Ralph W. Rogers, Donald W. Ween, Jr., and Bill Mock, KGW-KEX; Harvey Wixson, KHOW-KGA, R. W. Britton, KGBU; Tom Olsen, KGY; Loren B. Stone, H. J. Quilliam, KIRO; Harrison A. Miller, Dick Ross, J. A. Murphy, KMO-KIT; Barney Kenworthy, Marvin E. Johnston, KODL; H. M. Swartwood, Jr., C. W. Myers, Joseph Samgaches, Harry H. Buckendahl, Charles G. Conche, Harvey S. Benson, Ted W. Cooke, KOIN-KALE; Ted Kooroeman, KALE; Birt F. Fisher, Peter Lyman, W. W. Warren, H. M. Feltis, KOMO-KJR; Sheldon F. Sackett, KOOS-KVAN; Glenn McCormick, Day Foster, Frank Hill, KORE; Marshall H. Penga, KNBR; Robert E. Prieehe, KRSC; H. A. Reed, KSLM; John G. Bairiedel, KUIN; Jerry Jensen, KUJ; S. W. McCready, KVAN; Vernice Irwin, Earl Irwin, KVI; Rogan Jones, KVOS; Ralph R. Cronise, KWIL; C. O. Chatterton, KWLk; Florence Wallace, KXX; T. W. Symons, Jr., KFPX-KXL; T. W. Symons, HI. KXL; Harry R. Spence, Fred S. Goddard, KXRO; John Kutner; Paul H. Raymer, F. C. Brokaw, Paul H. Raymer Co.; Gerald King, Standard Radio; Carl Haverlin, BMI; Johnnie Walker, Doris Quinn, Music Clearance, Inc.; W. McKinley Sillerman, SESAC.

District Meetings

RESOLUTION

The broadcasters of the 17th NAB District, embracing stations of Washington, Oregon and the territory of Alaska in official session at Portland on this 22nd day of January, Nineteen Hundred and Forty-one resolve:

Whereas, for the past three years, C. W. “Chuck” Myers (KOIN-KALE), Portland, has served this district in the capacity of District Director on the Board of the National Association of Broadcasters, and whereas, at Mr. Myers’ specific request that he be relieved of further duties in this connection, a new Director for the 17th District has this day been selected to succeed Mr. Myers for the ensuing two-year term and whereas, Mr. Myers during the term of his membership upon the Board, and prior thereto, in other industry capacities has faithfully, constructively, able and diligently served the interests of this District and has contributed in a large measure to the solution of industry problems of a national character, and has at all times evidenced a deep personal interest and given attention to problems of individual broadcasters within this District, now therefore, be it resolved by the broadcasters of the 17th NAB District that we hereby express to “Chuck” Myers our deep personal and official appreciation for his splendid service and express for him our hope of continued success and well-being.

Seconded by: John G. Bairiedel (KUIN), Grants Pass, Oregon.

Unanimously carried.

The following registered at the Seventeenth District meeting in Portland, January 22:

James C. Wallace, KAST; Frank H. Loggan, KBND; J. Elroy McCaw, KELA; W. Carey Jennings, H. Q. Cox, Abe Bercooth, Paul H. Connet, Chester L. Blomness, Bob Pizgmore, James A. Mount, Ralph W. Rogers, Donald W. Ween, Jr., and Bill Mock, KG...
tion Relations Manager of BMI, answered many questions relative to the use of the Catalog and protection against possible use of music for which no license is held by the station. Every station present reported a most encouraging and gratifying audience reaction to the music being played on their station since the 1st of January.

Other industry problems were discussed, including certain phases of the labor situation, the unit plan of volume measurement, and great stress was laid upon the coming 19th annual convention of NAB to be held in St. Louis. St. Louis is in the 10th District and all of the broadcasters agreed to fully discharge their obligations as hosts.

Director Gillen appointed committees to look after the various details. It was a splendid and rousing meeting.

The list of those present follows:

Rev. W. A. Burk, WEW; William Brandon, WHO-WOC; Arthur B. Church, KMBC; George Crocker, KFN; Russ David, KSD; Dietrich Dirks, KTR; Benford Eaves, KGFN; F. C. Eighnne, KGLO; Ralph Evans, WHO-WOC; Jack Falvey, KBIZ; Dean Fizer, WDF; E. T. Fishbery; KSC; Ralph Foster, KGNS; KWT; Paul Boyer, KORS; Earl H. Gammons, WCCO; John J. Gillin, Jr., Howard Peterson, William Russ, Bill Wiseman; WOW; Edward W. Hamlin, KSD; Merle S. Jones, KMOX; H. J. Kaufman, WDF; Jack Luther, KORN; Craig Lawrence, KSO-KRNT; W. I. LeBaron, KGFN; Buyl Lottridge, WOC; William B. Quaunte, WMT; J. C. Rapp, J. D. Rankin, Jr.; Owen Saddler, R. H. Sawyer, KMA; Orville Rennie, Duane L. Watts, KHAS; Randall Ryan, Elbert A. Read, KFN; Elizabeth Sammons, KSC; Vernon H. Smith, KOWH; Robert F. Schueff, NBC; E. C. Woodward, KFN; Frank E. Pelcerin, KOIL-KFAB-KFOR; J. M. Lowman, KOIL; Foster May, WOW; Clifford T. Johnson, KOIL; Woody Woods, WHO; Hale Bondurant, WHO; Carl Haverlin, BMI; C. E. Arney, Jr., NAB; Gustav M. Hagenah, SESAC; W. C. Hutchings, Associated Music Publishers, Inc.; Alex Sherwood, Standard Radio; Luther Hill, KSO-KRNT-WMT.

DISTRICT 14

The broadcasters of Colorado, Utah, Idaho, Wyoming and Montana met in a District session in Denver on Monday, January 27th.

Director Eugene P. O'Fallon, KFEL, called the session to order with 31 representatives of broadcasters and allied industries in attendance. There were 20 stations of the 27 NAB members in the District represented. As in previous district meetings, music questions received detailed attention and similar reports of satisfactory audience reaction to the music being offered by radio was announced.

The following resolution was adopted:

“Resolved: That the broadcasters of the Fourteenth District vote renewed confidence in BMI, and congratulate those responsible for its progress on a job well done.”

Following is a list of those present:

E. G. Bechler, KGKE; Frank Bishop, KFEL; S. S. Fox, KDVL; H. E. Green, KFRA; William C. Grove, KFBC; Donald Hathaway, KDPA; L. L. Hilliard, KGKH; Earl H. Hollis, KFV; Frank E. Hurt, KFSD; Don McGaig, KFEL; J. H. McGill, KGHI; Holty Moyer, KFEL; Eugene P. O'Fallon, KFEL; R. H. Owen, KOA; W. D. Pyle, KVOD; Curtis Ritchie, KGKH; Glen Shaw, KSL; O. P. Soule, KFPI-KEI; Hugh B. Terry, KLZ; W. E. Wastall, KDLY; Ray B. White, KPOP; Ed Yocum, KGHI; Lloyd E. Voder, KOA; H. L. McCracken, KYN-KVRS; C. E. Arney, Jr., NAB; Leonard Callahan, Gustav Hagenah, SESAC; Carl Haverlin, BMI; William H. Pickens, Transradio; Alex Sherwood, Standard; R. B. Hudson, Rocky Mountain Radio Council.

GILBERT NEWSOME

Anyone knowing the whereabouts of Gilbert Newsome, announcer, is requested to communicate immediately with Station WGH, Norfolk, Virginia.

ADMINISTRATIVE PROCEDURE

The Attorney General's Committee on Administrative Procedure last Saturday made public its report which it has transmitted to the Attorney General.

The Committee's Report, which is a thousand pages in length, is based upon detailed studies of the individual agencies. The Committee finds that the agencies are so diverse in character that in many instances they must be dealt with individually rather than in terms of general recommendations. Accordingly the Committee has included in its Report a group of detailed technical recommendations for changes in each of the individual agencies which it has studied. (Not available as we go to press.) In addition the Committee has made a series of general recommendations, applicable to all agencies and which have been embodied in a proposed bill accompanying the Report.

The principal general recommendations contained in the Report and in the proposed bill are as follows:

An Office of Federal Administrative Procedure is to be established to review the procedures and practices of administrative agencies. The new Office would be composed of a Director appointed by the President, with the advice and consent of the Senate, an Associate Justice of the United States Circuit Court of Appeals for the District of Columbia to be designated by the Chief Justice of that Court, and the Director of the Administrative Office for the United States Court who is appointed by the Supreme Court of the United States. The Director of the Office of Federal Administrative Procedure would make a continuing study of the work of the administrative agencies, receive complaints from members of the public, and from time to time would make such recommendations to the agencies and to the Congress as might be desirable to achieve as much uniformity in administrative procedure as possible.

A new corps of officers is to be created to hear and decide cases in the administrative agencies. These officers would be known as "hearing commissioners." They would be nominated by the administrative agency and would be appointed, after investigation, by the Office of Federal Administrative Procedure. To assure their independence, these "hearing commissioners" would be given a 7-year term of office, and would be removable for cause only by the Office of Federal Administrative Procedure. Their salaries would also be fixed by law at $7,500 a year.

The functions of the "hearing commissioners" would be analogous to those of trial judges. In each case heard by a "hearing commissioner" his decision would be final unless appealed to the head of the agency. The Committee recommends that on appeal the findings of fact of the "hearing commissioners" be left undisturbed unless clearly erroneous. A major objective of the Committee's recommendations is to limit further agency review of the decisions of "hearing commissioners" so as to make it possible for the agency heads them-
selves to examine and decide cases on appeal, and thus to abolish review attorneys.

The Committee recommends further steps to effect an internal separation of the functions of judge and prosecutor. The "hearing commissioners" are to be a separate unit entirely divorced from any investigative or prosecutive activities. Persons within an agency who investigate or present cases will have no part in the decision and will not act as consultants for agency heads who decide cases on appeal. It is also recommended that the agency heads divorce themselves as far as possible from the initiation of action by delegating that function to responsible officers in the agency who will have no part in the deciding.

The Committee recommends that the procedure for the issuance of rules and regulations be regularized, and that persons affected by proposed rules and regulations be given a fuller opportunity to participate in the drafting. The Committee's proposed bill provides that, except in special cases, rules and regulations adopted by administrative agencies shall not take effect until 45 days after publication so that all persons may, meanwhile, submit their views and comments. In addition, any person affected by a rule or regulation is to have the right to petition for an amendment to the regulation, and each agency is to report to Congress on its disposition of such petitions.

Although the Committee recommends the extension of the use of hearings prior to the issuance of rules and regulations in many specified situations, it states that a rigid requirement of hearings in all cases before regulations are issued is not desirable. It urges agencies, however, to allow the broadest possible participation, by consultation and otherwise, of the public in rule-making processes. It observes that the great majority of agencies now use hearings, conferences, and consultations, even though they are often not required by law.

To eliminate unnecessary uncertainties, the Committee recommends that all agencies be empowered to issue declaratory or advance rulings. Any interested person who wishes to know his rights and duties in a specific situation may request a ruling of the agency and, after the ruling has been issued, it is to be binding on both the agency and the interested person and is to be reviewable in the courts to the same extent as any final order.

4. Simplification of Administrative Procedures.

The Committee recommends that the agencies simplify administrative procedure by extending the use of conferences and other informal methods to handle controversies. Agencies are urged to delegate routine matters, and to make available responsible officers for the settlement of disputes, so that delays and red tape may be diminished. The Committee condemns protracted and expensive hearings, and proposes that devices such as stipulations, pre-hearing conferences and written evidence be used to expedite formal proceedings.

The Committee also discusses methods for keeping the public informed of the activities of administrative agencies, and recommends that each agency facilitate dealings with the public by making clear to the public what its policies, structure and organization are, and by accompanying its decisions with opinions.

5. Court Review.

The Committee finds that, under present statutes and decisions, there is adequate provision for court review of agency decisions, both on the law and on the facts. The Committee finds that further extension of court review would result in needless litigation, and would place an undue and improper burden upon the courts.

The Committee recommends against the creation of special administrative courts. After thorough study, it feels that the creation of special administrative courts is not feasible or desirable. It suggests that such a separation would create confusion for the persons who deal with agencies, and that such separation is not necessary to achieve impartial and objective decisions. The Committee believes that the creation of independent "hearing commissioners" and the recommended internal separation of functions within the agencies will provide adequate safeguards.

The Committee finds that the administrative process is not a new one, but that it has been used since the beginning of American government. A great majority of the agencies studied were created before 1930, and some are as old as the Federal government itself. The thirty-three agencies and departments studied by the Committee are: Division of Public Contracts, Department of Labor; Walsh-Healey Act; Veterans Administration; Federal Communications Commission; United States Maritime Commission; Federal Alcohol Administration; Federal Trade Commission; Administration of the Grain Standards Act, Department of Agriculture; Railroad Retirement Board; Federal Reserve System; Department of Commerce; Bureau of Marine Inspection and Navigation; Administration of the Packers and Stockyards Act, Department of Agriculture; Post Office Department; Federal Control of Banking, Comptroller of the Currency and Federal Deposit Insurance Corporation; Administration of the Fair Labor Standards Act of 1938 (Wage and Hour Division, Children's Bureau); War Department; Social Security Board; Railroad Labor National Mediation Board, National Railroad Adjustment Board); National Labor Relations Board; Civil Aeronautics Authority; Department of the Interior; United States Employees' Compensation Commission; Administration of Internal Revenue Laws (Bureau of Internal Revenue, Board of Tax Appeals, Processing Tax Board of Review); Bituminous Coal Division, Department of Interior; Interstate Commerce Commission; Federal Power Commission; Security and Exchange Commission; Administration of Customs Laws (Bureau of Customs, United States Tariff Commission).

At the conclusion of the Report, the Committee has included over 130 pages of detailed technical recommendations for changes in the individual agencies. In addition, the Committee has accompanied its Report with appendices, over 400 pages in length, describing important phases of administrative procedure.

The Committee was instructed by the President to make a thorough study of existing administrative practices and procedures "with a view to detecting any existing deficiencies and pointing the way to improvements." As part of its study, the Committee's staff prepared 27 monographs on existing procedures and practices of those Federal agencies which affect private interests. These were widely published, and in June and July, 1940, the Committee held public hearings at which it obtained the comments and opinions of the public and the bar. The Committee's recommendations are based upon this material.

Mr. Chief Justice Groner and the Messrs. McFarland, Stason and Vanderbilt have submitted statements of additional views and recommendations.
Legislation

FEDERAL LEGISLATION

HOUSE

H. R. 2598 (LANHAM, D-Texas) COPYRIGHT—To provide a uniform fee for the registration of copyrights. Referred to the Committee on Patents.

HOUSE RESOLUTION

H. Res. 74 (GEYER, D-Calif.) Requesting the Attorney General of the United States to investigate the facts and circumstances connected with the granting of United States citizenship to W. J. Cameron, of Dearborn, Michigan. Referred to Committee on Immigration and Naturalization.

H. Res. 79 (MlVERS, D-Penna.) To appoint a special committee to investigate the alleged disagreement between the National Association of Broadcasters and the American Society of Composers, Authors, and Publishers (ASCAP). Referred to Committee on Rules.

SENATE

S. 517 (JOHNSON, D-Colo.) LIQUOR ADVERTISING—To prohibit the paid advertising of alcoholic beverages by radio in certain circumstances, and for other purposes. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

ARIZONA:

H. 13 (MOSCHAMMER) SALES TAX—INCREASE—Amends the present sales tax law by raising the rates for all types of business to two per cent gross; includes manufacturing, transportation, mining, etc., which now carry one per cent or less. Referred to Taxation Committee 1/14/41. Referred to Judiciary, Ways and Means, and Efficient Government Committees 1/15/41.

CALIFORNIA:

A. 434 (MALONEY) EMPLOYMENT AGENCIES—An act relating to employment agency licenses. Referred to Committee on Judiciary Codes.

A. 797—MUSIC—COPYRIGHTS—Prohibits pooling of music copyrights. Referred to Committee on Judiciary General.

A. 798—MUSIC—COPYRIGHTS—Prohibits pooling of music copyrights. Referred to Committee on Judiciary General.

A. 1578 (TENNEY) COPYRIGHTS—Assists in effectuating the intent and enforcement of the Federal Copyright Law. Referred to Committee on Judiciary General.

CONNECTICUT:

H. 90 (WADHAMS) RADIO ADVERTISING—LIQUOR—Prohibiting the sale of any brand of alcoholic liquor which has been advertised over any radio broadcasting station since July 1, 1941. Referred to Committee on Private Corporations.

IDAHO:

H. 65 (MPRHYE) MUSICAL COPYRIGHTS—Requiring registration of copyrights and performing rights for musical compositions with secretary of state, and prescribing his duties in proceedings affecting them.

MASSACHUSETTS:

H. 1721 (Pet: O'NEILL, Jr.) MUSIC—Provides that the sale of music and use thereof for private and public entertainment be placed under the jurisdiction of the department of Labor and Industries. Referred to Committee on Constitutional Law.

MICHIGAN:

H. 76 (STANLEY, et al) MUSICAL COPYRIGHTS TAX—Levys a 25% tax on the gross receipts from persons in this State of license holders of musical copyrights other than true or original composers. Referred to Committee on Private Corporations.

NEW HAMPSHIRE:

H. 183 (Mayo) PRIVATE EMPLOYMENT AGENCIES—Relating to the licensing of private employment agencies. Referred to Committee on Revision of Statutes.

H. 207 (TUTTLE) LIQUOR—SALE—Prohibiting the sale of brands of liquor and beverages advertised over the radio. Referred to Committee on Liquor Laws.

NEW YORK:

A. 474 (Same as S. 311) (BENNIGAN) INCITEMENT TO HATRED—MISDEMEANOR—Makes it a misdemeanor to incite, advocate or promote hatred, violence or hostility against any person or group by reason of race, color, religion or manner of worship, by any form of communication. Referred to Committee on Codes.

S. 311 (COUGHLIN) CENSORSHIP—Makes it a misdemeanor to incite, advocate or promote hatred, violence or hostility against any person or group by reason of race, color, religion or manner of worship, by any form of communication. Referred to Committee on Codes.

OREGON:

H. 174 (WELLS ET AL.) LIBEL—Amends section 81-2533 prohibiting certain libelous publications during election campaigns.

Pennsylvania:

H. 79 (COX) RADIO BROADCASTING—Prohibits the recording of any broadcast performance or rendition without the permission and consent of the person or persons whose performance or rendition is so recorded.

WASHINGTON:

H. 32 (PENNOCK) PUBLIC EMPLOYMENT AGENCIES—An act to regulate public employment agencies prescribing maximum charges. Referred to Committee on Labor and Labor Statistics.

WISCONSIN:

S. 43 (CASHMAN) COPYRIGHTED MUSIC—An act to create Section 177.01 (8) of the Statutes, relating to copyrighted music. Referred to Committee on Judiciary.

NEW YORK LEGISLATION

Harold E. Smith, WABY, Albany, has accepted an appointment as legislative contact man at the New York capital. (NAB Reports, p. 32.)

FEDERAL COMMUNICATIONS COMMISSION

FCC APPROPRIATION

The House of Representatives on Thursday passed that part of the Independent Offices Appropriation Bill taking care of the FCC appropriation for the fiscal year 1942.

The total appropriation as passed by the House was for $4,259,729. Included in this amount was $1,920,000 for national defense activities which will allow the Commission to continue to perform the national defense functions for the performance of which during the fiscal year 1941 the Commission received allocation of appropriation from the President’s emergency fund.

The House Appropriation’s Committee, in reporting out the Independent Offices Bill, had the following to say in connection with the FCC:

"For salaries and expenses of the regular activities of this agency there is recommended $2,315,229, which is the Budget estimate and
The FCC has announced suggested rules for consideration, and the procedure for opportunity to themselves propose standards, to comment received. No questions other than those of a purely engineering character were involved. It was not an occasion for other parties to be heard, or to cross-examine the Committee and panel chairmen. However, at the March 20 hearing, all interested parties will be afforded full opportunity to themselves propose standards, to comment upon standards which have been proposed by others, to cross-examine various witnesses, and, generally, to be heard upon all the pertinent problems in connection with the standardization and commercialization of television. He is particularly optimistic about the possibilities of television as demonstrated to the Commission several days previously in New York.

At the informal conference this week reports by the National Television Systems Committee only were received. No questions other than those of a purely engineering character were involved. It was not an occasion for other parties to be heard, or to cross-examine the Committee and panel chairmen. However, at the March 20 hearing, all interested parties will be afforded full opportunity to themselves propose standards, to comment upon standards which have been proposed by others, to cross-examine various witnesses, and, generally, to be heard upon all the pertinent problems in connection with the standardization and commercialization of television.

The Commission will issue a more specific notice as to suggested rules for consideration, and the procedure for the scheduled hearing.

Chairman Fly expressed the hope that the intervening time will be utilized by those interested to study the alternative standards with a view to ironing out differences in the industry so far as may be feasible. He also holds it desirable that field testing, which is currently under way, be brought to some fairly definite conclusion, in order that the differing standards for television may be presented on the basis of practical operation.

FM TECHNICAL REQUIREMENTS WAIVED

As the result of a conference with manufacturers of high frequency (FM) broadcast equipment, the FCC has waived certain technical requirements to expedite operation and, incidentally, announces its 30th FM grant on a commercial basis—for a new station at Syracuse, N. Y. More than 600,000 residents within a 6,800-square-mile area of that city will be served by the Central New York Broadcasting Corp. on 46,300 kilocycles.

Since high frequency broadcast stations are rated on the basis of specified service and the actual power may vary widely for the same service area in the same location, the Commission's rules do not specify or standardize power rating. However, standardization of the maximum power rating and operating range of the transmitters would be of mutual assistance to the manufacturer and broadcaster. Since the Commission has agreed to standardize the power in connection therewith it became desirable to waive two rules—Section 3.241, relating to maximum power rating, to permit maximum power of four times the operating power between 12,500 and 25,000 watts until a 25,000 watt transmitter can be developed and placed on the market; and Section 3,245, relating to transmitter performance requirements, to permit manufacturers more time to meet the 2 per cent limit on the combined audio frequency harmonics generated by the transmitting system.

Because proposed FM service in the Philadelphia and New York areas makes assignment of adjacent channels desirable, the Commission has modified the construction permit granted the WCAU Broadcasting Co., in the former city, to specify 46,900 kilocycles (instead of 46,700), and that of the Columbia Broadcasting System, Inc., New York, to specify 46,700 kilocycles (instead of 48,700). The call letters W67PH assigned to the Philadelphia station necessarily must be changed to W69PH to indicate the new frequency assignment. Call letters for the Columbia Broadcasting System station have not yet been assigned.

SECTION 3.92 OF RULES SUSPENDED

The FCC suspended requirements of Section 3.92 with respect to station identification announcements applicable to all radio broadcast stations carrying the President's birthday celebration program for the period 11:15 p. m. to 12:15 a. m. EST, January 30 and 31.
WAIVER OF SECTIONS 3.241 AND 3.245 OF FM RULES

Section 3.241, of the FCC rules, relating to maximum power rating, was waived, to permit maximum power of four times the operating power between 12,500 and 25,000 watts until a 25,000 watt transmitter can be developed and placed on the market; and Sec. 3.245, relating to transmitter performance requirements, to permit manufacturers more time to meet the 2 per cent limit on the combined audio frequency harmonics generated by the transmitting system, was also waived.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings are scheduled before the Commission in broadcast cases during the week beginning Monday, February 3. They are subject to change.

Monday, February 3
NEW—Atlantic Broadcasting Corp., Miami, Fla.—C. P., 1550 kc., 500 watts night, 1 KW day, unlimited.
NEW—Seaboard Broadcasting Corp., Tampa, Fla.—C. P., 1330 kc., 1 KW night, 1 KW day, unlimited.
NEW—Robert V. Lee, Bradenton, Fla.—C. P., 1500 kc., 250 watts night, 250 watts day, unlimited.

Tuesday, February 4
To Be Held in the U. S. Court Building, San Juan, Puerto Rico
NEW—Puerto Rico Advertising Co., Inc., San Juan, P. R.—C. P., 1550 kc., 250 watts, unlimited.
NEW—Caribbean Broadcasting Association, Inc., San Juan, P. R.—C. P., 1500 kc., 250 watts, unlimited.
WPRK—Puerto Rico Advertising Co., Inc., Mayaguez, P. R.—Renewal of license, 750 kc., 1 KW night, 2½ KW day, unlimited.

Wednesday, February 5
WCSC—The Liberty Life Insurance Co. (Transferor) and John M. Rivers (Transferee), Charleston, S. C.—Transfer of control of South Carolina Broadcasting Co., Inc.; 1360 kc., 500 watts night, 1 KW day, unlimited.

Thursday, February 6
WOOD—King-Trendle Broadcasting Corp. (Assignor), WOOD Broadcasting Corp. (Assignee), Grand Rapids, Mich.—Voluntary assignment of license; 1270 kc., 500 watts, unlimited, S-WASH.

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings. They are subject to change.

March 3
Television
NEW—R. B. Eaton, Des Moines, Iowa.—C. P., 66000-72000 kc., 46 watts night, 46 watts day, visual; 100 watts day, aural; unlimited.
NEW—William D. Hudson and Violet Hutton Hudson, Clarksville, Tenn.—C. P., 1370 kc., 250 watts, unlimited time.

March 17
WDGY—Dr. George W. Young, Minneapolis, Minn.—C. P., 1100 kc., 5 KW night, 10 KW day, unlimited, DA night. Present assignment: 1180 kc., 1 KW night, 5 KW day, limited-KOB.

March 18
WAGA—Liberty Broadcasting Corporation, Atlanta, Ga.—C. P., 590 kc., 1 KW night, 5 KW day, DA night, unlimited. Present assignment: 1450 kc., 500 watts night, 1 KW day, unlimited.

March 19
NEW—Butler Broadcasting Corporation, Hamilton, Ohio.—C. P., 1120 kc., 250 watts, unlimited.

APPLICATIONS GRANTED

Central New York Broadcasting Corp., Syracuse, N. Y.—Granted construction permit for new high frequency (FM) broadcast station to operate on frequency 1430 kc.; 6800 square miles; 600,000 population (B1-PH-50).
WWJ—The Evening News Association, Detroit, Mich.—Granted modification of construction permit (B2-P-2850 to make changes in directional antenna nighttime) for approval of new directional antenna specifications (B2-MP-1132).
KVOX—Robert K. Herbst (Transferor), David C. Shepard, John W. Boler, and Howard Johnson (Transferee), KVOX Broadcasting Co. (Licensee), Moorhead, Minn.— Granted consent to transfer control of KVOX Broadcasting Company from Robert K. Herbst to David C. Shepard, Howard Johnson and John W. Boler, representing all the issued and outstanding capital stock (250 shares of common, par value $100 per share) for a cash consideration of $25,000 and $15,000 in time on the station. The value of time used will be computed at prevailing rates and not less than $2,000 per year shall be used; station operates on 1310 kc., 250 watts, unlimited time (B4-TC-241).
WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.— Granted modification of license to move main studio from 1100 Market St., Newark, N. J., to 1440 Broadway, New York City (B1-ML-1041).

RENEWAL OF TELEVISION STATION LICENSES

The Commission granted the following applications for renewal of television broadcast station licenses:

The following licenses for television stations expiring Feb. 1, 1941, were extended to March 1, 1941, pending action on applications for renewals:

The following licenses for television stations expiring Feb. 1, 1941, were extended to March 1, 1941, pending receipt of applications for renewals:
W2XB, W2XH, General Electric Co., Schenectady, N. Y.; W9XUI, State University of Iowa, Iowa City, Iowa.

MISCELLANEOUS

National Broadcasting Co., Inc. New York, N. Y.— Granted special temporary authority to rebroadcast over the NBC Blue
Network of affiliated stations and international stations WRCA and WNBH program material originating on army planes flying over Angeles, Calif. WAFB's aerial maneuvers over Anacostia, D. C., part of program "One Nation Indivisible" to be broadcast on January 20, 1941, between 9 p.m. and 10 p.m. EST.

National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to rebroadcast over WRC, WMAL and WCBS Red and Blue Network stations, international broadcast stations WRCA and WNBH, and experimental station W2XWG, conversations and orders transmitted from one plane to another and from planes to the ground control stations, as a special feature in the coverage of U. S. Navy aerial maneuvers over Washington on Inauguration Day, January 20, 1941; communications between planes and ground to be on Government frequencies and program reception to be effected by NBC receiving equipment located on the Washington Monument and on the Dome of the Capitol Building, Washington, D. C.

The Tribune Company, Tampa, Fla.—Petition (1) for partial removal of condition in its construction permit; (2) for grant of application of City of St. Petersburg (WSUN) for modification of license; (3) for grant of application for transfer of control of Lake Region Broadcasting Co. (WLRA), Lakeshorea, Minn., to individual stockholders of the Tribune Company; and (4) for assignment of call letters WFLA in place of call letters WKG in new station of the Tribune Company, Tampa, denied except as to request for grant of WSUN application and except as to request for change in call letters; granted as to these matters only.

WGEN—Arthur Faskc, Brookhn, N. Y.—Granted special temporary authority to rebroadcast over WRC, WMAL and WCBS Red and Blue Network stations, international broadcast stations WRCA and WNBH, and experimental station W2XWG, conversations and orders transmitted from one plane to another and from planes to the ground control stations, as a special feature in the coverage of U. S. Navy aerial maneuvers over Washington on Inauguration Day, January 20, 1941; communications between planes and ground to be on Government frequencies and program reception to be effected by NBC receiving equipment located on the Washington Monument and on the Dome of the Capitol Building, Washington, D. C.

William H. Rines, Portland, Maine.—Granted motion for dis¬

Wm. D. Hudson & Violet Mutton Hudson, Clarksville, Tenn.—Granted license to cover construction permit (B4-P-2350) for increase in night power to 5 KW, 820 kc. unlimited time, DA night; also granted authority to deter¬mine operating power by direct measurement of antenna input.

WJNO—WJNO, Inc., W. Palm Beach, Fla.—Licensed construction permit to use formerly licensed composite transmitter and install vertical antenna as an auxiliary unit at 511 Datura St., W. Palm Beach.

KFEH—KFEH, Inc., Honolulu, Hawaii.—Granted modification of construction permit (B1-P-2462) for extension of completion date from Feb. 18 to July 18/41.

KARK—Arkansas Radio and Equipment Co., Little Rock, Ark.—Granted license to cover construction permit (B3-P-2570) which authorized a new relay station to operate on 1360 kc. 250 watts unlimited time, DA night; also granted authority to deter¬mine operating power by direct measurement of antenna input.

WFTG—J. Samuel Brody, Sumter, S. C.—Granted authority to determine operating power by direct measurement of antenna input.

WJNO—WJNO, Inc., W. Palm Beach, Fla.—Licensed construction permit to use formerly licensed composite transmitter and install vertical antenna as an auxiliary unit at 511 Datura St., W. Palm Beach.

KFEH—KFEH, Inc., Honolulu, Hawaii.—Granted modification of construction permit (B1-P-2462) for extension of completion date from Feb. 18 to July 18/41.

KARK—Arkansas Radio and Equipment Co., Little Rock, Ark.—Granted license to cover construction permit (B3-P-2570) which authorized a new relay station to operate on 1360 kc. 250 watts unlimited time, DA night; also granted authority to deter¬mine operating power by direct measurement of antenna input.

KMMJ—KMMJ, Inc., Grand Island, Neb.—Granted authority to determine operating power by direct measurement of antenna input.

KOCY—KOCY, Inc., Oklahoma City, Okla.—Granted authority to install automatic frequency control unit.
mine operating power by direct measurement of antenna input (B4-Z-65).

WNBH—E. Anthony & Sons, Inc., New Bedford, Mass.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-630).

WAWT—Alabama Polytechnic Institute, University of Alabama, Etc., Portable-Mobile (area of Birmingham, Ala.)—Granted license to cover construction permit (B5-PKY-211) which authorized a new relay broadcast station to be used with applicant's standard broadcast station WAPI; frequencies 1622, 2058, 2150, 2720 kc., 25 watts (B3-1RX-214).

WGNB—WGN, Inc., Chicago, Ill.—Granted license to cover construction permit (B5-PRE-247) for new relay broadcast station WGNB—E. Anthony & Sons, Inc., New Bedford, Mass.—Granted

KFSD—.Mrar Radio Corporation, Ltd., San Diego, Calif.—Modification of construction permit for high frequency broadcast station W67PH heretofore assigned were changed to 690 kc., 469011 kc., 46700 kc., 46901 kc., so as to specify the channel 6900 kc. instead of 45700 kc., and the call letters W67PH heretofore assigned were changed to W67PH.

WDEL—WDEL, Inc., Wilmington, Del.—Request to withdraw petition for rehearing directed against the action of the Commission November 26, 1940, granting without hearing the application of WCBP, Boston, Mass., for construction permit to operate unlimited time on 1120 kc., with 500 watts power, was considered as a motion to dismiss, and granted, and the petition filed by WDEL for rehearing was dismissed.

The May Department Stores Co., Los Angeles, Cal.—Granted extension of time in which to supply the experimental program for television broadcast station W6WMC (CP only), for a period of 60 days from January 14, 1941.

WCAU Broadcasting Co., Philadelphia, Pa.—Granted construction permit for high frequency broadcast station so as to specify the channel 10800 kc. instead of 145700 kc., and the call letters W67PH heretofore assigned were changed to W67PH.

Columbia Broadcasting System, Inc., New York City.—Granted modification of construction permit for high frequency (FM) broadcast station so as to specify the channel 106700 kc. instead of 148700 kc., heretofore assigned. Call letters for this station have not yet been assigned.

APPLICATIONS FILED AT FCC

550 Kilocycles

WSVA— Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Modification of construction permit (B2-P-2578) as modified for new equipment, increase in power, and antenna, requesting a new transmitter and extension of completion date from January 28, 1941 to 180 days after grant.

KVO—Riviera Broadcasting Co., Phoenix, Ariz.—Construction permit to install a new transmitter.

600 Kilocycles

KFSD—Elmer G. Beehler, Sterling, Colo.—Authority to determine operating power by direct measurement of antenna power.

WFMD—Monocacy Broadcasting Co., Frederick, Md.—Authority to determine operating power by direct measurement of antenna power.

WBEN—WBEN, Incorporated, Buffalo, N. Y.—Construction permit to move auxiliary transmitter from RFD No. 2, Shawnee Road, near Martinsville, New York, to corner Bush Road and Beaver Island Parkway, Grand Island, New York.

920 Kilocycles

WAFF—Drovers Journal Publishing Co., Chicago, Ill.—Construction permit to increase power from 1 KW to 1 KW, 5 KW

NEW—Cuyahoga Valley Broadcasting Company, Cleveland, Ohio.—Construction permit for a new station on 1000 kc., 1 KW, unlimited time, to install a new transmitter, install directional antenna for day and night use and move of transmitter.

1000 Kilocycles

WFMD—Monocacy Broadcasting Co., Frederick, Md.—Authority to determine operating power by direct measurement of antenna power.

WBEN—WBEN, Incorporated, Buffalo, N. Y.—Construction permit to move auxiliary transmitter from RFD No. 2, Shawnee Road, near Martinsville, New York, to corner Bush Road and Beaver Island Parkway, Grand Island, New York.

920 Kilocycles

kfhs—KTHS Broadcasting Co., Inc., Hot Springs National Park, Arkansas.—Construction permit to install new transmitter, and directional antenna for night use; change frequency from 1080 kc. to 1060 kc.; increase power from 10 to 50 KW and hours of operation from shares KRLD to unlimited time. Amended to change name from Hot Springs Chamber of Commerce to KTHS Broadcasting Co., Inc.; change type of requested transmitter; and change power of amplifier from 100 watts, 250 watts local sunset, to unlimited.

1120 Kilocycles

KFWI—The Farmers and Bankers Broadcasting Corp., Wichita, Kans.—Modification of construction permit (B4-MP-896) for change of power and hours of operation from 5 KW, limited time, to 1 KW, 5 KW, Local Sunset, unlimited time, and installation of directional antenna for night use, requesting changes in directional antenna for night use.

1050 Kilocycles

KWV—Westinghouse Electric and Manufacturing Co., Philadelphia, Pa.—Authority to determine operating power by direct measurement.

1060 Kilocycles

KTHS—KTHS Broadcasting Co., Inc., Hot Springs National Park, Arkansas.—Construction permit to install new transmitter, and directional antenna for night use; change frequency from 1080 kc. to 1060 kc.; increase power from 10 to 50 KW and hours of operation from shares KRLD to unlimited time. Amended to change name from Hot Springs Chamber of Commerce to KTHS Broadcasting Co., Inc.; change type of requested transmitter; and change power of amplifier from 100 watts, 250 watts local sunset, to unlimited.

1120 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—Modification of construction permit (B1-P-2758) for increase in power from 250 watts, 1 KW local sunset, to 5 KW day and night, install new equipment and directional antenna for day and night use. Amended to make changes in directional antenna for day and night use.

1140 Kilocycles

WAPI—Alabama Polytechnic Institute, University of Alabama and Alabama College (Board of Control of Radio Broadcasting Station WAPI), Birmingham, Ala.—Voluntary assignment of license from Alabama Polytechnic Institute, University of Alabama and Alabama College (Board of Control of Radio Broadcasting Station WAPI), to Voice of Alabama, Inc.

WDEL—WDEL, Inc., Wilmington, Del.—Modification of construction permit (B1-P-2758) for increase in power from 250 watts, 1 KW local sunset, to 5 KW day and night, install directional antenna for day and night use, and new transmitter, requesting approval of directional antenna for day and night use.

1200 Kilocycles

WJOB—F. L. Adair and O. E. Richardson, Hammond, Ind.—Modification of license to change hours of operation from unlimited day, share WFAM night, to unlimited time.

KGEK—Elmer G. Beehler, Sterling, Colo.—Authority to determine operating power by direct measurement of antenna power on 1230 kc., under NARBA.

January 31, 1941 — 109
FM APPLICATIONS

FM APPLICATIONS

NEW—Rambaher Broadcasting Service, Inc., Newark, N. J.—Modification of construction permit (B1-PH-46) for a new high frequency broadcast station, approval of transmitter, changes in antenna, and change population from 11,800,000 to 11,900,000. Amended to change location of studio from Newark, N. J., to New York, N. Y.

NEW—Wodaam Corporation, New York, N. Y.—Construction permit for new high frequency broadcast station. Frequency, 14300 ke.; coverage, 8,500 square miles; population, 10,400,000. Amended to change frequency from 16700 ke., population from 11,417,600 to 11,431,600; change type of transmitter, and location of transmitter from Carlsdtad, N. J., to New York, N. Y., and changes in antenna.

NEW—New Jersey Broadcasting Corp., New York, N. Y.—Construction permit for new high frequency broadcast station. Frequency, 42900 ke.; coverage, 8,900 square miles; population, 10,400,000. Amended to change frequency from 45300 to 16700 ke., population from 11,417,600 to 11,431,600; change type of transmitter, and location of transmitter from Carlsdtad, N. J., to New York, N. Y., and changes in antenna.

NEW—The Evening News Association, Detroit, Mich.—Modification of construction permit (B2-PH-21) for approval of transmitter, antenna changes, and change population from 5,611,961 to 2,498,600. Amended re change type of transmitter.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.
Dr. Jane Blanchard—Charging misrepresentation in the sale of a medicinal preparation, a complaint has been issued against Jane Blanchard Geary, trading as Dr. Jane Blanchard, 2817 East St. (N.S.), Pittsburgh.

According to the complaint, the respondent advertises her product designated “Dr. Blanchard’s Female Compound and Regulator,” as a competent and reliable regulator of conditions peculiar to women, and as being safe and harmless.

The complaint charges, however, that the preparation’s therapeutic properties are limited to those of an alcoholic stimulant and irritant laxative; that it is not safe and harmless in that contains the drug aloes in quantities sufficient to be harmful, and that the respondent’s advertisements are false because they fail to reveal that use of the preparation under conditions prescribed in the advertisements or under customary conditions may cause colitis and produce pelvic congestion.

Use of the title “Dr.” by the respondent is misleading as she is not a medical doctor, the complaint alleges. (4449)

STIPULATIONS

The following stipulations have been entered into by the Commission during the past week:

Foot Pep Sales—A. Greenberg, Sol Bassan, and H. Greenberg, trading as Foot-Pep Laboratories, and Foot-Pep Sales, 930 West Roosevelt Road, Chicago, in a stipulation entered into with the Federal Trade Commission, agree to cease advertising that their preparation “Foot-Pep” is a competent remedy or effective treatment for athlete’s foot; that it has any therapeutic value in treating this ailment in excess of affording temporary symptomatic relief and that it stops acidity, penetrates skin pores, stimulates foot circulation, peps up normal feet, and soothes corns, bunions or callouses. The respondents also agree to cease representing, by use of the word “Laboratories” in their trade name, that they maintain or control a laboratory. (02713)

Alvin L. Keeny, Route No. 1, New Freedom, Pa., a dealer in mink breeding stock, in a stipulation has agreed to cease representing that he personally has substantial resources to assure the sale at a profit, of mink raised from breeding stock sold by him; that he has obtained or is able to obtain any specific amount for a mink pelt in excess of the amount actually obtained, or that mink pelts are worth any specific amount in excess of such amount obtained. The respondent also agrees to cease overstating the possible profits attainable by persons selling mink raised from stock sold by him. (02712)

Meyer Brothers Drug Company, 217 South Fourth St., St. Louis, has entered into a stipulation with the Federal Trade Commission in which it agrees to cease advertising that its product “Ratskill” is the most effective exterminator to use against rats, and that the Department of Agriculture has said that red squill is the most successful of all rat poisons. The respondent, according to its stipulation, advertised its product as “a red squill rat exterminator.”

Old Indian Medicine Company—Charles K. Wilson, trading as Old Indian Medicine Company, and as Wa-Hoo Medicine Company, 845 Western Ave., Toledo, Ohio, has entered into a stipulation with the Federal Trade Commission in which he agrees to cease and desist from certain representations in the sale of medicinal preparations.

The respondent stipulates that he will cease representing that “Wa-Hoo Bitters” is a tonic or effective treatment or competent remedy for ailments of the blood, nerves, stomach, liver or kidneys, and is efficacious as a treatment or remedy for rheumatism, impure blood, gastritis, sour or bloated stomach, liver or kidney complaint, indigestion, dyspepsia, catarrhal troubles, nervousness, salt rheum, scrofula, skin diseases or any other ailment or condition aside from constipation.

The respondent further agrees to cease representing by statements such as “Old Indian Remedy” or “Old Indian Root and Herb Tonic” or otherwise, that the formula for the preparation was originated or used by American Indians prior to the time of their introduction to or acquaintances with generally recognized medical science.

The respondent also agrees to desist from representing fictitious prices as customary prices. (3027)

Rogers Peet Company, operating a number of men’s furnishing stores in New York City, has entered into a stipulation in which it agrees to cease certain representations in the sale of robes.

The respondent agrees to cease and desist from failing to disclose that such products are composed of rayon, either in whole or in part, as the case may be, such disclosure to be made clearly in invoices and all advertising matter.

The respondent corporation also stipulates that it will cease using the terms “Pure Silk” or “Silk Faille” or the word “Silk” or similar words, alone or in conjunction with other words, as descriptive of products which are not silk exclusively or which contain any metallic weighting.

If, according to the stipulation, a product consists of weighted silk, either in whole or in part, then the words “Silk,” “Pure Silk,” or “Silk-Faille,” if used to refer to its silk content, shall be immediately accompanied by full and conspicuous disclosure of the presence of metallic weighting, together with its proportion or percentage, in all tags and advertising matter.

The stipulation gives the following illustrative examples of the disclosure provided for: “Silk, Weighted, 20%,” “Silk with 20% Metallic Weighting,” “Silk Weighted up to 20%,” and “Silk Weighted not over 20%.” (3026)

Sumlar Company—A. Marks, trading as The Sumlar Company, 1 Sickles St., New York, has entered into a stipulation in which he agrees to cease certain representations in the sale of “Kloronol,” a nose drop medicinal preparation.

The respondent agrees to cease disseminating advertisements (1) which represent that continuous use of Kloronol is safe, or that it may be continuously used without harm in certain pathological conditions such as sinusitis; (2) which advertisements fail to reveal that its continued or frequent use may cause nervousness, restlessness or sleeplessness, and (3) which fail to reveal that persons ill of high blood pressure, heart disease, diabetes or thyroid trouble, should not use the preparation except on competent advice.

The stipulation provides, however, that such advertisement need contain only a statement that the preparation should be used only as directed on the label, if and when such label either contains an appropriate warning or specifically directs attention to such a warning statement in the accompanying labeling.

The respondent also agrees to cease representing that the product is “new” or “rare.” (02711)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Apex Lamp Works—B. Solomon, trading as Apex Lamp Works, 146 West 25th St., New York, to cease and desist from making misleading representations in the sale of a lamp shade or reflector known as “Amplidirector.”

Commission findings are that the respondent advertised her product as being a new and amazing light discovery which cuts light bills from 25 to 50 per cent, and as an advancement in the science of light reflectors providing extreme concentration of light rays. The respondent also made other representations of the product’s merit and efficiency.

The respondent, according to findings, discontinued such advertising in 1938 and continued selling the reflectors until a year later.
The Commission finds that the respondent's reflector does not reduce lighting costs and that, like many other reflectors, it is instrumental in directing and increasing light on a given working plane, and is merely an adaptation of a well-known principle of light diffusion.

The Commission order directs the respondent to cease and desist from various representations made concerning the product. (3629)

Cheshill Manufacturing Company—Selling a chain door lock equipped with a so-called safety bell and advertised as a burglar alarm, Edward Shill and Sanford C. Chesick, trading as The Cheshill Manufacturing Company, 501 Seventh Ave., New York, have been ordered to cease and desist from misrepresentation in the sale of this product, known as “Safety Bell Chain Lock.” The order directs the respondent to cease using the word “manufacturing” or any similar word as part of their trade name unless they actually own, operate and control a factory in which their product is made, and to cease representing that they are manufacturers of the “Safety Bell Chain Lock” device, and that it is patented or that an application for a patent is pending, when such is not a fact. (4123)

Group Sales Corporation, 215 West 39th St., New York, a jobber or wholesaler of silk and rayon piece goods, has been ordered to cease and desist from misrepresentation of its products. Through its use in circular advertisements distributed to retail customers of the well-known names of manufacturers such as H. R. Mallinson, Cheney Bros., Ebeling, Schwarzenbach, and others, and of accompanying representations, the respondent, according to Commission findings, advertises that the piece goods which it sells are composed entirely of so-called “name goods,” when in fact a substantial portion of the products so advertised consist of materials having no recognized quality and made by manufacturers who do not have a wide or favorable reputation. Most of the respondent’s merchandise, the findings continue, has been obtained, not directly from manufacturers, but from commission merchants, dress manufacturers, garment makers and jobbers.

The Commission order directs that the respondent cease representing, or aiding retailers to represent, through the device of so-called “name sales” of groups of piece goods, that groups of its silk and rayon piece goods constitute “name goods,” unless all or a majority of the goods included in such groups have been actually produced and widely advertised by a nationally known manufacturer. The order further directs that in the event such groups of goods include pieces not produced and widely advertised by a nationally known manufacturer, disclosure of that fact is to be made.

The respondent is further ordered to cease representing as new, wanted, up-to-date, stylish or fashionable, any fabric which is not such in fact; representing that the quality, character or origin of a fabric is other than what is actually the fact, and that any product has been obtained by the respondent directly from the manufacturer, when such is not a fact. (2922)

Home Diathermy, Inc.—A cease and desist order which it issued last November against Home Diathermy, Inc., 1750 Broadway, New York, has been modified directing cessation of misleading representations in the sale of a “Home Diathermy” device.

The modified order directs the respondent to cease and desist from misrepresentation of the therapeutic value and merit of its product, as did the original order, but the modified order changes that part of the original order which prohibited the dissemination of advertisements which failed to reveal that un supervised use of the device by unskilled persons may result in serious and irreparable injury.

Under the modified order, now in effect, the respondent is directed to cease disseminating advertisements which fail “to conspicuously reveal that the device may be safely used only after a competent medical authority has determined, as a result of diagnosis, that diathermy is indicated and has prescribed the frequency and amount of application of such diathermy treatments and the user has been adequately instructed in the method of operating such device by a trained technician.” Otherwise the modified order is the same as the original order. (3653)

McAfee Candy Company—Orders have been issued against a Georgia candy manufacturer and a New York distributor of smoking pipes, directing them to cease and desist from the use of lottery methods in the sale of their products.

The respondents are: Joe B. Hill and C. O. McAfee, trading as McAfee Candy Co., and as Liberty Candy Co., 651 Poplar St., Macon, Ga., and S. M. Frank & Co., Inc., and its subsidiary, Wm. Demuth & Co., Inc., both of 133 Fifth Ave., New York.

The order against the Macon, Ga., firm directs that it cease and desist from supplying to or placing in the hands of others candy or any other merchandise so packed and assembled that its sale to the public may be made by means of a lottery; from supplying others with candy or other merchandise, together with push or pull cards, punch boards or other lottery devices, which devices may be used in selling or distributing such candy or other merchandise to the public; from supplying to or placing in the hands of others, punch boards, pull tabs, punch boards or other lottery devices, either with assortments of candy or other merchandise or separately, which devices may be used in selling or distributing such candy or other merchandise to the public; and from selling or otherwise disposing of any merchandise by means of a game of chance, a gift enterprise, or lottery scheme. (4114)

The two New York pipe companies are directed to cease and desist from selling or distributing pipes or any other merchandise so packed and assembled that their sale to the public may be made by means of a lottery; from supplying others with push or pull cards, pull tabs, punch boards or other lottery devices, either with assortments of merchandise or separately, which devices may be used in selling or distributing such pipes or other merchandise to the public; and from selling or otherwise disposing of any merchandise by means of a game of chance, a gift enterprise, or lottery scheme. (3493)

New York Premium Novelty Company—Alexander Weiler and Lily Greenspan Weiler, trading as New York Premium Novelty Co., 168 Avenue A, New York, has been ordered to cease and desist from using lottery methods in the sale of jewelry, cosmetics, cigarette lighters, clocks and other merchandise.

Commission findings are that the respondents distributed between 800,000 and 1,000,000 advertising circulars, each containing a pull card device and picturizations of their merchandise. By means of their sales plan, the findings continue, the respondents have done an annual business of between $25,000 and $30,000, of which 60 per cent has been outside New York State.

The Commission order directs the respondents to cease supplying to or placing in the hands of others, or transporting to agents, distributors, or the public, punch boards, push or pull cards, or other devices, which may be used in selling or distributing their merchandise to the public by means of a game of chance, a gift enterprise, or lottery scheme. (3579)

National Proprietaries, Inc., 767 North Milwaukee Ave., Chicago, has been ordered to cease and desist from misrepresentation in the sale of “Nuga-Tone,” advertised as having substantial value in treating nervous disorders.

The preparation, according to Commission findings, does not possess any value in the treatment of nervous disorders and is not safe, as it contains several drugs in quantities sufficient to produce serious and irreparable injury if used under conditions prescribed in the advertisements or under usual conditions.

The Commission order directs the respondent to cease and desist from disseminating advertisements which represent that Nuga-Tone possesses any therapeutic value in the treatment of nervous disorders or which fail to reveal that use of the preparation may result in chronic poisoning, irritation of the kidneys, nervous irritability, neuritis, or other conditions. (4271)

Spors Company—Frank Spors, trading as Spors Company and as Quality Products Company, Le Center, Minn., has been ordered to cease and desist from disseminating advertisements representing that his preparation, which he has prepared and which he has designated as “Liquid Corn-Go,” will remove blemishes or has any value in their treatment; will prevent recurrence of corns or callouses, or that the preparation’s action in removing callouses or corns accomplishes anything other than a temporary removal. (4397)
FTC DISMISSES CASES

The Federal Trade Commission has dismissed a complaint charging 10 card clothing manufacturers and the Card Clothing Manufacturers' Association, New York, with unfair competition in violation of the Federal Trade Commission Act in the sale of their product.

The respondent manufacturers' product, card clothing, is a tough, close-woven fabric studded with steel teeth, used principally by textile manufacturers in combing out wool and cotton preparatory to spinning.

The Commission has closed its case against Aero Industries Technical Institute, Inc., Los Angeles, which conducts a vocational school in modern aircraft construction and allied fields. The respondent had been charged with violation of the Federal Trade Commission Act in the sale of home study or correspondence courses. The Commission closed the case without prejudice to its right to resume proceedings, should future facts so warrant.
The FCC reallocation order of January 31 leaves the industry with less than 60 days in which to prepare for the shifts. To accomplish the reallocation as scheduled on March 29, requires the utmost of cooperation between the FCC, the broadcast stations and the equipment manufacturers. The FCC reallocation release number 47182 issued January 31, outlines the course of procedure to follow.

There are two possible bottlenecks apparent at present in carrying out the reallocation. Grinding the hundreds of new crystals will be a difficult task for the manufacturers to accomplish before March 29. It is therefore of the utmost importance that stations make immediate arrangements for securing new crystals. Some stations may be able to obtain crystals from present tenants of their new frequency. Correspondence in connection with this should be carried out with all speed so that if crystals cannot be obtained this way, the manufacturer of crystals will be given the maximum possible notice. Stations should be sure to notify the manufacturer whether a directional antenna is to be used or not.

Deliveries on equipment other than crystals are slow and therefore, stations are urged to ascertain their needs and place orders immediately.

Each consulting engineering firm will be called on to change over several directional antennas. It will not be possible for each firm to be at the transmitter of each client on the night of the change. The FCC in its release provides for changing most of the directionals on a skeleton proof of performance basis. Under this plan the consultants can start immediately resetting directionals during test periods and then record the new settings. On the shift night the station engineer can set all the coils and condensers to the previously marked positions. This (Continued on page 116)

Justice Department Files Criminal Action Against ASCAP

The Department of Justice on Wednesday, February 4, filed in the United States District Court for the Eastern District of Wisconsin at Milwaukee a criminal information against the American Society of Composers, Authors and Publishers. The information charged that the Society was an unlawful combination in restraint of trade in violation of the Sherman antitrust law. Specifically, it alleged that the following practices of the Society and its members constituted illegal conduct:

(1) The members of the Society assign exclusively to the Society all public performance rights to the copyrighted music composed or published by the respective members thus eliminating all competition among the members in the exploitation of the public performance rights to their music.

(2) The Society is governed by a self-perpetuating board of directors which supervises all of the business of the Society and determines the method of distributing the revenues of the Society among the members and the amount to be received by each member.

(3) Membership in the Society is conditioned, among other requirements, upon the regular publication by the candidate for membership of not less than five musical compositions.

(4) Performance licenses for the Society's music are available only on an all-or-none basis. Licenses authorizing the performance of single compositions or groups of compositions are not available.

(5) The fees collected for these licenses are fixed arbitrarily by the Society to all commercial users of music. In the case of radio broadcasters, this fee is based upon a percentage of the gross revenue of the music user, whether or not such revenue is derived from programs in which music controlled by the Society is used.

(6) The Society has discriminated as to both price and terms among various commercial users of music so that some users have received more favorable treatment at the hands of the Society than others who are similarly situated.

(7) The members of the Society have exercised their privilege of restricting from public performance popular and current musical compositions so as to deprive the listening public of the opportunity of hearing the restricted music and have used this privilege for the purpose of enhancing recording fees received by the members for the recording rights to their respective catalogues of music.

(8) Prior to December 31, 1940, the Society did not offer blanket licenses to radio networks, but required that each station in the network obtain a separate license. Radio stations affiliated with a network have no control over the copyrighted musical compositions.

(Continued on page 116)
JUSTICE DEPARTMENT FILES CRIMINAL ACTION AGAINST ASCAP

(Continued from page 115)

which they receive from the originating station in the network. Nevertheless these radio stations have had to accept a license from the Society upon any terms and conditions imposed by the Society or subject themselves to numerous infringement suits.

Commenting on the Department’s action, Thurman Arnold, Assistant Attorney General in charge of the Antitrust Division, stated:

“In plain language, ASCAP is charged with exploiting composers by preventing them from selling their music except on terms dictated by a self-perpetuating board of directors. That board has the power arbitrarily to determine on what basis various members of ASCAP shall share in the royalties from ASCAP compositions. In addition to discriminating against composers, ASCAP has begun using its monopoly power to charge the users of music for songs they do not play. This is done by compelling the user to pay a percentage of his gross receipts on programs where other music is used or where no music is used. By this method, anyone who does not belong to ASCAP is excluded from the market. These practices we consider not only illegal but unjustifiable on any ground of fair dealing. Our proceeding is aimed only to compel ASCAP to stop such practices. Therefore, the Department will continue to hold the door open to proposals from ASCAP which will eliminate these abuses. It does not desire to prevent ASCAP from protecting the copyright privileges of its members.”

Others Named in Complaint

These officers and directors of ASCAP were named as defendants:

Gene Buck, president; Louis Bernstein and Otto A. Harbach, vice presidents; George W. Meyer, secretary; Gustave Schirmer, treasurer; J. J. Bregman, assistant secretary; Irving Caesar, assistant treasurer, and Max Dreijius, Fred E. Ahlert, Saul Bornstein, George Fischer, Walter Fischer, Raymond Hubbell, Olev Speaks, Deems Taylor, Will von Tilzer, John Mercer and Oscar Hammerstein 2d; E. C. Mills, chairman of the administrative committee, and John G. Paine, general manager.

These corporations, which have officers, agents or representatives on the board of directors of ASCAP, also were named defendants:

All members of ASCAP, in addition to the defendants listed, are named as co-conspirators, the information states, also including these by name: Jerome Kern, Edgar Leslie, Jack Mills, Herman Starr, John O'Connor and J. J. Robbins.

The information was filed after a comprehensive investigation of the activities of the Society and its members which has been conducted by the Department for several months. Negotiations for a settlement between representatives of the Society and the Department respectively, ended abruptly late in December.

The case is in charge of Victor O. Waters, Special Assistant to the Attorney General, and Warren Cunningham, Jr., Special Attorney.

REALLOCATION

(Continued from page 115)

scheme can probably be worked in the majority of cases. Inasmuch as the time is very short, it is imperative that stations immediately place orders with their consulting engineers for realigning the directional antennas.

If a station's transmitter has duplicate crystals, it will be permissible to operate with one crystal for the old frequency and one for the new frequency in the transmitter during the change-over period.

Stations should immediately place orders with the manufacturers for changing frequency monitors to the new frequencies. The FCC has made arrangements with the monitor manufacturers so that an order can be placed for the change without sending in the monitor at that time. The manufacturers will schedule the work and notify each station when to send their monitor in. In this way each station can use its monitor on the old frequency as long as possible. The FCC has authorized operation without a monitor for the required time if the monitor is returned on schedule from the manufacturer. During the period the station is without a monitor frequent checks should be made by the station's monitoring service. A check at least twice a week is suggested. A station's good standing will not be jeopardized if due precautions have been taken and good faith has been shown if they accidentally are found off frequency during the period. Stations should ask their monitor manufacturers for a recalibration schedule without delay.

The equipment necessary to change frequency only requires no further authority from the FCC but any change of tower location and antenna system changes requires a CP in the regular order. The requirements to obtain a CP are not affected by change of requirements due to the reallocation order and must be filed in the usual manner. Stations have full authority without filing for
in accordance with the design of the transmitter and adjust each successive stage, beginning with the first buffer, for optimum operation on the new frequency. Clips or other markings should be made on each tuning capacitor and inductance so that the old frequency can be returned to in the minimum of time.

At stations employing nondirective antennas, the process may be carried on through the antenna systems, and any station in good operating condition should have no great difficulty in adjusting the frequency to the new assignments. By this means every adjustment may be made ("get all set") well before March 29 and the morning of March 29 at 3 a.m. EST, the permanent shift to the new frequency will be made. The frequency should be checked with a frequency monitoring service when the adjustments are first completed and if possible on the morning of March 29.

Each commercial frequency monitoring service is requested to cooperate by making their service available during the entire test period for a week or more before and after March 29, 1941.

General monitoring throughout the broadcast band should be carried on when scheduled checking permits, so as to advise licensees of any off frequency operation. The Commission will have its monitoring stations in operation to advise of any off frequency operation but cannot assist in making adjustments similar to a commercial service.

Stations employing directional antennas in which no substantial change in the directional pattern is required should proceed as follows:

1. Change frequency and adjust each power stage as instructed above.
2. Roughly adjust the antenna coupling and phasing in accordance with the new calculated values.
3. Exercise care to mark all inductances and capacitors so that the original position can be returned to as short time thereafter.
4. As soon as the rough adjustments are made in the phasing and coupling equipments, turn on the power and check the field pattern in pertinent directions.

It may be necessary to purchase new fixed capacitors which should be temporarily connected in the circuit during tests and dropped out when returning to the old frequency.

The Commission will accept proof of the directive antenna operation from readings made on the radial through the monitoring points (direction in which protection is required) and a few readings in other directions.

All told, the final readings need not be in excess of some 8 or 10 in most cases. In every case, readings on appropriate selected points should be made before the frequency change and repeated after the change. Two or three measurements on the radial through monitoring points (direction in which protection is required) and a few checks in other directions.

The usual regional or channel group monitoring stations should be made by the licensee. The time to change the equipment back from the new frequency to the old 300 cycles or less removed should not in any case exceed 30 minutes, if the matter is engineered in a proper manner.

Those stations having engineers familiar with the technique of adjustment of the different circuits should experience no difficulty in making all required adjustments in changing to the new frequencies. Those stations employing directive antennas necessarily require the services of engineers competent to calculate and adjust directive antennas and equipped with the necessary field intensity measuring equipment. It is believed that station engineers will have no difficulty in shifting the equipment including directional antennas to the new channels on March 29 once they have been previously fully adjusted. These data on the radiation field together with the frequency check should be supplied to the Commission upon completion and prior to March 29, 1941.

In case any station is not able, due to any causes, to change to the new frequency on March 29, the Commission must be notified and the station will be required to cease operation until such station can change frequency.

All stations which must return their frequency monitors to the manufacturer to readjust the frequency should do so in the following manner:

1. Notify the manufacturer it is desired to return the monitor at once.
2. Obtain a shipment schedule from the manufacturer.
The manufacturers are requested to make a schedule on the recalibration of the frequency monitors so that a great number will not be received when they cannot be handled except at a certain rate on schedule. Stations determining power by the direct method may continue the direct method when accurate resistance measurements have been made on the new frequency and supplied to the Commission. Readings taken on the old frequency which also cover the new frequency will suffice. Stations operating by the indirect method should continue to so operate. However, attention is called to the fact that all stations must operate by direct method by June 1, 1941.

Licenses and Construction Permits

It should be emphasized that the approval which has been given by the Commission to the lists of stations, pursuant to the agreement, does not in itself authorize operation by licensees on the frequencies or with the power specified. Action by the Commission resulting in the issuance of station licenses in accordance with the Communications Act is required before such operation is authorized. There are now pending before the Commission applications for renewal of license for all standard broadcast stations which were in operation on October 1, 1940. The Commission, upon consideration of these applications, will issue renewal licenses effective at 3:00 a.m., EST, March 29, 1941. Such applications, if approved, will be granted in part, specifying the new frequencies in lieu of the former frequencies, and issued subject to such further conditions with respect to directional antennas as may be required in order to carry out the Agreement.

The foregoing does not mean that all pending applications for renewal of license will be granted. In instances where the Commission, in the normal course, because of complaints or investigations pending against the station, or for other reasons, may determine to hold hearings or conduct other proceedings with respect to the licensees, the Commission procedures regularly applicable in such cases will be followed. In instances where outstanding construction permits require modification in order to comply with the terms of the Agreement, the Commission will institute appropriate procedures for modification of such construction permits.

In order to comply with the assignments permissible under the Agreement, new construction is involved in some instances. Licenses whose applications for renewal are granted subject to a condition, and who accept the condition, must file applications for construction permits to carry out the construction involved for consideration in regular order by the Commission. That is, if a station now operates on frequency A with 1 kw power and under the assignment provided in the Agreement must operate under frequency B but requires a directional antenna to limit the radiation in some direction to less than the equivalent of 1 kw, the station must file an application and be granted authority to put in the necessary equipment with required antenna. The application should be filed as soon as possible and prior to March 29 and the construction proceeded with as rapidly as possible; but in any event the station will be required to shift frequency from frequency A to frequency B at the first operation after 3:00 a.m., EST, March 29. Where construction cannot be completed by that date, such station will be required to operate without directional antennas at a sufficiently low power to avoid interference with other stations.

Some station assignments are listed with a power in excess of that now contained in the station's license. In no case is any station authorized to operate with any power other than that contained in the license or otherwise ordered by the Commission. Applications must be filed with the Commission in order to take advantage of the power increase specified under the listings and such applications will be considered in the order of their filing. The listing does not necessarily mean that the listed station or existing licensee will receive the power specified. The Commission will determine according to the requirements of the Communications Act of 1934.

LICENSES FOR REALLOCATION

The FCC has sent this notice to standard broadcast station licensees and holders of standard broadcast station construction permits.

The Commission today issued a separate order to each of 795 standard broadcast station licensees, as to whose frequency assignments a change is contemplated in keeping with the North American Regional Broadcasting Agreement and the Recommendations adopted by the Commission's Resolution of January 31, 1941, looking to the granting of renewal or license applications specifying frequencies and conditions of operation consistent with the Agreement.

Under the Agreement all stations must shift simultaneously to appropriate frequencies at 3:00 a.m., EST, March 29, 1941, Section 307(e) of the Communications Act of 1934, as amended, provides, that the Commission may not grant renewals of existing station licenses more than 30 days prior to the expiration of such licenses. The Recommendations provide that the other governments parties to the Agreement may give notice on or before March 1, 1941, of their acceptance of said Recommendations, and that in the absence of notification prior to March 1, 1941, the Recommendations are to be considered as approved and accepted by such governments. For these reasons no final action with respect to pending renewal applications will be taken prior to March 1, 1941. The Commission desires, however, to anticipate the placing into effect of the Agreement so far as possible.

The Commission's order in each case specifies the frequency and conditions of operation proposed to be authorized. It further provides that the station licensee may give notice to the Commission of any objections it may have to the frequency assignment and other conditions of operation proposed affecting such station on or before February 18, 1941. Upon receipt of any such notice the Commission will afford appropriate opportunity for a hearing.

Although the orders permit the filing of objections and provide for hearing, it should be observed that the proposed changes were made public September 11, 1940, and opportunity was then and thereafter given to interested parties to make their views known. The purpose of the further opportunity now afforded is to permit the final examination of any remaining objections under the standard of public interest, convenience and necessity. Stations not filing objections will be deemed to have consented to such changes and the orders provide that the Commission will then consider the applications for renewal of such stations as applications for renewal on the new frequencies and subject to the new conditions.

There are outstanding standard broadcast station construction permits looking to the issuance of licenses for operation after March 29, 1941. Before any license covering such construction permits may be issued provision must be made consistent with the terms of the Agreement for the use of a frequency, and in some instances installation of directional antennas or modification of directional antennas presently provided for in said construction permits. The holder of any such construction permit should file as promptly as possible an application for modification of the construction permit to specify a frequency and conditions of operation consistent with the terms of the Agreement.

The Commission also announced that although the Recommendations are not yet legally in effect, pending the response of other governments, no action will be taken by the Commission in a manner inconsistent with the provisions of the Agreement, the Recommendations or the appended lists.

This, of course, will not preclude action where there are no questions of a signal of sufficient intensity to cause interference consequences in another country, nor the granting of authorizations for operation effective after March 29, 1941, which may be notified as changes under the Agreement.
Radio’s Moving Day

The entire radio industry is rapidly getting in step for March 29 when 90 per cent of United States stations will come in on new dial locations on over 50,000,000 radio receivers.

Suggestions to stations will be consolidated in a broad-side soon to be mailed from headquarters.

Advantages to all stations concentrating on an identical point of view will be obvious to all station managers. There are basically three points which must be understood by the radio public and the servicemen who will setup the push buttons of 10,000,000 radio sets:

(1) Reallocation is another forward step in the constant improvement in radio broadcasting.
(2) Reallocation will bring better over-all program reception in the United States.
(3) Reallocation results from careful, long time planning and consultation between governments. It required over 3 years for reallocation to become effective.

Prior to the arrival of the broadside it is suggested that managers complete arrangements with power companies, gas companies and telephone companies for envelope stuffer enclosures in March bills, in line with the “Good News” bulletin of February 1.

It would also be helpful during the coming week for the cause of reallocation if managers will notify the local radio trade that they have complete information in their office on the new frequencies.

Many servicemen and dealers will want to publish a log for advance distribution to their customers.

Editors of trade papers going to servicemen and dealers have pointed out in their columns that for the first time in a great many years servicemen and dealers have log information, which is really news.

**Notes:**
1. WAPI, Birmingham, Alabama, station to operate on 1170 kc, pending adjustment of domestic problems in U. S.
2. KTHS, Hot Springs, Arkansas, at present divides time with KRLD nights on 1040 kc. and operates full-time on 1040 kc.
3. KGEZ, Kalispell, Montana, may be moved to 1460 kc. instead of 1340 as listed.
4. CP—Construction permit.
5. SA—Special authority.

**Payments to ASCAP After December 31**

A number of stations have raised the question whether ASCAP is correctly interpreting its contract in demanding payment upon receipts for programs carried in December, payments for which, however, were not received until after December 31. The accounting policies of stations vary and therefore there is no uniform rule which can be applied.

Some stations report that in the past ASCAP received payment the first month of the contract or the first month
of a revised contract on all receipts received, even though some receipts were for programs carried previous months. If the contract has been so interpreted in the past, it would seem that payment to ASCAP on all receipts received during December would discharge all obligations to ASCAP.

However, if payments in the past have been made on billings or on collections when and as made, then the station is obligated to pay ASCAP on such sums as are collected after January 1 for business carried prior to January 1.

The question should be decided by each station's local counsel or accountant based upon the terms of the contract and its past interpretation by the parties.

**BMI CATALOGUE**

M. E. Tompkins, Vice President and General Manager of BMI, has issued a memorandum to all members calling attention to the wealth of material in the BMI catalogue and in the catalogues of other music publishers licensing through BMI which may be used to obtain wider diversification in building programs. The memorandum follows in full:

We are heartened by the splendid support of our stations in the use of the materials offered by BMI. To forestall criticism on the part of the listening public, however, we must improve program structure by widening our use of available material in the interest of intelligent diversification.

You have splendidly cooperated with our professional department in promoting the use of the titles upon which they are working, and we do not want to diminish that cooperation.

There is, however, an enormous wealth of excellent material offered by BMI from its own catalogue as well as from the catalogues, the performance rights of which BMI has acquired. Accompanying this list is a carefully selected list of material from the catalogues of BMI, Ricordi, Marks and Peer. All of this material is up to the standard of our "hits". We urge continuous effort on the part of program managers throughout the industry to see that these numbers are used in ever increasing variety.

If we are to have the continuous support of the listening audience, which has been very flattering up to the moment, we must now take advantage of the wider diversification that is possible from the material that BMI makes available to you.

BMI's music you already have in your library. The material listed from our other publishers, you can acquire at reasonable rates by direct application to the publisher if you do not already have it. We shall be very glad to act as intermediary for you if you wish us to have these publishers ship any material to you.

We anticipate your wholehearted support of this request.

**BEST SELLERS**

BMI songs have now definitely established themselves as the most popular tunes in all parts of the country. Throughout America ten out of the ten best song sellers for the week ended February 2, according to variety, are songs published or licensed by Broadcast Music, Inc. In the history of Tin Pan Alley, no one publisher has ever had so many hits at the same time.

The enthusiastic reception by the dancing public of BMI songs is regarded as direct refutation of two theories often posed by ASCAP: (1) that playing songs on the air "ruins sheet music and record sales" and (2) that "only ASCAP writers can write hit songs". Radio's ability to skyrocket sheet music sales is reflected in the following figures: To-date "There I Go", has sold 140,000 copies of sheet music, "Frenesi", 130,000 and "I Hear A Rhapsody", 120,000. Many more thousand will be sold within the next few weeks. According to popular music experts a song is classified as a "hit" if it sells 75,000 copies, and rarely do more than 15 songs sell more than 100,000 copies in a year. It is therefore considered phenomenal that one publishing house, BMI, has turned out two songs that have sold well over one hundred thousand copies during the first month of 1941. Especially interesting is the history of "Frenesi"-the widely popular Mexican number. Although this song was published and recorded last February, it did not achieve any popularity until it was put on the radio. As soon as it began to "catch on" and appear on the programs of the name bands, sheet sales jumped and it is now a bigger hit in the United States than it ever was in Mexico.

The success of "There I Go", "I Hear A Rhapsody", "I Give You My Word", "So You're the One", "You Walk By" and many other popular dance favorites is concrete evidence that BMI has opened up a wealth of real musical talent which had hitherto been denied recognition by ASCAP's "closed-circle" policies. All these songs were written by gifted young composers, who were not lucky enough to reach the "inside" of Tin Pan Alley. For years they have been waiting for a "break". Now, thanks to BMI, these and many other composers have arrived.

**BMI FEATURE TUNES**

**February 10-17**

1. HIGH ON A WINDY HILL
2. YOU WALK BY
3. HERE'S MY HEART
4. BUGLE WOOGIE
5. IT ALL COMES BACK TO ME NOW
6. MAY I NEVER LOVE AGAIN
7. I CAN'T REMEMBER TO FORGET
8. WISE OLD OWL
9. ACCIDENTLY ON PURPOSE
10. KEEP AN EYE ON YOUR HEART
11. BECAUSE OF YOU
12. ALL I DESIRE
13. WALKIN' BY THE RIVER
14. LET'S DREAM THIS ONE OUT
15. LITTLE SLEEPYHEAD
16. ANYWHERE
17. BREAKFAST FOR TWO
18. I LOOK AT YOU
19. SHADOWS IN THE NIGHT
**A LONDONER COMMENTS**

A letter in Life Magazine, issue of February 3rd, affords interesting comment on the widespread popularity of "There I Go". John English, the writer, a Londoner, takes exception to remarks by Walter Graebner on "the enforced trend toward uniformity in London". In this connection Mr. English writes "I don't suppose this Graebner person has ever noticed how Americans drink large quantities of a drink called Coca-Cola, how they have all been humming There I Go for the past few weeks, how many of them are reading a magazine called Life, and how they all praise such characters as Charlie McCarthy and Jack Benny. Does the popularity of these things necessarily denote a trend toward uniformity? Of course not—neither in this country or in London."

**FAVORABLE COMMENT PREDOMINATING**

More than a million dollars has been subscribed in license fees for the renewal period of BMI license which runs from April 1, 1941 to April 1, 1942—very strong testimony to the universal approval of BMI policies among the broadcasters.

Carl Haverlin, BMI’s Station Relations Director, who attended the district meetings in the 16th, 17th, 14th and 10th Districts, reports that the consensus of the two hundred broadcasters attending these meetings was that favorable comment on the new music far outweighed the unfavorable comment. In virtually all cases where the broadcasters had taken the trouble to trace down unfavorable comment it was found to be inspired by ASCAP propagandists.

**Labor**

**SUPREME COURT UPSETS ARNOLD IN FIRST LABOR CASE**

The Supreme Court on February 3 handed down its decision in the first of the "Thurman Arnold" labor cases to come to the Court’s attention. It will be recalled that Mr. Arnold some time ago listed five labor union practices which he thought were illegal under the Anti-Trust Laws:

1. Unreasonable restraints designed to prevent the use of cheaper material, improved equipment, or more efficient methods. An example is the effort to prevent the installation of factory-glazed windows or factory-painted kitchen cabinets.

2. Unreasonable restraints designed to compel the hiring of useless and unnecessary labor. An example is the requirement that on each truck entering a city there be a member of the local teamsters' union in addition to the driver who is already on the truck. Such unreasonable restraints must be distinguished from reasonable requirements that a minimum amount of labor be hired in the interests of safety and health or of avoidance of undue speeding of the work.

3. Unreasonable restraints designed to enforce systems of graft and extortion. When a racketeer, masquerading as a labor leader, interferes with the commerce of those who will not pay him to leave them alone, the practice is obviously unlawful.

4. Unreasonable restraints designed to enforce illegally fixed prices. An example of this activity is found in the Chicago Milk case where a labor union is charged with combining with distributors and producers to prevent milk being brought into Chicago by persons who refuse to maintain illegal and fixed prices.

5. Unreasonable restraints designed to destroy an established and legitimate system of collective bargaining. Jurisdictional strikes have been condemned by the A. F. of L. itself. Their purpose is to make war on another union by attacking employers who deal with that union. There is no way the victim of such an attack may avoid it except by exposing himself to the same attack by the other union. Restrictions of trade for such a purpose are unreasonable whether undertaken by a union or by an employer restraining trade or by a combination of an employer and a union, because they represent an effort to destroy the collective bargaining relationships of a union with an employer.

The broadcasting industry was especially interested in No. 2.

It was No. 5 which the Court ruled on Monday. (U. S. vs. Hutcheson et al. No. 43.)

Certain work in connection with the building of some new beer vats at the Anheuser-Busch plant in St. Louis was awarded to the International Association of Machinists (A. F. of L.). The United Brotherhood of Carpenters and Joiners (A. F. of L.) maintained that its members should do the work. The Carpenters' Union then called a strike of its members employed at the brewery, and put Budweiser on its unfair list. Mr. Arnold stepped in and charged the Carpenters' Union with violation of the Anti-Trust Laws.

The Court held that Mr. Arnold was wrong, stating that "so long as a Union acts in self-interest, and does not combine with non-labor groups licit and the illicit under Section 20 (of the Clayton Act), are not to be distinguished by any judgment regarding the wisdom or unwisdom, the rightness or wrongness, the selfishness or unselfishness of the end of which the particular Union activities are the means."

Broadcasting lawyers are now studying the opinion with a view to determining how it might affect situations in which the broadcasting industry is interested.

**WAGE-HOUR ACT CONSTITUTIONAL**

The same day the Court upheld the constitutionality of the Wage and Hour Act, as had been generally expected. (U. S. vs. F. W. Darby Lumber Company et al. No. 82.)

**GUARANTEED OVERTIME**

Down in Dallas, Texas, William H. Atwell, a Federal District Judge, made a ruling this week which, if upheld by higher courts, would in effect remove any pain that the broadcasting industry suffers from the Act. Judge
Atwell said, in effect, that any plan for computing overtime that was agreeable to employer and employee was all right under the Act so long as the total payment exceeded the minimum wage requirements.

Specifically, Judge Atwell approved of a "guaranteed overtime" plan used by the A. H. Belo Corporation, publisher of the Dallas Morning News, and operator of stations WFAQ and KGKO. The Wage and Hour Administration has ruled that such plans are illegal, and so an appeal from Judge Atwell's decision is probable.

Warning! Judge Atwell's decision is now "the law" only in his district, and even there can be upset by a higher court. Any broadcaster who used "guaranteed overtime" plan does so at the risk of prosecution, pending a final adjudication of the question.

INDEPENDENT CONTRACTOR

The following exchange of correspondence about the possibility of avoiding overtime for a chief engineer by making him an "independent contractor" may be of interest:

Labor Relations Director,
Natl. Ass'hn of Broadcasters,
1626 K Street, N.W.,
Washington, D. C.

DEAR SIR:

I plan on making a contract with my chief engineer to furnish labor for our transmitter operation for a fixed sum per month. Would such a plan herein outlined be legal under wage and hour laws?

The situation is this: my chief operator would much rather work than not work and is willing to work a great many more than 40 hours per week but when it comes to paying him time and a half for all over 40 hours the expense runs too high. Now, can I make a contract with him to provide all the labor at the transmitter for a fixed sum per month. Under this contract he would agree to hire and pay all labor he employs and work them under wage and hour laws. This then, to my way of figuring would make him an independent contractor and he could work, for himself, as many hours as he desires, and pay any help he hires on wage and hour basis. He is anxious to make as much as possible of course but we really need another operator under the present set-up and to furnish a fireman and a water man and a washer. The son operators are HARD to get. He wants to work all that he can and asked for the contract. This he figures would eliminate him from wage and hours law, since as before mentioned he would be an independent contractor.

A similar situation exists in a certain business here in town. A laundry owner leased his building to his son and in the lease agreed to furnish a fireman and a water man and a washer. The son then hires 7 employees on his own and escapes the unemployment compensation payment as he employs less than 8 employees. This was decided in his favor in district court when the state sued for unemployment insurance payments.

What is your opinion on our deal?

Very truly yours,

DEAR MR. —:

You raised a very interesting point in your letter of January 30. I have consulted several leading radio lawyers. All agree that, although there is a possibility of evading excessive overtime payments by the "independent contractor" plan you propose, such a plan would be held illegal by the Federal Communications Commission. These lawyers say that several times, in decisions, the FCC has held that the licensee must retain control over the technical operations, and consequently over his operators. If you turned that control over to an independent contractor, they say, you would be violating the terms of your license.

If you did not turn over this control, it follows that the "independent contractor" would not be a real independent contractor, and thus would not be exempt under the Wage and Hour Act. Of course I did not mention your name or your station specifically in discussing this matter.

If you have any further questions about it, please do not hesitate to call on me.

Sincerely,

JOSEPH L. MILLER.
Director of Labor Relations.

NAB

DISTRICT 9

Over thirty Ninth District broadcasters met in Chicago on Thursday, January 30, for the primary purpose of selecting a District Director for the coming two-year term. The following were present:

Arthur F. Howe, Bradley R. Eidmann, WAAF; J. L. Van Volkenburg, WBBM; Jack Heintz, Harold L. Dewing, WCBS; James F. Kyler, WCLC; Walter Ashe, R. M. Holt, WCLS; Francis Higgins, WDAN; Edgar L. Bill, WMGD-WDZ; A. W. Kaney, B. T. Peterson, Donald Marquette, WENR-WMTQ-A; Edwin Bundy, WGN; Les Johnson, WHEB; James A. Wagner, WHBY-WTQA; Marie E. Clifford, WHFC; Ed Cunniff, WBKH; William R. Cline, George R. Cook, Harold A. Safford, WLS; Henry R. LePoidevin, WRHN; John J. Dixon, WROK; Merrill Lindsay, WSOY; L. W. Herzog, WTMJ; William H. West, WTMV; John J. Gillin, Jr., WOW.

The balloting resulted in the re-election of William H. West of WTMV, East St. Louis, Illinois, for the full two-year, 1941-42, term.

MEMBERSHIP STILL GROWING

Since the first of the year NAB membership has increased from 497 to 518. The new members we welcome:

Active: W8XAD (FM) Rochester, New York
WCED—DuBois, Pennsylvania
WCOY—Montgomery, Alabama
WATW—Ashland, Wisconsin
WHDF—Houghton, Michigan
KGBU—Ketchikan, Alaska
KODL—The Dalles, Oregon
KWLK—Longview, Washington
KBIZ—Otumwa, Iowa
KRMC—Jamestown, North Dakota
KVOX—Moorhead, Minnesota
KMTC—Marysville, California
KRRD—Los Angeles, California
KSD—St. Louis, Missouri
WEAU—Eau Claire, Wisconsin

Associate: Long-Worth Feature Programs, Inc.
World Broadcasting System
Columbia Recording Corporation
National Broadcasting Company—Radio Recording Division

CODE COMMITTEE MEETS

Leaders of most of the outstanding women's organizations in the country commended the NAB's efforts to ulti-

128 — February 7, 1941
mated the standards of children's programs, at a luncheon Tuesday in New York, with the NAB Code Committee.

Mrs. Dorothy Lewis, who recently made a nationwide survey of children's programs, read the report of the Radio Council on Children's Programs. Neville Miller, Edgar Bill, and Earl Glade received the report on behalf of the Code Committee, and discussed at some length the industry's collaboration with the women's organizations in this respect.

At morning business sessions the Code Committee appointed J. O. Maland and Henry P. Johnston to a sub-committee, to consider time limitations for 5, 10, and 25-minute commercials. Their report will be submitted at the next NAB Convention. The Committee also passed a resolution praising the report of the Radio Council on Children's Programs, and Mrs. Lewis' valuable work. The Committee recommended that this work be continued with proper support and appropriations from the NAB Board.

A Committee study showed that nearly every station in the country was complying with the Commercial Section of the Code.

At the Monday morning session, the Committee discussed various labor broadcasting problems with Joseph L. Miller, NAB Director of Labor Relations. No formal action was taken.

CONVENTION COMMITTEE ANNOUNCED

John J. Gillin, Jr., Tenth District Director, announced an important change in the committee line-ups for the 1941 convention to be held in St. Louis.

George Burbach, general manager of KSD, has been named as general chairman of the Publicity and Public Relations Committee. Appointed to serve with him are John C. Roberts, Jr., KXOK, St. Louis; H. Dean Fitzer, WDAF, Kansas City; Vernon H. "Bing" Smith, KOWH, Omaha; and Luther Hill, KSO-KRNT, Des Moines.

This Committee will supervise the advance, as well as the convention publicity, and arrange for the attendance at the convention of prominent officials from the cities and states within the Tenth District.

CONVENTION RESOLUTIONS

To avoid any misunderstandings, broadcasters should read the following rules governing hotel reservations at the NAB convention in St. Louis, May 12-15. The convention will be held at the New Jefferson Hotel. Other St. Louis hotels at which accommodations may be reserved are:

- Chase
- Park Plaza
- Coronado
- DeSoto
- Lennox
- Mark Twain
- Mayfair
- Melbourne
- Statler

Complete information as to type and prices at these hotels will be given in an early issue of THE REPORTS.

1. Requests for hotel reservations should be sent direct to the hotel at which the applicant desires accommodations.

2. The request should be set forth in as much detail as possible—
   a. the type of accommodations desired, rate, single or double occupancy, double or twin beds, etc.
   b. the exact date of arrival and if possible the time; the names of all people for whom reservation is requested.
   c. the length of time which the party plans to stay.
   d. if the reservation is not made in a firm name or the request written on a firm letterhead, the station or other business with which the reserving parties are affiliated should be given.

3. Hotels, upon receipt of any request for reservations, should immediately refer them to the NAB Housing Committee for consideration. As acknowledgment to the person from whom the request comes, the hotel should write a letter and attach a printed copy of the rules, supply of which will be provided. This is not a confirmation or acceptance by the hotel of the reservation.

4. The Housing Committee has a complete list of NAB member stations and associate members. Reservation requests from parties or stations whose names are on this list will be given priority and assignments made in the order of their receipt. Requests from parties or stations not appearing on the membership or associate membership list will be held in abeyance until April 12, at which time rights of priority will terminate and all assignments made in order of their receipt. While NAB members and associate members will be given precedence, every effort will be made to suitably and satisfactorily care for the accommodations requested by individuals, firms and radio stations not on this list.

5. If the exact type of accommodations requested are not available in the hotel specified, the NAB Housing Committee will immediately notify the individual, firm or radio station of that fact and give information as to the type of accommodation available which most nearly meets the specifications. This information shall cover the accommodations in the hotel requested, as well as in other hotels. Applicants should bear in mind that no assignments will be made in such cases until a confirmation of the alternative accommodation is sent to the Housing Committee.

LONG DISTANCE REMOTE

In the January 10 NAB REPORTS, WOW, Omaha, claims the crown for a long distance remote control pick-up, based on its recent series of pick-ups from the Pacific Coast. Now having a scale map conveniently at hand, KWK, St. Louis, is willing to cede WOW the palm on distance. However, the St. Louis station would like to put in a claim of its own.

Said claim concerns the only foreign broadcast ever picked up by a local station. The event occurred last winter when KWK sent sports announcer Johnnie O'Hara and engineer Kenneth Hildenbrand to Havana, Cuba, to stage remote interviews with members of the two baseball teams during the series between the St. Louis Cardinals and the Cuban All-Stars.

Oddly enough, the long-distance broadcasts by both WOW and KWK were sponsored by the same St. Louis client—the Falstaff Brewing Corporation.

(EDITOR'S NOTE: The current long distance remote "contest" will close March 1—to be reopened next January 1, provided anyone wants to challenge the title claimants at that time.)
FM CONFERENCE

Conclusions and Agreements reached during conference held on December 9, 1940, regarding equipment for high frequency (FM) broadcast stations:

In accordance with the Commission's notice of November 23, 1940, the two principal items of the conference were: (1) maximum power rating and operating power range of standard high frequency (FM) transmitters, and (2) performance characteristics of audio amplifying equipment when obtained separately as a complete unit.

The conference was attended by approximately 40 engineers. The greater number represented manufacturers of FM equipment and broadcasters. Mr. A. D. Ring, Assistant Chief Engineer of the Commission, presided at the meeting with the assistance of Mr. Wm. H. Bauer and Mr. Wm. C. Boese.

As to Item (1)

Considerable discussion centered around this item. The Commission in its notice of November 23, 1940, suggested a table of maximum power ratings and operating power ranges. Some of the manufacturer representatives submitted papers which suggested different power ratings and operating ranges than those set forth in the Commission's proposal. The suggested were fully discussed.

The discussion of topic (1) developed that there was unanimity of opinion in that the service area of the HF broadcast station is dependent on the antenna gain and height and the topography of the surrounding area, as well as the transmitted power. After the installation is completed, it is generally, however, more desirable for practical considerations to adjust the transmitter operating power in order to obtain minor adjustments in the service area, as may be required, rather than to adjust one of the other controllable factors in the transmitting system, including the antenna. If large adjustments are necessary in the radiation to obtain the required coverage, then changes in the antenna height or gain may be necessary. Since high frequency broadcast stations are rated on the basis of specific service, it was therefore concluded that standardization of the maximum power rating and operating range of the transmitter would be of mutual benefit to the manufacturer, broadcaster, and the Commission.

On the basis of the foregoing conclusion reached as to item (1), the following table of maximum power ratings and operating power ranges was adopted:

<table>
<thead>
<tr>
<th>Maximum Power Rating</th>
<th>Operating Power Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>250 watts</td>
<td>100—250 watts</td>
</tr>
<tr>
<td>1,000 watts</td>
<td>250—1,000 watts</td>
</tr>
<tr>
<td>3,000 watts</td>
<td>1,000—3,000 watts</td>
</tr>
<tr>
<td>10,000 watts</td>
<td>3,000—10,000 watts</td>
</tr>
<tr>
<td>25,000 watts*</td>
<td>10,000—25,000 watts</td>
</tr>
<tr>
<td>50,000 watts</td>
<td>12,500—50,000 watts</td>
</tr>
<tr>
<td>100,000 watts*</td>
<td>50,000—100,000 watts</td>
</tr>
</tbody>
</table>

* Not in production.

It was agreed that in case any manufacturer decided to produce a 25,000 or 100,000-watt transmitter for FM broadcasting stations, it must give notice to the Commission which would release to all other manufacturers of FM transmitters the manufacturer's name and the maximum power rating of the transmitter to be produced at least six months prior to the completion or delivery date of such transmitter.

As to Item (2)

The Rules and Regulations of the Commission governing high frequency broadcast stations require that the frequency response be uniform within 2 decibels of 1,000 cycles within the range from 50 to 15,000 cycles, that the root mean square of the audio frequency harmonics be less than 2% within the range from 50 to 15,000 cycles, and that the noise level be 60 decibels or more below 100% modulation (75 kc. swing). Mr. Ring emphasized that the Commission has directed that this overall performance must be strictly adhered to in practice. Actual measurements must be made on every complete installation and furnished the Commission before a station is licensed. This is necessary to carry out the directions of the Commission.

All of the manufacturers, except one, agreed upon the following:

1. That the performance specified in the rules was desirable.
2. It is practical to obtain this performance in practice.
3. That the achievement of this performance necessitates the making of adjustments on the completed installation and measuring the overall performance.

The discussion brought out the fact that in instances where the addition of the responses of individual amplifiers, connecting lines and transmitter would indicate the overall response to be within the Commission's rules, such performance would not necessarily obtain because of the reactions between various units. It was pointed out that if the response of the studio equipment as a whole, the connecting line and the transmitter were measured separately, these characteristics could be added with reasonable assurance that the overall response would be that expected. However, it would be desirable to make a single series of measurements on the equipment from studio microphone terminals to the transmitter output. This is quite important when equipment of various manufacturers is utilized in an installation. Due to the fact that different units in the system contribute to the overall characteristic, a final determination of the overall performance should be the responsibility of the licensee and applicants for high frequency broadcast stations should be aware of this.

It was also considered desirable to extend the lower limit for frequency response to 30 cycles, although it was recognized that difficulty would be experienced if the 2% distortion limit was extended to this frequency response for certain types of transmitters.

One type of transmitter discussed inherently is more difficult to keep the distortion low at low frequencies whereas this is no particular problem on other designs. In order that the requirements may be the same for all transmitters, the Commission will accent installations with a maximum overall distortion of 5% RMS harmonics until further notice. The rules and the application form may be considered waived in this regard until further notice.

In connection with item (2) there was also discussed the problem of transmitting over telephone lines from the studio to transmitter the frequency response range from 30 to 15,000 cycles. An engineer appearing for the Long Lines Department of the Bell System believed that so long as it could be done that a number of installations had already been made that met these requirements. It is suggested that since a great deal of difficulty is being experienced in some cases, the Telephone Company should make a study of this problem, and applicants should consult the Telephone Company representative given in the attendance on difficult cases.

Other Matters

The discussion also included the subject of determining the output power at high frequency broadcast stations. It was pointed out that the actual measurement of the power in watts was not necessary but that some means be provided to maintain the power at the value to give the coverage specified in the authorization. The indicating instrument should give a reading proportional to the actual measurement of the power in watts. The device should be representative of the actual transmission point.

interest to applicants and can be used by the Commission in reviewing applications. The Committee suggested for this purpose consists of the following:

Chairman, Mr. Lynne C. Smeby, National Association of Broadcasters
Mr. John F. Morrison, Bell Telephone Laboratories
Mr. R. D. Duncan, Radio Corporation of America
Mr. H. P. Thomas, General Electric Company
Mr. C. A. Priest, General Electric Company
Mr. Wm. B. Lodge, Columbia Broadcasting System, Inc.
Mr. Frank A. Gunther, Radio Engineering Laboratories
Mr. R. N. Harmon, Westinghouse Electric and Manufacturing Company
Mr. Andrew Alford, International Telephone and Telegraph
Mr. Paul DeMars, Yankee Network

Another topic of discussion was the situation when suitable wire lines from studio to transmitter could not be obtained as a practical fact. The manufacturers present were asked as to the availability of equipment for “Link” stations operating above 300 mc, for this purpose. It was agreed that the state of the art permitted the establishment of such a service at this time and would fill an important need.

This release is primarily for the purpose of providing a record of the conclusions and agreements reached during the conference. It appears that the conference fully served its purpose respecting establishment of such a service at this time and would fill an important need.

tion with intent to offer for sale, sell, lease or license or otherwise commercially use such recording without the consent and permission of the person or persons whose performance or rendition is so recorded.

Section 2. It is unlawful for any person, copartnership, association or corporation to offer for sale, sell, lease or license or otherwise commercially use any recording of any broadcast performance or rendition without the consent and permission of the person or persons whose performance or rendition is so recorded.

Section 3. It is unlawful for any person, copartnership, association or corporation to use any recording of any broadcast performance or rendition for commercial purposes without the consent or permission of the person or persons whose performance or rendition has been so recorded.

Section 4. Whoever violates any of the provisions of sections one or two of this act shall be guilty of a misdemeanor and upon conviction shall be sentenced to pay a fine of not more than one thousand dollars ($1,000) or undergo imprisonment for not more than one (1) year, or both, as the court may direct.

Section 5. Whoever violates any of the provisions of section three of this act shall be guilty of a misdemeanor and upon conviction shall be sentenced to pay a fine of not more than five hundred dollars ($500) or undergo imprisonment for not more than three (3) months or both as the court may direct.

Section 6. Upon conviction of a violation of any provisions of this act the court shall also order the delivery and the destruction of such unlawful recordings.

Section 7. None of the provisions of this act shall apply to any case of recording for private personal communal, civic or political uses or to any recording of any address or talk on subjects of a public nature.

Section 8. This act shall become effective immediately upon final enactment.

FEDERAL LEGISLATION

HOUSE

H. R. 3099 (WALTER, D-PENNA.) JUDICIAL CODE—To amend the Judicial Code by adding thereto a new section 274e, relating to the interception of wire or radio communications by persons employed in the investigation, detection, or prevention of offenses against the United States. Referred to Committee on Judiciary.

SENATE

S. 674 (HATCH, D-N. M., and VAN NUVIS, D-IND.) ADMINISTRATIVE PROCEDURE—To prescribe fair standards of duty and procedure of administrative officers and agencies, to establish an administrative code, and for other purposes. Referred to Committee on Judiciary.

S. 675 (HATCH, D-N. M., and VAN NUVIS, D-IND.) ADMINISTRATIVE PROCEDURE—To revise the administrative procedure of Federal agencies; to establish the Office of Federal Administrative Procedure; to provide for hearing commissioners; to legalize declaratory rulings by administrative agencies, and for other purposes. Referred to Committee on Judiciary.

STATE LEGISLATION

ARIZONA:

H. 108 (VIDRINE) CAMPAIGN EXPENDITURES—RADIO TIME.—To include advertising or speaking on the Radio in limitation of political campaign expenditures. Referred to Committees on Judiciary, Suffrage and Elections, Efficient Government, County and County Affairs.

CALIFORNIA:

S. 1118 (SWAN) LIBEL & SLANDER—Amending secs. 45 & 46, adding sec. 3349 to Civil Code, relating to libel & slander. Referred to Committee on Judiciary.

CONNECTICUT:

H. 178 (FAULKNER) PRIVATE EMPLOYMENT AGENCIES—Concerning private employment agencies. Referred to Committee on Judiciary.

H. 1141 (TEDESCO) LIBEL—RETRACTION—Concerning Actions of Slander and Libel, providing for no action of slander or libel until the defendant has refused to retract the alleged slanderous or libellous charges in writing after a reasonable time and providing for the filing of a bond by the plaintiff. Referred to Committee on Judiciary.

MARYLAND:

S. 172 (JOHNSON) CHIROPRACTIC ADVERTISING—To add Sec. 455A to Art. 43 of the Annotated Code (1939 Ed.), relating to advertising by practitioners of Chiropractic. Referred to Committee on Judicial Proceedings.

MINNESOTA:

S. 262 (MULLIN, WOLFE) AGENCIES—THEATRICAL—Regulations for licensing, bonding and code for theatrical or booking agencies. Referred to Committee on Commerce.

NEVADA:

Bill No. 2 H. (NORMAN et al.) NEWS—CENSORSHIP—Prohibits newspapers and broadcasting companies from procuring election returns until the polls close.

NEW YORK:

S. 403 (WILLIAMSON) INTEREST RATE ADVERTISING—Provides that no industrial bank shall advertise, print or broadcast any statement with regard to rates, terms or conditions for loans unless interest rate or charge is stated in terms of simple interest on amounts due. Referred to Committee on Banks.

S. 406 (WILLIAMSON) CREDIT ADVERTISING—Prohibits advertising by printing, broadcasting or otherwise, in connection with extension of consumer credit, for the purpose of encouraging needless borrowing. Referred to Committee on Banks.

GEORGIA CONTACT

Leonard Reinsch, WSB, Atlanta, has accepted an appointment as legislative contact man at the Georgia capital and Harold Fellows, WEEI, Boston, has accepted an appointment as legislative contact man at the Massachusetts capital. (NAB Reports, p. 32.)

FLY PRESS CONFERENCE

Chairman James Lawrence Fly of the FCC said at a press conference on Monday that in a previous statement which he had made that the monopoly report would be taken up within a few weeks that he had no intention of misleading the press. Mr. Fly said that he still thinks that the report may be made in February.

Chairman Fly was asked about the possibility of taxing broadcasters. He said that such a study has been going on, but he doesn’t know specific extension or details. It came up in connection with testimony which was given before the House Appropriations Committee dealing with FCC appropriations.
The Chairman told the newsmen that there is nothing new in connection with the Defense Communications Board "although routine problems are grinding off and committees are busy." He said that the Board meets every week.

PROPOSED DECISION IN BROOKLYN CASES

Long-Standing controversy involving the use of the 1500 kilocycle frequency by three Brooklyn broadcast stations, was moved a step nearer adjustment by reason of proposed action by the FCC as follows:

PROPOSED DISMISSAL WITH PREJUDICE of the application of the Metropolitan Broadcasting Corp., (WMBQ), Brooklyn, N. Y., for renewal of license and construction permit.

PROPOSED DENIAL of application of Paul J. Gollhofer, Brooklyn, N. Y., for construction permit.

PROPOSED DENIAL of application of Arthur Faske, (WCNW), Brooklyn, N. Y., for renewal of license.

PROPOSED DISMISSAL WITH PREJUDICE of application of Lillian E. Kiefer of Brooklyn, N. Y., for construction permit.

PROPOSED DENIAL of application for renewal of license of said station and the operation thereof, and the Commission's Rules and Regulations require a determination that the grant of the license theretofore issued to him by this Commission for renewal of license and construction permit should be denied. In view of this finding, the applications filed by him regularly allocated to Station WWRL, modification of construction permit requesting the hours of Arthur Faske, (WCNW), Brooklyn, N. Y., for modification of license, construction permit, and modification of construction permit.

PROPOSED DENIAL of application of Arthur Faske, (WCNW), Brooklyn, N. Y., for renewal of license.

PROPOSED DENIAL of application for renewal of license and construction permit should be dismissed.

These cases in part figured in a hearing as far back as February, 1937, and were consolidated in a further hearing in October, 1939. In today's Proposed Findings of Facts and Conclusions (No. B-131), the Commission holds:

1. The Metropolitan Broadcasting Corporation failed to offer any evidence at the original or instant hearings in support of its application for renewal of license of Station WMBQ. Therefore, said application and its application for construction permit should be dismissed with prejudice.

2. Lillian E. Kiefer failed to offer any evidence at the instant hearing in support of her application for construction permit requesting the facilities of WMBQ. Therefore, said application should be dismissed with prejudice.

3. Paul J. Gollhofer, in support of his application for a construction permit requesting the facilities of WMBQ, has failed to sustain the burden of proof that he is qualified to construct and operate a broadcast station, and in view of the manner in which he, as President of the Metropolitan Broadcasting Corporation, operated Station WMBQ, the Commission is unable to find that a grant of this application will serve the public interest. Consequently, this application should be denied.

4. Arthur Faske, licensee of Station WCNW, has operated, and permitted said station to be operated, in violation of the terms of the license therefor issued to him by this Commission for the operation thereof, and the Commission's Rules and Regulations, and has failed to sustain the burden of proof that the granting of his application for renewal of license of said station and the continued operation thereof, will serve public interest, convenience and necessity. Therefore, said application should be denied. In view of this finding, the applications filed by him for modification of license of Station WCNW requesting the hours of operation formerly allocated to Station WMBQ, and all hours regularly allocated to Station WWRL, modification of construction permit and construction permit should be dismissed.

5. The Long Island Broadcasting Corporation, licensee of Station WWRL, is legally, financially, technically and otherwise qualified to continue the operation of said station as requested in its application for renewal of license and to utilize the hours of operation formerly allocated to Station WMBQ and the hours now allocated to Station WCNW as requested in its application for modification of license. Therefore, each of said applications should be granted.

FCC ACTIVITIES

The FCC announces that the work, business and functions of the Commission for the month of February have been assigned as follows:

Commissioner Payne: Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Walker: Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including all motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission: provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

ASSISTANT SECRETARY REYNOLDS RESIGNS

John B. Reynolds has resigned as Assistant Secretary of the FCC to become part owner and general manager of WKWK, a new broadcast station under construction at Wheeling, W. Va.

Mr. Reynolds joined the Federal Radio Commission in 1930 and was subsequently appointed Assistant Secretary of that body, being continued in the same capacity when the Federal Communications Commission was created in 1934. At various times he has served as Acting Secretary.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings and oral arguments are scheduled to be heard before the Commission during the week beginning Monday, February 10. They are subject to change.

Monday, February 10

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary); 890 kec., 1 KW night, 1 KW LS, unlimited.
Wednesday, February 12

NEW—Herbert L. Wilson, Middletown, N. Y.—C. P., 1310 kc., 250 watts, unlimited.

Thursday, February 13

Conradised Hearing

NEW—Edward J. Doyle, Rochester, N. Y.—C. P., 1310 kc., 1 KW, unlimited, DA day and night.

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, Owner), Rochester, N. Y.—C. P., 1310 kc., 1 KW, unlimited, DA day and night.

NEW—Community Broadcasting Corp., Middletown, N. Y.—C. P., 1310 kc., 250 watts, unlimited, DA night.

NEW—Herbert L. Wilson, Middletown, N. Y.—C. P., 1310 kc., 250 watts, unlimited, DA day and night.

NEW—Edward J. Doyle, Rochester, N. Y.—C. P., 1310 kc., 1 KW, unlimited, DA day and night.

NEW—Community Broadcasting Corp., Middletown, N. Y.—C. P., 1310 kc., 250 watts, unlimited, DA night.

NEW—Herbert L. Wilson, Middletown, N. Y.—C. P., 1310 kc., 250 watts, unlimited, DA day and night.

FUTURE HEARINGS

During the past week the Commission has announced the following dates for broadcast hearings and oral arguments. They are subject to change.

February 20

Oral Argument Before the Commission

March 27

APPROPRIATIONS GRANTED

Richard Field Lewis, Jr., Winchester, Va.—Granted construction permit for a new station at Winchester to operate on 1370 kc., 250 watts, unlimited time (B2-P-1005).

WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.—Granted amended construction permit authorizing increase in nighttime power from 1 to 5 KW, subject to approval of site and antenna at Lawrence; 1230 kc., 5 KW day, shares KFKU (B4-P-2272).

KWWJ—KWWJ Broadcast Co., Inc., Portland, Ore.—Granted construction permit to change frequency from 1050 to 1010 kc., increase power from 500 watts to 1 KW, and increase hours of operation from limited to unlimited, install directional antenna for nighttime use, subject to approval of site and antenna (B5-P-2881).

WSGN—The Birmingham News Company, Birmingham, Ala.—Granted, subject to questions involved in hearing on renewal proceedings, application for construction permit to change frequency from 1310 to 610 kc., increase power from 250 watts to 1 KW, install new transmitting equipment, directional antenna for nighttime use, and move transmitter site locally to State Fair Grounds, Birmingham (B1-P-2993).

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Granted modification of construction permit (R5-P-2437) to increase power from 10 to 50 KW, make changes in directional antenna, install new equipment and extend completion date (R5-MP-1049).

WFFI—Broadcasting Co., Philadelphia, Pa.—Granted construction permit for new high frequency (FM) broadcast station to operate on frequency 15300 kc., 9,300 square miles, nearly 4,000,000 population (B2-PH-75).

South Bend Tribune, South Bend, Ind.—Granted construction permit for new high frequency (FM) broadcast station to operate on frequency 17100 kc., 4,300 square miles, 448,000 population (B4-PH-54).

WSXP—Philco Radio and Television Corp., Philadelphia, Pa.—Granted construction permit to increase power in portable mobile television station from 15 to 125 watts, and install new equipment (B2-PV-80).

Clinton Broadcasting Corp., Clinton, Iowa.—Granted construction permit for new station to operate on 1340 kc., with 250 watts power, unlimited time, effective March 29.

Burlington Broadcasting Co., Burlington, Iowa.—Granted construction permit for new station to operate on 1390 kc., 250 watts power, unlimited time, effective March 29.

WSUL—WCLS, Inc., Joliet, Ill.—Granted construction permit to operate on 1330 kc., with 250 watts power, unlimited time, effective March 29 (station now operates on 1310 kc., with 100 watts).

DESIGNED FOR HEARING

Camden Broadcasting Co., Camden, N. J.—Application for construction permit for new station in Camden to operate on 880 kc., 500 watts, daytime (B1-P-2926).

WJAX—City of Jacksonville, Jacksonville, Fla.—Application for construction permit to increase nighttime power from 1 to 5 KW, make changes in transmitting equipment, and install directional antenna for nighttime use; 900 kc., 5 KW LS (B3-P-3012).

MISCELLANEOUS

WAPI—Alabama Polytechnic Institute, University of Alabama, Alabama College (Board of Control of Radio Broadcast Station WAPI) (Assignors), Voice of Alabama, Inc. (Assignee), Birmingham, Ala.—Granted voluntary assignment of license of standard broadcast station WAPI, and construction permit for relay station WAWT from Alabama Polytechnic Institute, University of Alabama, Alabama College (Board of Control of Radio Broadcast Station WAPI), to Voice of Alabama, Inc. The assignors will discontinue operation of the station but will retain ownership of the physical equipment which will be leased to the assignee. Station WAPI operates on 1140 kc., 5 KW power, simultaneous day, shares KVMO night (S.A. operate 5 KW, unlimited time, employing DA after sunset, Tulsa).

WRCA-WNYB—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to suspend the effective date of Commission action of December 10, 1940, in granting the license File No. B1-MLIB-45, and special temporary authority issued after consideration of application File No. B1-MLIB-44, until March 2, 1941, in order to permit the simultaneous utilization of 9620 and 17580 kc., while changes in equipment are being made in accordance with outstanding construction permits.

W2XBS—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate television broadcast station W2XBS with special emission in addition to A3 emission on Channel No. 1, in order to continue experiments for the National Television Standards Committee and the National Broadcasting Co., Inc., for the period beginning January 31 to not later than March 1, 1941.

WBOS—Westinghouse Electric & Mfg. Co., hull, Mass.—Granted extension of special temporary authority to operate the equipment of International broadcast station WBOS authorized in construction permit B1-PIB-23, with power of 50 KW using WL 893R tubes in final amplifier stage in lieu of Federal 124R tubes, for the period February 3 to not later than March 4, 1941.

WSUI—State University of Iowa, Iowa City, Iowa.—Granted special temporary authority to use licensed daytime power of 5,000 watts from 7:30 p. m. (or commencement of basketball game) to 9 p. m. (or until end of game), CST, on February 3, 10, 15, 17, 22, 24, and March 1, 3, 1941; and from 7:30 p. m. (or start of game) to 9 p. m. (or until end of game), EST, on February 8, 1941, in order to
broadcast University of Iowa basketball games to a greater listening area.

WIN—Heard Radio, Inc., New York, N. Y.—Granted special temporary authority to operate from sign-off (February, 7:45 p. m., EST) to 12 midnight, EST, on February 1 and 22, 1941, in order to broadcast sustaining music and de-

WNYE—Board of Education, City of New York.—Granted ex-

special temporary authority to operate from 7:30 p. m. to 11 p. m.,

CBT, February 1, 7, 8, 14, 15, 21, 22, 26, 27, and 28, 1941, in order to broadcast basketball games and preliminary

WNW—Educational Television, City of New York.—Granted ex-

association of programs and to broadcast the Melrose Games

WOB—West Side Broadcasting Corp., Boston Mass.—

KGGE—Hugh J. Powell, Coffeyville, Kans.—Granted special tem-

ers for the period not to exceed 30 days commencing

February 3, 1941, instead of February 15, March 1 and 3, 1941, as

the Newark News Radio Club on power of 250 watts (B3-S-869).

WQGC—North Side Broadcasting Corp., New Albany, Ind.—

Granted special temporary authority to rebroadcast over WQGC and stations affiliated with the Mutual

Broadcasting System special conversations between units of the First Armored Division at Fort Knox, Ky., on

February 1, 1941, from 2:30 to 3:15 p. m., CST.

WTR—WTAR Radio Corp., Norfolk, Va.—Granted license to cover construction permit (B2-P-2757) which authorized

increase in power to 5 KW day and night, 780 kc., and changes in directional antenna system (B2-L-1319); also granted authority to determine operating power by direct measurement of antenna power (B2-Z-618).

WBOF—West Side Broadcasting Corp., Boston Mass.—Granted modi-

fication of construction permit for international broadcast

station (B1-PB-23), which authorized move of station from

WBU—University of Iowa, Iowa City, Iowa.—Granted temporary

authority to operate from 2 p. m. to 9 p. m., EST, on

February 2, 9, 16, and 23, 1940, to broadcast University of Iowa basketball games to a greater

WSAQ—West Side Broadcasting Corp., Boston Mass.—

Granted special temporary authority to operate from 8 p. m. to 10:30 p. m.,

EST, February 11, 14, 21, 25 and March 4, 7, 10, 1941, to broadcast basketball games only.

WTO—Florida Capitol Broadcasters, Inc. Tallahassee, Fla.—

Granted special temporary authority to operate from 2 p. a.m. to 3:30 p.m., EST, on

February 2, 9, 16, 23, and 30, 1940, to broadcast special test program in cooperation with and for the members of the New England News Radio Club on power of 50 watts (B3-S-869).

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted exten-

sion of special temporary authority to operate the equipment of International Broadcast Station WLW with

power input to the final stage of 100 KW for a period not to exceed 30 days from January 31, 1941, in order to obtain data requested in connection with application (MLJB-40).

KGGS—Hugh J. Powell, Coffeyville, Kans.—Granted special tem-

porary authority to remain silent from 2 to 3:30 p.m., CST, February 4, 5, 6, 11, 12, 13, 18, 19, 20, 25, 26, 27, from

2 to 3:15 p.m., CST, February 3, 10, 17, 24, from 9:15 to 9:45 p.m., CST, February 11, 1941, in order to permit West Side Broadcasting to broadcast educational programs only; to operate from 8:15 to 9:15 p.m., February 12, 1941, to broadcast a Lincoln Day address by Congressman Dewey Short (pro-

vided WNAD remains silent).

WNAD—University of Oklahoma, Norman, Okla.—Granted spe-

cial temporary authority to operate from 2 to 3 p.m., CST, February 4, 5, 6, 11, 12, 13, 18, 19, 20, 25, 26, 27, from

2 to 3:15 p.m., CST, February 3, 10, 17, 24, and from 9:15 to 9:45 p.m., CST, February 11, 1941, in order to broadcast educational programs only; to operate from 8:15 to 9:15 p.m., February 12, 1941, to broadcast a Lincoln Day address by Congressman Dewey Short (pro-

vided WNAD remains silent).

WKEU—Radio Station WKEU, Griffin, Ga.—Granted special temporary authority to operate from 3:15 to 3:45 p. m.,

CST, February 2, 9, and 16, 1941, in order to broadcast a program issued by the Mutual program only.

WCF—Massachusetts Broadcasting Corp., Boston Mass.—

Granted special temporary authority to operate from 2 to 3 p.m., EST, February 2, 9, 16, 23, 1941, in order to broadcast a program by the Massachusetts State Federation of Women's Clubs only; to operate from 3:15 p.m. to 5:45 p.m., EST, February 1, 8, 15, 22, 1941, in order to broadcast a program by the Professional Women's Clubs of Boston only.

WWBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—

Granted extension of special temporary authority to operate simultaneously with Station KFAB from 6 a. m., CST, to

local sunrise (at Lincoln, Nebr., January, 7:45 a. m.; Feb-

uary, 7:30 a. m., CST), for the period January 29, 1941 to

not later than February 28, 1941, pending action on formal application for such authority.

WQGC—North Side Broadcasting Corp., New Albany, Ind.—

Granted special temporary authority to rebroadcast over WQGC and stations affiliated with the Mutual

Broadcasting System special conversations between units of the First Armored Division at Fort Knox, Ky., on

February 1, 1941, from 2:30 to 3:15 p. m., CST.

WTR—WTAR Radio Corp., Norfolk, Va.—Granted license to cover construction permit (B2-P-2757) which authorized

increase in power to 5 KW day and night, 780 kc., and changes in directional antenna system (B2-L-1319); also granted authority to determine operating power by direct measurement of antenna power (B2-Z-618).

WBOF—West Side Broadcasting Corp., Boston Mass.—Granted modi-

fication of construction permit for international broadcast

station (B1-PB-23), which authorized move of station from

Pittsburgh to Hull, Mass., increase in power to 50 KW, and

make changes in equipment, to extend completion date to

June 7 (B1-MP-111).

KFB—Amariillo Broadcasting Corp., Portable-Mobile, area of

Amarillo, Tex.—Granted license to cover construction permit (B3-PY-229) for new relay station; 1625, 2158, 2530,

2790 kc., 21 watts power (B3-LRY-116).

KEO—WDAY, Inc., Portable-Mobile, area of Fargo, N. Dak.—

Granted license to cover construction permit (B4-PRE-372) which authorized change in frequencies from

133950, 133850, 136310, 136830 kc. to 156750, 158100, 159310, 161100 kc., increase power from 1 watt to 5 watts, and install new equipment (B4-LRE-340).

The following applications for renewal of relay broadcast station

licenses were granted for the period ending December 1, 1941:

KAOU, area of Tucson, Ariz.; KEHO, area of Salt Lake City;

KEIM, area of Phoenix; KEIN, area of Walla Walla, Wash.;

WEOC, area of Schenectady; WELZ, area of Memphis; WECW, area of Hartford; WENX, area of Erie, Pa.; WEOC, area of Charleston, S. C.; WEGZ, area of New Haven; WEOAM, area of Aurora, Ill.

The following stations were granted further extension of licenses

upon a temporary basis only, pending receipt and or determina-

tion upon the applications for renewal of licenses, not longer than March 1, 1941 (relay broadcast): WEGZ, area of Champaign, Ill.; WENX, area of Champaign, Ill.; KEGN, area of San Francisco; KFAS, area of Fairbanks, Alaska.

The following stations were granted further extension of licenses

upon a temporary basis only, pending determination upon applica-

tions for renewals of licenses, not longer than March 1, 1941 (relay broadcast): WENX, area of Champaign, Ill.; KEGN, area of San Francisco; KFAS, area of Fairbanks, Alaska.

The following stations were granted further extension of licenses

upon a temporary basis only, pending determination upon applications for renewals of licenses, not longer than March 1, 1941 (relay broadcast): WENX, area of Champaign, Ill.; KEGN, area of San Francisco; KFAS, area of Fairbanks, Alaska.

The following stations were granted further extension of licenses

upon a temporary basis only, pending determination upon applica-

tions for renewals of licenses, not longer than March 1, 1941 (relay broadcast): KFAS, area of Fairbanks, Alaska.

KJG, area of Brownsville, Tex.; KEMA, area of Shenandoah, Iowa.

W55M—The Journal Company (The Milwaukee Journal), Mil-

waukee, Wisc.—Granted modification of construction permit which authorized construction of new high frequency broadcast station, to change type of transmitter and make antenna changes.

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—

Granted authority to determine operating power by direct measurement of antenna output (B-Z-606).

WRGA—Rome Broadcasting Corp., Rome, Ga.—Granted author-

ity to install automatic frequency control equipment (B3-

P-169).

WOKO—WOKO, Inc., Albany, N. Y.—Granted authority to make changes in automatic frequency control apparatus (B1-

F-170).

WKMO—Kokomo Broadcasting Corp., Kokomo, Ind.—Granted modification of construction permit (B4-P-2842) which authorized a new station, for approval of vertical antenna, approval of transmitter site, and installation of new trans-

mitter (B1-MP-1119).

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted modification of construction permit (B2-P-

2578) for new transmitter and extension of completion date from January 26 to 180 days after grant (B2-MP-1154).

WBEN—WBEN, Inc., Grand Island, N. Y. (Trans.), Buffalo, N. Y. (Studio)—Granted modification of construction per-
mit (B1-P-2757) authorizing changes in antenna system, and new transmitter (B1-MP-1104).

KWIL—Central Willamette Broadcasting Co., Albany, Ga.—Granted license to cover construction permit (B2-P-2739) which authorized a new station to operate on 1210 kc., 250 watts, unlimited time (B5-L-1320); also granted authority to determine operating power by direct measurement of antenna input (B5-Z-655).

WCHS—Charleston Broadcasting Corp., Charleston, W. Va.—Granted license to cover construction permit (B2-P-2739) which authorized installation of directional antenna for night use, and increase in power to 5 KW day and night (B2-L-1299); also granted authority to determine operating power by direct measurement of antenna input (B2-Z-649).

WJHL—WJHL, Inc., Johnson City, Tenn.—Granted license to cover construction permit (B3-P-2626) for installation of transmitter and directional antenna for night use, increase in power from 250 watts to 1 KW, change in frequency from 1300 to 890 kc., and additional time (B3-Z-652); also granted authority to determine operating power by direct measurement of antenna input (B3-Z-644).

WTAW—Agricultural and Mechanical College of Texas, College Station, Tex.—Granted modification of construction permit (B3-MP-1066) authorizing new transmitter, and increase in power from 250 to 500 watts night, 1 KW day, change in frequency from 1310 to 620 kc., and move transmitter (B3-L-1316); also granted authority to determine operating power by direct measurement of antenna input (B3-Z-643).

WXBN—State Broadcasting Corp., New Britain, Conn.—Granted modification of construction permit (B1-P-2725), which authorized changes in equipment and increase in power, D.A. day and night; also authority to install new transmitter and extend commencement date to 60 days after grant and completion date to 180 days thereafter (B1-MP-1142).

WOI—Iowa State College of Agriculture & Mechanical Arts, Ames, Iowa.—Granted special temporary authority to operate on 1370 ke., 250 watts, unlimited time; on

WAPI—Alabama Polytechnic Institute, Etc., Birmingham, Ala.—Granted license to cover construction permit (B3-P-2435) for a new station to operate on 1370 ke., 250 watts, unlimited time (B2-L-1318); also granted authority to determine operating power by direct measurement of antenna input (B2-Z-647).

Wrol—Stuart Broadcasting Corp., Knoxville, Tenn.—Granted license to cover construction permit (B3-P-2435) for new transmitter, directional antenna for night use, increase in power from 250 to 500 watts night, 1 KW day, change in frequency from 1310 to 620 kc., and move transmitter (B3-L-1316); also granted authority to determine operating power by direct measurement of antenna input (B3-Z-643).

WSPR—WSPR, Inc., Springfield, Mass.—Granted special temporary authority to operate on 1210 ke., 250 watts, unlimited time; on

WSPD—The Fort Industry, Toledo, Ohio.—Dismissed without prejudice petition of applicants insofar as it referred to interference of KFRO with WSPD (B3-MP-872).
quests retention of hearing date and ordered that the hearing scheduled for February 3 on these applications be cancelled (B3-P-2768, 2796, 2813, respectively).

Robert V. Lee, Bradenton, Fla.—The Commission on its own motion continued to an indefinite date the hearing scheduled for February 3 on the application for construction permit for a new station to operate on 1300 kc., 250 watts night, 250 watts day, unlimited (B3-P-2780).

WOOD—King Trendle Broadcasting Corp. (Assignor), WOOD Broadcasting Corp. (Assignee), Grand Rapids, Mich.—Granted leave to amend application for voluntary assignment of license of station WOOD by substituting new agreements between the parties in interest for the agreements presently attached to application, thus dismissing motion for continuance of hearing.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Granted motion to take depositions in re hearing on application for renewal of license of station WCAP (B1P-R-181).

WAPI—Alabama Polytechnic Institute and University of Alabama, Etc., Birmingham, Ala.—Reconsidered action of January 20, 1940, in designating for hearing the renewal application of WAPI, and adopted order cancelling hearing now scheduled.

WESX—North Shore Broadcasting Co., Inc., Salem, Mass.—Granted motion to dismiss petition for rehearing directed against the action of the Commission December 17, 1940, granting without hearing the application of C. T. Sherer Broadcasting Co., Inc., for a new station in East Forst, Mass. LeRoy’s Jewelers, Los Angeles, Calif.—The Commission upon its own motion modified the conditional authorization for television station to substitute Channel No. 13 (230000-236000 kc.) in lieu of Channel No. 10, the conditional construction permit to otherwise remain the same.

Columbia Broadcasting System, Inc., Los Angeles, Calif.—Granted extension of time to May 1, 1941, for filing program of research in connection with construction permit for new television station.

APPLICATIONS FILED AT FCC

580 Kilocycles

WDBO—Orlando Broadcasting Company, Inc., Orlando, Fla.—License to cover construction permit (B3-P-2734) for increase in power, installation of directional antenna and changes in equipment.

WDBO—Orlando Broadcasting Company, Inc., Orlando, Fla.—Authority to determine operating power by direct measurement of antenna power—auxiliary transmitter.

WDBO—Orlando Broadcasting Company, Inc., Orlando, Fla.—Authority to determine operating power by direct measurement of antenna power—main transmitter.

600 Kilocycles

KROD—Dorrance D. Roderick, El Paso, Texas.—License to cover construction permit (B3-P-2725) as modified for new equipment, increase in power and change in frequency.

KROD—Dorrance D. Roderick, El Paso, Texas.—Authority to determine operating power by direct measurement.

NEW—The WTBS Radio Company, Inc., Toledo, Ohio.—Construction permit for new station to be operated on 690 kc., Class III-B, 1 KW, unlimited time.

680 Kilocycles

KFEQ—KFEQ, Incorporated, St. Joseph, Mo.—Construction permit to install new transmitter, directional antenna for day and night use, increase power from 500 watts; 2½ KW, local sunset to 5 KW, hours of operation from daytime to unlimited time, and move transmitter. Amended: To make changes in directional antenna for day and night use.

720 Kilocycles

WGN—WGN, Incorporated, Chicago, Ill.—Extension of S.E.A. for transmission of facsimile signals using 50 KW, 8-1-40 to 2-1-41. Amended: To extend period to 8-1-44.

920 Kilocycles

WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Modification of construction permit (B2-P-2658) for new equipment and increase in power requesting authority to install new transmitter, and extend completion date to 180 days after grant.

WICA—WICA, Inc., Ashtabula, Ohio.—Construction permit to install new transmitter, installation of directional antenna for night use, increase power from 1 KW to 5 KW, local sunset, and change hours of operation from daytime to unlimited time.

WFLA—The Tribune Company, Tampa, Florida.—License to cover construction permit (B3-P-2866) for a new station, and approval of studio site at Tar Tr Bldg., corner Lafayette and Hyde Park, Tampa, Florida.

WFLA—The Tribune Company, Tampa, Florida.—Authority to determine operating power by direct measurement of antenna power.

1010 Kilocycles

KGGF—Hugh J. Powell, Coffeyville, Kans.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter and directional antenna for night use and move transmitter, change frequency from 1010 kc. to 690 kc.* Amended: To change hours of operation from specified hours to unlimited time.

1070 Kilocycles

WCAS—Superior Broadcasting Service, Inc., Carthage, Ill.—Authority to determine operating power by direct measurement of antenna power.

1120 Kilocycles

WAPO—W. A. Patterson, Chattanooga, Tenn.—Modification of construction permit (B1-P-1939) as modified for increase in power, change frequency, installation of new transmitter and directional antenna for night use, and move of transmitter, requesting authority to make changes in directional antenna system, night use, and extend commencement date to 30 days after grant and completion date 180 days thereafter. Also make changes in equipment. Amended: RE: to omit request for changes in directional antenna.

1130 Kilocycles

WJJD—WJJD, Incorporated, Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power.

1170 Kilocycles

WCAU—WCAU Broadcasting Co, Philadelphia, Penna.—Modification of construction permit (B2-P-3001) for new equipment, requesting changes in antenna system, and move of transmitter from 1½ miles west by southwest of Newtown Square on Bishops Hollow Road, Penna. to near Church and Pamona Roads, Cinnaminson and Moorestown Township, N. J. Extend commencement date to 30 days after grant and completion date to 180 days thereafter.

1200 Kilocycles

KPOW—Albert Joseph Meyer, Powell, Wyo.—Modification of construction permit (B5-P-2593) for a new station, requesting approval of studio and transmitter site at corner East 7th and Hamilton Streets, Block No. 2, original townsite, Powell, Wyoming, changes in antenna system and transmitting equipment.

WCBT—J. Winfield Crew, Jr., Roanoke Rapids, N. Car.—License to cover construction permit (B3-P-2647) as modified for a new station.

WCBT—J. Winfield Crew, Jr., Roanoke Rapids, N. Car.—Authority to determine operating power by direct measurement.

WCBT—J. Winfield Crew, Jr., Roanoke Rapids, N. Car.—Modification of construction permit (B3-P-2647) as modified for a new station.

WCAU—Burlington Daily News, Inc., Burlington, Vt.—Construction permit to install new transmitter, directional antenna for day and night use, increase power from 1500 kc. to 2510 kc.* Under NARBA.
transmitter from 203 College St., Burlington, Vt., to one-half mile north of Pine Island, Colchester, Vermont.

1210 Kilocycles
KFBC—Frontier Broadcasting Company, Cheyenne, Wyo.—Modification of license to change frequency from 1420 to 1210 kc., increase power from 100 watts; 250 watts local sunset, to 250 watts day and night.

1240 Kilocycles
WEDC—Emil Denemark, Inc., Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power.

1250 Kilocycles
KFJM—University of North Dakota, Grand Forks, N. Dak.—Modification of license to change name from Albert Lea Broadcasting Company to Albert Lea-Austin Broadcasting Company, Inc.

1370 Kilocycles
WISE—Radio Station WISE, Inc., Asheville, N. C.—Modification of construction permit (B3-P-2944) for directional antenna for night use, requesting extension of commencement and completion dates from 2-5-41 to 8-5-41 to 4-4-41 and 10-4-41, respectively.

1420 Kilocycles
WWDC—Capital Broadcasting Co., Washington, D. C.—Modification of construction permit (B1-P-2679) to make changes in synchronous amplifier equipment and antenna, and extend commencement and completion dates from 12-29-40 and 6-29-41 to 30 days after grant and 180 days thereafter, respectively.

FM APPLICATIONS
NEW—The A. S. Abell Company, Baltimore, Md.—Modification of construction permit for new high frequency broadcast station. Frequency, 44300 kc.; coverage, 15,489 square miles; population, 3,308,983. Amended to change frequency from 44300 to 46500 kc., coverage, 15,489 to 6,040 square miles, population from 3,308,983 to 1,810,159; install new type transmitter; change location of transmitter from Clarksville, Md., to Baltimore, Md., and give studio location in Baltimore, Md.

NEW—The Travelers Broadcasting Service Corp., Hartford, Conn.—Modification of construction permit (B1-PH-12) for a new high frequency broadcast station, requesting approval of transmitter and antenna system and change population from 4,953,439 to 1,036,400.

NEW—Stronberg-Carlon Telephone Manufacturing Company, Rochester, N. Y.—Modification of construction permit for new high frequency broadcast station. Frequency, 45100 kc.; coverage, 2,240 square miles; population, 534,000. Amended to change coverage from 2,240 to 3,200 square miles and population from 534,000 to 584,800.

NEW—Walker & Downing Radio Corp., Pittsburgh, Penna.—Modification of construction permit for new high frequency broadcast station, requesting changes in antenna.

NEW—Evansville on the Air, Inc., Evansville, Ind.—Modification of construction permit for new high frequency broadcast station to be operated on 45706 kc., coverage, 13,200 square miles; population, 1,004,320.

NEW—Courier-Journal and Louisville Times Company, Louisville, Ky.—Modification of construction permit for new high frequency broadcast station to be operated on 45700 kc.; coverage, 15,620 square miles; population, 1,004,320.

WRLC—R. G. LeTourneau, Toccoa, Ga.—Modification of construction permit (B3-P-2767) for a new station, requesting authority to install a new transmitter and change type of antenna.

KATE—Albert Lea Broadcasting Co., Albert Lea, Minn.—Modification of license to change name from Albert Lea Broadcasting Company to Albert Lea-Austin Broadcasting Company, Inc.

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Modification of construction permit (B4-P-2501) for a new station, requesting extension of commencement date from 1-19-41 to 4-19-41.

WBRY—American Republic, Inc., Waterbury, Conn.—Modification of construction permit (B1-P-2756) as modified for new transmitter and directional antenna for day and night use and increase in power, requesting extension of commencement date from 1-22-41 to 2-22-41.

1500 Kilocycles

WIGM—George F. Meyer, Medford, Wis.—Modification of construction permit (B4-P-2501) for a new station, requesting extension of commencement date from 1-19-41 to 4-19-41.
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Beeman’s Laboratory, Inc.—Misrepresentation of a medicinal preparation is alleged in a complaint issued against Beeman’s Laboratory, Incorporated, 70 Central Ave., S. W., Atlanta, Ga. Other respondents are E. A. Rush and Mrs. J. F. Rush, officers, and H. C. Allen, director, of the corporation.

The complaint alleges that the respondents advertised that their preparation “BQR Remedy”, “fights colds”; that it has value as a cold preventive and that it is a cure or remedy for colds. According to the complaint, the product is not capable of any curative action on the underlying factors that cause colds, and has no therapeutic value in the treatment of such conditions in excess of furnishing temporary relief from some of the symptoms often associated with colds and of furnishing laxative action. (4451)

S. Buelsbaurn & Co., 243 East Huron St., Chicago, manufacturer of a device sold as “Vinylite”, an organic material of glass-like appearance, has been charged with misrepresentation. “Vinylite”, the complaint points out, is a chemically manufactured plasticized resinous material resembling glass which the respondent company buys in the form of phable, semi-elastic sheets, and converts into products such as suspenders, belts, garters, wrist watch bands, key chains, raincoats, and other accessories.

The complaint alleges that the respondent disseminates advertisements stating that its products are made of “Elasti-Glass” (its trade name for Vinylite), described as “science’s latest miracle” that the advertisements picture the transparency of the material, state it to be elastic in action and further ascribe to it many of the properties commonly associated with glass, such as durability and imperviousness to water or moisture.

By means of such advertisements, and otherwise, the respondent, according to the complaint, represents and implies that its Elasti-Glass accessories are made of glass, when in fact they contain no glass. (4450)

H. & L. Candy Company—A complaint has been issued charging J. C. Helms, trading as H. & L. Candy Company, Marshallville, N. C., with the use of lottery methods in the sale of candy.

The respondent, according to the complaint, sells to dealers assortments of candy so packed and assembled as to involve the use of a lottery scheme when the merchandise is sold to the consuming public. Push card devices are used, the complaint alleges. (4455)

Preparatory Training Institute, 55 N. Clinton Ave., Trenton, N. J., in a complaint is charged with misrepresentation in the sale of correspondence courses intended to prepare students for civil service examinations.

The complaint alleges that by means of representations made by the respondent’s agents, designated as “registrars”, who call upon service examinations. The complaint further charges that the respondent’s representatives are merely salesmen and that their designation as “registrars” further tends to mislead prospective students into the belief that they are Civil Service Commission officials.

The respondent also is charged with misleading prospective students by concealing or failing to reveal pertinent facts regarding a provision in the respondent’s enrollment contract which has to do with refund of tuition fees. (4454)

United Diathermy, Inc., 100 West 42nd St., New York, distributor of “United Short Wave Diathermy”, an electrical device for treating diseases, is charged, in a complaint, with misrepresentation in the sale of a product.

In newspaper, radio and other advertising, the complaint alleges, the respondent corporation represents that its apparatus is a safe and scientific means for treating and alleviating the pain of rheumatism, arthritis, neuritis, bursitis, lumbugo and other ailments, with or without the unskilled layman in treating self-diagnosed diseases by self-application in the home, and that its use will have no ill effects.

According to the complaint, the results claimed will not be accomplished by unskilled, self-application of the respondent’s device under conditions prescribed in the advertisements or under usual conditions, and the treatment is not safe but may result in severe electric burns or other serious injury.

The complaint alleges that the respondent’s apparatus is not competent for treating acute arthritis, neuritis, and bursitis, as distinguished from chronic cases of such disorders.

The complaint further alleges that the respondent has disseminated false advertisements through failure to conspicuously reveal that the apparatus may be safely used only after a competent medical authority has determined that diathermy is indicated and prescribed the frequency and amount of application, and a trained technician has instructed the user in the device’s operation.

In December, 1940, the respondent corporation was restrained by the United States District Court for the Southern District of New York from further dissemination of certain advertisements concerning its device pending issuance of the Commission complaint and its final disposition under Commission procedure. (4453)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

AW-Advertising, Inc., 420 Lexington Ave., New York, an advertising agency, entered into a stipulation concerning advertisements of cosmetics which it disseminated in behalf of Rose Helen Kingsone, trading as The R. & H. Laird Company and Rose Laird, New York. The respondent agrees to cease advertising that “Rose Laird’s Greaseless Lubricant”, “Protective Face Lotion”, “Overnight Cream”, and “Liquid Facial Soap”, alone or in combination, will correct blemishes or other skin ills, or enable one to acquire or keep a clear skin, or be free from a problem skin, and that the use of the products, alone or in combination, one will not turn bumpy skin, excess oil, eruptions, coarse pores or blackheads. (02716)

Courtland D. Ferguson, Inc., National Press Building, Washington, D. C., an advertising agency, has entered into a stipulation in which it agrees that in the advertisement of “Kohler Antidote”, in behalf of Kohler Manufacturing Company, Baltimore, it will cease and desist from representing that use of this product affords complete relief from pain; that it will relieve pain double quick, lightning fast, or quicker than other similar preparations, and that it is absolutely safe and has no bad after-effects. (02718)

E. Pueini & Co., Inc., 524 West Broadway, New York, entered into a stipulation in which it agrees to cease representing that “Fernet Vittone” is a tonic, unless the representation is expressly limited to its effect as a gastric tonic; that everyone requires a tonic, stomachic and digestive; that Fernet Vittone is an effective remedy for intestinal disturbances or has any effects beyond those of a laxative, stomachic and gastric tonic, and that “Acqua Fluggi” is an effective remedy for gallstones, kidney troubles, gout, calculus of the bladder, digestive blood circulation or excreta urinary. (02721)

Patten Concentrates, Inc., in the sale of “Patten’s Concentrates,” consisting of dehydrated vegetable products some of which are fortified with vitamins and others with drug laxatives, agrees

February 7, 1941 — 139
to cease representing that it manufactures or produces the products; that they are chemically or biologically analyzed and assayed at frequent intervals; that they are "correctives" and have any special health-giving or remedial value; that "Patten's Tablets Enriched with Vitamins A-U-D-G" will maintain a person's physical fitness; that "Patten's Kelp Tablets" are an effective remedy for high blood pressure or hardening of the arteries; that the use of "Ultra-Eleven Vegetable Tablets" is effective for treating anemia, loss of weight, arthritis and malnutritions; and to discontinue similar representations concerning these and other preparations.

The respondents further stipulate that it will cease disseminating advertisements which represent or imply that "Patten's Kelp Tablets" are in all cases safe or harmless; or which advertisements fail to reveal that the preparation should not be used by persons ill of lung diseases, chronic cough, goiter or thyroid diseases, except upon the advice of a physician; and which fail to reveal that if a skin rash appears, use of the preparation should be discontinued.

The stipulation further provides that the advertisement need contain only a statement that the preparation should be used only as directed on its label, if and when the label either contains such a warning or specifically directs attention to a similar warning in the accompanying labeling. (02720)

D. B. Smith & Co., Inc., Utica, N. Y., stipulated that it will cease advertising that "Jim Dandy Rat and Mouse Killer" will kill mice, gophers and other rodents, except rats, wharf rats and mice; that it positively stops waste caused by rodents; will rid homes, barns, poultry houses, wharves, fields, warehouses and other buildings of rodents. (02722)

Southern Greeting Card Company—A Memphis and a Chicago corporation selling greeting cards, have had modified stipulations accepted in which they agree to cease and desist from certain representations in the sale of their products. The respondents are: Southern Greeting Card Company, McCall Building, Memphis, and John A. Hertel Company, 105 West Adams St., Chicago. Under the modified stipulations, the respondents agree to cease advertising "free samples" or making any use of the word "free" or similar expression in a manner purporting a gift or gratuity only, where any consideration such as payment of money, rendering of services, or otherwise, is required of the person receiving the samples or other gratuity. The respondents further agree to desist from inducing a customer to order samples or other goods by deceptively concealing the terms of the transaction. The original stipulations, executed in May, 1940, have been rescinded. (2822-2825)

United Service Training Schools—Trading as United Service Training Schools, Ray W. Davis, 405 Arctic Building, Seattle, Wash., has entered into a stipulation in which he agrees to cease and desist from certain representations in the sale of a correspondence course for assisting students to pass civil service examinations. Among practices which the respondent agrees to discontinue are use of the initials U. S. or any initials, words, emblems or depictions on printed matter to cause the impression that his school is a government agency or has an official connection with the United States Civil Service Commission. The respondent further agrees to cease representing that the completion of his course is a prerequisite for success in passing civil service examinations, and that students or graduates of the course are assured of civil service appointments or Government employment. He also agrees to discontinue use of statements implying that his course was prepared by persons who have information concerning forthcoming civil service examinations. (3028)

U. S. Drug & Sales Company—Edwin L. Leisenring and Gordon Leisenring, trading as U. S. Drug and Sales Company, 1534 Lawrence St., Denver, Colo., have stipulated that they will cease representing that their medicinal product "Hex Tabs" constitutes a competent remedy or treatment for ailments of the kidneys, bladder, prostate or other glands. The stipulation recites that, according to reliable medical authority, the use of the respondents' product is not indicated as a treatment for the conditions named. (3030)

Vegretates, Inc., in the sale of "Vege-broth", "Vegretate SF-1", "Vegretate Formula No. CC-413" and 13 other similar preparations, agrees to cease representing that modern conditions cannot assure the full measure of life-sustaining organic minerals in the food one buys or cooks today; that the "Vegretate" formulas are concentrated or contain all the concentrated goodness of nature's own vegetables grown in a specially mineralized soil; or that they give added protection to persons having low resistance. The respondent also agrees to cease advertising that "Vegretate 'Caro!' Fortified with Vitamin 'A'" is a protection against infection; that "Wheat Germ Oil Perls, Standard Potency Vitamin E" is essential during pregnancy and is of the highest available potency, and to discontinue various similar representations concerning other of its products. (02719)

Ar. Winariek, Inc., a corporation, trading as The Herpicide Co., 505 East 140th St., New York, stipulated to cease representing that "Newbro's Herpicide" will prevent loss of hair or baldness; assure beautiful or healthy hair; is a cure for or will remedy dandruff or is positive dandruff germicide or competent dandruff treatment (unless the representation is limited to a temporary removal of dandruff scales and the mitigation of the symptoms of itching); that Newbro's Herpicide has been tested and approved and is recognized as the world's standard hair tonic; that it will penetrate pores, stir up sluggish scalp circulation, or cause the sebaceous glands to function properly, and that its use aids in overcoming faulty scalp conditions (unless clearly limited to those particular conditions in which it would be an effective treatment). The respondent further agrees to cease using the term "inc." in referring to The Herpicide Co. or from otherwise representing that concern itself a corporation. (02717)

Wayne Short Wave Company—Lillian B. Ferenz, trading as Wayne Short-Wave Company, 156 Book Building, Detroit, has entered into a stipulation in which she agrees to cease and desist from certain representations in the sale of an electrical device designated "Approved Model Short-Wave Machine". The respondent agrees to cease advertising that the device constitutes a cure or remedy for scleritis, uritis, lumbago, arthritis, rheumatism or similar, and to discontinue representing that it can be used for any purpose, unless it is clearly indicated that it cannot be safely used except under a competent physician's supervision, and that its use is dangerous in cases of acute inflammatory processes such as non-draining cellulitis, acute arthritis, and pelvic inflammation, and under other specified conditions. Further representations to be discontinued by the respondent, according to the stipulation, are that the machine produces a "friendly fever" or that a fever can be created by use of an electrical short-wave machine; that the device is identical with short-wave machines used in medical practices and hospitals, or that the Wayne Short-Wave Company has been in business for a long time or has, because of mature experience, contributed to the development of perfection of diathermy machines. (3029)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

National Distributors—A. F. Duverger, trading as National Distributors, and as Income Audit Service, 3402 Rhode Island Ave., Mt. Rainier, Md., has been ordered to cease and desist from representing that an "Income Audit Service" sold by him is required under federal law that persons failing to buy and use this service or record keeping system will be subject to arrest and imprisonment because of such failure, and from other similar representations. A so-called free advisory service on federal income tax, social security and accounting questions is included in the respondent's system for recording business transactions. Representations concerning the service have been made by the respondent's agents to various prospective purchasers, particularly small business men, including immigrants and poorly educated persons, according to Commission findings. During a recent year the service was sold to approximately 3,000 subscribers. The Commission order further directs the respondent Duverger and his agents to cease and desist from representing, directly or by implication, that his agents, salesmen or canvassers are officers of representatives of, or are connected with the United States

CEASE AND DESIST ORDERS
Government or any of its departments; that other income tax receivables, if any, or services must be replaced by the respondent, or his system or service, and that his system or service is produced by or sold under the direction of the Federal Government or any of its departments.

The respondent formerly maintained an office at 927 Fiftteenth St., N. W., Washington, D. C. (3016)

Nu-Way Manufacturing Company—L. B. Patterson, trading as Nu-Way Manufacturing Company, Des Moines, Iowa, has been ordered to cease and desist from misrepresentation in the sale of the “Speed King Water Heater”.

Commission findings are that in advertising for the services of distributors in various States the respondent made such misleading representations as “A big money clean-up for agents”—and “Make it up to $20 a day”. In advertising the heater itself, the findings continue, the respondent represented that although it afforded “the fastest way known of heating water, Speed King actually saves users up to 50% on gas and fuel bills too”.

The Commission order directs the respondent to cease making these representations; to cease advertising that the heater boils water instantly, or in 60 seconds, or in any other specified time, unless the quantity of water that may be boiled in the time specified is conspicuously set forth, and to cease representing that the heater has been approved or tested by “Underwriters Laboratories”, unless the quantity of water that may be boiled in the time specified is 40 to 50 times as much as the respondent’s product.

Pictorial or other representations indicating that the respondent’s heater has been approved or tested by “Underwriters Laboratories”, or a similar organization, are prohibited, when contrary to the facts, and the order further provides that when only part of the product has been so approved or tested, that circumstances must be clearly indicated.

The Commission order also prohibits misrepresentation of the possible earnings of salesmen selling the respondent’s heater; misuse of the word “free” to refer to products delivered for a consideration either in money or services, and misrepresentation as to prices. (3852)

Robinson Clay Products Company—An order has been issued directing The Robinson Clay Products Company of New York, New York City, and Russell L. Pinkley and Urban G. Weckesser, trading as Empire Clay Products Company, Rochester, N. Y., distributors, and 27 dealers selling in the Rochester area, to cease and desist from a combination and conspiracy to restrain competition by fixing and maintaining uniform prices for building materials, including vitrified pipe.

The Commission order directs The Robinson Clay Products Company of New York, Russell L. Pinkley and Urban G. Weckesser, trading as Empire Clay Products Co., and the 27 building material dealers to cease and desist from carrying out their agreement or conspiracy, and to discontinue, as of that agreement, the maintenance of uniform or minimum delivered prices, terms, discounts and conditions of sale. The respondents are further directed to cease inducing or coercing industry members to raise the prices quoted by them to the uniform or minimum amounts resulting from the respondents’ agreement, and to desist from holding meetings, conferences or other gatherings with treasurers or other members of the trade, for the purpose or with the object of creating or inducing members of the vitrified pipe industry, or any or other persons or entities, to raise the prices charged for or to maintain or publish prices for building materials, including vitrified pipe, or able by any uniform price list resulting from the respondents’ understanding, agreement or conspiracy.

The Commission dismissed the complaint in this proceeding as to Frank A. Seiser, deceased, who formerly traded under the name Acme Builders’ Supply Co., Rochester, and as to the Britton Stone & Supply Corporation, Rochester, which had entered bankruptcy proceedings.

The Commission found no evidence in the record to support the allegations of the complaint with respect to The Robinson Clay Product Company, Akron, Ohio, parent company of the respondent The Robinson Clay Product Company of New York; Universal Sewer Pipe Corporation, Cleveland; Rochester Builders Supply Association and Edwin C. Kaelber, its secretary; Gaetano Delia Pietra, and The Irondequoit Coal and Supply Company, Rochester, building supply dealers, and closed its case against them without prejudice to its right to resume proceedings as to them, should the facts warrant. (4003)

Scientific Manufacturing Company, Inc., 426 Prescott Ave., Scranton, Pa., and Howard J. Force, its president, have been ordered to cease and desist from making misleading representations in the sale of pamphlets entitled “Poisons Formed by Aluminum Cooking Utensils” and “Are You Heading for ‘The Last Round-Up’”.

Devoted to the alleged dangers of using aluminum cooking and storage utensils, the pamphlets, according to Commission findings, have been sold to the public and to manufacturers, distributors and salesmen of utensils made of materials other than aluminum.

Finding that extensive scientific investigations have failed to disclose evidence that food prepared or stored in aluminum utensils is unsafe, deleterious, disease producing, poisonous or otherwise dangerous to health, as represented by the respondents, the Commission ordered the respondents to cease and desist from making representations of that character and from any unfair disparagement of aluminum utensils. (3874)

Shapiro Felt Rug Company, also trading as Esta Hat Company, Newark, N. J., and William Shapiro, Morris Shapiro, and Sarah Shapiro, its officers, have been ordered to cease and desist from representing that hats or caps made either wholly or partly from old, used or second-hand materials are new or are composed of new materials.

Commission findings are that the respondents buy old, worn and previously used felt hat bodies which they clean, steam, iron and shape into novelty hats and caps. In some instances they are fitted with new trimmings, sweat bands, and size labels. The hats and caps have the appearance of new ones and are sold to dealers, the findings continue, without labels or stamped markings to indicate to the public that they are made from old, worn and previously used hat bodies.

The order further directs the respondents to stamp on the sweat bands in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweat bands, a statement that the products are composed of second-hand or used materials. The order provides that if sweat bands are not affixed to such hats or caps, then such stamping must appear on the body of the hats or caps in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bodies. (2647)

University Press—J. Herbert Blackhurst, Des Moines, Iowa, a dealer in classroom books and other printed matter, who formerly traded under the name “University Press.” has been ordered to cease and desist from using the word “University” in his trade or corporate name and to discontinue representing in any manner that he has any connection with any college, university or other institution of higher learning. Commission findings are that the respondent discontinued use of the name University Press on October 31, 1940, a short time prior to issuance of the Commission’s complaint in this proceeding, and that since that time he has operated by means of a corporation designated “Blackhurst Book Sales, Inc.” (4375)

Vennegut Hardware Company, 120 East Washington St., Indianapolis, as manufacturer of self-releasing fire exit devices, has been ordered to cease and desist from price discriminations in violation of the Robinson-Patman Act.

Commission findings are that the respondent has sold “Von Durum Panic Devices” from his Chicago house to purchasers at lower prices than to other purchasers. The discrimination, according to findings, is accomplished by granting to some purchasers a 40
per cent discount from the uniform list price, while at the same
time allowing a similar 50 per cent discount to other purchasers
competitively engaged with the group receiving the 40 per cent
discount.

Commission findings are further that no justification has been
affirmatively shown or is claimed by the respondent for the differ¬
tential in prices charged competing purchasers.

The Commission order prohibits these discriminations. (4344)

Wallace Brown, Inc., 225 Fifth Ave., New York, greeting card
distributor, has been ordered to cease and desist from using the
words "free" or "free sample" to advertise merchandise which is
not delivered without cost or unconditionally.

Commission findings are that the respondent sought agents for
marketing its cards by advertising a "free sample" offer in connection
with its "Golden Value" 21-card assortment. Persons answer¬
ning the advertisements and requesting samples, the findings continue,
received printed matter illustrating cards and assortments, and a
complete and salable card assortment "on approval" which, accord¬
ing to an accompanying notice, was to be paid for in cash or
selling services or returned to the respondent. Such an assortment,
according to Commission findings, was not "free" or a "free sample,"
since it was not delivered without cost or unconditionally. (4312)
THE WEEK IN WASHINGTON

Senator Wheeler (D. Mont.), chairman of the Interstate Commerce Committee, alleged this week that network commentators were "editorializing" and started an investigation. (p. 143)

A complete program of BMI music is to be presented at Town Hall in New York, March 13. Sales of BMI records and sheet music continue to show the importance of radio as a means of making music popular. (p. 143)

The NAB convention Housing Committee is ready for business. (p. 145)

A proposed form to be used in obtaining the War Department's permission for commercial programs from Army posts is included in this issue. (p. 145)

Establishment of the Clear Channel Broadcasting Service with an office in Washington, D. C., was announced by Edwin W. Craig, WSM. (p. 146)

The entire industry is cooperating with NAB's "movin' day" promotion. (p. 147)

James Lawrence Fly, Chairman of the FCC, and Joseph L. Miller, NAB Labor Relations Director, were among the speakers at a luncheon given by the American Civil Liberties Union. (p. 147)

Mr. Fly told a press conference that the FCC had begun the study of its "monopoly" report. (p. 150)

Wheeler Questions Networks About Commentators

Senator Burton K. Wheeler (D. Mont.), chairman of the Interstate Commerce Committee, addressed the following self-explanatory letter this week to the Mutual Broadcasting System:

February 12, 1941

Mr. Fred Webber
General Manager
Mutual Broadcasting Co.
1440 Broadway
New York, N. Y.

My dear Mr. Webber:

A few days ago I called in Mr. Butcher and Mr. Russell representing the Columbia and National Broadcasting Companies respectively, and asked them to furnish me with a list of the commentators over their stations, together with the names of their sponsors, and if the sponsor is a corporation, to give me the name of the President of the Company, and the members of the Board of Directors.

You will recall that just recently the Federal Communications Commission reprimanded a station in Boston for editorializing the news. In checking up on your commentators, I find that on the war issue particularly they have been not only editorializing, but in many instances propagandizing.

I would like very much to have you send me a copy of the script of your commentators during the past year. Complaints of propaganda by the radio, by some of the newspapers, by many columnists, and the motion picture industry, have become so numerous that official notice must be taken of them.

When we passed the Communications Act we tried to write into that legislation provisions which would require all broadcasting chains and stations to give equal time to both sides of every public question. While the originating stations of the chain have generally given equal time to individual speakers on the more important public issues, I question whether or not their affiliates have done so, and sponsored news commentators on the chains have been quite one-sided on the great issue that is pending before the country at the present time, namely, the lend-lease bill, and the question of our own neutrality.

If we are to preserve Democracy in the United States it is absolutely necessary on fundamental issues, such as granting dictatorial powers to the President, and the question of Peace or War, that the people should be fully and impartially advised. The only way that Hitler, or Stalin or Mussolini are able to keep their people in subjection is because of controlled press, radio and motion pictures.

Respectfully,

(Signed) B. K. Wheeler.

BKW*m

BMI CONCERT

A complete program of BMI music is to be presented by Otto Cesana and his orchestra at the Town Hall in New York on the evening of March 13.

This occasion may well make history not only for BMI but for the whole field of American music. The famous evening when Paul Whiteman first appeared on the concert stage stands in retrospect as the opening of... (Continued on page 144)

February 14, 1941 — 143
BMI
(Continued from page 143)

a new chapter in the story of American music. It was at that time that critics began to recognize the real musical importance of jazz as the American idiom. The so-called "serious" composers have become increasingly concerned with the development of the characteristic American musical speech. The young composers now make constant use of the expression "symphonic jazz." The borderline between "popular" music and "serious" is becoming blurred and shows signs of fading out. Those terms are losing their meaning. The emphasis is falling rather on the fact that we are producing music which is as American as hot dogs and chewing gum. Whether it be called jazz or swing is no longer important, but only the fact that it is characteristically American music.

Otto Cesana is well known as teacher, composer, and conductor. The direction of his musical interest is suggested by the title of the final number on his program for March 13, Symphony in Swing.

It is very significant that he should present a full program of music in the American idiom for a concert hall audience.

It is also very significant that every number on the program should be drawn from the BMI catalogue.

MORE CATALOGUES ACQUIRED

BMI has completed a contract for the licensing of the music controlled by the Society of Jewish Composers, Publishers and Songwriters. Some stations already have a license from this Society and in such cases adjustment of fees will be made.

BMI has also acquired the performance rights in the catalogue of band music controlled by Jean Missud of Salem, Massachusetts. This catalogue has about fifty well known and useful band numbers. Mr. Missud is an almost legendary figure in the band world. He is now eighty-nine years old and still rehearses regularly every Tuesday evening.

BMI has also completed the contract for the catalogue of the Majestic Music Corporation which is managed by Arthur Shilkret, son of the famous bandleader, Nat Shilkret.

9. ACCIDENTLY ON PURPOSE
10. KEEP AN EYE ON YOUR HEART
11. BECAUSE OF YOU
12. ALL I DESIRE
13. WALKIN' BY THE RIVER
14. LET'S DREAM THIS ONE OUT
15. LITTLE SLEEPYHEAD
16. ANYWHERE
17. BREAKFAST FOR TWO
18. I LOOK AT YOU
19. SHADOWS IN THE NIGHT
20. A STONE'S THROW FROM HEAVEN

The records of sales of sheet music and phonograph records and of play on the coin phonographs continue to establish conclusively the prime importance of radio as a medium of popularizing music. 12 of the 15 sheet music best sellers, 8 of the 10 best selling records, and 5 of the 10 coin phonograph leaders are licensed through BMI. These numbers include 9 BMI publications, 2 of Southern Music, and 1 from Marks.

Nevertheless there are clear indications that the BMI music wins and holds the public favor by its merit. The radio Daily for February 10th carries the following significant item:

Philadelphia—Although WDAS, here, has both BMI and ASCAP contracts and performers have been flocking to the station in order to be able to present any music, 85 per cent of the numbers played by the station are from non-ASCAP catalogues. Station's musical fare is built on popular requests of the public.

KATE SMITH FEATURES "WE'RE ALL AMERICANS"

Kate Smith, one of America's best loved singers, has made a new record of We're All Americans, the patriotic march song written by Jim Mangan, Merchandizing and Advertising Director of the Mills Novelty Company, which is licensed through BMI. It is understood that Miss Smith plans also to make the use of this song a feature of her weekly broadcasts on Friday evenings.

BMI WINS IN MARATHON PROGRAMS

Station WIP of Philadelphia challenges the claim of KTRH of Houston, Texas for the longest commercial program on the air, but announces similar results from the
use of BMI music. After receiving the reprint of the letter from KTRH which was recently mailed out, Murray Arnold, WIP’s Program Director wrote Mr. Tompkins that WIP has an all-night program called The Dawn Patrol, sponsored by the Pep Boys (Auto Accessories), devoted entirely to music and running for 5½ hours. “Since the first of the year,” writes Mr. Arnold, “our telegram and mail response on this program has been slightly over average, which to me is a very fine indication of what our listeners think of BMI music.”

HISTORY REPEATS ITSELF—TO MUSIC
The list of numbers suitable for special Washington’s Birthday programs recently sent out to BMI member stations included the new BMI arrangement of an Old English song, Heart of Oak. This number was written by the English composer Boyce in 1710 during the so-called War of the Spanish Succession when Louis XIV of France was trying to establish the Bourbon dynasty to the Spanish throne. England had, not long before, ousted the autocratic James II, who fled to the French Court. Louis XIV, who was in some respects the Hitler of his time, found his way blocked by the military genius of the English general, John Churchill, Duke of Marlborough, direct ancestor of the present Prime Minister. There was then, as now, the threat of an invasion of England from the military power which was dominating the continent of Europe. The second stanza of Heart of Oak, now issued in its new BMI arrangement, may stand as well today as in the circumstances for which it was written more than 230 years ago:

They swear they’ll invade us, these terrible foes,
They frighten our women, our children, and beaux;
But, should their flat bottoms in darkness get over,
Still Britons they’ll find to receive them on shore.

NAB

HOUSING COMMITTEE READY
The Housing Committee for the assignment of reservations at NAB’s Nineteenth Annual Convention to be held at the Jefferson Hotel, St. Louis, Missouri, May 12 to 15, inclusive, has perfected its plans and is ready for business.

Chairman Ray Dady, KWK, and his committee consisting of Rev. W. A. Burk, WEW; Arthur Casey, KMOX; Frank Eschen, KSD; and Elzey Roberts, KXOK, have perfected plans which assure an orderly and efficient handling of all requests for reservations. We cannot urge too strongly upon broadcasters the wisdom of early attention to their hotel requirements at St. Louis.

The convention city is unusually well equipped to care for the varying requirements of broadcasters but there are other events scheduled in St. Louis simultaneously with ours and we sincerely hope that broadcasters will get their reservations in early in order to insure themselves proper accommodations.

All requests should be addressed direct to the hotel at which accommodations are desired. They will then be referred to the Housing Committee for final attention. Other matters connected with the convention are being ably handled, by the various committees appointed by Tenth District Director John J. Gillin, Jr.

PROMOTIONAL EXHIBITS
Howard O. Peterson, WOW, Convention chairman of the committee to assemble and stage the exhibit of station promotional material and his committee consisting of Chick Allison, WLW; J. Soulard Johnson, KMOX; and Robert Sampson, KWK, have perfected an effective plan. The outline of this plan will be sent to all NAB member stations within a short time after you receive this week’s Reports. We urge your cooperation and immediate attention.

DISTRICT 13 MEETING
A meeting of the NAB stations in the Thirteenth District (Texas) is scheduled for February 28, in San Antonio, at the Gunter Hotel beginning at 10 a.m. A staff representative of NAB will attend to discuss industry problems and Association activities, and Carl Haverlin of BMI will bring the Texas broadcasters up to date on music developments. Election of a District Director for the ensuing two-year term will be another important item of business.

REALLOCATION ERRORS
Reallocation frequency list carried in February 7 NAB Reports listed the wrong call letters for three stations. On page 119 the call letter of Newburgh, New York should be WGNY instead of WHNY and on page 124 the call letter of Tyler, Texas should be KGKB instead of KGXB. The call letter of Modesto, California should be KTBR instead of KTRD.

PROGRAMS FROM ARMY POSTS
In a previous issue of the Reports advice was given to broadcasters that in arranging sustaining programs at Army camps, permission may be secured from the commanding officer of the post involved. The War Department has now provided information respecting the method of clearance of commercial programs originating at Army camps or posts.

A suggested form which is published herewith in full has been prepared for the use of any station or network desiring to secure permission to originate commercially sponsored broadcasts. This form should be prepared in
triplicate and sent direct to the Public Relations Director of the War Department at Washington, D.C. His address is 2012 Munitions Building.

This form has not been printed or mimeographed but those desiring to make requests are asked to follow it closely. The War Department states that it does not desire to burden stations with a multiplicity of questionnaires but is anxious that station and network requests for the origination of commercially sponsored programs be submitted as indicated.

NAB is cooperating with the War Department and other national defense agencies and seeking to make radio's part effective. Broadcasters are, therefore, urged to follow the procedure outlined, namely: On sustaining programs, make request directly of the commanding officer of the post involved; on commercial programs, send the request in triplicate to the address above given in the following form:

(To be sent in triplicate)

1941.

SUBJECT: Request for commercial radio broadcast from military reservation.

To: The Director, Bureau of Public Relations, Room 2012, Munitions Bldg., War Dept., Washington, D.C.

1. Station located in (City)

FCC License in name of requests authority to originate a commercially sponsored broadcast (by wire or transcription) from (Name of Camp, Post or Station)

2. The following essential data is submitted for your information:

   Date of program or schedule
   Length and time of program
   Name of sponsor
   Product to be advertised
   What is the general nature or type of the program? (Give brief outline of the entire program)—musical? talking? etc.
   Do you contemplate using Army talent? If so, of what nature?
   If you plan on using any particular individual officially connected with the Army on the program, state whom you desire and the nature of his appearance.
   Where do you desire to install microphones? Give definite location. If a building, at what actual location in the building?
   What line or circuit facilities will be required? (1)
   Actual time wires to be in use, From To
   Is program to be transcribed?
   If so, is it planned to use the transcription on other stations?
   3. It is understood that the program must be produced without expense to the Government and will not interfere with the normal training of the troops at the point of origin. It is also understood that the program must meet with the approval of the Commanding Officer of the Army post concerned.
   4. It is further understood that the following must be announced at the opening and close of the broadcast:

   “The presentation of this program from Fort (name of the Fort or Camp) does not constitute an endorsement by the War Department or its personnel of the product advertised, the origination of the broadcast from this station being made solely for the entertainment of the military personnel serving at this post.”

5. The text of the proposed commercial copy to be used in this program—opening—middle—close—it attached.

Give name of your representative in charge of program.

.................................................. (Name)
.................................................. (Official Status)

NOTE: To be signed by an officer of the corporation in which the name of the station license is held. If individually owned, to be signed by the individual.

CLEAR-CHANNEL STATIONS OPEN
WASHINGTON OFFICE

Establishment of the Clear Channel Broadcasting Service with office in Washington, D.C., was announced by Edwin W. Craig, Nashville, Tenn., chairman of a committee composed of independently owned radio stations throughout the country.

The service, Craig explained, is intended to familiarize American radio listeners with the importance of preserving “clear channel” broadcasting primarily as a domestic service, but also in line with the North American Regional Broadcasting Agreement which goes into effect March 29, 1941.

The Washington office will be headed by Victor Sholis, who recently resigned as Special Assistant to the Secretary of Commerce.

Clear channel stations are those broadcasting with a power of 50 kilowatts on a wave length not shared by any other radio station at night. “Since 81.7 percent of the United States is solely dependent upon clear channel broadcasts for radio reception at night,” said Craig, who is Vice President of WSM, Nashville, Tenn., “the importance of this type of station is obvious. Without these stations, all the residents of this tremendous portion of our country would be living in a radio 'blackout.'

“Under the treaty entered into by the United States, Canada, Mexico and Cuba, however, the principle of clear channels assumes additional importance. The United States has been assigned exclusive use of 25 such channels in this agreement. Unless these channels are used as prescribed in the treaty—only one station at night to a channel—the United States loses its priority on the channel. Our neighboring countries would then be entitled to set up stations on these channels.

“This would mean that many American radio listeners would be denied the chance to hear broadcasts at night. It is our hope that our service will acquaint the millions of American radio listeners with the stake they have in preservation of clear channel broadcasting,” added Craig.
Radio Movin’ Day

The NAB broadside on Radio Movin’ Day, March 29, will be mailed to all stations tomorrow, February 15. The two big jobs ahead are: (1) education of the public; and, equally important, (2) education of servicemen and dealers.

March 10 is suggested as the approximate date for bringing the reallocation story to the public. Right now is the time to set the stage for the public campaign of education and promotion and to line up the servicemen for a Radio Rally.

RADIO RALLY IN CHICAGO

On behalf of Chicago broadcasters, Don E. Kelley, of WLS, wired today that there would be a giant Radio Rally of the servicemen and the trade early in March.

CHARLESTON RALLY

Charleston, S. C., Radio Rally will be held February 18, according to John M. Rivers, president, WCSC.

UTILITY STUFFERS

In Janesville customers of the Wisconsin Power & Light Company will receive Movin’ Day stuffers in their bills. This was arranged by James F. Kyler, general manager, station WCLO.

Furthermore, wrote Mr. Kyler, Les Hayes of the power company asserted that the company will “be more than glad to cooperate in every manner possible.”

IN LOUISVILLE

Though the Louisville Gas & Electric Company collects all of its accounts by solicitors, it will cooperate with Louisville stations by devoting a large space in the Louisville Courier-Journal to Movin’ Day. Advertising Manager Green’s decision was reported by Steve Cisler, manager, WGRC.

IN COLUMBIA

In Columbia, S. C., G. Richard Shafto, manager, WIS, “has obtained agreement of the South Carolina Electric and Gas Company whereby the power company will mail a list of the new frequency assignments within the state of South Carolina to all consumers. This will be contained in the regular monthly statements for service.”

IN JAMESTOWN

Simon Goldman, manager, WJTN, Jamestown, N. Y., reports that the local servicemen are anxious to cooperate all along the line.

IN BOSTON

Boston members of RSA are conducting classes for members demonstrating every available type of mechanical tuning so that on and after March 29 Boston push buttons may be setup with dispatch.

IN WEST PALM BEACH

In West Palm Beach, Florida, city officials, county officials, the school system, Red Cross, Unified Drive and Girl Scouts have volunteered to help Steve Willis, general manager, WJNO, spread the news of the station’s new dial location. The Boy Scouts volunteered to distribute notices house to house. The County Ministerial Associations are considering the observance of March 30 as “WJNO Day.”

OVER NBC BLUE

Dr. O. H. Caldwell, editor, RADIO TODAY and former radio commissioner, will discuss reallocation on his broadcasts over WJZ and the Blue Network on Fridays at 7:15 p.m. The subject will occupy all of Dr. Caldwell’s radio talks beginning February 21 straight through to and including Friday, March 28.

AT WBIG

Major Edney Ridge of WBIG, Greensboro, N. C., has begun to plug Movin’ Day in his weekly printed, advance program schedule. That for February 18 contained a three column box, four inches deep.

Other utilities which have pledged cooperation were reported to members in the bulletin of January 31.

YOCUM HITS FREE OFFER

Ed Yocum, KGHL, Billings, Montana, recently received a form letter from the MacFadden Publications, offering “without a penny of cost to your station,” dramatic script, “This Is My True Story” and another “True Detective Mystery.” Both were for a half hour. On receipt of this free offer Mr. Yocum made a counter offer, knowledge of which we believe will be advantageous to all stations. Here is what he wrote:

“We have available for you, without a penny of cost to your editorial department, a series of success stories by advertisers who have used this station. If and when, MacFadden Publications care to carry this material, we will be happy to carry the also gratis advertising suggested in your letter of January 31st.”

The letter was addressed to George B. Davis, Sales manager, MacFadden Publications, Inc., Bartholomew Building, 205 East 42nd Street, New York City.

FLY AND JOSEPH MILLER ADDRESS CIVIL LIBERTIES UNION

James Lawrence Fly, chairman of the FCC, and Joseph L. Miller, NAB labor relations director, were among the speakers February 12 at the Lincoln’s Birthday Luncheon of the American Civil Liberties Union in New York. Their talks:

Mr. Fly—

How can radio broadcasting best function as an instrument of democracy? The Federal Communications Commission receives
scores of suggestions each month on this subject. Let me describe a few of them.

One type of suggestion involves keeping something or other off the air. Thus a Georgia resident, in the interest of democracy, wants to ban all news from Germany. A New Jersey man wants to ban all news. A citizen of the Bronx believes that the majority should rule, and that any opinion not approved by a majority of Americans should be prohibited.

A woman from Pennsylvania, however, has brought forward the most far-reaching suggestion. She wants the Federal Communications Commission to rule that radio stations which broadcast opinions not approved by a majority of their listeners of their right to decide for themselves strikes at the very roots of democracy and self-government. Banning free discussion on the air, far from making radio an instrument of democracy, robs listening millions of their democratic birthright.

As against those who urge that we ban various programs, others suggest to the Commission that we require stations to broadcast one program or another. There are in the United States literally thousands of special interest groups, each with a particular cause to plead, and each seeking radio time in which to plead it.

Radio stations are in duty bound to meet these requests as fully as the public interest requires. But to meet all requests for broadcasting facilities, at least one law would have to be repealed—not a man-made law, but a law of nature. This law decrees that the number of broadcasting stations is limited by the number of channels available. Every man can have his day in court, but unfortunately every man cannot have his hour on the air. So long as there is room for only a limited number of programs, some people who want to broadcast will not be accorded that privilege by the broadcasters.

This, of course, is not government censorship. It is the necessary exercise of a discretion by the broadcaster. It is, in fact, physics, engineering, and common sense.

Because the way in which programs are selected is widely misunderstood, I want to describe it briefly. Primary responsibility for selecting some programs and rejecting others rests with radio station management. From the thousands of would-be programs battling for time on the air, stations and networks are expected to select those which will, in their opinion, best serve the public interest.

To guide them, the radio stations have a set of rules which they have themselves drawn up. The Code of the National Association of Broadcasters. This code provides that stations shall provide time for the presentation of controversial issues, and shall use their best efforts to divide the available time fairly among those interested in the controversy. The code further provides that newsshall be presented fairly and accurately, without editorial twisting, and uncensored by the opinions or desires of the station, the announcer, or the advertiser. Under the code, commentators and analysts are free to discuss and explain the news, but not to warp or color it. Their complete freedom from any special advantage of commercial influence is essential to a proper discharge of their functions.

The Federal Communications Commission did not draft the code, and has no responsibility for enforcing it. The radio stations have full responsibility. The Commission's function is rather to see that radio stations in the long run have not abused their power to select or reject programs consistently with the public interest.

The reasons for this requirement that broadcasters serve the public interest are clear. The air waves belong to all the people, not to the few who happen to own licensed radio broadcasting equipment. And, thus far, the license has not been required to pay any fee to obtain this privilege. A station owner who uses a broadcasting channel for private ends is like a man who blocks a public highway. The station's license for exclusive use of a broadcasting channel is a license to keep that channel open in the interests of listeners, not to close it to all views but those of the owner.

The Commission stated its position on this issue a few weeks ago, in considering the license application of a New England station. We then said:

"Radio can serve as an instrument of democracy only when devoted to the communication of information and the exchange of ideas fairly and objectively presented. A truly free radio cannot be used to advocate the causes of the licensee. It cannot be used to support the candidacies of his friends. It cannot be used to suppress the supposed majority principle which he regards as unfavorable. To discontinue foreign-language broadcasts, especially to which they are most responsive. These stations can, and in large measure do, serve a constructive purpose.

The problems of radio broadcasting in areas torn by war, of course, are varied, and differ markedly from the problems confronting broadcasting in the United States. In Europe today, for example, broadcasting stations may, under certain conditions, act as direction finders and beacons for enemy aircraft. Last spring, broadcasting stations were used much like artillery to soften up enemy motorized forces. The great significance of radio, and its power for evil as well as for good, is demonstrated by the ability with which the invader first of all seizes the broadcasting station and utilizes it shrewdly for his own ends.

It is interesting to note that even in the heart of a besieged country, the normal structure and program schedule are maintained to the greatest extent consistent with military expediency. The daily life of civilians must go on; and the need is doubly great for information, and for the entertainment and emotional release which radio so pre-eminently affords. I think it significant that in contrast, even the most widely broadcast problems and events have not caused the discontinuance of broadcast programs generally. Indeed, from the heart of the bomb-wrecked city, radios bring us news of the battle.

The United States has not found it necessary to interfere in any way with the regular broadcast programs of its stations. It had an emergency so grave that it would require taking the vast burden of broadcasting operations out of the hands of the broadcasting industry. Intensification of our defense efforts will make it all
the more important that radio broadcasting continue to play its part, under private auspices, in the home life and daily activities of the American listening public. It is probable that labor problems may require some sacrifice, but they will not require sacrificing the basic pattern of our American system of broadcasting.

In saying this, I have in mind not merely the activities of the Communications Board but also the activities of the Defense Communications Board. This Board, established by Executive Order last September, is essentially a planning body, concerned with the defense aspects of all branches of our far-flung wire, cable, and radio communication systems. So far as radio broadcasting is concerned, I do not anticipate that the potential effect of the Board's plans will extend beyond purely technical matters of procedure and coordination; or that they will reach such substantive matters as control of program content. The latter questions are, of course, vital ones, and in treating them we must have a jealous regard for our basic freedoms.

Maintaining civil liberties and other democratic traditions in an era like ours is no easy task. I am inclined to believe that it has never been an easy task. History has a habit of recording past decisions without recording the debate, the turmoil, the searching of heart and soul that went into the making of them. I am hopeful that historians of some future day will view the decisions we now make as worthy of our country, and will deem the techniques we now evolve to be suitable for their purpose—the maintenance of democracy in a war-torn world.

Mr. Miller—

When we finished writing the NAB Code of Program Standards down in Atlantic City two years ago, we were pretty sure that we could count on an unqualified endorsement from organized labor. Father Coughlin might not like it. Judge Rutherford might not like it. Some parents might think we should have set up more rigorous standards for children's programs. But organized labor should be with us, 100 per cent.

What had we done?

We had said that broadcasting stations were obligated to carry labor programs when they served the public interest. Time should not be sold for these programs. All parties to any controversy raised in a labor program should be afforded an equal opportunity before the microphone.

In other words, when a national labor issue of importance arose, a nation-wide network was obligated to give the justified amount of network time for discussion from all viewpoints. When a labor issue of local importance arose, a local station was obligated to give the justified amount of its time for discussion from all viewpoints.

Time should not be sold for this discussion because the employer ordinarily could out-buy the union, and thus weight the argument in his favor. That wouldn't be fair play.

It turned out that labor wasn't with us, 100 per cent. A few who conceive of radio as a common carrier, like a railroad, have accused us of the most outrageous censorship, because we refuse to sell a seat before the microphone to anyone who can pay the fare. As Chairman Fly pointed out after luncheon today, there can be only so many programs a day. Denial of requests for time—free or paid for—isn't censorship. "It is the necessary exercise of discipline by the broadcaster. It is, in fact, physics, engineering and common sense." You can add a car to a railroad train, but you can't add an hour to the day.

A few majority union leaders, however, have given the code their enthusiastic support. We have heard nothing but praise of the national network policy in regard to the amount of time accorded labor leaders and government officials dealing with labor problems. The National Broadcasting Company alone had 43 labor talks on the coast-to-coast network last year. William Green gave six of these: John L. Lewis, five. While I do not have the exact figures at hand, I venture that the Columbia and Mutual Broadcasting Systems carried about the same number.

Locally labor has fared well under the code. Let me cite an instance.

On the other hand, the size of a strike certainly is not the only criterion for a broadcaster, in determining whether it should be of prime public interest. To air his views. The station manager informs him that he cannot buy time, under the code, and that he regrets he cannot give away the time, either, because that station's far-flung audience or a good share of it just wouldn't be interested in hearing about the merits and demerits of a small strike.

On the other hand, the size of a strike certainly is not the only criterion for a broadcaster, in determining whether it should be of prime public interest. To air his views. The station manager informs him that he cannot buy time, under the code, and that he regrets he cannot give away the time, either, because that station's far-flung audience or a good share of it just wouldn't be interested in hearing about the merits and demerits of a small strike.

On the other hand, the size of a strike certainly is not the only criterion for a broadcaster, in determining whether it should be of prime public interest. To air his views. The station manager inform
cast such a speech. In this connection, I would like to quote from our code manual:

"The broadcaster who denies time to a labor leader or organization solely because the broadcast might "stir up trouble" or disturb the status quo is treading dangerous ground.

"Of course, no broadcaster would permit his facilities to be used to incite to riot or bloodshed. When a broadcaster is in doubt on this score, after reading the proposed script, he might well consult the proper police officials.

"On the other hand, the opinion of an employer that a labor program dealing with his employees would be "dangerous" should be considered for just what it is worth. It is certainly not for the broadcaster to decide that labor unions are good or bad, and give or refuse to give them time accordingly.

"Not long ago, I helped to arrange for a national network program for a labor leader who had made his first request for time. First, he was surprised that he received it, and received it so promptly. Then he submitted his script. In it, he quite strongly attacked three of the largest industrialists in the country. The network lawyers looked it over, found no libel, and gave it their O.K. The labor leader was amazed.

"Do you mean I can say all that?" he asked.

We think labor is getting a pretty good break on the air.

FEDERAL COMMUNICATIONS COMMISSION

The FCC, this week, began its "monopoly" report study. In this connection James Lawrence Fly, Chairman, said at a press conference early this week that "the Commission began consideration of the network matter a few days ago, but it is still in the discussion stage and the Commission has not reached a report draft status."

Mr. Fly told the newspapermen that he has read the report of the National Television Systems Committee recommendations, but in view of the hearing which has been slated he would make no comment. Also, Mr. Fly said in answer to a inquiry that there is no additional news about the Defense Communications Board other than its committees are quite active and very much on the job, meeting where they choose, some in New York and others in Washington.

Mr. Fly said that the $1,600,000, special defense fund has been used for new equipment and personnel and the FCC is still taking on technicians. He stated that additional funds may mean more equipment and more people.

Answering a specific question relative to evidence of subversive use of radio, Mr. Fly said that he could hardly say that it was acute, but agreed that it was an important subject. He stated further that he could hardly say it is under control, but a lot of work is being done on it in the field. He admitted "hitting some pay dirt, if you want to know that."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings and oral arguments are scheduled to be heard in broadcast cases before the Commission during the week beginning Monday, February 17. They are subject to change.

Monday, February 17

NEW—Stephen R. Rintoul, Stamford, Conn.—C. P., 1370 kc., 250 watts, unlimited.

NEW—William H. Amesbury, Minneapolis, Minn.—C. P., 630 kc., 1 KW, unlimited. DA-night and day.

Thursday, February 20

Oral Argument Before the Commission

REPORT NO. B-121:

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings and oral arguments. They are subject to change.

March 10

WARM—Union Broadcasting Co., Scranton, Pa.—License to cover C. P., 1370 kc., 250 watts, unlimited.

Consolidated Hearing

WCAM—City of Camden, Camden, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAP.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAM.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WCAP.

WTNJ—WOAX, Incorporated, Trenton, N. J.—C. P., 1230 kc., 1 KW night, 1 KW day, unlimited, DA-day and night.

NEW—Trent Broadcast Corp., Trenton, N. J.—C. P., 1230 kc., 1 KW, unlimited, DA-day and night.

March 12

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 890 kc., 1 KW night, 5 KW LS, unlimited time.

March 13

Oral Argument Before the Commission

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, 1210 kc., 100 watts night, 100 watts LS, unlimited time.

March 24

WMBG—Havens & Martin, Inc., Richmond, Va.—Modification of license, 1350 kc., 5 KW, unlimited, DA-day and night. Present assignment: 1350 kc., 1 KW night, 5 KW day, unlimited, DA-night and day.

March 25

April 2

NEW—Symons Broadcasting Co., Ellensburg, Wash.—C. P., 1110 kc., 1 KW, unlimited.

NEW—J. C. Kaynor, Ellensburg, Wash.—C. P., 1310 kc., 250 watts, unlimited time.

April 25

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WKPT—Kingsport Broadcasting Co., Kingsport, Tenn.—Granted

KFEO—KFEO, Inc., St. Joseph, Mo.—Dismissed without prejudice the petition to intervene in the hearing on application of KVKW, St. Louis, to change frequency from 1350 to 680 kc., and increase power to 50 KW, unlimited time, using DA.

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted motion for leave to amend application for construction permit to change frequency from 1180 to 690 kc., increase power to 50 KW, unlimited time, DA-night, to substitute revised and amended technical exhibits.

WCNC—Aubrey G. McCabe and Trim W. Aydlett, d/b a as Albemarle Broadcasting Co. (assignor), and Albemarle Broadcasting Co. (assignee), Elizabeth City, N. C.—Granted petition for leave to amend application relating only to corporate structure, to withdraw Aubrey G. McCabe and substitute Trim W. Aydlett in assignee corporation, in re application for consent to voluntary assignment of license of WCNC, N. H.—Modification of construction permit (Bl-P-2897) as drawn, and the proceedings in Dockets Nos. 5982 and 5983, in re application of WTCN and KSOO (Sioux Falls Broadcast Association, Sioux Falls, S. Dak.) was granted in part only insofar as to balance.

The Community Broadcasting Corp., Middletown, N. Y.—Motion for continuance of hearing now set for February 12, withdrawn, and the proceedings in Dockets Nos. 5982 and 5983, in re applications of Community Broadcasting Corp. and Herbert L. Wilson, both applicants for new station at Middletown, to operate on 1310 kc., 250 watts, unlimited time, were consolidated.

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Granted petition for continuance of hearing for period of 60 days from February 24, on application to operate on 1500 kc., 250 watts, unlimited time.

WBAH—H. H. Stengle Jr., Wilkes-Barre, Pa.—Continued oral argument now set for February 13 to March 13, in application for renewal of license.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted motion for leave to amend application by February 28, with regard to technical information, new transmitter location and new directional antenna data, in re application to change frequency and increase power.

WGST—Georgia School of Technology, Atlanta, Ga.—Granted motion for continuance of hearing set for February 10 for 30 days, on application for renewal of license.

Park Cities Broadcasting Corp., Dallas, Texas.—Granted motion to take depositions in re application for new station.

WMBG—Havens and Martin, Inc., Richmond, Va.—Granted motion for continuance of hearing now set for February 21, for period of 30 days, on application for modification of license to increase night power to 5 KW.

Mosby's Inc., Anaconda, Mont.—Granted petition for leave to amend application for construction permit so as to request 1290 instead of 1100 kc., 500 watts night, 1 KW day, unlimited time.

R. B. Eaton, Des Moines, Iowa.—Granted petition for continuance of hearing now set for March 3, until after hearing on television scheduled for March 20, in re application for new television station.

Trent Broadcasting Corp., Trenton, N. J.—A adopted order denying petition for reconsideration and grant of application of Trent Broadcasting Corp. for new broadcast station to operate on 1230 kc., 1 KW, directional antenna day and night; dismissed without prejudice to refile leave to amend application and alternative request that the Commission grant its application modified to specify operation upon the frequency of 890 kc.

General Television Corp., Boston, Mass.—Granted special temporary license to operate television station WIXG for the purpose of conducting tests ending in no event later than March 20, 1941; frequencies 50000-56000 kc. (Channel No. 1), on an experimental basis only, upon the express condition that this authority is subject to change or cancellation by the Commission at any time, without advance notice or hearing; if in its discretion the need for such action arises; AS granted for 500 watts visual power, in accordance with Sec. 4.78; to operate as a television broadcast station in accordance with Sections 4.71, 4.72, 4.73, 4.74, 4.75, and 4.76.

WRDO—WRDO, Inc., Augusta, Maine.—A adopted an order dismissing renewal of license proceedings and continuing on a temporary license to March 29, 1941, pending application for transfer of control of the station.

WQAM—Miami Broadcasting Co., Miami, Fla.—A adopted an opinion and order dismissing petition which requested that the Commission (1) classify station WQAM as a Class III-A station upon its present assignment of 610 kc., 1 KW, unlimited time, and modify the license of station accordingly; (2) that action upon petitioner's application for authority to install a new transmitter and increase power to 5 KW be deferred until after final action upon petition; and in event petition were granted, that application for authority to increase power to 5 KW be returned to petitioner. (In its opinion the Commission points out that classification of stations as Class I, II, III-A, etc., is merely for administrative convenience and such classification is not part of any license and not a source of any right in the licensee.)

KFDN—Beaumont Broadcasting Co., Beaumont, Tex.—A adopted a similar decision and order dismissing application for modification of license to add "Class III-A" to license of KFDN.

City of New York, Municipal Broadcasting System, New York, N. Y.—Designated for hearing application for new high frequency (FM) broadcast station to operate as follows: Frequency, 16700 kc.; service area, 3.889 square miles; hours of operation, day 10 hours, night 5 hours (B1-PH-83).

WTCN—Minnesota Broadcasting Corp., Minneapolis, Minn.—Designated for hearing application as amended to request construction permit to change frequency to 710 kc., increase power to 10 KW, change transmitter site locally, and employ directional antenna at night (WTCN now operates on 1250 kc., with power of 1 KW night and 5 KW day) (B4-P-7439).

WHB—WHB Broadcasting Co., Kansas City, Mo.—Designated for joint hearing with WTCN (above) application for construction permit to change frequency to 710 kc., increase power to 5 KW unlimited time, install directional antenna for day and night use, install new transmitter, and move transmitter site locally (WHB now operates on 860 kc., with 1 KW daytime).

Joint petition of WTCN and KSOO (Sioux Falls Broadcast Association, Sioux Falls, S. Dak.) was granted in part only insofar as it requests leave to amend the application of KSOO; denied as to balance.

APPLICATIONS FILED AT FCC

610 Kilocycles

for a new station, requesting authority to install new transmitter, approval of studio site at 1819 Elm St., Manchester, N. H., and extension of commencement date to 10 days after grant and completion date to 60 days thereafter.

FM APPLICATIONS

NEW—The Moody Bible Institute of Chicago, Chicago, Ill.—Construction permit for new high frequency broadcast station to be operated on 43300 kc.; coverage, 15,300 square miles; population, 5,091,500. Amended: Change frequency from 43300 to 47500 kc.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Amasia Importing Corporation, 10 East 39th St., New York, is charged with misrepresentation in the sale of corsets and foundation garments for women in a complaint. According to the complaint, the respondent uses the trade name "Silk Skin" in advertising and on tags, labels and boxes, representing that its garments consist in part of silk when in fact none of them contain more than 20 per cent silk and many have no silk at all. Some allegedly consist of a cotton elastic yarn and others of such yarn combined with lisle, rayon or silk.

The complaint charges that on certain boxes and on tags attached to garments the term "Silk Skin" appears in large type and in smaller type is printed the notation "80 per cent to 100 per cent elastic yarn combined with lisle, rayon or silk." It is alleged that beneath a primary label containing the name "Silk Skin" is a secondary label, not readily discernible, stating the purported percentages of elastic and lisle, rayon or silk, as the case may be. However, the complaint alleges that neither the respondent's advertising and printed matter nor the primary cloth label differentiate between the types of garments containing various combinations of lisle, rayon or silk, and that many garments contain percentages other than those stated on the secondary label.

The respondent further is charged with representing through its business stationery that it has branch houses or factories in parts of the country that does not have any. The respondent is also charged with misrepresentation in the sale of corsets and foundation garments containing more than 20 per cent silk when in fact none of them contain any silk at all.

Illinois Herb Company—Misrepresentation in the sale of 40 medicinal preparations advertised as having value in treating various diseases and conditions, is alleged in a complaint issued against Charles A. Bliem, trading as Illinois Herb Co., 542 South Dearborn St., Chicago.

The complaint alleges that the products do not possess the therapeutic values advertised. According to the complaint, preparations designated as "Calexa Herb Compound" and "Sonada Tonic," and represented as cures or remedies for digestive ailments, have no therapeutic value in excess of temporary relief afforded by their laxative properties, and the respondent's use of the word "tonic" to designate "Sonada Tonic" and "Verbita Tonic" is misleading in that these preparations have no substantial therapeutic value as tonics.

The complaint charges that the respondent's product "Lura," advertised as being of value in eliminating halitosis, has no effect upon that condition other than to mask it temporarily; that the value of the preparation "Rexora Herb Compound," represented as a remedy for bladder weakness and irritations, is limited to such slight relief for bladder irritations as it may afford because of its properties as a weak diuretic, and that "I. H. C. Dorelle Hair Tonic," advertised as being capable of stimulating hair growth and preventing falling hair, has no value in stimulating hair growth, or in preventing falling hair except as it may assist in temporary removal of dandruff scales.

The complaint further alleges that the respondent's advertisements concerning the preparations "Wahoo Bark," "Geroca Herb Compound" and "Trilax Herb Tea," constitute false advertisements in that they fail to reveal that use of these preparations under conditions prescribed in the advertisements or under usual conditions, may result in serious injury to health. (4460)

Wayne-Townesend & Company—Misrepresentation in the sale of men's wearing apparel is alleged in a complaint issued against Albert Walters, trading as Wayne-Townesend & Co., 1001 Chestnut St., Philadelphia.

According to the complaint, the respondent promotes a merchandising plan under which a participant paying $1 a week for 39 weeks would be entitled to receive a garment.

Through his agents and otherwise, the respondent is alleged to make representations such as that a drawing or some similar method would be held weekly at the respondent's place of business for the selection, by lot or chance, of a participant's name; that a participant so selected would receive a garment without further payment on the contract, and that, in order to advertise the merchandising plan, a suit or other garment would be given in certain instances to a participant after three, four or other small number of payments had been made.

The complaint alleges, however, that no such drawings have been held, and that a suit has never been given to a participant for less than the contract price, either through a method of employing a chance feature or to advertise the respondent's merchandising plan. (4461)

Webster Electric Company—A complaint has been issued charging Webster Electric Company, Racine, Wis., with misrepresentation in the sale of fuel units for oil burners.

According to the complaint, the respondent advertised that the capacity of its "Webster Electric Fuel Unit" is greater than that of any other fuel unit on the market; that the unit is more easily serviced than are all similar devices, and that it is the only device of its kind having the outboard bearing outside of the seal.

The complaint further charges that the respondent with representing that the unit's dependability exceeds that of similar devices, and that, during a certain year, more oil burners would be equipped with its fuel unit than with the fuel unit of any competing manufacturer. (4456)

STIPULATIONS

Following stipulations have been entered into during the past week:

Agnes MacGregor, Inc., 350 North Clark St., Chicago, cosmetics distributor, has entered into a stipulation to cease using on labels affixed to its products or in advertising matter representations directly asserting or implying that use of any of its preparations will, among other things, effectively cleanse enlarged pores, eliminate blackheads, be a proper treatment for all types of acne, penetrate into the second layer of skin tissue, remove crow's feet, wrinkles or fine lines, nourish the skin, promote the growth of new hair, and correct dandruff. (3031)

Cass Bean & Grain Co., 603 Germania Ave., Bay City, Mich., has entered into a stipulation in which it agrees to cease advertising that "Snelling's Dog Food" will prevent skin diseases, worms, and other ailments, and that it will assure better health, or resistance to colds and discomfort. The respondent further agrees to cease representing that it guarantees its food, unless the nature and extent of the guarantee are clearly disclosed. (0/726)
John R. Evans & Co., Second and Erie Sts., Camden, N. J., have entered into a stipulation to cease and desist from certain representations in the sale of leathers imported from France.

According to the stipulation, the respondent sells certain of its imported leathers to novelty manufacturers for use in making ladies' handbags, belts and other novelty articles. In shipping memoranda and invoices, the stipulation continues, the respondent has represented its leathers as “Black French Ant. Fin. Suede” or as “Black French Ant. Suede” and certain manufacturers advertised the articles made from these leathers as “Imported French Antelope Suede.”

The leathers referred to in the memoranda and invoices were not made from the skin of the antelope, according to the stipulation and the respondent agrees to cease using in its printed matter the word “Antelope” or the abbreviation “Ant.” in connection with the words “Black French Suede” or “Black French Fin. Suede” as descriptive of leathers not made from the hide of an antelope. (3033)

M. B. Groghan Company—Merwin B. Grohan, trading as M. B. Groghan Co., 122 South Michigan Ave., Chicago, distributor of greeting cards, has entered into a stipulation to cease and desist from advertising “free samples” or making any other use of the word “free” or similar expression in a manner purporting a gift or gratuity only, where any consideration such as payment of money, rendering of services, or otherwise, is required of the person receiving articles of merchandise sent in response to his request for such free samples or other gratuity. The respondent further agrees to desist from inducing a customer to order samples or other goods by deceptively concealing the terms of the transaction. The original stipulation, executed in May, 1940, has been rescinded. (2819)

Harrington Publishing Company—John Harrington, trading as Harrington Publishing Company, Portland, Oreg., has entered into a stipulation in which he agrees to cease certain representations in the sale of a correspondence course designated “Harrington Diesel” as misleading. The respondent stipulates that he will cease advertising that those who study the course can earn from $15 to $25 a day, and that prospective purchasers can make profits in a specified time which exceed the average net profits theretofore consistently made by purchasers of the course in like periods of time under normal conditions.

The respondent further stipulates that he will cease employing the word “Diesel” as part of the name of his course or otherwise representing that the method will enable one to convert an ordinary gasoline engine into an engine in which the crude oil used as fuel is ignited by the heat resulting from the high compression of air drawn into the cylinders. (02723)

R. H. Macy & Co., Inc., New York, entered into a stipulation to cease certain representations in the sale of rugs.

The respondent corporation agrees to desist from use of the words “Oriental,” “Chinese,” “Persian,” “Numdah” or other distinctive Oriental names as descriptive of rugs not made in the country or locality designated; from use of the words “Oriental Reproductions,” “Oriental Copies,” “Chinese Reproductions,” “Persian Reproductions,” “Numdah Reproductions” or the words “reproduction” or “copy” or similar words as descriptive of rugs which are not reproductions or copies of the types named, that is, true counterparts or reconstructions in all particulars.

Under its stipulation, the respondent further agrees to cease using the words “Oriental,” “Chinese,” “Persian,” “Numdah” or other distinctive Oriental appellations in connection with any rug or carpet which does not contain all the essential qualities and properties of such types of rugs; unless, when properly employed to describe the design or pattern only, such words shall be immediately accompanied by a word like “design” or “pattern” primiarily an equally conspicuous type to clearly indicate that only the form delineated on the surface of the rug or carpet is a likeness of the type named; for example, “Oriental Design” or “Chinese Pattern.” (3032)

Seneca Specialties—George A. Springstead, trading as Seneca Specialties, 24 Main St., Geneva, N. Y., entered into a stipulation in which he agrees to cease advertising that the hair preparation “Nova” will banish gray hair, or impart the original or former color or the exact shade desired, and to cease representing or implying by any other terminology that the product will have more than a slight coloring action on the hair. The respondent also stipulates that he will desist from representing that the use of Nova cannot be detected; that Nova is blended or balanced according to a French formula, and that the respondent is assisted by a staff of employees. (02725)

Smith Products—Trading as Smith Products, H. B. Smith, 226 East Orchard Ave., Council Bluffs, Iowa, stipulated that he will cease advertising that “Smith’s Rat Kill” will stop destruction by rats, is a sure or quick death for rats, and will stop waste due to rats; that the preparation will be taken by rats under all baiting conditions, and that it is approved by the United States Department of Agriculture. (02724)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Continental Baking Company—Seven Sioux City, Iowa, bakery products dealers and a labor union local whose members operate delivery trucks belonging to the different bakeries, have been ordered to cease and desist from agreements tending to restrain trade in bakery products.

The respondents are: The Continental Baking Company, Wilmington, Del., operating a Sioux City plant; The Sioux City Bakery; Metz Brothers Baking Company; Fred W. Lenhardt, trading as Quality Bakery; Emil A. Madsen, trading as Madsen Bakery; Jake Schmidt, trading as Iowa Bakery Company: Anthony Pazes, trading as Sunkist Cake and Pie Company; Local No. 383 of the Chauteurs, Teamsters and Stablenmen and Helpers Union, and Glenn Beaman, Charles Cunningham, Jim Brookhart, William Carlson, O. G. Foster, Ralph Johnson and Howard Foutz, officers of the union local, all of Sioux City.

Commission findings are that following a strike of union drivers of bakery trucks in Sioux City in 1938, the seven respondent baking companies and the labor union local entered into a contract under which they prevented independent route men who had entered the business of delivering and selling bakery products, subsequent to January 1, 1938, from obtaining bread and other bakery products for sale in the Sioux City area. After the agreement was made by the respondents, members of the respondent union local accosted the independent route men and by threats forced them to cease their operations and go out of business, according to findings.

The Commission order directs the seven bakery dealers, the labor union local and its officers, representing the membership, to cease and desist from entering into or carrying out any agreement or understanding, the purpose or effect of which is to hinder or suppress competition in the purchase, sale and distribution of bread, cakes, or other bakery products; to cease entering into, carrying out or enforcing any agreement to classify dealers for the purpose or with the effect of preventing any dealer or class of dealers from obtaining bakery products for resale, and to discontinue the use of threats or other coercive methods or practices pursuant to agreement or understanding with each other or with others to prevent any bakery, dealer, or route man from purchasing and receiving or selling and delivering bakery products. The Commission dismissed its complaint in this proceeding as to Interstate Bakeries Corporation, Kansas City, Mo., operating the Schultz Baking Company, Omaha, Nebr. According to findings, this respondent had not entered into the contract between the respondent bakeries and union. (3900)

Imperial Knife Co., Inc., and Colonial Knife Co., Inc., both of Providence, R. I., and Utica Cutlery Co., Utica, N. Y., have been ordered to cease and desist from using the word “Scout” or similar words as markings for knives not endorsed by The Boy Scouts of America, and to discontinue representing that their “Scout” knives are a part of the equipment of that organization’s members. (4115-4116-4117)
ReVigator Corporation, 1630 Hanna Building, Cleveland, and its president, E. O. Loeber, have been ordered to cease and desist from misrepresentations in the sale of their "ReVigator Pressure Cap," either alone or in combination with their preparations "ReVigator Liquid Home Treatment for Scalp and Hair," and "ReXigator Liquid Shampoo."

Commission findings are that the respondents, in advertising "The Re\daggerator System of Home Treatment for the Scalp and Hair," represented that use of the pressure cap provides a cure or remedy for falling, fading and thinning hair, and for dandruff and baldness, and a means of making new hair growth. However, according to findings, the use of this cap, alone or in combination with the respondents' preparations, will not accomplish the results claimed and the cap has no therapeutic value in treating such conditions in excess of cleansing the hair and scalp and temporarily removing accumulated dandruff scales.

The Commission order directs that the respondents cease disseminating advertisements containing such representations. (4329)

Walker & Woodward, Inc.—A Casper, Wyo., corporation and four individuals have been ordered to cease and desist from misrepresentation in the sale of "George's Compound," a medicinal preparation. The respondents are Walker & Woodward, Inc., J. Lawrence Walker and T. Kyle Woodward, trading as Walker & Woodward, and Nick A. George and John G. Brown.

Commission findings are that the respondents disseminated periodical, radio and other advertisements representing that "George's Compound" has substantial therapeutic value in the treatment of all ailments and conditions except cancer and diabetes, and that it is a cure, remedy and effective treatment for some 60 specified diseases or conditions.

According to findings, the respondents' preparation possesses no therapeutic properties except that its use for rheumatism, colds, influenza, tonsillitis, arthritis, muscular aches and pains, sore throat, headache, fever or backache results in a temporary palliation of attendant pain or discomfort due to its analgesic properties, and that stomach, digestive and gastric disturbances may be benefited when these conditions are associated with an insufficient flow of gastric juices.

The Commission order directs the respondents to cease and desist from disseminating advertisements which represent that their preparation constitutes a cure or remedy for the specified ailments or conditions, or possesses any therapeutic value in the treatment of any ailment in excess of affording a stimulus to the flow of gastric juice, a mild stimulus to the appetite, and a temporary and palliative relief from aches and pains. (4194)
THE WEEK IN WASHINGTON

Facing criminal prosecution in a Federal Court by the Department of Justice as an alternative, ASCAP's Board of Director's last night signed a Consent Decree. (p. 157)

C. E. Hooper reports that there has been no noticeable increase or decrease in the size of the radio audience as a result of the absence of ASCAP music in the majority of radio stations. Other BMI news, including the acquisition of new catalogs and the announcement of the formation of a special "Public Domain Lyrics Department," is found on pp. 158-161.

Samuel Rosenbaum, IRNA Chairman, answers Senator Wheeler's attack on radio commentators. (p. 161)

Asserting that he did not want to "promise" Chairman Fly of the FCC this week declared that the final monopoly report may be expected shortly, possibly next week. (p. 161)

A full report of the Fourth Annual Broadcast Engineering Conference, by Lynne Smeby, NAB Director of Engineering, including discussions of television, reallocation, FM coverage, is found on p. 162.

A new compilation of pending Federal and State legislation is given by NAB Counsel, Russel Place. (p. 165)

The Federal Communications Commission reports the operation of 881 stations as of February 1, 1941. (p. 167)

Reports from all over the country indicate industry-wide action in NAB's effort to bring about an orderly procedure for Radio's "Movin' Day." (p. 167)

Members will be particularly interested in the Appendix of this week's Report, showing the measurement of broadcast advertising volume by units and classification for November, which has just been compiled by the Research Department. This valuable information is of particular importance in control of sales efforts and in production of new business. Research Director Paul Peter shows managers how this information can mean more and better time sales. (p. 177)

Many stations, included in the itinerary have an opportunity to present the outstanding impressions of radio, magazine, and newsreel executives, who are being taken on an aerial tour to inspect Army camps and National Defense preparation. Ed Kirby as Civilian Radio Advisor to the War Department, will be on hand to assist stations in lining up broadcasts. The complete itinerary of this trip is on p. 164.

ASCAP CAPITULATES

Facing criminal prosecution in a Federal Court by the Department of Justice as an alternative, ASCAP's Board of Directors last night signed a Consent Decree.

While the details of the decree were still being negotiated at press time, Neville Miller declared "It will be necessary to make a careful study of the Consent Decree to ascertain its full effects upon the present music situation. We hope that its effect will be to create and maintain an open and competitive market for music. Such a competitive market is, in our opinion, necessary if American creative genius is to have freedom of opportunity."

Meanwhile a general meeting of ASCAP's membership was to be held last (Thursday) night at the Hotel Astor in New York City for the purpose of presenting the Decree for ratification.

After the signing of the Decree ASCAP issued the following statement:

ASCAP's Statement

The Board of Directors of the American Society of Composers, Authors and Publishers, at a special meeting held this (Wednesday) morning, unanimously approved and authorized signature by the Society of a Consent Decree, the terms of which were negotiated in its behalf with the Department of Justice by Special Counsel, Charles Poletti, and Milton Diamond, associated with General Counsel, Schwartz and Frohlich of the Society.

This action marks the termination of litigation between the Department of Justice and the Society under the Anti-Trust Laws which has been in and out of the courts since 1934.

The Decree as proposed by Assistant Attorney General Thurman Arnold, and accepted by ASCAP, modifies previous policies of the organization in respect to licensing the public performance for profit by broadcasters and others of copyrighted musical works, by providing that ASCAP may not as heretofore be an exclusive agent in behalf of its members, but that the members individually may deal directly with users if that is their preference. This privilege is, however, conditioned upon the member notifying ASCAP of the intention to deal directly, and also that any fees charged by the member shall be paid into ASCAP by the user and distributed according to ASCAP's royalty distributing formulae. The Decree further provides that individual members of ASCAP may not appoint any other agency than ASCAP for the re-sale of rights, and specifically prohibits them from appointing Broadcast Music, Inc., as an agent in that regard.

The Decree also stipulates that any person who regularly prac-

(Continued on page 158)
"ASCAP CAPITULATES

(Continued from page 157)

ASCAP capitulates

The profession of songwriting shall be eligible to membership in ASCAP upon the production and public publication of one song, instead of five compositions as has heretofore been the minimum requirement for eligibility to membership in the Society.

Another provision of the Decree stipulates that the Board of Directors of the ASCAP shall be elected by the general membership as rapidly as the terms of present directorships expire. The practice heretofore has been for the Board of Directors itself to elect successors to vacancies.

Another provision of the Decree provides for a broadcaster at his option to have the privilege of securing a license to utilize the ASCAP repertoire upon either a blanket basis as has heretofore prevailed, or a "per program" basis, in either case paying fees only in respect of such programs as make use of ASCAP music.

In the case of network broadcasts, the Decree puts into effect a provision which has been a main source of contention of the existing controversy; that is, that as to such broadcasts the entire fee for the use of copyrighted music must be paid by the originating station, and no fee whatever paid by the interconnected stations.

The Decree is to become effective ninety days after it is approved by the U. S. District Court for the Southern District of New York.

Commenting upon the Decree, Gene Buck, President of the Society, said:

"ASCAP accepts this Decree in a completely conciliatory and cheerful spirit, and in utter good faith, and with every intention of meticulously fulfilling its every condition. We are entirely willing to accept its guidance as to our future policies, and we feel that while we have been in complete disagreement with the Department of Justice as to the alleged illegality of any phase of our operations or policies which have for more than a quarter of a century remained unchanged, we nevertheless believe that on the whole the Decree's conditions will clarify the whole atmosphere between ASCAP and the broadcasters in connection with the proposed new licensing agreement."

"It is our sincere hope that the broadcasters, who have heretofore consistently refused to negotiate or discuss their differences with us, will now decide to do so, to the end that the American public may be no longer deprived of its opportunity to hear on radio the musical works of the foremost composers of the United States and Europe."

"A general meeting of ASCAP's membership will be held at the Astor Hotel on Thursday evening for the purpose of presenting the Decree for their ratification."

NO SIGNIFICANT CHANGE IN RADIO AUDIENCES

The most recent surveys both by the C. E. Hooper organization and by the Cooperative Analysis of Broadcasting (Crossley) show that there has been no noticeable increase or decrease in the size of the radio audiences and no marked change in listening habits as a result of the absence of ASCAP music from the majority of radio stations.

The latest regular C. A. B. Report is made the subject of a feature article in the current issue of Variety, which lists various musical programs showing gain and those showing loss. There is a danger in drawing conclusions from slight variations in the showing of programs because under the method by which any survey is conducted there is no room for a certain amount of fluctuation without any actual change at all in the situation which is being investigated by the survey—in other words a variation which is regarded as a normal statistical fluctuation, having no significance. In the last C. A. B. Report only one evening commercial of an hour's length showed a change greater than this normal statistical allowance. That was Fred Allen's hour which showed a gain. Out of 80 half-hour evening programs only 17 showed a change greater than the margin allowed for purely statistical variations. Of these, 8 were musical shows or variety shows using music as a secondary appeal. Three of these showed gains. Of the 5 which showed losses, 2 were musical quizzes which showed a change in which is probably to be accounted for by the fact that quiz programs of all kinds showed a drop. That leaves the programs which might be assumed to be affected by music showing exactly a 50-50 stand.

A similar conclusion is reached by the survey made by the Hooper organization making a comparison between December and February.
PUBLIC BACKS THE BROADCASTERS

The February 17th issue of Tap & Tavern carries the following item:

Philadelphians sympathize with the broadcasters in their current battle with ASCAP, the Front Door Ballot Box, conducted by Dan E. Clark, II, of the Evening Public Ledger, found in a survey recently completed in that city.

In an effort to find out what popular sentiment is in a dispute which has kept all ASCAP music off the programs of the major radio networks since January 1, the Ballot Box polled a typical cross-section of Philadelphia's citizens.

Among other things, it discovered:

First. That practically one-third of the city (32 percent) is unaware that any dispute is going on, and

Second. That although a majority thinks that the barring of ASCAP tunes has lessened somewhat their enjoyment of the radio, they are, nevertheless, opposed to ASCAP and would like to see the radio stations win out.

Of those who had heard of the ASCAP dispute, the Front Door Ballot Box asked whom they favored, ASCAP or the radio stations. Results showed:

<table>
<thead>
<tr>
<th></th>
<th>25 percent</th>
<th>42 percent</th>
<th>18 percent</th>

CONTINUITY DEPARTMENT VALUED BY MEMBER STATIONS

BMI's Continuity Department, which prepares introductions which announcers may use in presenting BMI numbers and plans scripts for programs of BMI's new music and standard arrangements, has been receiving expressions of approval and appreciation. An interesting example is a letter from Station KMYC at Marysville, California, saying:

"We have found the Continuity Department very helpful. You might also be interested in knowing that the first series of Gilbert & Sullivan scripts were used to close a long term contract with an account we had been seeking for several months."

The Continuity Department wishes all member stations to know that it is glad to cooperate with them in building continuities for specific purposes, commercial and otherwise. So many BMI stations have found the BMI scripts to be of great use with respect to spot announcements and partial commercial sponsorships that the department is anxious that all stations should understand the nature of this service which BMI is offering them.

BMI GETS NEW CATALOGUES

Broadcast Music, Inc. announces the acquisition of a catalogue of selections of Golden Gate Publications, consisting chiefly of Hawaiian numbers. The new music came to BMI in accordance with the terms of an agreement with the Peer International Corporation. Among the many songs are: Dusky Hula Eyes, It Happened On the Beach at Waikiki, Moon O’er Hawaii, Love Song of Old Hawaii, and Sweet Hawaiian Maid.

BMI has also acquired the performing rights in the catalogue of the Stevens Music Company, publishers of the currently popular song, I Do, Do you.

SPECIAL PUBLIC DOMAIN LYRICS DEPARTMENT FORMED

Continuing to expand its activities in all phases of music production, Broadcast Music, Inc., announced the formation of a special Public Domain lyrics department, headed by Irving Weill. The new department, which is entirely separate from BMI's lyric department for popular songs, was created to meet the demand of performing artists and BMI stations for lyrics to use with BMI's Orchestral Library of Public Domain selections. Because ASCAP-owned copyrights of most P.D. numbers cover words as well as melody, BMI arrangements of public domain selections are being supplied with lyrics from either original source, or new copyrighted words written by free-lance writers. To date, lyrics for some 75 numbers, including those for Melody In F, Dark Eyes and Martha, have been written and hundreds are scheduled for future publication.

Mr. Weill joined BMI after some 20 years of experience in the music and radio field. He was for several years connected with M. Witmark & Sons before leaving the music business for work in radio. Mr. Weill has also been associated with the Columbia Broadcasting System as musical coach and director and prior to his affiliation with BMI did free lance musical work for the National Broadcasting Company and other radio stations in New York City.

BMI TUNES IN NEW ROOSEVELT PICTURE

BMI tunes, Hi, Si!, What's Cookin', Broadway Calablero, and Peter Piper, will be featured in James Roosevelt's forthcoming production, Pot Of Gold, which stars James Stewart and Paulette Goddard and Horace Heidt's orchestra. The tunes are by Lew Forbes and Henry Russel. A double set of lyrics will be issued for Hi, Si!, What's Cookin'—one for the rhythm or hot bands, and the other for straight performance. Release to BMI member stations some time next month is scheduled.

CONTRACTS SIGNED FOR BMI SONG SHEETS

Lyrics of BMI songs are to appear in two song sheets to be issued monthly—one 16-page sheet to sell for five cents and one 32-page sheet to sell for ten cents. BMI has just signed contracts with the D. S. Publishing Company, Inc., and with the Charlton Publishing Cor-

February 21, 1941 — 159
poration granting these companies the right to use BMI lyrics in illustrated song sheets which will be devoted exclusively to songs published and licensed by BMI. Subject to cancellation provisions, the contracts run to March 31, 1944.

BMI FEATURE TUNES
February 24-March 3

1. HIGH ON A WINDY HILL
2. YOU WALK BY
3. HERE’S MY HEART
4. WHERE’S THE CAPTAIN’S HAT
5. IT ALL COMES BACK TO ME NOW
6. MAY I NEVER LOVE AGAIN
7. I CAN’T REMEMBER TO FORGET
8. WISE OLD OWL
9. ACCIDENT’LY ON PURPOSE
10. KEEP AN EYE ON YOUR HEART
11. BECAUSE OF YOU
12. ALL I DESIRE
13. WALKIN’ BY THE RIVER
14. LET’S DREAM THIS ONE OUT
15. LITTLE SLEEPYHEAD
16. TALKING TO THE WIND
17. BREAKFAST FOR TWO
18. I LOOK AT YOU
19. SHADOWS IN THE NIGHT
20. STONE’S THROW FROM HEAVEN

Billboard this week restores its list of 20 songs with most radio plugs, announcing that it does in response to numerous requests. All numbers listed are, of course, covered by the BMI license. The record gives gratifying evidence of an increased diversification in radio programs. Of the 20 songs 4 come from the catalogue of the Southern Publishing Company, 3 from E. B. Marks, and 1 from the Stevens Music Company. The rest are BMI’s own publications.

The 10 sheet music best sellers last week were all numbers published or licensed by BMI. And again 8 of the 10 leading records were also BMI numbers. In Billboard’s record of the biggest money makers in the coin machines, 4 of the 7 were BMI numbers, including There I Go, leading the list and appearing for the eleventh week. The Variety lists, obviously made up from very different reports, showed 5 of the 10 leaders carrying the BMI flag including Frenesi and I Hear a Rhapsody, which stand at numbers 1 and 2 respectively.

BMI BRINGS GEMS OF JAZZ

Hot Jazz is not dead on the airlines, despite the protest of Tin Pan Alley publishers that the ASCAP-Radio situation would kill swing. Prime platters of jazz evergreens that have been marked o.k. for broadcasting range from the new Hit Parade favorite There’ll Be Some Changes Made, first made famous by Tesch and the Chicagoans, down to Astoria Strut, recorded in New Orleans in 1929 by a small combination lead by trumpeter Lee Collins.

Among the outstanding jazz jam tunes which radio stations and orchestras throughout the country have available for performance are Cherry, Rockin’ Chair, Georgia On My Mind, Lazy River, You Can Depend On Me, Jazz Me Blues, Shim-Me-Sha-Wabble and Song Of The Islands.

Of special interest to collectors and musicians is the fact that many compositions recorded by jazz combinations and never heard on the air before are now made available through BMI. Foremost among these selections are the classic Minor Drag, recorded by Fats Waller in 1930, and Pleasin’ Paul, recorded by the great Luis Russel band with Trumpeter Henry (Red) Allen, Jr., and Trombonist J. C. Higginbottam.

Other tunes in the BMI books are Moten Swing and Moten Stomp, two of Bennie Moten’s outstanding sides; King Oliver’s Mule Face Blues, Sugar Foot Stomp, recorded by Louis Armstrong on the old Okeh Label; Balling the Jack, Crescent City favorite Mary Lou Williams’, Froggy Bottom; and Didn’t He Ramble, the old New Orleans marching tune, whose stirring melody has been swung along Perdido and Rampart Streets by every New Orleans jazzman from Buddy Bolden on.

BMI’S ONE IN A THOUSAND

More than 1,000 manuscripts from hopeful tunesmiths pour into the offices of BMI each day, and in this mountain of music the general average of material suitable for publication and radio performance is about one in one thousand. Examination of the fifty most recent BMI publications, representing the pick of 50,000 submitted manuscripts, reveals that they have been created by many composers with diverse occupations, including nine profession musicians, among them Horace Heidt, the band leader; one newspaper man now drilling in the ranks of the selectees; and the American Household Poet, Edgar Guest, who has written At Home, When Lights Are Low, in collaboration with Maurice Wetzel, Chicago radio program director. Another of BMI’s new songs, Penthouse On The Palisades, was written by a Philadelphia dentist and a postoffice clerk.

The desire of the office worker for the romance of the wide-open spaces is reflected in the novelty western song Little Hobby Horse, written by a mid-western bookkeeper, and published last month by BMI.

Milton Rettenberg, Chief Music Editor, offers the following advice:
"I love you may be a welcome sentence to millions of American girls, but it has proven to be the stumbling block to more than one hopeful songwriter. Probably the greatest fault of the amateur songsmith is the lack of freshness of his work. Hundreds of songs on the 'love and you' theme are received by BMI each day, but it is the song with the new twist or an original approach that is accepted.

"Originality of the expression of a familiar idea in a different way is one of the major points to be remembered in the creation of a song and an ingenious title or phrase has been responsible for the success of many hits. Professional songwriters are always on the alert for some new phrase around which to build a song. amateurs, on the other hand, are content to write what they consider a good song without realizing that the same thing has been used in a thousand other songs."

ROOKIE FATHERS A FEATHER

Walter Brevig of the New York Herald Tribune staff, composer of the new BMI tune She Wears A Feather In Her Hat, and Miles Apart, which was number six on the Hit Parade in February 1937, now carries the address Private Walter Brevig, G. Company, 1222nd Reception Center, Camp Upton, N. Y.

Cyrano said, "I have kept my plume" and Kay Vincent, Fashion Editor of the Herald Tribune, has kept hers despite Hitler. Thereon hangs the song She Wears A Feather In Her Hat which has been picked up by BMI. Brevig will soon hear it coming over the air at Camp Upton.

"When you see a gal wearing a feather in her hat," says Brevig, "while the talk of the country centers around lease-and-lend bills, crisis in the Balkans and the invasion of England, you are impressed. It is not too hard to get a tune."

Brevig comes from a musical family. He was born in Oslo, Norway, when his parents were on a visit there and has lived on McCord Avenue in Merritt, Long Island, since he was six. A cousin in Norway is director of a large glee club and McCord Avenue is named after Nancy McCord, Broadway musical star. Brevig began on the Tribune as a copy boy and recently was promoted to the telegraph desk. He hopes to write some tunes around army life, but so far, he says, "My only taste of military life is a two-mile hike through the rain."

ROSENBAUM ANSWERS WHEELER'S CHARGE

In a statement released over the weekend, Samuel R. Rosenbaum, Chairman of the Independent Network Affiliates, answered the criticisms of Senator Wheeler concerning the alleged bias of radio commentators. Mr. Rosenbaum's statement follows:

"Senator Wheeler is quoted as stating that he questioned whether the affiliated stations have been as careful as the network originating stations to give equal time to both sides of every public question, particularly on the Lend-Lease Bill and American neutrality.

"Speaking for the affiliates, I am quite positive Senator Wheeler is not correctly informed. There is no class of business men in the country more aware of public service obligation than the owners and operators of the network-affiliated stations. We are at all times eager to bring to our listeners views on both sides of current controversial questions.

"Apart from the legal requirement, it makes for vital and thought-provoking programs and that increases our listening audience, something every station desires.

"We have no editorial policies. We do not color our news. It may be that there is an overwhelming current of public opinion running one way or another, but we do not create it. Each listener draws his own conclusion.

"It would be a calamity for American freedom if it were otherwise. We want to preserve freedom in radio from unwarranted censorship or coercion.

"If Senator Wheeler believes that individual stations have knowingly departed from this standard, our group will be the first to see to it that it be maintained."

Monopoly Report Soon—Fly

Monopoly report is in the works FCC Chairman James Lawrence Fly told a press conference early this week. Answering a specific question the Chairman said that it is possible that the Commission might receive a draft of the monopoly report from the Legal Department this week. However, Mr. Fly said that he did not want to "promise" this.

The Chairman told newsmen that the draft might be considered by the Commission next week. He stated that the general scope and extent of the Commission's report has already been discussed by the Commission and the Legal Department in outline form. "In other words," Mr. Fly said, "the Commission knows what it is going to get."

Chairman Fly told the correspondents that the Commission will take time on the report and "be sure to do the job right." He said that "a thoroughgoing and convincing Commission report is necessary."

Chairman Fly was asked regarding complaints received by the Commission in connection with news commentators. Mr. Fly said that he did not believe that a great many such complaints are received. He contended that the FCC in its administration of the Communications Act must see "that the avenues of free speech be kept open."
parts of the country were in attendance. All the meet-
inggs were presided over by Dr. W. L. Everitt, Director of the Conference.

F. V. Hunt of Harvard University, speaking on the subject “Sound Reproduction From Recordings,” said that it was his opinion that a frequency range up to 15,000 cycles could be attained on transcriptions. He said, however, that the development of such transcriptions would probably be expensive.

Television

The subject of “Television” was covered during five Conference periods. The first period, entitled “Television Standards,” was conducted by W. R. G. Baker, Chairman of the National Television System Committee. Mr. Baker was assisted by the chairmen or their alternates of the nine NTSC panels and each one explained the part of the standards developed by his committee. Peter C. Goldmark, of the Columbia Broadcasting System, presented a paper entitled “Color Television” in which he illustrated with slides the work he has carried on in developing the CBS Color Television System. Harry Sadenwater of the RCA Manufacturing Company discussed the status of television. It was Mr. Sadenwater’s belief that television can develop into the greatest entertaining and advertising medium we have ever known. Mr. Sadenwater pointed out the possibility that if television were allowed to grow on a normal basis that it could become a big factor in National Recovery at the end of the present crisis the same as Sound Broadcasting aided the nation in recovering after the World War.

The subject “Studio Acoustics” was discussed by Paul J. Washburn of Johns-Manville Corporation. He went into the factors involved in acoustically treating broadcasting studios.

Polyphase Experiment

The Polyphase Broadcasting Experiment carried on at WHO was described by Paul Loyet, technical director of the Central Broadcasting Company. He said that there was a 50% saving in the modulator capacity of the transmitter and that the scheme probably was only feasible for high-powered stations.

Re-Allocation

The re-allocation and high frequency broadcasting were the principal topics during the “General Discussion and Question Box,” conducted by Andrew D. Ring, assistant chief engineer of the FCC with Lynne C. Smeby of NAB as chairman. Mr. Ring spent considerable time discussing the re-allocation problems and covered the various items in detail, using FCC release number 47182 as a guide. Mr. Ring told the engineers that the FCC had carefully investigated the obtaining of crystals before ordering the re-allocation into effect on such short notice.

He said that the FCC had been assured by the manufacturers that they would be able to produce the required crystals. Upon discussing the NAB request that the regular experimental period of 1 to 6 a. m. be extended to midnight to 7 a. m., Mr. Ring asked for a vote among the engineers present to see if they thought this would be desirable. A unanimous vote was registered by all of the engineers in support of the request. The NAB requested that this special authority be given until March 30. In discussing FM rules and regulations, Mr. Ring said that the FCC was studying modifications of its coverage requirements for commercial operation.

Recent developments in Speech Input Systems was discussed by C. M. Lewis and J. D. Colvin of the RCA. They discussed the additional problems involved in extending the frequency range of audio facilities from 10,000 to 15,000 cycles.

H. F. Olson of the Radio Corporation of America, spoke on the subject “Loud Speakers.” Mr. Olson discussed the various factors involved in building loud speakers with a satisfactorily low distortion.

The members of the “Round Table on Receivers” were J. Kelly Johnson of the Hazeltine Corporation, E. B. Passow of the Zenith Radio Corporation and W. L. Dunn of the Belmont Corporation. Receiving sets were discussed in light of how they are correlated with the radio transmitters in order to form the complete broadcasting system. This subject became so interesting that an additional informal session was held on the subject.

The first paper on High Frequency Broadcasting was presented by Edwin H. Armstrong of Columbia University. The chief proponent of FM discussed the status of frequency modulation.

FM COVERAGE

Stuart Bailey of Jansky & Bailey discussed the subject “FM Allocation and Coverage.” He discussed the FCC procedure for determining the coverage FM stations should have under various conditions. He pointed out that it was sometimes necessary to modify an FM application more than once before the proper coverage could be arrived at.

One of the most interesting papers of the conference was that presented by Harvey Fletcher of the Bell Telephone Laboratories entitled “Hearing the Determining Factor for High Fidelity.” Mr. Fletcher said that the hearing of over two million people was tested at the San Francisco and the New York World’s Fairs. He discussed the tone and volume range of various music and set the limits for a perfect system. He then showed how these ideal conditions could be compromised in order to meet practical considerations and still render a high fidelity service to the listener. Mr. Fletcher discussed Binaural Transmission and described a series of tests made, using
Binaural and Diotic transmission. The Diotic system used had a frequency characteristic up to 15,000 cycles. A low pass cut-off filter was used on the Binaural system. The following table lists the low-pass cut-off frequency of the Binaural system and the percentage of the observers preferring the quality from the Binaural system as against the percent who preferred the 15,000 cycle Diotic system.

<table>
<thead>
<tr>
<th>Low-pass cut off</th>
<th>Binaural Percent</th>
<th>Diotic Percent</th>

<td>50</td>
<td>50</td>
</tr>
<tr>
<td>2850 &quot;</td>
<td>42</td>
<td>58</td>
</tr>
</tbody>
</table>

Mr. Fletcher continued that more extensive tests on this subject were needed. He felt that there is a great possibility of improvement in using a Binaural system of two 7,500-cycle channels as against a single channel of 15,000 cycles. He explained the effects produced on the ear by various sounds and said that there was very little to be gained in going above 8,000 cycles even when using one channel. Mr. Fletcher explained another experiment conducted by the Bell Laboratories. He said that a number of observers were asked to give their preference between a system cutting off at 5,000 cycles and another cutting off at 8,000. There was a preference of 20 to 1 in favor of the wider band. The same group was then subjected to a test between an 8,000 and a 15,000 cycle system. The votes between these two conditions were practically even.

M. L. Levy of the Stromberg Carlson Company discussed FM receivers. Mr. Levy covered the various design features involved in producing FM receivers.

**Transmission Lines**

"UHF Antennas and Transmission Lines" was the subject of the presentation made by Andrew Alford of the Mackay Radio and Telegraph Company. Mr. Alford discussed in particular the turnstile antenna invented by Dr. Brown and the horizontal ring antenna invented by himself. He also discussed the various methods of feeding UHF antennas. He pointed out that a coaxial transmission line could be unbalanced as much as three to one without introducing serious additional losses provided the line in the first place was an efficient one. He also pointed out that open transmission lines have much lower loss for the same amount of copper used provided the line is balanced. He showed that the radiation losses on a properly balanced open line are, for all practical purposes, negligible in comparison to the copper losses. Mr. Alford also pointed out that open lines have mechanical problems which are not present in coaxial lines such as sleet forming on the conductors, thereby changing characteristics.

Raymond F. Guy, National Broadcasting Company, discussed the subject "FM Field Tests." He described the elaborate tests made by NBC, comparing amplitude modulation, frequency modulation with a deviation of 15 k.c. and FM with a 75 k.c. deviation. Mr. Guy played a set of test records showing the threshold effect with various deviations.

Kenneth A. Norton of the FCC Technical Information Department discussed UHF transmission. Mr. Norton showed how the atmosphere and ground conditions effect radio transmission with particular emphasis on the UHF spectrum. He also outlined the theory involved in reflection from the Ionosphere.

Mr. E. K. Jett, chief engineer of the FCC, was scheduled to talk on the subject "Communication and National Defense" on Tuesday night. Mr. Jett was not able to attend the conference because of an attack of flu and his place was taken by Gerald C. Gross, chief of the International Section of the FCC. Mr. Gross' talk covered the organization and functions of the Defense Communications Board. He pointed out that communication was of vital concern in our national defense.

Tuesday night, February 18, the conference was addressed by Mr. Homer Dudley on the subject "The Vocoder or Remaking Speech Electrically." Mr. Dudley demonstrated with the Vocoder the various elements involved in speech. He also showed how music could be remade from the words recited in a monotone.

The subjects of the conference during the first week and up through Wednesday of the second week have been covered. The balance of the program to be given on Thursday and Friday will be outlined in next week's NAB Reports.

**COMPLETE NTSC REPORTS AVAILABLE FOR SUBSCRIPTION**

Notice from Bond Geddas, Executive Vice President of RMA and Trustee of NTSC, advises that the complete reports of the proceedings, including all standards and technical data, of the National Television System Committee which were presented January 27 to the FCC, are available for subscription. The reports of the NTSC main committee and its nine panels comprise 2,000 pages in 10 bound volumes and include, in addition to the recommendations of proposed television broadcasting transmission standards, the detailed record of the meetings and discussions of the NTSC main committee and all panels. This includes the wide range of technical papers, reports of studies, tests, investigations and demonstrations, bibliographies and correspondence developed in the minutes of the work by the entire NTSC membership, which totaled 168 experts and comprise some 40 organizations.

The 10 volumes of the NTSC reports comprise a most significant contribution yet made to the literature of
television, with the vast amount of material which has been developed.

A few sets of the complete reports of 10 volumes are available at cost, by subscription, and they are of especial interest to those who will be concerned in the public hearing ordered by the FCC on television, scheduled for March 20. Subscription orders at $250 for each complete set and check should be sent to Mr. Bond Geddes, Trustee, National Television System Committee, c/o Radio Manufacturers Association, 1317 F Street, N. W., Washington, D. C.

NOTICE TO ALL STANDARD BROADCAST LICENSEES

Supplementing the FCC’s announcement concerning the North American Regional Broadcasting Agreement, all standard broadcast stations are permitted to test between 12 midnight and 7 a.m., local standard time, provided the operation between 12 midnight and 1 a.m. is restricted to unmodulated carrier only and precautions are taken to avoid interference to stations maintaining a regular schedule during the period from 12 midnight to 1 a.m. local standard time.

It is hoped that all broadcast licensees will cooperate in enabling adjustments to be made properly on the new frequencies. In cases where interference may be caused to regular operation, but program schedule has no particular or unusual significance, it is requested that such licensees cooperate in making the testing possible.

All testing should be done on a dummy antenna when feasible. Where no dummy antenna is available, the low power stages should be tuned completely before the last power stage is tuned.

It has been suggested that stations on local channels could check their frequency by observing the heterodyne note between their station and other stations on the channels at the outskirts of the service area. If it is found that the heterodyne note is in the order of a few cycles with the majority of the signals on the channels, it is reasonable to believe that the station is within the required tolerance of the assigned frequency. This method of checking should be used only for preliminary checking.

The monitoring schedule from March 10 to 15 has been cancelled. Monitoring schedule for the month of April should be observed at the same time as now scheduled.

Any broadcast licensee experiencing any particular difficulty which the Commission may be able to assist in resolving should advise the Commission of the facts promptly.

ARMY AERIAL TOUR OFFERS PROGRAM POSSIBILITIES

A group of well-known radio, magazine and newsreel executives have been invited by the War Department to make an aerial tour of inspection of Army camps and activities next week. Under the direction of Lieutenant Colonel Frank A. Allen Jr., chief, Pictorial and Radio Branch, the Bureau of Public Relations, the group will arrive at Dayton, Ohio, on the morning of February 27. Ed Kirby, NAB Director of Public Relations, on leave of absence as Civilian Radio Advisor to the War Department for radio, will be in the party.

To facilitate those stations who desire to broadcast the impressions of National Defense preparations of the prominent people on the tour, the itinerary and tentative arrival and departure schedule is given below.

To arrange for broadcasts, stations should contact the commanding officers at the posts concerned. Mr. Kirby will be available to assist the stations in completing preparations for any broadcasts upon arrival.

NEW REMOTE RECORD TOPS ALL—2,563 MILES

Business of reporting "record," single station, long-distance remote pick-ups continues. Latest record is for 2563 miles—Honolulu to Fresno, Cal.

Manager Clyde F. Coombs, claims premier honors for KARM, Fresno. His claim is based on the New Year's Day broadcast, from Honolulu, of the game between the Fresno State College Bulldogs and the Roaring Rainbows of Hawaii. Says Mr. Coombs:

"We sent Dick Wegener, our sportscaster, to Hawaii with the Bulldogs to cover the Pineapple Bowl Classic. Dick not only broadcast this game, but also presented a fifteen-minute greeting program, exclusively for KARM listeners, on Christmas night.

"He used equipment he took along with him, as well as some furnished by KARM's sister CBS station, KGMB. But neither of the broadcasts were released in the Islands. RCA short-waved the broadcasts across the Pacific to San Francisco. Telephone lines from there to Fresno completed the transmission facilities.

"It's 2563 miles from Honolulu to Fresno, and only 1627 miles from Peoria to Los Angeles, the last 'record' printed in NAB Reports."

LISTENERS LIKE UTILITY SHOW

Broadcast stations continue to deliver for utility companies. Proof is the case of WROK, Rockford, Ill., and the Central Illinois Electric and Gas Company. The program is broadcast six times per week for a total of one and one half hours. Despite the fact that the original contract had a thirteen week cancellation clause, three 13-week periods have gone by with no cancellation in sight.

Recently, the utility's monthly mailing piece, "Home Fires," which goes to 30,000 Rockford homes each month, contained a story on the company's WROK program, "Town Crier." It was written without the station's knowledge. Tone of the article indicates the company's great satisfaction with the program.

The "Town Crier" gives publicity to meetings and special programs of religious, school, fraternal, civic and social organizations. It frequently contributes to public service by locating articles of value which have been lost and even finding pets which have strayed. One writer was quoted as saying the program was a "civic necessity."

According to Bill Traum, WROK promotion director, NAB's utility survey of January 16, 1940, was of assistance in getting the utility on the air.

SAM HENRY'S NEW JOB

Samuel J. Henry, who resigned as supervisor of the NAB Bureau of Radio Advertising, effective February 1, has become radio director of Vincent Tutching and Associates with offices in Washington, D. C.

ED CRAIG'S TRIBUTE TO RADIO AT WMC CEREMONY

Tribute to the American System of Broadcasting and a plea that its riches be used to maintain democracy, not destroy it, was made by Edwin W. Craig, WSM, Nashville, and NAB District 6 director, on the recent dedication program of WMC studios, Memphis.

"The American System of Broadcasting, the finest and freest to be found in the world," said Mr. Craig, "is based squarely on the American principles of democracy. In comparatively recent years this new force has come into our possession. Its full possibilities and potentialities are yet unknown, but we all know that it has an educational force. As a social force it has the power to remake our national life; and, conversely, wrongly used, to turn forces capable of destroying our way of life and our civilization. Certainly it behooves us to give serious thought to radio in all its phases that it may be used here in America to promote the greatest good—that its power not be abused lest we find that its riches have been squandered and we, as a nation, have become the poorer.

"WMC, Memphis, Tennessee, has served to make American radio better radio, and this occasion marks another milestone in its record of faithful public service. My hearty congratulations, my sincere good wishes!"

Legislation

FEDERAL

HOUSE

H. R. 3331 (Kramer, D-Calif.) COPYRIGHT—To amend section 8 of the Copyright Act of March 4, 1909, as amended, so as to preserve the rights of authors during the present emergency, and for other purposes. Referred to Committee on Patents.

H. R. 3456 (Kennedy, D-N. Y.) To provide the public, sponsors of broadcasting programs, broadcasting stations, performers, and all persons interested in radio from being deprived of the enjoyment by means of radio broadcast of music. Referred to Committee on Interstate and Foreign Commerce.

SENATE

S. 864 (Bone, D-Wash.) COPYRIGHT—To amend section 8 of the Act entitled "An Act to amend and consolidate the Acts respecting copyright", approved March 4, 1909, as amended, and for other purposes. Referred to Committee on Patents.

S. 918 (Hatch, D-N. M., and Van Nuys, D-Ind.) To provide for the more economical, expeditious, and just settlement of disputes with the United States, and for other purposes. Referred to Committee on Judicalty.

STATE

ARKANSAS:

H. 362 (Gates) BROADCASTING—LEGISLATIVE ACTIVITIES—To create a Board of Public Information, to provide for broadcast of proceedings of both House and Senate of General Assembly. Referred to Committee on Elections.

H. 2409 (Same as S. 1041) LIBEL—Concerning breach of the peace, intimidation and libel. Referred to Committee on Judiciary.

H. 2424 (Same as S. 1056) CORRUPT PRACTICES—Providing for changes in statutes referring to corrupt practices—sponsor of advertising, in printed form, on radio or in movies must be disclosed. Referred to Committee on Judiciary.

H. 2453 (Same as S. 1085) COPYRIGHTED MUSIC—Concerning copyrighted music, providing that no one other than true or original composer shall issue licenses or agreements for public rendition of copyrighted music unless licensed by secretary of state—licensors shall file organization papers with secretary of state—penalties for violation. Referred to Committee on Judiciary.

S. 1041 (Gellin) LIBEL—Concerning breach of the peace, intimidation and libel. Referred to Committee on Judiciary.

S. 1056 (Coles) CORRUPT PRACTICES—Amending the provisions of Chapter 39 of the General Statutes, providing for changes in statutes referring to corrupt practices—sponsor of advertising in printed form, on radio, or in movies must be disclosed. Referred to Committee on Judiciary.

S. 1085 (Sullivan)—COPYRIGHTED LICENSEES—Concerning copyrighted music, providing that no person, firm corporation or association, other than true or original composer, shall issue licenses or agreements for public rendition of copyrighted music unless licensed by secretary of state. Referred to Committee on Judiciary.

S. 1196 (Murphy) DENTISTS—ADVERTISING—Amending Section 1014e of the 1939 Supplement to the General Statutes, providing for striking out subdivision twelve thereof referring to advertising by dentists. Referred to Committee on Public Health and Safety.

S. 1207 (Same as H. 1096) EMPLOYMENT AGENCIES—Concerning private employment agencies. Referred to Committee on Judiciary.

S. 2017 (Same as H. 1141) LIBEL—RETRACTION—Concerning actions of slander and libel, providing for no action of slander or libel shall be instituted until the defendant has refused to retract the alleged slanderous or libelous charge. Referred to Committee on Judiciary.

H. 2394 (Same as H. 1635) COPYRIGHTS—MUSICAL COMPOSITIONS—Concerning copyrights and public performing rights in musical compositions and dramatico-musical compositions and repealing all laws in conflict herewith. Referred to Committee on Judiciary.

H. 2491 (Same as H. 1732) SLANDER—LIBEL—Concerning uttering slanderous or libellous remarks against any race or religion, providing for fine or jail sentence. Referred to Committee on Judiciary.

GEORGIA:
H. 281 (Dorsey) SMALL LOANS—To regulate the business of making loans in the amount of $300.00 or less. Referred to Committee on General Judiciary No. 1.

INDIANA:
H. 501 (Korn) COPYRIGHT INCOME TAX—Levies 20 per cent tax on incomes received from selling, licensing or otherwise disposing of performing rights of copyrighted compositions, gives Secretary of State authority to license such business. Referred to Committee on Judiciary B.

MAINE:
H. 676 (Arbonico) DENTISTRY—Relating to the practice of dentistry; provides for annual dental examining law. Referred to Committee on Public Health.

S. 345 (Hildegard) ADVERTISING—To prevent fraudulent advertising. Referred to Committee on Judiciary.

MARYLAND:
H. 277 (Cordes) INSURANCE COMPANIES—ADVERTISING—Providing that it shall be unlawful for any insurance company, association, society, exchange, adviser or other person to publish or broadcast advertisements regarding insurance in unlicensed companies, associations, etc., or persons to solicit insurance business or offer advice on insurance matters. Referred to Committee on Insurance and Loans.

H. 291 (Kopers) RACIAL DISCRIMINATION—To add seven new sections to Article 27 of the Annotated Code of Maryland (1939 Edition), title "Crimes and Punishments", to be under subtitle "Racial or Religious Hatred, Propaganda Inciting", said new sections to be known as Sections 534A to 534G, inclusive, making unlawful any propaganda or acts inciting or tending to incite racial or religious hatred. Referred to Committee on Judiciary.

MINNESOTA:
H. 428 (Mann, et al.) MUSIC—Code to regulate ASCAP and BMI. Referred to Committee on Judiciary.

S. 469 (Mullen) EMPLOYMENT AGENCIES—Relates to licensing and regulating employment agencies. Referred to Committee on Labor.

MISSOURI:
H. 56 (Turner) TRUSTS AND POOLS—Repealing Section 8301, Article 1, Chapter 43, Revised Statutes, 1939, relating to pools, trusts, conspiracies and discriminations; enacting in lieu thereof, Sections 8301 and 8301a.

MONTANA:
H. 168 (Judiciary COMMITTEE) MUSICAL COMPOSITIONS—COPYRIGHTS—Relates to copyrights and public performance of musical compositions. Referred to Committee on Judiciary.

NEW HAMPSHIRE:
H. 278 (Velasheka) PRACTICE OF DENTISTRY—Relating to the practice of dentistry. Referred to Committee on Public Health.

NEW JERSEY:
A. 54 (Herbert) MUSIC—COPYRIGHTS—Regulates monopolistic activities under the guise of copyrights by price-fixing compensations and pools; defines a method whereby copyrighted musical works shall be used; substitutes a “per piece” system of fees. Referred to Committee on Taxation.

NEW MEXICO:
H. 81 (Love) MUSIC TEACHERS—LICENSE—To license music teachers and musical entertainers for hire. Referred to Committee on Educational Institutions.

NEW YORK:
A. 649 (Wright) (Same as S. 455) INSURANCE SERVICE ORGANIZATIONS—Prohibits insurance service organizations from using phrase “supervised by the insurance department of the state of New York” or its equivalent or any part thereof. Referred to Committee on Insurance.

A. 703 (Ehrlich) CHILD LABOR—Prohibits employment of children under 16 years of age in certain enterprises that are dangerous to life, limb or morals and authorizes education boards and districts to issue permits to child for singing, dancing and theatrical exhibition and the making of motion pictures; exhibitions for church, academy or school or in amateur radio program at regular broadcasting station are excepted. Referred to Committee on Education.

S. 598 (Hampton) (Same as A. 703) CHILD LABOR—Prohibits employment of children under 16 years of age in certain enterprises that are dangerous to life, limb or morals and authorizes education boards and districts to issue permits to child for singing, dancing and theatrical exhibition and the making of motion pictures;
exhibitions for church, academy or school or in amateur radio program at regular broadcasting station are excepted. Referred to Committee on Education.

S. 800 (Perry) BROADCASTS—RECORDINGS—Makes it petit larceny for person to sell, lease or license any recording of broadcast obtained without consent in writing of performer or of sponsor of broadcast or of owner of broadcasting station, and provides that records may be seized on warrant and destroyed by court order; broadcasts of lectures on political, educational, religious or civic nature are excepted. Referred to Committee on Codes.

OHIO:

H. 548 (Coughlin) MUSIC BROKERS—LICENSING—To provide franchise taxes on music brokers.

OREGON:

S. 281 (McKenna, et al.) MUSIC PUBLISHERS—MONOPOLY—Prohibits a combination of two or more music publishers as monopoly; publishers to pay five cents copy fee to secretary of state.

SOUTH CAROLINA:

S. 120 (Parler) SMALL LOANS—REGULATION—To define and regulate the business of making loans in the amount of three hundred ($300.00) dollars or less. Referred to Committee on Banking and Insurance.

SOUTH DAKOTA:

H. 286 (Trippler) COPYRIGHTED MUSIC—TAX—Provides for license and franchise tax for the rendition of copyrighted music.

TENNESSEE:

S. 790 (Mahoney) EMPLOYMENT AGENCIES—Regulating public employment agencies.

TEXAS:

H. 377 (Alsop, et al.) RADIO RECEPTION—Making it a misdemeanor, and imposing a fine of not less than one dollar and not more than twenty-five dollars for any person who shall intentionally interfere, obstruct, or willfully keep radio programs from being clearly brought in over radios. Referred to Committee on Criminal Jurisprudence.

WASHINGTON:

H. 264 (Schumann) RADIO DEFAMATORY MATTER—Defines liability of station for broadcasting defamatory matter over radio, or by television. Referred to Committee on Judiciary.

Ray E. Dady, KWK, St. Louis, has accepted an appointment as Legislative Contact man at the Missouri capital. (NAB Reports, p. 32.)

NOTICE TO ATTORNEYS

The FCC has invited the attention of attorneys appearing before it to its rule (Sec. 1.234) concerning the time for filing motions. This rule is designed not merely to afford other parties to the proceedings sufficient time within which to file oppositions to motions prior to the motions hearing date, but to allow sufficient time to the Commission itself for the study of such motions before the hearing thereon. The latter purpose is sometimes overlooked by attorneys, with the result that motions are filed a day or two before the next motions hearing date with the request that they be heard on such date. The Commission realizes that there may be circumstances which may make it impossible to file earlier, in which case the presiding commissioner may waive the rule, but to expedite the orderly discharge of the Commission’s business, such cases should be the exception.

Since there have been a number of inquiries concerning the day of commencement of the five-day period specified in the rule, the Commission also desires to point out that attorneys desiring to have their motions considered on Friday’s Motions Docket should file such motions not later than the preceding Saturday.

EDUCATIONAL PROGRAMS

Hugh B. Wood, professor of education at the University of Oregon, Eugene, Oregon, advises the NAB that he has available for broadcasters a series of inexpensive bulletins dealing with educational programs. Interested members should communicate with Professor Wood.

NAB will be represented at the annual meeting of the American Academy of Political and Social Science by Mr. James Aull, Publicity and News Director of Radio Station KYW, Philadelphia. The appointment was made by Lee B. Wailes, Manager of Broadcasting of the Westinghouse Radio Stations, with which KYW is affiliated.

881 STATIONS

During the month of January, 1941, the Federal Communications Commission issued operating licenses to five stations and granted one permit for the construction of a new station. One operating station and one CP station were deleted. A comparative table by months follows:

JOHN KIRBY?

Anyone desiring information about John Kirby should communicate with Joseph Lang, Secretary-Treasurer, Station WHOM, 29 West 57th Street, New York City.

GEORGE H. BOWLES?

Information about George H. Bowles will be furnished by Frank Katzentine, President of WKAT, Miami Beach, Florida.

Radio Movin’ Day

DANVILLE-LYNCHBURG-ROANOKE

Virginia’s Tri-City group of stations, WBTM, Danville, WLVA, Lynchburg, and WSLS, Roanoke, are perfecting aggressive Movin’ Day plans.
It is planned to hold a Radio Rally in each city, now that preliminary conversations with the radio trade have been completed. At each call servicemen will leave in listeners' homes a brochure which sells the stations' program service. A section will be devoted to plans which the station managers have for listeners in the months ahead. Window displays will be spotted in prominent locations in shopping district.

HARTFORD

Movin' Day plans for stations in Hartford, Conn., have passed the preliminary stages, according to information via telephone this week. They plan to take Movin' Day in their stride.

FIRST LEAFLET ORDER

James L. Howe, WBTM, Danville, Va., was first station manager to forward his order for the Movin' Day leaflets.

Imprinted with city, call letters and dial location, these two-color leaflets are ideal for distribution throughout a station’s entire listening area. Delivery is free. It is anticipated that large numbers of these leaflets will be used as they do a nice job, economically. All stations have been mailed convenient order blanks.

THREE GOVERNORS SAY "OK"

Three of the 48 Governors, up to Thursday, had agreed to issue Radio Movin' Day proclamations. West Virginia's Governor, Matthew M. Neely, was first to OK the proclamation. A few hours later Arkansas' Governor, Homer M. Adkins, came through. Governor Payne Ratner, Kansas, was next.

Orchids to Howard Chernoff, WCHS, Charleston, Ed Zimmerman, KARK, Little Rock, and Ben Ludy, Topeka, WIBW, for their fine work.

Gov. Ratner “will make this proclamation in all the official state papers as of March 15,” said Mr. Ludy.

THIS LETTER MAY HELP

The following letter has been mailed to the heads of the Department of Education of all 48 states and the District of Columbia:

"On March 29 approximately 90 per cent of all United States broadcast stations will change frequencies. Seven hundred and ninety-five out of 883 stations will come in at new dial locations on the sets used by the girls and boys of ———(state). Reallocation occurs after more than three years of deliberation and planning by the government of the United States, Canada, Cuba, Mexico and Haiti. It is regarded as a major improvement in broadcasting and destined to improve over-all reception.

"Perhaps you will find it agreeable to communicate with the various school executives in ———(state) to insure that all school programs be received without confusion or interruption on and after March 29. School principals and teachers, in turn, could notify their pupils of the changes and the reasons for them.

"Your cooperation will be sincerely appreciated.

"Enclosure: New Frequency List."

It is hoped that these letters will induce a fanning out of Movin' Day information from state headquarters.

They are no substitutes for contracts which station managers have locally. They're intended only to supplement the more effective local effort.

WHEN TO BEGIN

Several inquiries have been received concerning suggested dates for taking Movin' Day to the public. As seen here it will serve the broadcasters' purposes best to put on a "radio blitz" beginning about March 9 or a little later. Begin strong, increasing the pressure as the day approaches. This gives three weeks for “conditioning” listeners to the reasons for this major improvement in broadcasting and to make them familiar with new dial settings.

FOUR TALKS TO COME

Commissioner T. A. M. Craven and E. K. Jett, FCC chief engineer, have accepted our invitation to prepare official talks on Reallocation for station use. These two talks with those of FCC Chairman Fly and NAB President Neville Miller will be mailed as soon as material is received.

Let us know what you plan to do. It may help some other fellow. Write Art Stringer.

FIVE NEW FM GRANTS

More than 9,000,000 persons reside in the nearly 28,500 square miles of potential service area of five prospective FM broadcast stations which received construction permits from the FCC.

A population of 8,820,000 is in the contemplated 24,600 square mile service area of four FM stations of Westinghouse Radio Stations, Inc. One such station plans to serve 9,300 square miles with 4,500,000 population on 45,700 kilocycles from Philadelphia; another contemplates service to 6,700 square miles with 3,400,000 population on 46,700 kilocycles from Boston; a third, 2500 square miles with 500,000 population, on 48,100 kilocycles, from Springfield, Mass.; and the fourth, 6100 square miles, 42,000 population, on 44,900 kilocycles, from Fort Wayne, Indiana.

The other grant went to Rockford Broadcasters, Inc., at Rockford, Ill., which proposes to serve 3900 square miles with 270,000 population on 47,100 kilocycles.

Application of Columbia Broadcasting System, Inc., for a station at Boston to use 44,100 kilocycles to serve 16,230 square miles of area with more than 4,300,000 population was designated for hearing.

To date the Commission has authorized 39 FM stations to embark on full commercial operation.
OVERTIME FOR RADIO INSPECTORS

House of Representatives with practically no debate this week passed H.R. 533 which amends section 4(f) of the Communications Act of 1934 to provide for extra compensation for overtime of inspectors in charge and radio inspectors of the Field Division of the Engineering Department of the FCC.

The bill as passed by the House provides: That section 4 (f) of the Communications Act of 1934, as amended (49 Stat. 1098), is hereby further amended by inserting after the letter "(f)" the figure "(1)" and by adding after section 4 (f) as so amended the following additional paragraph:

"(2) The Commission shall fix a reasonable rate of extra compensation for overtime services of inspectors in charge and radio inspectors of the Field Division of the Engineering Department of the Federal Communications Commission, who may be required to remain on duty between the hours of 5 o'clock p.m. and 8 o'clock a.m., or on Sundays or holidays to perform services in connection with the inspection of ship radio equipment and apparatus for the purposes of Part II of title III of this act, on the basis of one-half day's additional pay for each 2 hours or fraction thereof of at least 1 hour that the overtime extends beyond 5 o'clock p.m. (but not to exceed 2 1/2 days' pay for the full period from 5 o'clock p.m. to 8 o'clock a.m.) and 2 additional days' pay for Sunday or holiday duty. The said extra compensation for overtime services shall be paid by the master, owner, or agent of such vessel to the local United States collector of customs or his representative, who shall deposit such collection into the Treasury of the United States to an appropriately designated receipt account: Provided, That the amounts of such collections received by the said collector of customs or his representatives shall be covered into the Treasury as miscellaneous receipts; and the payments of such extra compensation to the several employees entitled thereto shall be made from the annual appropriations for salaries and expenses of the Commission: Provided further, That to the extent that the annual appropriations which are hereby authorized to be made from the general fund of the Treasury are insufficient, there are hereby authorized to be appropriated from the general fund of the Treasury such additional amounts as may be necessary to the extent that the amounts of such receipts are in excess of the amounts appropriated: Provided further, That such extra compensation shall be paid if such field employees have been ordered to report for duty and have so reported whether the actual inspection of the radio equipment or apparatus takes place or not: And provided further, That in those ports where customary working hours are other than those hereinabove mentioned, there are hereby authorized to be appropriated from the general fund of the Treasury such additional amounts as may be necessary to the extent that the amounts of such receipts are in excess of the amounts appropriated: Provided further, That such extra compensation shall be paid if such field employees have been ordered to report for duty and have so reported whether the actual inspection of the radio equipment or apparatus takes place or not: And provided further, That in those ports where customary working hours are other than those hereinabove mentioned, there are hereby authorized to be appropriated from the general fund of the Treasury such additional amounts as may be necessary to the extent that the amounts of such receipts are in excess of the amounts appropriated: Provided further, That such extra compensation shall be paid if such field employees have been ordered to report for duty and have so reported whether the actual inspection of the radio equipment or apparatus takes place or not:

FUTURE HEARINGS

During the past week the Commission has announced the following future dates for broadcast hearings. They are subject to change.

March 6
Consolidated Hearing
NEW—Stephen R. Rintoul, Stamford, Conn.—C. P., 1370 kc., 250 watts, unlimited.

March 28
KGNO—The Dodge City Broadcasting Company, Inc., Dodge City, Kans.—Modification of license, 1310 kc., 500 watts night, 1 KW day, unlimited. Present assignment: 1340 kc., 250 watts night, 1 KW day, unlimited.

March 31
KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—C. P., 1410 kc., 1 KW, unlimited, DA night.
NEW—KNOE, Inc., Monroe, La.—C. P., 1120 kc., 250 watts, unlimited.

April 7
Joint Hearing

April 15
Television
W1XG—General Television Corporation, Boston, Mass.—Modification of license (considered as construction permit); 3000-56000 kc., 500 watts visual, emission A-5, Sec. 4.4(a). Present assignment: 32000-56000, 50000-80000 kc., 500 watts visual, emission A-5, Sec. 4.4(a).
W1XG—General Television Corporation, Boston, Mass.—C. P., 42000-56000, 60000-86000 kc., 500 watts aural and visual, emission A-3 and A-5, Sec. 4.4(a). Present assignment: 42000-56000, 60000-86000 kc., 500 watts visual only, emission A-5, Sec. 4.4(a).

NEW STATION GRANTS

Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—Granted construction permit for new broadcast station to operate on 1310 kc., 250 watts, unlimited time, subject to the condition that in any authorization to operate after March 29, 1941, the Commission may specify the frequency 1330 kc, in lieu of 1310 kc. (B-P-2978).
Vermont Radio Corp., Inc., St. Albans, Vt.—Granted construction permit for new broadcast station to operate on 1290 kc., with 1 KW day, requested facilities of station WQDM, which consents; order will be issued to dismiss renewal proceedings against WQDM (Bl-P-3065).
Harbenito Broadcasting Co., Harlingen, Tex.—Granted construction permit for new broadcast station to operate on 1240 kc., power 250 watts, unlimited time (B-P-2747).
Westinghouse Radio Stations Inc., Philadelphia, Pa.—Granted construction permit for new high frequency (FM) broadcast station to operate on frequency 15700 kc, 9,300 square miles, population 4,500,000 (B2-PH-65).
Westinghouse Radio Stations Inc., Boston, Mass.—Granted construction permit for new high frequency (FM) broadcast station to operate on frequency 16700 kc, 6,700 square miles, population 3,400,000 (B1-PH-62).

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

Following broadcast hearing is scheduled to be heard before the Commission during the week beginning, Monday, February 24. It is subject to change.

Wednesday, February 26
KFRO—Voice of Longview, Longview, Tex.—Modification of construction permit; 1310 kc., 5 KW, unlimited, DA night. Present assignment: 1310 kc., 1 KW, unlimited, DA night.
APPLICATIONS GRANTED

WFOR—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—Granted construction permit to make changes in equipment and increase power from 500 watts to 5,000 watts power, special emission for frequency modulation, with transmitter located at 135 South LaSalle St., Chicago, Ill., instead of S.W. S. N. Y. from Ohio, only. (B1-P-3015).

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted construction permit to move transmitter to approximately 9 miles south of center of city and install directional antenna for nighttime use, subject to the condition that no interference is caused to Naval aeronautical communications, 512 kc.; station operates on 350 kc., 1 KW night, 5 KW day (B1-P-2907).

WVBD—Debs Memorial Radio Fund, Inc., New York, N. Y.—Granted construction permit to move transmitter to approximately 1,000 feet from present location; increase power from 1 KW day and night to 5 KW day and night (Shares with WHAZ and WBR), install new equipment and directional antenna with different adjustments for day and night use (B1-P-2955).

DESIGNATED FOR HEARING

WEFW—Berk’s Broadcasting Co., Reading, Pa.—Application for construction permit to increase time of operation from day-time to unlimited and install directional antenna for nighttime use; 850 kc., 1 KW LS. (B2-P-3048).

WOOD—King-Trendle Broadcasting Corp. (Assignor), WOOD Broadcasting Corp. (Assignee), Grand Rapids, Mich.—Amended application for consent to voluntary assignment of license for station WOOD from King-Trendle Broadcasting Corp. to WOOD Broadcasting Corp.; station operating on 1250 kc. (B1-P-3045).

Columbia Broadcasting System, Inc., Boston, Mass.—Application for construction permit for new high frequency (FM) broadcast station to operate on frequency 4100 kc., 16,230 square miles; hours of operation: minimum 3 day, 3 night (B1-P-79), designated for hearing.

MISCELLANEOUS

WMC—Memphis Publishing Co., Memphis, Tenn.—Granted special temporary authority to operate with 5 kw power, using directional antenna, for a period not to exceed thirty days, in order to overcome interference from Cuban Station CMBC, provided such operation with additional power terminates immediately when CMBC ceases operation in frequency 1545 kc., reduces power so that additional interference is not involved, and pending reallocation effective March 29, 1941.

WINS—Hearst Radio, Inc., New York, N. Y.—Granted special temporary authority to operate additional time March 8, 1941, in order to broadcast the Knights of Columbus Fourth Annual Athletic Meet from Madison Square Garden on Saturday, March 7, 1941.

WCNW—Arthur Fiske, Brooklyn, N. Y.—Granted special temporary authority to operate with power of 250 watts from 10 p.m., February 12, 1941 to 2 a.m., EST, February 13, 1941, in order to broadcast the Brooklyn Boy Scout Dinner and the Annual Brooklyn Republican Dinner only.

WJOB—O. E. Richardson and Fred L. Adair, Hammond, Ind.—Granted special temporary authority to operate from 5:30 p.m. to 8 p.m., February 27 and 28, from 6 p.m. to 8 p.m., March 1, from 6 p.m. to 8 p.m. March 8, 9, 15, and 22, 1941, in order to broadcast basketball games described in letter dated January 30, 1941, only.

WSV—Shenandoah Valley Broadcast Corp., Harrisonburg, Va.—Granted special temporary authority to operate from 8:28 p.m. to 10 p.m., EST, on February 12, 1941, in order to broadcast an address by Honorable Robert P. Taft, Senator from Ohio, only.

W2XOV—General Electric Co., Albany, N. Y.—Granted extension of special temporary authority to relay through high frequency broadcast station W2XOV the frequency modulated programs of high frequency broadcast station W2XOV for the period beginning February 11 to not later than March 1, 1941.

W9XR—Zenith Radio Corp., Chicago, Ill.—Granted special temporary authority to operate a high frequency experimental broadcast station on 32800 kc., 5000 watts power, special emission for frequency modulation, with transmitter located at 135 South LaSalle St., Chicago, Ill., instead of 505 N. Michigan Ave., Chicago, as authorized December 21, 1940, for the period ending in no event later than March 1, 1941.

WBOS—Westinghouse Electric & Mfg. Co., Hull Mass.—Granted special temporary authority to operate international broadcast station WBO to replace a power of 50 kw using two WL-895 tubes in lieu of tubes specified in construction permit application. File No. B1-PIB-23 for the purpose of obtaining data on performance of such tubes preparatory to securing final approval for a period not to exceed thirty days.

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Granted special temporary authority to operate simultaneously with station KLX from 10 p.m. to 11 p.m., PST, on February 11, 1941, in order to broadcast material incident to blackout in cooperation with the American Legion and National Defense Committee only.

KOV—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Granted construction permit to install a new transmitter (B5-P-3078).

WGM—George F. Meyer, Medford, Ore.—Granted modification of construction permit (B4-P-2501, authorizing new station to operate on 1500 kc., 100 watts, unlimited time), for ex-
tension of commencement date to April 19, 1941 (B4-MP-1159).

WPEN—Vmn. Penn Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-P-2658 authorizing increase in power from 5 to 15 kw, using DA at night) for additional new transmitter and extension of completion date to 180 days after grant (B2-MP-1160).

KATE—Albert Lea Broadcasting Co., Albert Lea, Minn.—Granted modification of license to change name from Albert Lea Broadcasting Co. to Albert Lea-Austin Broadcasting Co. (B4-ML-1047).

KGEK—Elmer G. Beehler, Sterling, Colo.—Granted authority to WPEN—Vmn. Penn Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit, which authorized a new station, for approval of studio and transmitter sites at U. S. Highway No. 212, south near intersection of road to Miles City Country Club; approval of antenna, and change of requested transmitting equipment; 1349 kc., 250 watts, unlimited time (B4-MP-1127).

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Granted petition for leave to amend application of KEEN (KVL, Inc.) for construction permit to change frequency from 1170 kc. to 1190 kc., using 100 watts night, 250 watts day, unlimited time; to substitute Evergreen Broadcasting Corp., as applicant; and show change of call letters to KEVR; complete application to be filed on new form.

WRYA—Larus & Brother Co., Inc., Richmond, Va.—Dismissed without prejudice, at request of petitioner, petition to intervene in the hearing on the application of Symons Broadcasting Co., Ellensburg, Wash., for a new station to operate on 1110 kc., 1 kw, unlimited time.

KGIR—KGIR, Inc., Butte, Mont.—Granted motion for authority to take deposits in re application of KGNU, The Dodge City Broadcasting Co., Inc., Dodge City, Kans., for modification of license to increase power to 500 watts night, 1 kw, day and night, on 1310 kc.

KGIR—KGIR, Inc., and State of Montana.—Granted petition to continue hearing on application of KGNU now scheduled for February 26, for a period of 30 days.

State of Montana and Montana.—Granted petition for leave to amend application of KGNO, The Dodge City Broadcasting Co., Inc., Dodge City, Kans., for modifications of license to increase power to 500 watts night, 1 kw, day and night, on 1370 kc., 250 watts, unlimited time.

Stephen R. Rintoul, Stanford, Conn., for authority to operate on 1370 kc., 250 watts, unlimited time.

WBCB.—WBCB Broadcasting Co., Inc., Park Cities Broadcasting Corp., Dallas, Tex.—Granted motion to consolidate hearing and continue hearing now set for February 17, for period of 20 days, on applications of WGNY, Newburgh, N. Y., and Stephen R. Rintoul, Stamford, Conn., for authority to operate on 1370 kc., 250 watts, unlimited time.

KGIR—KGIR, Inc., and State of Montana.—Granted petition for leave to amend application of KGNO now scheduled for February 26, for a period of 30 days.

State of Montana and Montana.—Granted petition for leave to amend application of KGNO, The Dodge City Broadcasting Co., Inc., Dodge City, Kans., for modifications of license to increase power to 500 watts night, 1 kw, day and night, on 1370 kc., 250 watts, unlimited time.

KGIR—KGIR, Inc., Butte, Mont.—Granted motion for authority to take deposits in re application of KGNU, The Dodge City Broadcasting Co., Inc., Dodge City, Kans., for modification of license to increase power to 500 watts night, 1 kw, day and night, on 1310 kc.

KGIR—KGIR, Inc., and State of Montana.—Granted petition to continue hearing on application of KGNU now scheduled for February 26, for a period of 30 days.

State of Montana and Montana.—Granted petition for leave to amend application of KGNO, The Dodge City Broadcasting Co., Inc., Dodge City, Kans., for modifications of license to increase power to 500 watts night, 1 kw, day and night, on 1370 kc., 250 watts, unlimited time.

Stephen R. Rintoul, Stamford, Conn.—Dismissed without prejudice, at request of petitioner, petition to intervene in the hearing on application of KGNO, subject to conditions Attorney General of Montana amend his petition to comply with rules within 10 days after receipt of order.

WGNV—WGNV Broadcasting Co., Inc., Newburgh, N. Y.—Granted motion to consolidate hearing and continue hearing now set for February 17, for period of 20 days, on applications of WGNV, Newburgh, N. Y., and Stephen R. Rintoul, Stamford, Conn., for authority to operate on 1370 kc., 250 watts, unlimited time.

Comments on this page; new issue to be incorporated "to determine the radio service available in Stamford and Newburgh."

Park Cities Broadcasting Corp., Dallas, Tex.—Granted motion for consent to amend application for new station to operate on 940 kc., 1 kw, unlimited time, DA day and night, until Commission has acted on petition of KRBC for reconsideration.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Granted petition to amend application for construction permit to operate on 1100 kc., 5 kw night, 10 kw day, unlimited time, by substituting redesigned directional antenna system and in certain particulars pertaining to equipment.

WVO—Greater New York Broadcasting Corp., New York City.—Dismissed without prejudice petition to intervene in the hearing on application of WDGY listed above.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted special temporary authority to operate from 7:30 p.m. to 8:30 p.m., PST, to the conclusion of the Junior Chamber of Commerce Americaism Rally on February 19, 1941, in order to broadcast said rally only.

WBAA—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate from 4 to 5 p.m. and from 7:15 to 9:30 p.m., March 1, from 7:15 to 9:30 p.m., March 4, from 7 to 11 p.m., March 7 and 8, from 4 to 5 p.m., March 8, 15, and 18, and from 7:45 to 9:30 p.m., CST, March 15, 1941, in order to broadcast sports events listed above.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted special temporary authority to operate simultaneously with station KTHS on 1060 kc., from 6 p.m. to 9:30 p.m., EST, February 15, 1941, in order to broadcast speech of Thomas S. Beck on the subject "Our South American Relations" only.

W9XBC—Balaban & Katz Corp., Chicago, Ill.—Granted extension
of special temporary authority to operate two transmitter units to be installed and operated from the State-Lake Bldg., Chicago, Ill.; Link Transmitter Type No. 50-UTX, 100 watts aural; temporary steel tower to be used on roof of said building, in order to conduct tests, from February 18 to not later than March 19, 1941, in accordance with construction permit.

William H. Amesbury, Minneapolis, Minn.—Dismissed application for new broadcast station to operate on 530 kc., 1 KW power, unlimited time, using directional antenna night and day (B4-P-2746).

WAKK—Summit Radio Corp., Akron, Ohio.—Dismissed petition without prejudice to applicant filing an amended application showing the proposed antenna pattern, within such period as the Commission may determine. (Applicant requested construction permit to install new transmitter, make changes in directional antenna, and increase power from 1 KW to 5 KW.)

William D. and Violet Hutton Hudson, Clarksville, Tenn.—Granted petition for reconsideration and grant without hearing the application for a new station to operate on 1370 kc., 250 watts, unlimited time; cancelled the hearing now scheduled and granted application (B3-P-2983).

Clinton Broadcasting Corp., Clinton, la.—Granted amended order to permit construction of new station authorized on February 4, to commence construction immediately.

Courier-Post Publishing Co., Hannibal, Mo.—Adopted amended order to permit construction of new station authorized on February 4, to commence construction immediately.

Burlington Broadcasting Co., Burlington, la.—Adopted decision and order to permit construction of new station to start immediately.

J. Leslie Doss, Bessemer, Ala.—Denied petition requesting Commission to reconsider its action of December 4, 1940, designating for hearing application for new station to use 1370 kc., 250 watts power, unlimited time.

APPLICATIONS FILED AT FCC

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Modification of construction permit (B4-P-2579) which authorized installation of directional antenna for night use and increase power, requesting authority to make changes in directional antenna system.

590 Kilocycles

KGMB—Hawaiian Broadcasting System, Ltd., Honolulu, Hawaii.—Construction permit to move formerly licensed KDA 1-D 1 KW transmitter from fronting on Kapiolani Blvd., Honolulu, Hawaii, to Kapiolani Blvd., Honolulu, Hawaii, for use as an auxiliary transmitter.

NEW—Inter-City Advertising Co., Charlotte, N. C.—Construction permit for a new station to be operated on 610 kc., 500 watts power, 1 KW day, unlimited time, directional antenna day and night, Class III-B. Amended re antenna and to give transmitter site as NW Charlotte, N. C.

620 Kilocycles

NEW—Yankee Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new station to be operated on 620 kc., 1 KW, unlimited time, directional antenna day and night, Class III-B.

680 Kilocycles

WPTF—WPTF Radio Company, Raleigh, N. C.—Modification of construction permit (R3-P-2216) as modified, for new equipment, increase in power from 5 KW to 50 KW, changes in directional system, requesting extension of completion date from 3-16-41 to 4-16-41.

780 Kilocycles

KFYD—South Dakota State College, Brookings, S. Dak.—Authority to determine operating power by direct measurement of antenna power on 780 kc., under North American Regional Broadcasting Agreement.

KFYD—South Dakota State College, Brookings, S. Dak.—Authority to make changes in automatic frequency control equipment on 790 kc., under North American Regional Broadcasting Agreement.

800 Kilocycles

WFAA—A. H. Belo Corp., Dallas, Tex.—Authority to determine operating power by direct measurement of antenna power on 820 kc., under North American Regional Broadcasting Agreement.

WBAM—Carter Publications, Inc., Fort Worth, Tex.—Authority to determine operating power by direct measurement of antenna power on 820 kc., under North American Regional Broadcasting Agreement.

920 Kilocycles

NEW—Alamance Broadcasting Co., Inc., Burlington, N. C.—Construction permit for a new station to be operated on 890 kc., 290 kc. under the North American Regional Broadcasting Agreement, 1 KW, daytime, Class III.

940 Kilocycles

NEW—Park Cities Broadcasting Corp., Dallas, Tex.—Construction permit for a new station to be operated on 940 kc., 500 watts, unlimited time, Class III-B. Amended re stock ownership.

950 Kilocycles

WTRY—Troy Broadcasting Company, Troy, N. Y.—License to cover construction permit (B1-P-2910) to install directional antenna, change time from daytime to unlimited time, using 1 KW power night and day.

WTRY—Troy Broadcasting Company, Inc., Troy, N. Y.—Authority to determine operating power by direct measurement of antenna power.

WRC—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit (B1-P-243) as modified for increase in power and installation of directional antenna for night use, requesting extension of completion date from 3-5-41 to 4-5-41.

1120 Kilocycles

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Modification of construction permit (B1-P-2710) for change in hours of operation and installation of directional antenna for night use, requesting approval of directional antenna for night use and approval of transmitter site at 300 feet northeast of present site, Speedway Way of Soldiers Field, Boston, Mass.

1140 Kilocycles

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Extension of special experimental authorization to operate unlimited time, directional antenna after sunset at Tuske, Okla., period 8-1-40 to 8-1-41, for changes in equipment, increase in power from 10 KW to 50 KW, requesting extension of completion date from 3-8-41 to 3-29-41.

1170 Kilocycles

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Authority to determine operating power by direct measurement of antenna power on 1170 kc., and under North American Regional Broadcasting Agreement 1210 kc.

1180 Kilocycles

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Modification of construction permit (B5-P-2781) as modified, for changes in equipment, increase in power from 10 KW to 50 KW, requesting extension of completion date from 3-8-41 to 3-7-41.

1200 Kilocycles

KMLB—Liner broadcasting Station, Inc., Monroe, La.—Authority to determine operating power by direct measurement of antenna power.

NEW—Mosby's Incorporated, Anaconda, Mont.—Construction permit for a new station to be operated on 1110 kc., 500 watts power, 1 KW day, unlimited time. Amended to change requested frequency from 1110 kc. to 1290 kc. (Class IV), power from 500 watts night, 1 KW day, to 250 watts;
make changes in requested antenna; change requested type of transmitter, and give transmitter and studio sites as Lincoln St., north of Front, Anaconda, Mont.

WOLS—O. Lee Stone, Florence, S. C.—Authority to determine operating power by direct measurement of antenna power.

WBLJ—Dalton Broadcasting Co., Dalton, Ga.—Authority to transfer control of corporation from J. B. Roach to Kenenner Brothers, 59 shares of common stock.

WCED—The Tri-County Broadcasting Co., DuBois, Penna.—Authority to determine operating power by direct measurement of antenna power.

KPHO—M. C. Reese, Phoenix, Ariz.—Construction permit to install a new transmitter.

WJOE—E. E. Richardson & F. L. Adair, Hammond, Ind.—Authority to determine operating power by direct measurement of antenna power.

1210 Kilocycles

WATN—Watertown Broadcasting Corp., Watertown, N. Y.—License to cover construction permit (B1-P-809) as modified for a new station.

WATN—Authority to determine operating power by direct measurement of antenna power.

WLAG—LaGrange Broadcasting Co., LaGrange, Ga.—Modification of construction permit (B3-P-2763) for a new station, requesting authority to install a new transmitter and make changes in antenna.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Penna.—Voluntary assignment of license from John H. Stenger, Jr., to Wilkes-Barre-Scranton Broadcasting Co., Inc.

WAGA—Henry Estes, Austin Deen and L. H. Christian, d/b as Gainesville Broadcasters, Gainesville, Ga.—Modification of construction permit (B3-P-2627) for a new station, requesting approval of antenna and approval of transmitter and studio sites at Atlanta Road, Gainesville, Ga. Amended to give transmitter and studio sites as Athens Road, Gainesville, Ga., make changes in requested antenna, and request frequency 1210 kc. under North American Regional Broadcasting Agreement.

1230 Kilocycles

NEW—Texas Star Broadcasting Co., Houston, Tex.—Construction permit for a new station on 1210 kc., 250 watts, unlimited time, Class IV. Amended to change frequency from 1210 kc. to 1230 kc. under North American Regional Broadcasting Agreement.

WNAC—The Yankee Network, Inc., Boston, Mass.—Modification of construction permit (B1-MP-322) for increase in power, changes in equipment and installation of directional antenna for day and night use, requesting extension of commencement dates from 9-29-40 and 3-24-41 to 3-29-41 and 6-29-41 respectively.

WFHM—WFHM, Inc., Indianapolis, Ind.—Modification of construction permit (B4-ML-354) to increase power using directional antenna at night requesting extension of completion date from 2-25-41 to 4-25-41.

1260 Kilocycles

WHLD—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Authority to determine operating power by direct measurement of antenna power, under North American Regional Broadcasting Agreement.

KOIL—Central States Broadcasting Co., Lincoln, Nebr.—Authority to determine operating power by direct measurement of antenna power.

1300 Kilocycles

WHBL—Press Publishing Company, Sheboygan, Wis.—Construction permit to increase power from 250 watts night, 1 KW day to 1 KW day and night, and install directional antenna for night use. Class H1-A. Amended: re changes in directional antenna system.

1310 Kilocycles

WBRK—Harold Thomas, Pittsfield, Mass.—Authority to install new automatic frequency control equipment on 1310 kc., under North American Regional Broadcasting Agreement.

KGFW—Central Nebraska Broadcasting Corp., Kearney, Nebr.—Authority to determine operating power by direct measurement of antenna power on 1340 kc., under North American Regional Broadcasting Agreement.

KGB—Don Lee Broadcasting System, San Diego, Calif.—Modification of construction permit (B3-P-2940) for changes in equipment, requesting extension of commencement and completion dates from 10-10-40 and 4-10-41 to 4-10-41 and 6-9-41 respectively.

1330 Kilocycles

KTSM—Tri-State Broadcasting Co., Inc., El Paso, Tex.—Modification of license to increase power from 500 watts to 1 KW. Amended: to request power of 500 watts night, 1 KW day.

1370 Kilocycles

KICA—Western Broadcasters, Inc., Clovis, N. Mex.—Construction permit to change frequency from 1370 kc. to 1210 kc., increase power from 100 watts to 250 watts, and install new equipment.

WDEF—Joe W. Enzel, Chattanooga, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KELD—Radio Enterprises, Inc., El Dorado, Ark.—Authority to determine operating power by direct measurement of antenna power.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Authority to make changes in automatic frequency control equipment on 1400 kc. under North American Regional Broadcasting Agreement.

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Modification of license to change frequency from 1370 kc. to 1210 kc.

1430 Kilocycles

KGEZ—Donald C. Treloar, Kalispell, Mont.—Modification of construction permit (B3-P-2573) for new transmitter, increase in power and change of frequency, requesting authority to install directional antenna for night use.

WOKO—WOKO, Inc., Albany, N. Y.—Authority to determine operating power by direct measurement of antenna power.

KINY—Edwin A. Kraft,Juneau, Alaska.—Construction permit to make changes in equipment and antenna and increase power from 1 KW to 5 KW.

1500 Kilocycles

WSVB—Philip Weiss, tr/as Philip Weiss Music Co., Rutland, Vt.—Construction permit to install new transmitter, directional antenna for night use, increase power from 250 watts to 1 KW, and change frequency from 1500 kc. to 1350 kc.

1550 Kilocycles

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit (B1-P-3027) to move old main transmitter to site of main transmitter, for use as auxiliary transmitter with power of 1 KW, emergency use only.

FM APPLICATIONS

NEW—Gibraltar Service Corporation, Philadelphia, Pa.—Construction permit for a new high frequency broadcast station to be operated on 16100 kc., 9,318 square miles, population 3,998,402.

NEW—General Electric Co., Schenectady, N. Y.—Modification of construction permit (B1-PH-19) for a new high frequency broadcast station, requesting approval of transmitter, changes in antenna, and change population from 1,560,000 to 805,060.

NEW—News Syndicate Co., Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 14700 kc., 8,500 square miles, population 11,212,416. Amended to change type of transmitter.

NEW—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 18500 kc., 9,110 square miles.
population 11,717,445. Amended to change coverage from 9,110 to 8,550 square miles, and population from 11,717,445 to 10,817,455.

NEW—The Yankee Network, Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 16700 kc., 8,500 square miles, population 11,298,250, transmitter to be located at Palisades Park, Clifton, N. J. Amended to change frequency from 16700 kc. to 11700 kc., and give location of studio as 25 W. 45th St., New York, N. Y.

NEW—Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Calif.—Construction permit for a new high frequency broadcast station to be operated on 45300 kc., 7,060 square miles, population 2,467,178, with directional antenna.

NEW—WEP—Edwin H. Armstrong, Portable-Mobile (area of New York, N. Y.).—License to cover construction permit (B1-PYB-70) for a new television station.

TELEVISION APPLICATIONS

NEW—Allen B. DuMont Laboratories, Inc., Portable-Mobile (area of New York, N. Y.).—License to cover construction permit (B1-PYB-70) for a new television station.

MISCELLANEOUS APPLICATIONS

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—Construction permit for a new special relay broadcast station to be operated on 330000, 333000, 336000 kc., or any three suitable frequencies in the band 330 to 330 mc., 25 watts, special emission for frequency modulation.

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—Construction permit for a new special relay broadcast station to be operated on 330000, 333000, 336000 kc., or any three suitable frequencies in the band 330 to 330 mc., 25 watts, special emission for frequency modulation.

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—Construction permit for a new special relay broadcast station to be operated on 330000, 333000, 336000 kc., or any three suitable frequencies in the band 330 to 330 mc., 25 watts, special emission for frequency modulation.

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—Construction permit for a new special relay broadcast station to be operated on 330000, 333000, 336000 kc., or any three suitable frequencies in the band 330 to 330 mc., 25 watts, special emission for frequency modulation.

WEPA—Edwin H. Armstrong, Portable-Mobile (area of New York).—Modification of construction permit (B1-PRE-277) as modified for a new special relay broadcast station, for extension of commencement and completion dates from 10-7-40 and 4-20-41 to 60 days after grant and 180 days thereafter, respectively, and specify new group "I" frequencies of 156250, 158100, 155390 and 161100 kc.

KRCO—Columbia Broadcasting System, Inc., Portable-Mobile (area of Los Angeles, Cal.).—License to cover construction permit (B5-PRE-377) for a new relay broadcast station.

NEW—Echo Park Evangelistic Association, Los Angeles, Calif.—Construction permit for a new relay broadcast station to be operated on 359000 kc., or any channel allotted by FCC, 20 watts, special emission for frequency modulation with total power cumulated for 100 per cent modulation.

NEW—Guy S. Cornish, Portable-Mobile (area of Cincinnati, Ohio).—License to cover construction permit (R2-PARE-1) for a new Class II experimental public address relay station.

CALW—Board of Education of the San Francisco Unified School District, San Francisco, Calif.—Modification of construction permit (R5-PED-14) to make changes in equipment.

NEW—Echo Park Evangelistic Association, Portable-Mobile (area of Los Angeles, Calif.).—Construction permit for a new relay broadcast station to be operated on 1622, 2658, 2150, 2790 kc., 40 watts, A-3 emission.

NEW—J. J. White, Greenville Broadcasting Co., Portable-Mobile (area of Greenville, N. C.).—Construction permit for a new relay broadcast station to be operated on 1622, 2658, 2150, 2790 kc., 40 watts, A-3 emission.

WBKY—University of Kentucky, Lexington, Ky.—License to cover construction permit (B2-PED-17) for a new non-commercial educational station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Continental Premium Mart—Complaints have been issued charging Continental Premium Mart, Milwaukee, a distributor of novelty jewelry and other merchandise, and Irving Cohn, trading as Irvin Novelty Co., Danville, Ill., a distributor of candy and novelty merchandise, with the use of lottery methods in the sale of their products.

The respondents, according to the complaints, sell to dealers assortments of their merchandise so packed and assembled as to involve the use of a lottery scheme when the merchandise is sold to the consuming public.

Charging that the respondents' practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaints grant the respondents 20 days for filing answers. (4462-4464)

Grand Rapids Furniture Company, Inc.—A complaint has been issued charging Grand Rapids Furniture Co., Inc., 300-302 Monroe St., Passaic, N. J., with misrepresenting, through use of the name "Grand Rapids" in its corporate name and through representations made in its advertising and otherwise, that it deals exclusively in furniture manufactured and originating in Grand Rapids, Mich. Pointing out that furniture made in Grand Rapids has widespread good will and popularity, the complaint alleges that only a small portion of the respondent's furniture is made there. The complaint grants the respondent corporation 20 days for answering the charges. (4463)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Eaula Candy Company—Paul Botwin and Eaula Louise Botwin, trading as Eaula Candy Co., Columbia, S. C., have been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance, gift enterprise or lottery scheme.

According to Commission findings, the respondents distribute candy and other merchandise to operators of, and concessionaires with, motion picture and burlesque theaters and tent shows.

The respondents are further ordered to cease selling or distributing any merchandise so packed and assembled that its sale to the public may be made by means of a lottery, and to discontinue supplying others with assortments of individual packages or boxes of candy, together with other articles of merchandise of varying values, or separately, which other articles may be distributed by means of a game of chance to purchasers of the individual packages or boxes of candy. (3249)

Empire State Candy Company—B. M. Bennett, trading as Empire State Candy Co., Athens, Ga., and York Cone Co., York, Pa., have been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance, gift enterprise or lottery scheme.

Empire State Candy Co. is further ordered to cease selling or distributing candy or any merchandise so packed and assembled that its sale to the public may be made by means of a lottery, and to discontinue supplying others with push or pull cards, punch boards or other lottery devices, either with assortments of candy or other merchandise or separately, which devices may be used in selling such candy or merchandise to the public. (4400-3891)
E. B. Hall, trading as E. W. Hall, 3679 Olive St., St. Louis, has been ordered to cease and desist from disseminating advertisements representing that "Texas Wonder", a medicinal preparation, is a cure or remedy for inflammation of the bladder or kidney, or any other bladder or kidney disorders, or for diabetes, rheumatism, swollen joints, weak or lame back, pains in the back, or lumbago. The order also directs the respondent to discontinue advertising that the preparation possesses any therapeutic value in the treatment of any of the ailments mentioned, in excess of such slight symptomatic relief as it may afford in cases of swollen joints and pains in the back, because of its mild diuretic properties. (4330)

Jacobs Candy Co., Inc., New Orleans, and H. & D. Sales Co., and Nathan J. Hubbard and Arthur Easton Davis, its officers, Knoxville, Tenn., have been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance, gift enterprise or lottery scheme. Jacobs Candy Co., Inc., manufacturer of candy and nut confections, is ordered to cease selling and distributing any merchandise so packed and assembled that its sale to the public may be made by means of a lottery, and to discontinue supplying others with assortments of merchandise, together with punch or pull cards, punch boards or other devices, or separately, which devices may be used in selling merchandise to the public by means of a lottery scheme. (3586)

H. & D. Sales Co., and the respondents Hubbard and Davis, distributors of knives, fountain pens, flashlights and other merchandise, are directed to cease supplying to others any merchandise, together with punch boards, pull or pull cards, or other lottery devices, or such devices either with assortments of merchandise or separately, which devices may be used in selling or distributing such merchandise to the public. (3956)

Simmon's Cut Rate Drug Store—Carl D. Bates, trading as Simmon's Cut Rate Drug Store, Canandaigua, N. Y., has been ordered to cease advertising that "Mrs. Bee Femo Caps," a medicinal preparation also known as "Femo Caps" and "Bee Caps," is competent for treating delayed menstruation, and is safe and harmless. The order also prohibits dissemination of advertising which fails to reveal that use of the preparation may cause gastro-intestinal disturbances and other serious ailments or conditions. (4366)

Allen B. Wrisley Company—An order of April 6, 1939, which had directed Allen B. Wrisley Co., and others, Chicago, to cease and desist from misrepresentation of the olive oil content of certain soaps, has been modified. Respondents in the case are Allen B. Wrisley Co. and Allen B. Wrisley Distributing Co., also trading as Reel Soap Co., and Karl Mayer, George A. Wrisley and Wrisley B. Olson, trading as Karl Mayer & Co., all of Chicago. Upon petition of the respondents, the United States Circuit Court of Appeals, Chicago, had reviewed the Commission's order, and directed that it be modified in some particulars. Under the Commission's order as modified, the respondents are directed to cease representing that a soap which does not contain olive oil to the exclusion of all other oils is an olive oil soap.

The respondent further is ordered to cease advertising that "Palm and Olive" or "Olive-Oil Soap" or "Del Gloria Castile; "Olive-Skin Pure Toilet Soap" or "Del Gloria Castile Made With Pure Olive Oil" or other similar brand names or labels containing the word "Olive" or the letters "Oli" or any equivalent term, to refer to soap the oil content of which is not wholly olive oil. The order further provides that nothing contained therein shall prevent the respondents from using brand names containing the word "olive", or any derivative thereof or other similar words, to describe a soap containing olive oil combined with other oils if the respondent shall clearly and truthfully designate that such soap is not made wholly of olive oil, and if olive oil is present in an amount sufficient substantially to effect its detergent or other qualities.

The prohibitions of the Commission's modified order are not to apply to the trade names or labels "Palm and Olive Soap", "Palm and Olive Oil Soap", and "Olive-Palm Complexion Soap." (3021)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Arthrene Company—F. B. Allerdice, trading as Arthrene Co., Jacksonville, Fla., agrees to cease advertising that the product "Arthrene" produces circulation, reduces swelling, dissolves crystals or cleanses the blood of uric acid, and that it is an effective remedy or cure for arthritis, neuritis, sciatica, rheumatism or gout, or has any therapeutic value in the treatment of these ailments in excess of affording temporary symptomatic relief. (02729)

Lillian M. Camp, 246 Fifth Ave., New York, a dealer in products designed to improve personal appearance has entered into a stipulation to cease advertising that her product "Superior Hair Pepsil" will have any effect on the root of the hair; that her product "Leg Pads" are approved by the American Medical Association, and that she owns or controls a shop wherein she employs the makers of wigs and hair goods. The respondent further stipulates that she will desist from representing, by use of the brand name "Face Lifters" or otherwise, that she possesses a commodity that will alter the shape or structure of the face. (02731)

Cooter Brokerage Company—Paul M. Cooter, trading as Cooter Brokerage Co., Merchandise Mart, Chicago, has stipulated to cease advertising that "Moon Rose Complexion Soap" conditions or fortifies the skin, replaces the oils of the skin, stimulates the oil glands of the skin, and causes the skin to breathe. The respondent further agrees to discontinue representing that "Blue Cross Rat Killer" will prevent rats from destroying baby chicks; that the product is recommended by the United States Government; that it will kill rats instantly, rid rat-infested areas of rats, is the most effective or economical poison on the market, and that rates which consume a killing poison will not die on the premises. (02732)

Mrs. W. W. Hadley—Trading as Mrs. W. W. Hadley, Kate J. Hadley, 175 Tremont St., Boston, entered into a stipulation to cease advertising that "Indian Preparation", a depilatory, is an effective cure for superfluous hair; that it is not a depliatory or that no similar products are used by dermatologists or sold in the proprietary trade, and that the preparation will open the pores, loosen the hair follicles, gradually destroying the roots of the hair, or remove superfluous hair without injury to the skin. The respondent further agrees to cease representing, through use of the word "Indian" in the trade name or by pictorial representations, that the formula of her preparation was obtained from the Indian race. (02735)

Link Chemical Co., 520½ Commercial St., Emporia, Kans., agrees to discontinue advertising that "G-I-M-P First Aid" is a competent treatment for strains, sprains, muscular aches and soreness and has any therapeutic value in treating these conditions in excess of affording a temporary relief from superficial pain. The respondent also agrees to discontinue representing that the preparation is effective for treating colds; that it is effective for treating athlete's foot in excess of affording temporary relief from itching; that the preparation penetrates into the tissues and kills infection and that there is no other germicide possessing equal germicidal properties which is equally safe. (02730)

Login Corporation, San Francisco, originally organized as L. P. Ginsburg & Co., Inc., and Louis P. Ginsbrough, president

February 21, 1941 — 175
and principal owner, have entered into a stipulation to cease certain representations in the sale of peat moss.

The stipulation relates that in advertisements the respondents employed the name “Viking Swedish Peat Moss” and the trade name “Svenska Peat Aktiebolaget”, accompanied by the words “Stockholm, Rotterdam, London”, and “San Francisco Office, 459 California St.” According to the stipulation, the respondent also advertised that: “Our peat moss has been perfected for exporting the finest of our Swedish Peat Moss to America for distribution direct-to-users at considerable savings.”

However, according to the stipulation, Loglin Corporation with its principal place of business in San Francisco, is not a Swedish corporation with a San Francisco branch office and does not sell peat moss direct from Sweden to American consumers.

Under their stipulation, the respondents agree to cease making representations of this character.

The stipulation points out that Loglin Corporation, at its San Francisco headquarters, packs fruit and exports it to Europe where, in London and Rotterdam, respectively, it controls two subsidiaries operating under the name L. P. Ginsburg & Co. (3036)

**John A. Martin**, 93 Atlantic St., Jersey City, N. J., a manufacturer of preparations for treating the hair or scalp, entered into a stipulation in which he agrees to discontinue the use in advertisements of the words “No Go”, “Nu Hair” or any other words consisting of a combination of letters the resultant normal pronunciation of which simulates the words “New Grow” or “New Hair,” as a trade designation for such products. The stipulation points out that the respondent’s products so advertised will not cause hair to grow or promote its growth. (3035)

**N. J. Newman Advertising Agency**, N. J. Newman, trading as N. J. Newman Advertising Agency, 510 South Spring St., Los Angeles, in disseminating advertisements of “Entromoul” on behalf of Thomas J. McBride, trading as The Entromoul Co., Los Angeles, agrees to cease representing that the preparation will have a beneficial influence on an excess acid condition of the bowels or colon and that it has any significant value in the treatment of simple mucous colitis. (02714)

**Oneider Chemical Company**, Utica, N. Y., agrees to cease advertising that “Rat-Bombs” or “Oneida Ratsriup” are effective in destroying mice other than common house mice; that the products are endorsed by the United States Department of Agriculture, and that use of the products will make rats and mice go outside or underground to die, except in cases where their burrows or habitats are underground or outside of the homes or other buildings. (02727)

**Pompeian Company, Inc.**, 4201 Philadelphia Ave., Baltimore, has stipulated to cease representing that “Pompeian Milk Massage Cream” works differently from regular or ordinary cosmetic cleansing creams; that its use will remove dirt to a greater extent than ordinary cleansing methods, including soap and water, and that use of the preparation will leave the face “looking years younger”. (02736)

**Roy Tailors**—Roy D. Pastor and Abraham Nathan, trading as The Roy Tailors, 21 West Third St., Cincinnati, have entered into a stipulation in which they agree to cease using certain representations in the sale of men’s clothing.

The respondents stipulate that they will discontinue employing the word “Virgin” to designate the wool fiber in any fabric used in manufacturing their garments, when such fiber is not new wool (wool which has never been reclaimed from any spin, woven, knitted, felted or otherwise manufactured product).

Under their stipulation, the respondents further agree to cease employing the words “wool”, “woolen”, “all wool”, “worsted”, “tropical worsted”, “Cheviot” or any other term descriptive of wool to refer to any fabric or product not consisting wholly of wool. The stipulation provides that in the case of fabrics or products comprised partly of wool and partly of other fibers, such terms may be used as descriptive of the wool content if there are also employed in immediate connection therewith and in conspicuous type other words truthfully designating each constituent fiber or material in the order of its predominance by weight, beginning with the largest single constituent. If any particular fiber is not present in substantial amount by weight then the percentage in which it is actually present is to be disclosed.

The respondents further stipulate that they will cease using the words “silk” to refer to any fiber not obtained from the cocoon of the silkworm.

The respondents further agree to cease representing that the preparation will have a beneficial influence on an upset stomach, unless limited to relief of the condition when due to constipation. The respondents also agree to desist from advertising that Bilaphen Tablets will cause the liver to return to normal functioning and will cause normal or natural movements. (02728)

**Frank R. Waxman**, Raymond-Commerce Building, Newark, N. J., in disseminating advertisements of “Bilaphen Tablets” on behalf of Victoria Chemical Company, Newark, stipulates that he will not represent that the product will aid in relieving an upset stomach, unless limited to relief of the condition when due to constipation. The respondent also agrees to desist from advertising that Bilaphen Tablets will cause the liver to return to normal functioning and will cause normal or natural movements. (02728)

**Zehr & Company**—James A. Zehr and Jacob H. Zehr, trading as Zehr & Co., Pettisville, Ohio, have entered into a stipulation in which they agree to cease representing that “Zero-Dri-Cod”, a poultry and livestock feed, when administered to other feeds, assures a balanced ration at all times, when in fact such is not the case.

The respondents further agree to cease employing the word “balanced”, alone or in connection with the word “completely”, as descriptive of their product, and to desist from use of the statement “The completely balanced cod liver oil powder” or other similar representation implying that their feed is lacking in no essential nutritional factor. (0334)

**FTC CLOSES SEVERAL CASES**

The Federal Trade Commission closed its proceeding against Clover Farm Stores Corporation and its wholly owned subsidiary, The Lane Lease Company, both of 4300 Euclid Ave., Cleveland, without prejudice to the Commission’s right to resume proceedings, should the facts so warrant. The respondents had been charged with violation of the brokerage provision of the Robinson-Patman Act.

According to information received by the Commission, The Lane Lease Company has been dissolved; its brokerage business has been terminated and the Clover Farm Stores Corporation does not intend to assume the dissolved corporation’s business or engage in the business of a food broker.

The Commission has also dismissed its complaint issued in April, 1938, charging the Gulf Refining Company, Pittsburgh, with violation of the Federal Trade Commission Act in the sale of lubricating oil.

Also the Commission closed its proceeding against Clover Farm Stores Corporation and its wholly owned subsidiary, The Lane Lease Company, both of 4300 Euclid Ave., Cleveland, without prejudice to the Commission’s right to resume proceedings, should the facts so warrant. The respondents had been charged with violation of the brokerage provision of the Robinson-Patman Act.

According to information received by the Commission, The Lane Lease Company has been dissolved; its brokerage business has been terminated and the Clover Farm Stores Corporation does not intend to assume the dissolved corporation’s business or engage in the business of a food broker.

The Commission closed its proceeding against Clover Farm Stores Corporation and its wholly owned subsidiary, The Lane Lease Company, both of 4300 Euclid Ave., Cleveland, without prejudice to the Commission’s right to resume proceedings, should the facts so warrant. The respondents had been charged with violation of the brokerage provision of the Robinson-Patman Act.

According to information received by the Commission, The Lane Lease Company has been dissolved; its brokerage business has been terminated and the Clover Farm Stores Corporation does not intend to assume the dissolved corporation’s business or engage in the business of a food broker. (4334)

The Commission has closed its case against Merchant Calculating Machine Company, Oakland and Emeryville, Calif., and Dwight R. Cooke, its district manager for Washington, D. C., and certain area salesmen, charging them with violating the Commission’s right to resume proceedings, should the facts so warrant. The respondents had been charged with violation of the Federal Trade Commission Act in the sale of calculating machines. (3970)
November 1941 Broadcast Advertising Unit Report

The volume of broadcast advertising in the month of November, in terms of time units, is presented on the following pages as reported by 203 broadcasting stations and the national networks. The report of national network business presented herein is complete since it includes the business of the Columbia Broadcasting System, the Mutual Broadcasting System and the National Broadcasting Company. Non-national network business presented herein (regional network, national spot and local business), is not complete for the entire industry; the figures represent the total of such business placed on the 203 stations reporting.

On the last page of this analysis, there appears a complete roster for the 203 stations for November business. There is included also in the list seven additional stations reporting for the month, but from which reports were received too late for inclusion in this tabulation.

A majority of the stations reporting November business had also reported for the months of September and October. However, there is not a constant sample of stations for the three months and this fact is mentioned because it impairs comparison of unit volume presented for those months. An analysis of the reporting stations discloses that of the 216 stations reporting for September, 43 failed to report in October. There were 32 new stations reporting in the month of October, bringing the total of October reports to 205. Of the 205 October reports, 25 stations failed to report November business and 30 new stations reported, bringing the November total to 210. Further, 9 of the 30 stations reporting November business which had not reported in October had reported in September and were renewing their cooperation.

It is obvious from the above discussion of the sample represented here that it is not possible to compare reliably the November reports with those of October and September. Two developments are needed in this Broadcast Advertising Volume Analysis to establish statistical stability—consistent month-by-month reporting of cooperating stations—and more stations cooperating.

The Legend

A program unit equals one minute of program time. An announcement unit is equal to one announcement, unless the time consumed is one and one-half minutes or longer, in which case the units are calculated to the nearest number of minutes.

Advertising business placed in radio is classified under two major headings—"Retail" and "General." Retail Advertising is defined as the advertising placed by businesses which sell direct to consumers. General is that advertising placed by businesses which sell for resale and not direct to consumers.

In Retail Advertising the analysis presented here classifies retail businesses according to their principal retail line. No attempt is made to classify according to specific product advertised. This classification is most useful to the broadcasting industry since advertising is placed by the individual retail store and such buying units as have similar business are grouped together.

In General Advertising the classification is primarily an analysis of the products advertised by businesses engaged in selling to others for resale. The significance of this to the radio industry is that advertising campaigns are carried for individual products and in this analysis similar products are grouped together. Also included in the general classification are such service businesses as Financial, Insurance, Professional and Service, and Transportation which, because of their nature, could not properly be considered retail.

There appears on the following page Table I of the November 1940 Broadcast Advertising Unit Report. In this table, program and announcement units are presented for retail and general advertising with a total of the two showing the source of such business by national network, regional network, national non-network and local placement. The tables which follow present: Table II, program units by type of sponsoring business and source of business, first for retail and then for general advertising. Table III presents program and announcement units by type of sponsoring business and class of station, first for retail advertising and then for general advertising. Table IV presents program and announcement units by type of sponsoring business and by station metropolitan district or city population, first for retail, then for general advertising.

What Does It Show?

In November, the 203 stations reporting and all national networks carried broadcast advertising amounting to 3,885,232 units, divided as follows: Program units, 3,591,708 and announcements units, 293,425.

Although direct comparison with October is not accurate, there is shown a decrease from October to November of about 15%. One factor seriously affecting November advertising volume is a thirty-day month against the thirty-one day October and the situation of October having five Tuesdays, Wednesdays and Thursdays for the month, as compared to November with five
Fridays and Saturdays. Also, the political advertising carried during October was more than two and one-half times as great as that placed in November. The third factor is that of the World Series baseball broadcasts sponsored by Gillette Safety Razor which, of course, did not repeat in November.

There are some significant gains in advertising by various retail classifications. Boots and Shoes increased in program units to offset a decrease in announcement units. There was a slight increase in program units of Department and Dry Goods Stores, although announcement units fell off. Drug Store experience was the same. Electric and Gas Appliances and Supplies rose in both program and announcement units. Furniture and Home Furnishings up in program units, off in announcement units. Grocers and Food Stores up sharply in program units, off in announcement units. Sporting Goods up in both program and announcement units. Stationers increased in both. Notable decreases are found in Amusements, Automotive, Bakers, Building Supplies, Heating and Plumbing, Hotels and Restaurants, Jewelers and Miscellaneous.

In General Advertising, gains are found in Agriculture, Automotive, Building Materials, Confections, Educational, Housing Equipment and Supplies, Jewelry and Silverware, Religion, Radio, Tobacco and Wearing Apparel. Notable decreases in General Advertising for November are found in Financial, Industrial, Insurance, Medical, Miscellaneous, Political, Professional, Public Utilities, Publications, Toilet Requisites (explained completely by Gillette World Series mentioned above), and Transportation.

These comparisons of November business with October must be made with realization of the difference of composition in days between the two months. Any increases shown are greater than the figures show and declines are actually less.

**How to Use It**

Last week, the owner and manager of an NAB member station visited the Research Department and asked, “What good is this report of Broadcast Advertising Units?” This gave your Research Director a welcomed opportunity. Before the manager left, he had discarded his request to discontinue reporting and substituted in his thinking a plan of action secured by a memorandum on his “things-to-do-today” pad.

On his memorandum appeared first a list of missing business developed by comparing his station’s October report against the consolidated industry report for that month. There was a second list of business classifications in which he had substantial announcement business, but the industry report showed potential program unit business. The third list was drawn up because of the advance warning found in the consolidated report that he might have difficulty in holding a certain class of accounts. These were indicated by those classes of business in the consolidated report which showed an industry decline or faltered in trend from the previous month’s report.

Of course, the NAB member, in drawing up his lists, referred to the tabulation of stations in the same classification as his own and to the business placed in cities of the approximate size in which he operates. Further, he pinned down the local situation he faced in signing retail and general advertising accounts. Naturally, he considered carefully where he gets his business; whether it is local, national spot, regional network or national network.

But the net result—when he left your Research Director’s office, he had made a decision—to hold a sales meeting as soon as he could get back to his station.

**Footnotes:**
- The table provides data on station broadcast advertising by type of sponsoring business and by class of station for November 1940.
- The totals include both unlimited and limited & day parts.
- The figures represent the number of stations (%\) for each category.

February 21, 1941 — 193
ASCAP SIGNS CONSENT DECREE

Neville Miller, President of the National Association of Broadcasters, made the following statement Wednesday on hearing that ASCAP had signed a consent decree:

"We hope that the Department of Justice is right in saying that the signing of ASCAP’s consent decree is an important step toward arriving at an equitable arrangement for radio’s use of ASCAP music. The consent decree requires ASCAP to offer its music to broadcasters on a per-program basis. This is the formula on which we have always wanted to buy the right to use ASCAP music on the air, and months ago we made it quite clear to ASCAP’s management that our board of directors would be called together promptly to consider any proposal which ASCAP cared to make based on this formula."

"How imminent a settlement between broadcasting and ASCAP may be depends on how soon ASCAP can readjust its whole set-up to conform with the terms of the decree and how soon thereafter it will be in a position to work out a proposal for our consideration."

The Department of Justice announced Wednesday that the American Society of Composers, Authors and Publishers had signed a Civil Decree in the U. S. District Court of the Southern District of New York in which it agreed to cease engaging in activities which the Department alleges constitute violations of the Sherman Act. This decree brings to an end litigation started by the Government against ASCAP in 1935.

In the opinion of the Department the decree paves the way for an immediate settlement of the difficulties between ASCAP and the broadcasters which have resulted in the banning of ASCAP music from the air since January 1, 1941. All objectionable practices have been resolved by the decree. The only matter remaining for adjustment is one of price between ASCAP and the broadcasters.

The decree, which becomes effective 90 days after entry, provides:

1. That ASCAP members will not license the public performance rights of copyrighted musical compositions exclusively to ASCAP but are free to license to anyone except Broadcast Music, Inc.
2. ASCAP agrees not to discriminate either in price or terms among the users of copyrighted music. All ASCAP compositions will be offered for performance to all users of the same class on equal terms and conditions.
3. ASCAP agrees to license on a pay-when-you-play basis—that is, broadcasters will be able to buy ASCAP music on a per-program basis if they desire. Users other than broadcasters will be able to buy music on a per-piece basis if desired.
4. ASCAP agrees not to require a license for more than one station in connection with any network broadcasts. Licenses will be issued to networks’ originating stations.
5. Manufacturers of electrical transcriptions or sponsors or advertisers on whose behalf such transcriptions are made will, if they so desire, be able to obtain licenses for the use of such transcriptions for broadcast purposes.
6. ASCAP agrees not to engage in a all-or-none policy for licensing its music—that is, motion picture exhibitors, restaurants, hotels, radio stations and all commercial users of ASCAP music will be able to obtain the right to perform any ASCAP compositions desired without being compelled to take the entire ASCAP catalogue.
7. ASCAP agrees that it will not attempt to restrict performance rights of its music for the purpose of regulating the price of recording its music on electrical transcriptions made for use in broadcasting.
8. ASCAP agrees to abolish its self-perpetuating Board of Directors and to permit election of directors by the membership.
9. ASCAP agrees to modify its membership requirements so as to make eligible any composer who has copyrighted one tune. Under the existing arrangement publication of five songs is required for eligibility.
10. ASCAP agrees to modify the practice of compensating its members so as to make such compensation on the basis of the popularity of its tunes in any given period. Under the present method of distribution, compensation is determined by an elaborate set of rules, including seniority, type of composition, etc.

Disposition of the civil suit by entry of this decree will not dispose of the criminal suit filed against ASCAP in the Eastern District of Wisconsin on February 5, 1941. That case will be disposed of by separate proceedings.

The case was in charge of Victor O. Waters, Special Assistant to the Attorney General, assisted by Warren P. Cunningham, special attorney.

ASCAP’s consent decree:

IN THE DISTRICT COURT OF THE UNITED STATES FOR THE SOUTHERN DISTRICT OF NEW YORK
TERM, 1941

UNITED STATES OF AMERICA, Plaintiff,

vs.

AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS:
Gene Buck, President; George W. Meyer, Secretary; and Gustave Schirmer, Treasurer. Defendants.

CIVIL ACTION—File No. 1395

CIVIL DECREE

This cause came on to be heard on this day of 1941, the plaintiff being represented by Thurman Arnold, Assistant Attorney General, Victor O. Waters, Special Assistant to the Attorney General, and Warren Cunningham, Jr., Special Attorney, and the defendants being represented by (Continued on page 196)
ASCAP SIGNS CONSENT DECREES
(Continued from page 195)

their counsel, and having appeared and filed their answer to the complaint herein.

It appears to the Court that defendants herein have consented in writing to the making and entering of this decree, without any findings of fact, upon condition that neither such consent nor this decree shall be construed as an admission or adjudication that said defendants have violated any law.

It further appears to the Court that this decree will provide suitable relief concerning the matters alleged in the complaint filed herein and that by reason of the aforesaid consent of defendants and its acceptance by plaintiff it is unnecessary to proceed with the trial of the action, or to take testimony therein, or that any adjudication be made of the facts.

Now, THEREFORE, Upon motion of plaintiff, and in accordance with said consent, it is hereby

ORDERED, ADJUDGED AND DECREED

1. The Court has jurisdiction of the subject-matter set forth in the complaint and of the parties hereto with full power and authority to enter this decree and the complaint states a cause of action against the defendants under the Act of Congress of July 2, 1890, entitled "An Act to Protect Trade and Commerce Against Unlawful Restraints and Monopolies" and the Acts amendatory thereof and supplemental thereto.

2. Defendants, Gene Buck, as President of the American Society of Composers, Authors and Publishers; George W. Meyer, Secretary; Gustave Schirmer, Treasurer; and American Society of Composers, Authors, and Publishers, shall not, with respect to any copyright acquired or asserted any exclusive performing right as agent, trustee or otherwise on behalf of any copyright owner, its members, servants, employees, members, and all persons acting or claiming to act on its behalf are hereby perpetually enjoined and restrained from entering into or carrying out, directly or indirectly, any combination or conspiracy to restrain interstate trade and commerce, as alleged in the complaint, by doing, performing, agreeing upon, entering upon or carrying out any of the acts or things hereinbefore enjoined or restrained from doing.

(1) Defendant, American Society of Composers, Authors and Publishers, shall not, with respect to any musical composition, acquire or assert any exclusive performing right as agent, trustee or otherwise on behalf of any copyright owner, its members, or other owner of the performing right, or pursuant to any understanding or agreement with such owner, or its members, to pay for such right a share of, or an amount measured by, the receipts or revenues of said defendants. Nothing herein contained shall be construed as preventing defendant, American Society of Composers, Authors and Publishers, from regulating the activities of its members in the following respects: (a) By requiring all moneys derived from the issuance of licenses by the respective members of defendant to be paid by the licensee to defendant and distributed in the same manner as other revenues; (b) by requiring of its members that notice be given the defendant of their intent to issue licenses before the issuance of same; (c) by prohibiting the members from issuing exclusive licenses to commercial users of music; (d) by requiring, as a condition precedent to the issuance of a license by an individual member of the Society, the approval and consent, to be obtained by the licensor, of the composer(s), author(s) and publisher subject to such reasonable regulations as may be adopted by the composer(s), author(s), and publisher for that purpose; (e) by prohibiting the members from granting or assigning to persons, firms, corporations or enterprises, including Broadcast Music, Inc., the right to license or assign to others the right to perform publicly for profit the respective copyrighted musical compositions of which performance rights are owned or controlled by the respective members of the defendant Society.

(2) Defendant, American Society of Composers, Authors and Publishers, shall not enter into, recognize as valid or perform any performing license agreement which shall result in discriminating in price or terms between licensees similarly situated; provided, however, that differentials based upon applicable business factors which justify different prices or terms shall not be considered discriminations within the meaning of this sub-paragraph; and provided further that nothing contained in this sub-paragraph shall prevent price changes from time to time by reason of changing conditions affecting the market for or marketability of performing rights.

(3) Defendant, American Society of Composers, Authors and Publishers, shall not require, as a condition to any offer to license the public performance for profit of a musical composition or compositions for radio broadcasting, a license fee of which any part shall be (a) in respect of commercial programs, based upon a percentage of the income received by the broadcaster from programs in which no musical composition or compositions licensed by said defendant for performance shall be performed, or (b) in respect of sustaining programs, an amount which does not vary in proportion either to actual performance, during the term of the license, of the musical compositions licensed by said defendant for performance, or to the number of programs on which such compositions or any of them shall be performed; provided, however, that nothing herein contained shall prevent said defendant from licensing a radio broadcaster, either or both of the foregoing basis, if desired by such broadcaster, or upon any other basis desired by such broadcaster.

With respect to any existing or future performing license agreement with a radio broadcaster, defendant, American Society of Composers, Authors and Publishers, shall not, if required by such broadcaster, refuse to offer a per program basis of compensation on either or both of the following basis which may be specified by the broadcaster:

(i) in respect of sustaining programs a per program license fee, expressed in terms of dollars, requiring the payment of a stipulated amount for each program in which musical compositions licensed by said defendant shall be performed;

(ii) in respect of commercial programs, a per program license fee, either expressed in terms of dollars, requiring the payment of a stipulated amount for each program in which the musical compositions licensed by said defendant for performance shall be performed, or, at the option of defendant, the payment of a percentage of the revenue derived by the licensee for the use of its broadcasting facilities in connection with such program.

In the event that defendant shall offer to license the public performance for profit of a musical composition or compositions for radio broadcasting upon either or both of the foregoing per program basis, and shall also offer to license such performance on a basis of compensation which shall not vary in direct proportion

(Continued on page 199)
FOUR WEEKS TO MOVIN' DAY

Barring strikes, floods, fires and other acts over which we have no control, a large envelope containing at least the following will be mailed Saturday:

1—Special Movin' Day theme song written by BMI staff.
2, 3 & 4—Three Movin' Day scripts.
5—Release by Commissioner T. A. M. Craven.
7—Announcements, and
8—Perhaps other items.

WRITE ART STRINGER

Stations are now well under way with their promotional plans for Radio Movin’ Day. Will you tell us what they are? This kind of cooperation helps everybody.

RADIO GUIDE HELPS

Curtis Mitchell, retiring editor of Movie-Radio Guide, announces extensive cooperation with the broadcasting industry to publicize Movin’ Day and the new frequency locations.

"In our issue coming to the newsstand the week before the big station Movin' Day we tell readers what it is all about and what they may do by way of alleviating any inconvenience," he wrote.

"The following week we recapitulate the first article and present a station log showing all the stations with their new frequencies, listed alphabetically.

"The following week we will publish another station log giving the frequency of every American station listed according to kilocycles. We believe these special features, which will be played up big on our covers, will do a very satisfactory job."

KEN-RAD TUBE & LAMP CORP. OVER WLW

R. W. Metzner, sales manager of Ken-Rad, will include at least a 150-word Movin' Day editorial plug in his company’s 11:15 p. m. program over WLW on Mondays. This schedule started February 24 and will continue through April 14.

ORDER MOVIN' DAY LEAFLETS

Three thousand (3,000) or a million are prepared to get the 2-color leaflets to you in time for effective distribution. Over 400,000 imprinted leaflets will be turned over to parcel post or express company for stations on Saturday.

We will appreciate receiving orders at your early convenience. These leaflets are inexpensive and effective.

FIRST MAYORALTY PROCLAMATION

The chief executive of Hattiesburg, Miss., is the first Mayor to issue a Movin’ Day proclamation. News was reported by C. J. Wright, manager, WFOR, who made the contract. He said:

"We are transcribing the Mayor’s voice and will present it at opportune times between March 10-29. In addition we have also prepared and transcribed some promotional announcements that we will use in this campaign."

MINNESOTA AND THE NORTHWEST

Writes E. H. Gammons, general manager, WCCO:

"Twin City stations are already at work with the various groups of servicemen . . . the Northern States Power Company in Minnesota and other states in which it operates in the Northwest is distributing the change in frequencies in next month’s bills." Alminneapolis and St. Paul stations plan to begin their air campaign around the middle of March.

TOLEDO

J. H. Ryan, vice president, The Fort Industry Company, and head of WSPD, says: "We have received good cooperation from the local gas and electric companies."

ROCHESTER

William Fay, general manager, WHAM, says that Rochester stations have already had a meeting with the Electric League of Rochester, local manufacturers, radio dealers and servicemen, station representatives and advertising agencies. About the middle of the month the stations intend to begin a teaser campaign which will continue for approximately one week. Then stations will devote the remainder of the time to definite announcements regarding the change over of frequencies.

DENVER

Several of the Denver stations have had preliminary conversations as to suitable Movin’ Day promotion, according to word from Gene O’Fallon, president, KFEL.

ITHACA

Cornell University’s station WHCU, Ithaca, N. Y., has arranged with the local power company for 30,000 of the 2-color leaflets on reallocation to be enclosed with next month’s statements. Deal was set by Michael R. Hanna, general manager, WHCU.

CHATTANOOGA

The power company which serves Chattanooga will distribute 42,000 2-color Movin’ Day leaflets in March ‘bills on behalf of the city’s three stations WAPO, WDEF and WDOD. R. G. Patterson, WAPO, was contact.

February 28, 1941 — 197
THE STATE OF GEORGIA

Joe W. Kling, of the Georgia Power Company, which serves 75% of the entire state, is putting 225,000 logs of Georgia broadcast stations in next months' bills, according to a note from Howard Donahoe, program di¬

rector, WAGA, Atlanta.

The stuff is printed on red-orange cover stock. On the reverse side of the enclosure appears the following:

"March 29 Is Moving Day for U. S. Radio Stations

"Beginning March 29, your favorite radio station will have a new 'address' on the dial. On the other side of this card is published a list of all Georgia stations with their old and new frequencies in kilocycles. Use this table to locate your station. Or simply set the dial at the old location number and then vary it slightly up or back. You should be able to pick up your station in that way without difficulty.

"If you have a receiving set with push button tuning, a radio service man should make the proper adjustments for changed frequencies.

"The Georgia Power Company does not sell, install or repair radio sets. This card is sent to you only as a matter of information.

"Georgia Power Company"

The enclosures will go into homes and commercial establish¬

ments in the 450,000 square miles of territory served.

AMARILLO

Amarillo, Texas' two stations, KFDA and KGNC, will receive Movin' Day assistance from the Southwestern Public Service Company. Five thousand 2-color leaflets will be inserted in the March bills, according to John Ballard, general manager, KGNC.

ENCLOSED WITH THIS ISSUE

Enclosed with this issue of NAB Reports is a planographed copy of the official Movin' Day proclamation issued by the Governor of South Carolina. Like the other governors who have so far proclaimed, this chief executive has gone all the way to cooperate.

SAN DIEGO

J. Clark Chamberlain, secretary-manager, Bureau of Radio and Electrical Appliances, San Diego, Cal., is doing a fine job of promoting Movin' Day. On February 24 he wrote:

"We are working up and now have under production a special log for this territory of which we will print at least 50,000 copies for free distribution. Considerable newspaper advertising will be run by the Bureau. Every possible advantage to be gained from this change will be stressed in this copy. Users will be assured that the entire move is solely in the interest of the better reception.

"In addition to meetings of our Board we have had group dis¬

cussions of service dealers to make sure that they all understand the magnitude of the change over problem."

COLUMBUS, MISS.

The Columbus City Power and Light Department March bills will contain stuffers "telling of the change¬

over of WCBI," according to Bob McRaney, general manager of the station.

TWELVE PROCLAMATIONS

Up to Thursday noon, February 27, twelve governors had either issued Radio Movin' Day proclamations or had agreed to do so. The nine unreported cooperating governors are:

Culbert L. Olson—California
Ralph L. Carr—Colorado
Robert A. Harley—Connecticut
Henry F. Schrieker—Indiana
Keen Johnson—Kentucky
Leverett Saltonstall—Massachusetts
Paul B. Johnson—Mississippi
John W. Bricker—Ohio
Burnet R. Maybank—South Carolina

*Connecticut's governor is prohibited by law from making desired proclamation, but he will issue a statement instead.

Governors reported in NAB Reports of February 21 were:

Matthew M. Neely—West Virginia
Homer M. Adams—Arkansas
Payne Ratner—Kansas

Members of the Governors' Movin' Day Proclamation Committee are:

In many states the Governor's office will release a copy of the proclamation to all state papers, to press associations, radio stations and other interested parties. To make sure, however, that all stations receive news of the proclamation, without fail, it is suggested that members of the Governors' Movin' Day Proclamation Committee also notify stations by mail when, as and if the proclamation is issued.

It might be helpful also to carry a line in the letter stating the exact time after which the proclamation may be released. This is because the date of issuance of a proclamation may be later than the date stamped thereon.

**LINE UP MAYORS**

While the Governors' Committee is arranging matters don't forget to see the Mayors of cities in your service area about similar proclamations or resolutions.

**ASCAP SIGNS CONSENT DEGREE**

(Continued from page 196)

either to actual performances during the term of the licenses of the musical compositions licensed by said defendant for performance or to the number of programs on which musical compositions licensed by defendant shall be performed, defendant shall act in good faith so that there shall be a relationship between such per program basis and such other basis, justifiable by applicable business factors, including availability, so that there will be no frustration of the purpose of this sub-paragraph to afford radio broadcasters alternative basis of license compensation.

(4) Defendant, American Society of Composers, Authors and Publishers, shall not license the public performance for profit of any musical composition or compositions except on a basis whereby, in so far as network radio broadcasting is concerned, the issuance of a single license, authorizing and fixing a single license fee for such performance by network radio broadcasting, shall permit the simultaneous broadcasting of such performance by all stations on the network which shall broadcast such performance, without requiring separate licenses for such several stations for such performance.

(5) With respect to any musical composition in defendant's catalogue of musical compositions licensed for radio broadcasting and which is or shall be lawfully recorded for performance on specified commercially sponsored programs on an electrical transcription or on other specially prepared recordation intended for broadcasting purposes, said defendant shall not refuse to offer to license the public performance for profit by designated radio broadcasting stations of such compositions by a single license to any manufacturer, producer or distributor of such transcription or recording or to any advertiser or advertising agency on whose behalf such transcription or recording shall have been made who may request such license, which single license shall authorize the broadcasting of the recorded composition by means of such transcription or recordation by all radio stations enumerated by the licensee, on terms and conditions fixed by said defendant, without requiring separate licenses for such enumerated stations.

(6) Defendant, American Society of Composers, Authors and Publishers, shall, not, in connection with any offer to license by it the public performance for profit of musical compositions by users other than broadcasters, refuse to offer a license at a price or prices to be fixed by said defendant for the performance of such specific (i.e., per piece) musical compositions, the use of which shall be requested by the prospective licensee.

(7) Defendant, American Society of Composers, Authors and Publishers, shall not, in connection with any offer to license by it the public performance for profit of musical compositions by radio broadcasters, refuse to offer a license on a per performance on per program basis as provided for in paragraph II (3) hereof at a price or prices to be fixed by said defendant for the performance of such programs, the use of which shall be requested by the prospective licensee.

(8) Defendant, American Society of Composers, Authors and Publishers, shall not assert or exercise any right or power nor shall any of its members exercise any right or power to restrict from public performance for profit by any licensee of said defendant any copyrighted musical composition in order to exact additional consideration for the performance thereof, or for the purpose of permitting the fixing or regulating of fees for the recording or transcribing of such composition; provided, however, that nothing in this sub-paragraph shall prevent said defendant or its members from restricting performances of a musical composition in order reasonably to protect the work against indiscriminate performances or the value of the public performance for profit rights therein or to protect the dramatic performing rights therein, or, as may be reasonably necessary in connection with any claim or litigation involving the performing rights in any such composition.

(9) The Society shall not elect the members of the Board of Directors in any manner other than by a membership vote in which all author, composer and publisher members shall have the right to vote for their respective representatives to serve on the Board of Directors. Due weight may be given to the classification of the member within the Society in determining the number of votes each member may cast for the election of directors. Upon the expiration of the terms of office of the present directors, the provisions of this section shall apply to the election of their successors. Thereafter, not less than one-twelfth of the total membership of the Board of Directors shall be elected annually.

(10) Defendant, American Society of Composers, Authors and Publishers, shall provide in its by-laws that the Society shall not distribute to its members the moneys received by granting the right to perform copyrighted musical compositions publicly for profit on any basis other than the number, nature, character and prestige of the copyrighted musical compositions composed, written or published by each member, the length of time in which the works of the member have been a part of the catalog of the Society, and popularity and vogue of such works, all to be determined in a fair and non-discriminatory manner.

(11) Defendant, American Society of Composers, Authors and Publishers, shall not require as a condition precedent to eligibility for author or composer membership in the Society the regular publication of more than one musical composition or writing by any person who regularly practices the profession of writing music and the text or lyrics of musical works.

February 28, 1941 — 199
III. The terms of this decree shall be binding upon, and shall extend to each and every one of the successors in interest of defendant, American Society of Composers, Authors and Publishers, and to any and all corporations, partnerships, associations and individuals who or which may acquire the ownership or control, directly or indirectly, of all or substantially all of the property, business and assets of defendant, American Society of Composers, Authors and Publishers, whether by purchase, merger, consolidation, reorganization or otherwise. None of the restraints or requirements herein imposed upon the defendant shall apply to the acquisition of or licensing of the right to perform musical compositions publicly for profit outside the United States of America, its territories and possessions.

IV. For the purpose of securing compliance with this decree, and for no other purpose, duly authorized representatives of the Department of Justice shall, on the written request of the Attorney General or an Assistant Attorney General and on reasonable notice to defendant, American Society of Composers, Authors and Publishers, made to the principal office of said defendant, be permitted (a) reasonable access, during the office hours of said defendant, to all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of said defendant, relating to any of the matters contained in this decree; (b) subject to the reasonable convenience of said defendant and without restraint of interference from it, and subject to any legally recognized privilege, to interview officers or employees of said defendant, who may have counsel present, regarding any such matters; and said defendant, on such request, shall submit such reports in respect of any such matters as may from time to time be reasonably necessary for the proper enforcement of this decree; provided, however, that information obtained by the means permitted in this paragraph shall not be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Department of Justice, except in the course of legal proceedings in which the United States is a party or as otherwise required by law.

V. This decree shall become effective ninety (90) days after the entry hereof, except that the provisions of subparagraph (6) of paragraph II shall become effective nine (9) months after the effective date of the other provisions of this decree.

VI. Jurisdiction of this cause is retained for the purpose of enabling any of the parties to this decree to make application to the Court any time after the effective date hereof for such further orders and directions as may be necessary or appropriate in relation to the construction of or carrying out of this decree, for the modification hereof upon any ground for the enforcement of such compliance heretofore and the punishment of violations hereof. Jurisdiction of this cause is retained for the purpose of granting or denying such applications so made as justice may require and the right of the defendant to make such application and to obtain such relief is expressly granted.

United States District Judge.

We hereby consent to the entry of the foregoing decree.

For the Defendants:

BMI

THE NEW MUSIC CONQUERS CANADA

Broadcasts Music, Inc., announces that it has concluded arrangements for the printing of all of its leading popular tunes in Canada. A recent Canadian edition of 5,000 copies of I Hear A Rhapsody was sold within a week and was followed by the second 5,000 which was likewise exhausted within a week. Canada's three bestselling records at the present are I Hear A Rhapsody, Frencsi, and You Walk By, in the order named. Aside from war songs more than 90% of the songs ordered in the Dominion are BMI publications or licensed through BMI.

Copyright counsel for BMI recently appeared before the Copyright Appeal Board of Canada to request four cents out of the eight cents on each licensed receiving set in Canada for performing rights. This is the first time that the Copyright Appeal Board has received claims of two competitive agencies, the entire field having been covered heretofore by the Canadian Performing Rights Society, a subsidiary of ASCAP. The Canadian Association of Broadcasters stated at the hearing that they welcomed BMI to the field as a competitive source of music.

Analysis based on the performance of representative Canadian stations presented at the hearing indicated that total performances in Canada are now in the ratio of three BMI tunes to five ASCAP tunes. Each performing rights agency is required to file its catalogues and its tariff of expected charges with the Canadian Copyright Board for decision. An announcement of the proportion of the eight cents which will be allotted to BMI and to ASCAP is expected soon.

BMI GIVES A SONG TO BRITAIN

Peter Colefax, member of the Administrative Committee of the British War Relief Society, has acknowledged receipt of a letter from M. E. Tompkins, General Manager of Broadcast Music, Inc., which sets forth the desire of the composers of a new song, The Vesper Bells of Dover, to contribute their entire royalties from the sale and performance of the song to the Society. At the suggestion of the composers, Mr. Tompkins points out that BMI is also contributing its full share of any profits accruing from the sale and performance of the composition.

The song, written by Don McCray, Robert Sour, and Ernest Gold, appeals to the nostalgia in the heart of every Englishman for a return of "the days we knew
before” and “of the days that once again must be.” The chorus follows:

“The quiet hush of evening was falling once again
And the VESPER BELLS WERE RINGING IN DOVER.
Here friends could talk together and wander down the lane
While the VESPER BELLS WERE RINGING IN DOVER.
Now the old cathedral is facing troubled times
But still it welcomes nightfall with the same familiar chimes.
The great white cliffs are watching while waves come rolling in
And the VESPER BELLS KEEP RINGING CLEAR IN DOVER.”

BMI FEATURE TUNES
March 3-10

1. HIGH ON A WINDY HILL
2. YOU WALK BY
3. HERE’S MY HEART
4. WHERE’S THE CAPTAIN’S HAT
5. IT ALL COMES BACK TO ME NOW
6. MAY I NEVER LOVE AGAIN
7. I CAN’T REMEMBER TO FORGET
8. WISE OLD OWL
9. ACCIDENT’LY ON PURPOSE
10. KEEP AN EYE ON YOUR HEART
11. BECAUSE OF YOU
12. ALL I DESIRE
13. WALKIN’ BY THE RIVER
14. LET’S DREAM THIS ONE OUT
15. LITTLE SLEEPYHEAD
16. TALKING TO THE WIND
17. BREAKFAST FOR TWO
18. I LOOK AT YOU
19. SHADOWS IN THE NIGHT
20. STONE’S THROW FROM HEAVEN

The appeal of BMI tunes to the public is clearly established by their position in the coin machines, in phonograph record sales, and sheet music sales. In this week’s issue of Billboard 3 of the 6 top numbers in the coin machines and 5 of the 8 in the “coming up” group are numbers published or licensed by BMI. In Variety, 6 of the top 10 and 4 of the next 8 are from the BMI list. Phonograph record sales show that the 9 best selling records are all covered by the BMI license, while in sheet music sales the first 13 (according to Variety), 10 of the first 15 (according to Billboard) are covered by the BMI license.

Twenty-five new publishers have sprung up during the “battle of music,” 15 of them licensing their music through BMI. Among those who have recently entered the publishing business are a number of band leaders, singers, and composers. Claude Lapham, well-known composer and teacher, recently resigned from ASCAP and opened his own publishing house which will feature his music. Included in the firms whose performing rights are controlled by BMI are Regent Music Corp., publishing originals by Benny Goodman; Mutual Music, outlet for the music of the Glenn Miller band; Republic Music, owned by Sammy Kaye; London Music, issuing originals by the Guy Lombardo band; and Nationwide Music, specializing in songs written by its owner, Lanny Ross.

At the present time The Moon Won’t Talk, published by Regent Music, Number 10 Lullaby Lane from Warren Music, and I Do, Do You? published by Stevens Music, all licensed through BMI, are coming up rapidly among the most popular tunes of the country.

HIT MADE HIT-MAKER

A hefty swing to the jaw of Alberto Dominguez determined the future career of Latin America’s composer of the currently popular BMI hit tunes Frenesi and Perfidia.

Nine years ago, Dominguez, one of eighteen children, aspired to pugilistic fame. He had already made good as musician and composer at the age of nineteen with two musical hits to his credit. However, a deep-rooted hankering to become the bantam-weight champion of all Mexico obsessed him. He had up to that time slugged his way up to the top of the amateur class in his native Chiapas and the surrounding land. To test his boxing skill he entered the professional ranks in Mexico City and signed up for his premiere bout—a six-rounder. In the second round his opponent swung a haymaker that completed its arc of motion on Alberto’s chin. Alberto heard music, slumped to the ring floor, and later in his dressing room decided his future was in music. Today Dominguez contends that in the few seconds of semi-consciousness when he lay on the rosin-strewn ring mat he heard the most beautiful music. He’s been trying to interpret the charm of that elusive tune ever since.

Substituting the baton for the boxing gloves, Dominguez organized five of his eleven music-playing brothers into the “Dominguez Marimba Band.” Within four years his aggregation of tunemakers became the rage of music-made Mexico City. Radio Station XEW, most powerful south of the Rio Grande, signed Dominguez and his brothers for long-term service.

Dominguez relaxes by writing music. He is master of piano, trumpet, saxophone, violin, xylophone, and clarinet.

He hails from a family with wide musical background. His parents, in moderate circumstances, taught school with special emphasis on music. At the age of nine Dominguez played piano, xylophone, and trumpet sufficiently well to participate in the family circle orchestra. At ten he wrote Viva La Feria. It is still being played at festivals and county fairs in Mexico.

February 28, 1941 — 201
Frenesi and Perfidia have been pleasing Mexican ears for several years. Artie Shaw, vacationing in Mexico City last year, heard Dominguez play and got permission to feature Frenesi on his American radio program several months later. Shaw, it can be said, by featuring the tune really discovered the merits of Dominguez’ work. Perfidia followed Frenesi and when BMI pushed the songs they became hits.

Dominguez composes his music when inspired by mood or stress of emotion. When in the “moody groove,” he says, he can finger out on the piano a likeable tune in fifteen or twenty minutes. Frenesi was written after a hard day’s work and excitement. Dominguez couldn’t sleep and in his restlessness the melody came to him. He climbed out of bed, rushed to the piano with manuscript paper and pencil and poured out his feelings onto paper, via music. When dawn broke Frenesi was born.

Not a note from the original manuscript has been changed, Dominguez says.

The unassuming 28-year-old composer recently slipped unheralded into New York, bringing a bagful of tunes which he believes will strike American public fancy. One of the numbers, Un Momento (One Moment) he regards as his best selection. Another recent composition, Mala Noche (Insomnia), which he knocked off after a mild nightmare, will be played with Un Momento for the first time over an NBC network.

Apparently unaware of the tremendous popularity of his music in New York, Dominguez was startled when the bellboy in the Hotel Edison, where he is staying, pushed the button which set the room radio in tone and Frenesi filled the room.

“That’s a lovely song,” commented the bellhop, not knowing the guest’s identity. “I hear some ambitious Mexican music student wrote it. I bet he’s going places someday.”

Dominguez smiled and said simply, “It would be nice for that to happen.”

FRENESI GOES OVER THE TOP

The sales of phonograph records of Frenesi are giving a demonstration of the popularizing power of radio. Artie Shaw's record has already become one of the half-dozen best-sellers published by the RCA Victor Company in recent years. It was placed on sale about nine months ago. Its sales were good but not phenomenal until it began to be featured by BMI stations. During the last four months the sales of the record have mounted steadily and at the present time there are about ten other records of Frenesi selling under various labels. It is reliably stated that a record of Frenesi is to be found in nearly all of the country's 500,000 coin phonographs, with the Shaw recording featured in about half of them. According to present indications the total sale of Frenesi records by various orchestras will hit well over the million mark.

For the past ten weeks Frenesi has been among the leading sheet music sales with about 175,000 piano copies sold to date.

FIRST 100 PER CENT BMI PICTURE

The first 100% BMI picture will be Puddin' Head, starring Judy Canova and produced by Republic Pictures. Jack Owens will do the complete score. BMI will promote the top songs of the film on all of its member stations.

DUKE ELLINGTON RECORDS BMI HITS

Duke Ellington and his orchestra have recorded seven Broadcast Music, Inc. hit songs on electrical transcriptions for the Standard Radio, Inc., of Hollywood. The discs have been released to radio stations throughout the country and mark the first radio appearance of the Ellington group since last December when the band went on a tour of the west coast.

Numbers recorded by Ellington were: Bounce from Hellzapoppin', Frenesi, I hear A Rhapsody, It's Sad But True, Love and I, Madame Will Drop Her Shawl, and Until Tonight.

90 PER CENT BMI

Leon Mojica has written the BMI office in Hollywood as follows:

“Just a reminder to let you know that your tunes are very popular here in San Francisco.

“Tell it to me, I get requests every night for about 90 per cent BMI songs. Your Macumba, I'm At a Loss For Words and Walkin' By The River are very outstanding. In fact, they are tops.”

MARKS FEATURES NEW CUBAN FOX TROTS

The Edward B. Marks Music Corporation is featuring two new fox trots by Ernesto Lecuona, well-known Cuban composer whose most recent hit was The Breeze and I. The two new numbers are For Want Of A Star and Two Hearts That Pass In The Night. Both of these numbers are already being featured by leading orchestras including Jimmy Dorsey, Orrin Tucker, Tony Pastor, Guy Lombardo, and others and record companies have already scheduled them for waxing.
said that we were fortunate to have a number of ways
strong, in commenting on Mr. Morrison's presentation,
was necessary to build UHF tubes as small and compact
frequencies. He showed how leads of a few inches length
of elements and the relation to other elements in the
practical operating problems in FM transmitters.
pointed out that in order to obtain the proper strength
were discussed. Mr. DeMars, chairman of the round table,
discussed practical operating problems in FM transmitters.
by his discourse on UHF tubes, pointed out that the size
of elements and the relation to other elements in the
tube was of much more importance than at lower fre¬
cuencies. He showed how leads of a few inches length
could have many ohms reactance, and that therefore it
was necessary to build UHF tubes as small and compact
as possible.

The sessions on FM were fittingly summed up during
the “round table on FM problems” conducted by Mr.
Paul DeMars, Yankee Network, E. J. Content, WOR,
and Dan Gellerup, WTMJ. Many questions on various
FM problems had been submitted in advance and these
were discussed. Mr. DeMars, chairman of the round table,
showed slides of the new turnstile antenna installation
at Paxton. The slides showed how a separate transmission
line had been run from each element to a termination
house at the base of the tower, and the various elements
were then properly phased at that point. In showing
slides of the Mount Washington FM installation, DeMars
pointed out that in order to obtain the proper strength
the turnstile elements were made from automobile springs,
because the biggest hazard from ice was large chunks of
it falling on the elements and breaking them off.

Present at the banquet Thursday night at the Fort
Hayes Hotel were 19 engineers who had attended all four
of the Annual Broadcast Engineering Conferences. Pro-
fessor Everitt, Director of the Conference, presented each
of these engineers with a diploma, attesting to their four-
year attendance. In token of appreciation for the Con-
ferences, the members presented to Professor Everitt a
chronometer wrist watch, and a cigarette case and lighter
were presented to his secretary, Miss Dorothea Fismer.

The registration of 287, a gain of 39 over last year, at-
tested to the steady growth and popularity of the Con-
ferences. The list of those present shows that the members
of the Conference assembled from Coast to Coast. Several
of those in attendance came all the way from the West
Coast and Western Canada.

The Conference has come to be looked upon as the
main meeting each year for Broadcast Engineers. NAB
officially cooperated in the Fourth Broadcast Engineering
Conference, and Professor Everitt has indicated his desire
that this cooperation be extended to future conferences.

TELEVISION HEARING

The FCC on February 27 issued its release No. 47872
entitled “Procedure For Television Hearing Scheduled
For March 20, 1941.”

The following is quoted from this release:

The Commission on January 27, 1941, directed that a hearing
be held at its offices, Washington, D. C., beginning Thursday,
March 20, 1941, for the purpose of considering the various engi-
neering standards that have been suggested for television broadcast
stations, to determine when television broadcasting shall be placed
upon a commercial basis, and to afford all interested parties full
opportunity to be heard on all the pertinent problems related to
the standardization and commercialization of television broadcast-
ing. This action of the Commission was set forth in a press release
dated January 28, 1941. The press release included the statement:
“The Commission will issue a more specific notice as to suggested
rules for consideration, and the procedure for the scheduled hear-
ing.”

Pursuant to the above, interested parties are requested to con-
sider the advisability and effect of the promulgation by the Com-
mision of the attached drafts: (1) rules and regulations for com-
mercial television broadcast stations; (2) rules and regulations for
experimental television broadcast stations, and (3) standards of
good engineering practice for the consideration of television
stations. In several instances the suggested standards are in the alter-
native, and the Commission desires to hear interested parties on the ad-
visability and effect of alternative suggestions, as well as on the
question when the rules and regulations permitting commercializa-
tion shall be placed in effect, and the question whether standard-
ization and commercialization shall apply to any of the higher
television channels Nos. 8 to 18, both inclusive. It is to be under-
stood that neither the regulations nor the standards have received
the approval of the Commission and are to be taken solely as a
basis for directing the attention of the parties to the issues in
this proceeding.

All interested parties will be afforded full opportunity to propose
standards, to comment upon standards which have been proposed by
others, to cross-examine various witnesses and, generally, to
be heard upon all the pertinent problems in connection with the
standardization and commercialization of television.

The attention of persons interested in frequency modulation
for the sound channel is invited to the alternative transmission
standards Nos. 13 and 22.

All parties desiring to appear are requested to file with the
Commission in this proceeding (Docket No. 5506), on or before
March 15, 1941, a notice of desire to be heard setting forth the
subjects to which their testimony will be directed, the number
of witnesses desired to be heard, and the estimated time for pre-
senting testimony. In the event any party desires to make pro-
posals for regulations or standards not set forth in the attachments
the notice should specifically set forth such proposals. Eighteen
copies of the notice of desire to be heard should be submitted,
and, in addition, at least 18 copies of any printed or typewritten
material desired to be offered in connection with the testimony
should be made available at the hearing.
The hearing will begin at 10 a. m., and will be held in Hearing
Room “A”, Interstate Commerce Commission Building.

The public notice contained attached drafts of rules
and regulations for commercial and experimental television
broadcast stations and standards of good engineering
practice for television stations.

The proposed rules, regulations and standards were
outlined in complete detail and in the cases where there
may be a controversy, the alternatives were listed.

While being guided by the final finding of the National
Television Systems Committee, it is apparent that the
rules and regulations outlined for discussion by the FCC contain the alternatives wherever there may be a minority opinion opposed to the general opinion of the NTSC.

**Legislation**

**FEDERAL**

**HOUSE**

H. R. 3464 (WALTER, D-Penna.)—To provide for the more economical, expeditious, and just settlement of disputes with the United States, and for other purposes. Referred to Committee on Judiciary.

**HOUSE JOINT RESOLUTION**

H. J. Res. 123 (Sheridan, D-Penna.)—To define the principle of international reciprocity in the protection of American patents, trade-marks, secret formulas and processes, and copyrights by providing a method for assuring the payments of amounts due to persons in the United States from users thereof in countries restricting international payments from their territories. Referred to Committee on Patents.

**STATE**

**GEORGIA:**

S. 133 (Edenfield et al.) SMALL LOANS—To define and regulate the business of making loans in the amount of $300 or less. Referred to Committee on Special Judiciary.

**MARYLAND:**

H. 394 (Baunes) FRAUDULENT ADVERTISING—AMUSEMENTS—To add a new section to Article 27 of the Annotated Code of Maryland (1939 Edition), title “Crimes and Punishments”, sub-title “Fraud-Advertisements”, said new section to be known as Section 212A, relating to the use of the true names of performers in advertisements publicizing shows given for the amusement and entertainment of the public. Referred to Committee on Judiciary. S. 303 (Lindsay) MUSICAL COPYRIGHTS—To add Secs. 364-370 to Art. 56 of the Annotated Code (1939 Ed.), providing for the licensing and regulation of the business of collecting royalties from copyrighted musical compositions. Referred to Committee on Finance.

**New Mexico:**

S. 149 (ArmiJo) FEEDING STUFFS—To amend school (sales) tax law to provide that feed stuffs sold in bulk shall take wholesale instead of retail rate and among other things imposes a 2% tax on gross receipts of broadcasting stations. Referred to Committee on Livestock.

**Pennsylvania:**

S. 324 (Deest) MUSIC COPYRIGHTS—RADIO STATIONS—Regulating the copyrights and the performing rights of any composition of music, lyrics, verse or drama; providing for a filing fee of 5 cents for each number registered and an annual maintenance fee of 2 cents for each number; prohibiting a flat performing fee in contracts with radio stations and providing for a compensation on a program basis; prohibiting the use of material without permission. Referred to Committee on Judiciary Special.

**PROPOSED REVISION OF EXCESS-PROFITS TAX**

On Tuesday the House passed a series of amendments to the Excess-Profits Tax Section of the Second Revenue Act of 1940. The Bill has now been placed on the Senate calendar and prompt passage is expected.

These amendments are the result of study by Treasury and Congressional tax experts since the Excess-Profits Tax Act was passed last October. They are designed to alleviate hardships inherent in the original tax measure. In general the amendments provide methods for eliminating hardships caused by abnormalities of income in the base period years, on which the excess-profits credit is based, and in the taxable year itself.

Of particular interest to many broadcasting corporations is the amendment providing for an alternative method for computing the excess-profits credit on the average earnings method. As pointed out in a previous article on the excess-profits tax, appearing in NAB Reports, of October 4, 1940, corporations subject to the tax which are just emerging from their development period with a record of meager earnings in the base period years (1936-39), would be penalized unduly by the existing law.

This amendment provides an alternative method; permitting the averaging of the first two and the second two years of the base period separately, taking the difference between the two averages and adding half of this difference to the average for the last 2-year period. However, it is provided that this credit shall not exceed the amount of the excess-profits tax net income of any one year of the base period.

This means, in effect, that a corporation with constantly increasing earnings during the 4-year base period can have a credit up to the amount of the highest excess-profits tax net income year of the four.

Other amendments relate to a 2-year carry-over of unused credit against income, subject to the excess-profits tax, as compared to a 1-year carry-over in the present bill; specific deductions for abnormal income in the 4-year base period; joint returns for insurance companies; the recapitalization of advertising and other goodwill expenses included in the base year period which are clearly of a nature of a capital investment; revision of income categories affecting the excess-profits tax base in years now subject to statute of limitations, and revision of the general relief section of the excess-profits law to permit upward revision of abnormally low incomes in base period years.

**BILL TO ARBITRATE MUSIC FEES**

A measure (H. R. 3456) has been introduced in Congress by Representative Martin J. Kennedy (D.-N. Y.) which seeks to protect the public in hearing and enjoying the playing of copyrighted music. The price for performing rights is declared affected with public interest, and whenever a copyright pool refuses to sell performing rights at a fair and reasonable compensation, the Federal
Trade Commission is empowered to arbitrate the price. If the pool fails to comply, it shall be guilty of an unfair method of competition, and its copyrights subject to condemnation proceedings. Any person wilfully refusing to license performing rights at a fair and reasonable price would be subject to $5000 fine or one year's imprisonment or both.

We print the bill in full:

H. R. 3456
77TH CONGRESS—1ST SESSION
IN THE HOUSE OF REPRESENTATIVES
FEBRUARY 18, 1941

Mr. Martin J. Kennedy introduced the following bill; which was referred to the Committee on Interstate and Foreign Commerce

A BILL

To protect the public, sponsors of broadcasting programs, broadcasting stations, performers, and all persons interested in radio from being deprived of the enjoyment by means of radio broadcast of music.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Protection of the Public in Hearing and Enjoying the Playing of Copyrighted Music".

DEFINITIONS

Sec. 2. As used in this Act—
(a) The term "person" means an individual, partnership, corporation, association, or any other form of business enterprise, plural or singular, as the case may be;
(b) The term "music" means any musical composition, with or without lyrics, and for which a United States copyright has been issued;
(c) "The public" means all persons citizens of the United States;
(d) "Sponsors" means persons who for value engage time on broadcasting stations and pay for programs thereon;
(e) "Programs" means any time on broadcasting stations giving entertainment, musical or nonmusical;
(f) "Broadcasting stations" means any person engaged in broadcasting by radio;
(g) "Performers" means any persons engaged in presenting entertainment, either musical or nonmusical, on broadcasting programs;
(h) The term "Commission" means the Federal Trade Commission.

The term "Territory" includes the insular possessions and any Territory of the United States.

Sec. 3. It is hereby determined and declared that the price or charge for a license or permission to perform copyright music in theaters, places of amusement or entertainment, or other places where public exhibitions, games, contests, or performances are held, or by means of radio or other electrical devices, is a matter affected with public interest and subject to regulation by the Government of the United States for the purpose of safeguarding the public against fraud, extortion, exorbitant rates, and similar abuses.

Sec. 4. Whenever two or more persons, owners, assigns, or possessors of a United States copyright on any musical production combine or join in an association to fix or limit the price charged for the public use or performance of said musical production shall refuse to enter into an agreement or contract with any other person permitting that person to publicly use said musical productions upon the payment of a fair and reasonable compensation, the Federal Trade Commission shall, upon the application of any interested party, summon before it the persons seeking the use of said copyright musical production and the owner, assignee, or possessor of such copyright musical and after hearing all parties fix a reasonable compensation for such use and shall make an order thereon permitting the use of said copyright music upon the payment of such fixed compensation. Any person refusing to comply with the terms of such order shall be guilty of an unfair method of competition within the meaning of the Federal Trade Commission Act.

Sec. 5. (a) Except as otherwise specifically provided herein, this Act shall be enforced by the Federal Trade Commission under rules, regulations, and procedure provided for in the Federal Trade Commission Act.

The Commission is authorized and directed to prevent any person from violating the provisions of this Act in the same manner, by the same means, and with the same jurisdiction, powers, and duties as though all applicable terms and provisions of the Federal Trade Commission Act were incorporated into and made a part of this Act; and any such person violating the provisions of this Act shall subject to the penalties and entitled to the privileges and immunities provided in said Federal Trade Commission Act, in the same manner, by the same means, and with the same jurisdiction, powers, and duties as though the applicable terms and provisions of the said Federal Trade Commission Act were incorporated into and made a part of this Act.

Sec. 6. Any copyright of any musical production shall be liable to be proceeded against in the district court of the United States for the district in which the owner, assignee, or possessor of such copyright shall reside or maintain a place of business and to be seized for confiscation by process of libel for condemnation if the Commission has reasonable cause to believe that the owner, licensee, or possessor of such copyright has refused to comply with the order of the Commission as provided for by section 4 of this Act. Proceedings in such libel cases shall conform as nearly as may be to suits in rem in admiralty and may be brought by the Commission.

If such copyrights are condemned by the court, they shall be disposed of in the discretion of the court by sale to the highest bidder on a public sale or by cancellation. If such copyrights are disposed of by sale, the proceeds less legal costs and charges shall be paid into the Treasury of the United States.

Sec. 7. Any person who willfully violates section 4 of this Act shall be guilty of a misdemeanor and upon conviction shall be fined not more than $5,000 or be imprisoned not more than one year or both in the discretion of the court; provided that nothing herein shall limit other provisions of this Act.

Whenever the Commission has reason to believe any person is guilty of a misdemeanor under this section it shall certify all pertinent facts to the Attorney General, whose duty it shall be to cause appropriate proceedings to be brought for the enforcement of the provisions of this section against such person.

Sec. 8. The provisions of this Act shall be held to be in addition to, and not in substitution for or limitation of, the provisions of any other Act of the United States.

EFFECTIVE DATE

Sec. 9. This Act shall take effect six months after the date of its passage.

SEPARABILITY CLAUSE

Sec. 10. If any provision of this Act, or the application thereof to any person, partnership, corporation, or circumstance is held invalid, the remainder of the Act and the application of such provisions to any other person, partnership, corporation, or circumstance shall not be affected thereby.

Sales

COST-PER-INQUIRY

On the cost-per-inquiry front, a number of concerns are trying to get stations to accept contingent deals and guarantee a fixed return. Some of these are:

Mendenhall Manufacturing Company, Mendenhall, Miss. (hosiery).
Don Howard, Radio Advertising, Del Rio, Texas, on behalf of Bargain Book House ("The Home Book of Medicine").
Haldeman-Julius Publications, Girard, Kansas (Little Blue Books).
Walter E. Battenfield Company, Des Moines, Iowa, on behalf of Mendenhall Manufacturing Company, Mendenhall, Miss, (hosiery).
Haldeman-Julius Publications, Girard, Kansas (Little Blue Books).
The Bible Press, Richmond, Virginia (Bibles).

All six, in the opinion of the Bureau of Radio Advertising, are opposed to the best interests of radio stations, and
the Bureau has written them accordingly. At the same
time, it has invited each of the above-named companies
to give serious consideration to a paid radio campaign,
if they wish to obtain maximum results and maintain
the continued goodwill and cooperation of the broad-
casting industry.

Miscellaneous

DISTRICT 1 MEETING

A meeting of the NAB stations in the First District
(New England) is scheduled for March 4, at the Hotel
Bancroft in Worcester, Massachusetts, beginning at 10
a.m. A staff representative of NAB will attend to discuss
industry problems and Association activities, and bring
the New England broadcasters up to date on music de-
velopments. Election of a District Director for the en-
suing two-year term will be an important item of business.

THAD BROWN DIES

Thad H. Brown, 54 years old, former member of the
Federal Communications Commission, died Tuesday night
at Cleveland, Ohio, according to word received in Wash-
ington, from an intestinal ailment.

He served on the Federal Communications Commission
from its inception until last October. The former secre-
tary of state of Ohio, unsuccessful candidate for governor
in 1926, left the FCC to return to private law practice
after the Senate Interstate Commerce Committee refused
to confirm his reappointment to the Commission.

MONOPOLY REPORT A "CURRENT
PROBLEM"

Asked about the FCC monopoly report at a press con-
ference early this week, James Lawrence Fly, Chairman,
said that the report from the Legal Division had been
somewhat delayed because of the illness of Assistant Gen-
eral Counsel Rauh. He expressed the hope that the
Legal Division's draft of the report would be made to
the Commission itself sometime this week.

Chairman Fly said that the "report is a current problem
and will receive current attention." He said how long
it will take the Commission to iron out the report, he did
not know.

Mr. Fly told the newspapermen that there is nothing
particularly new insofar as the Defense Communications
Board is concerned. Committees of the Board, he stated,
are starting to function in turning out their reports. There
are now three or four before the Board and the Coordin-
ating Committee has received a considerable number.
Such reports are preliminary and cover special phases.

Mr. Fly in answer to a question said that he did not be-
lieve that the reports themselves would be made public,
but stated that he would try to devise some means to
give out a general statement covering at least some of
the reports.

FM EXPERIMENTALLY OPERATING

FCC has announced its policy concerning the existing
high frequency broadcast stations operating experiment-
ally by means of frequency modulation as follows:
I. A person having (1) an experimental FM station and (2) a
commercial FM construction permit may be authorized, upon ap-
propriate request, to operate his existing station commercially on
the frequency designated in the commercial construction permit
with commercial call letters, provided the applicant demonstrates
that he has made a bona fide effort to comply with the construction
permit. Such showing must include photostatic copy of acknowl-
edgment of order for transmitter and promised delivery date.
II. A person having (1) an experimental FM station and (2) an
application pending for a commercial FM construction permit may
be granted one or more extensions of his present special temporary
experimental authorization, on condition that operations there-
under shall be experimental only, on the experimental frequency,
and with experimental call letters.
III. A person having an experimental FM station but no com-
mmercial construction permit or application pending therefor may
be granted one or more extensions of his present special temporary
experimental authorization, so long as no commercial FM broad-
cast service is actually rendered in the area served by such experi-
mental station. When such commercial FM service is placed in
operation the special temporary experimental authorization will
be discontinued.*

CHANGE IN INTERNATIONAL
BROADCAST RULE

The following paragraph has been added to FCC Rule
4.44(c):

"Any frequency assigned to an international broadcast station
shall also be available, during hours when such frequency is not
regularly used by such station or when no objectionable interfer-
ence would be caused to the service rendered by any existing inter-
national broadcast station, for assignment to other international
broadcast stations."

BROADCAST MEASUREMENTS

FCC experts during January measured 722 broadcast
stations, leaving 153 stations not measured.

Of these stations 673 showed a maximum deviation
within 0-10 cycles; 44 stations within 11-25 cycles; and
5 stations within 26-50 cycles. No stations showed a
deviation over either 20 or 50 cycles.

FROM THE FCC MAIL BAG

The Federal Communications Commission has re-
ceived the following resolution from the Greenwich
(Conn.) Council of Women:

"Resolved, That the Greenwich Council of Women commend
the increased policing of radio by the Federal Communications
Commission, to guard against subversive activity, and the Council
also notes with gratification the special appropriation of $1,600,000

* No authorization for any class of high frequency broadcast station (whether
AM or FM) which expired January 1, 1941, by Order No. 69, and which has
not heretofore been extended, may be reinstated.
authorized for this purpose by the President, and $175,000 from Congress with which to reallocate six of its seven main monitoring stations to detect unlicensed transmitters."

The Commission, which functions largely as a licensing authority, informs a Canadian professor that it is unable to confirm a radio announcement concerning the capture of a member of the British RAF as a prisoner of war, but suggests that the inquirer communicate direct with the management of the station over which the announcement was made.

A New Orleans man is advised that the Commission has issued no rules or regulations with reference to the transmission and delivery of interstate telegrams. It explains that ordinarily the telegraph companies in their tariff schedules establish the rules and regulations applicable to this subject. The companies are required by the Commission to maintain copies of such tariff schedules for public inspection. Accordingly, these schedules can be consulted at New Orleans.

Since it has no jurisdiction over oil pipe lines, the Commission has referred to an appropriate authority the request of a State commission for information as to the date certain pipe lines were laid in that State.

An advertising agency which wants the broadcast industry to observe standard time throughout the year as a solution to the time-change problem is informed that the matter is one for determination by the industry itself.

A Yonkers, N. Y., man would ban from the air continuities of finance companies on the ground that they have a tendency to undermine stability of those not in a position to borrow money. He is advised that complaints relative to misrepresentation and unfair methods of competition in interstate commerce should more properly be addressed to the Federal Trade Commission.

A Long Island man opines that certain news commentators "are alarmists and should be held in restraint." His attention is invited to that section of the Communications Act which prohibits censorship of radio programs.

A woman protests the cancellation of a certain radio contract and a manufacturer complains of the refusal of a station to broadcast an advertising announcement with respect to a patent medicine. The Commission is without authority to require that a station transmit a particular program against the will and judgment of the licensee. The Communications Act specifically states that a person engaged in radio broadcasting shall not be considered a common carrier. Any business contract between a station and a sponsor is private in nature.

Various persons who complain about advertising on the air are reminded that the Commission is limited by statute from exercising any power of censorship. Existing legislation places the responsibility for the selection of program material upon the station licensees, who are charged with the duty of operating in the public interest. In connection with renewals of licenses the Commission reviews the conduct of stations during preceding license periods and considers complaints involving any action of the station claimed to have been against the public interest. In his application for a station construction permit, the applicant is required to furnish an analysis of the average number of hours devoted to the various types of commercial and sustaining programs, such as religious, educational, civic, agricultural, and fraternal, as well as those intended solely for entertainment. As previously pointed out, the Commission has no jurisdiction over private contracts for program service.

A New Yorker who applied for a license to do "radio servicing" is told that this is not a Commission function.

A Providence, R. I., inquirer is informed that as of February 1 of the current year there were 294 standard broadcast stations owned or controlled by newspapers or affiliated with newspapers.

To frequent requests for a copy of the International Morse Code, the Commission advises that the same appears in its printed booklet, "Study Guide and Reference Material for Commercial Radio Operator Examinations," which is sold by the Superintendent of Documents, Government Printing Office, Washington, at 15 cents a copy.

---

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following hearings are scheduled to be heard in broadcast cases before the Commission during the week beginning Monday, March 3. They are subject to change.

**Monday, March 3**

NEW—William D. Hudson and Violet Hutton Hudson, Clarksville, Tenn.—C. P., 1570 kc., 250 watts, unlimited time.

**Tuesday, March 4**

KWK—Thomas Patrick, Inc., St. Louis, Mo.—C. P., 680 kc., 50 KW, unlimited, DA day and night.
KMCB—Midland Broadcasting Co., Kansas City, Kans.—C. P., 690 kc., 50 KW, unlimited, DA night; requests facilities of KGIF, KFEQ and WNAD as proposed by N.A.R.A.
KOMA—KOMA, Inc., Oklahoma City, Okla.—C. P., 690 kc., 50 KW, unlimited, DA night.
KGIF—Hugh J. Powell, Coffeyville, Kans.—C. P., 690 kc., 5 KW, specified hours, DA night.

**Thursday, March 6**

Consolidated Hearing

NEW—Stephen R. Rintoul, Stamford, Conn.—C. P., 1370 kc., 250 watts, unlimited.

---

February 28, 1941 — 207
FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings. They are subject to change.

March 28

KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Modification of license, 1310 kc., 500 watts night, 1 KW day, unlimited. Present assignment: 1310 kc., 250 watts night, 1 KW day, unlimited.

NEW—J. C. Kaynor, Ellensburg, Wash.—C. P., 1310 kc., 250 watts, unlimited.

April 3

To Be Heard Before Commissioner Paul A. Walker. Place of Hearing to Be Later Designated

WTMC—Ocala Broadcasting Company, Inc., Ocala, Fla.—In the Matter of Revocation of License of Station.

WDLP—Panama City Broadcasting Company, Panama City, Fla.—In the Matter of Revocation of License of Station.

April 10

NEW—Granite District Radio Broadcasting Co., Murray, Utah.—C. P., 1500 kc. (1490 kc. when Havana treaty is effective), 250 watts, unlimited.

APPLICATIONS GRANTED

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Granted construction permit to increase power from 1 KW night, 5 KW day, to 5 KW day and night; install new radiators for nighttime directional array; directional antenna with different patterns day and night; 580 kc. (B1-P-3019).

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted renewal of license on a temporary basis to operate on 690 kc., with 1 KW day and 500 watts night, commencing March 29, 1941, pending Commission final action on amended application (B4-P-2883).

WNAD—University of Oklahoma, Norman, Okla.—Granted construction permit to move transmitter site from Engineering Bldg., University of Oklahoma, to approximately 1 mile south of the center of Norman, Okla., East Stadium, University of Okla.; change frequency from 1010 kc. to 610 kc.; install new antenna; and change hours of operation from specified to daytime only, subject to approval of antenna and antenna site (B3-P-3074).

KFBH—The Farmers and Bankers Broadcasting Corp., Wichita, Kans.—Granted modification of construction permit to make changes in directional antenna for night use (B4-MP-1156).

WABI—Community Broadcast Service, Inc., Bangor, Maine.—Granted construction permit to install new transmitter; install directional antenna for use after sunset at Chicago; change frequency from 1200 to 910 kc. (after March 29); and increase power from 250 watts to 5 KW (B1-P-2349).

WCFL—Chicago Federation of Labor, Chicago, Ill.—Granted construction permit to increase power from 5 to 10 KW, unlimited time, on 970 kc.; install new transmitter and directional antenna for day and night use (B4-P-2961).

WIN—Hearst Radio, Inc., New York City.—Granted construction permit to install new transmitter, directional antenna for day and nighttime, increase power from 1 to 50 KW; change frequency from 1180 to 1000 (NARBA frequency) kc., and increase hours of operation from limited to unlimited, subject to approval of antenna and antenna site (B1-P-3026).

Lewistown Broadcasting Co., Lewistown, Pa.—Granted construction permit for a new station to operate on 1500 kc., 250 watts, unlimited time (B2-P-2977).

WCRC—Columbia Broadcasting System, Inc., Brentwood, N. Y.—Granted modification of construction permit (B1-PIB-26) for international broadcast station, approving antenna and adding frequency 9650 kc., in addition to present frequencies; time of operation: sharing with WCAB on 6060 and 21350 kc., with WCAB and WCBX on 9650, 11830 and 13270 kc. (B1-MPIB-17).

WCBS—Columbia Broadcasting System, Inc., Brentwood, N. Y.—Granted modification of construction permit (B1-PIB-27) for international broadcast station approving antenna system and change in type of operation: share 9650, 11830 and 13270 kc. with WCAB and WCRC (B1-MPIB-18).

WCH—Congress Street Hotel Co., Portland, Me.—Granted modification of construction permit (B1-P-2535 which authorized installation of directional antenna for day and night use and increase in power to 5 KW on 940 kc.), for extension of completion date to April 25, 1941 (B4-MP-1174).

DESIGNATED FOR HEARING

KWTO—Ozarks Broadcasting Company, Springfield, Mo.—Construction permit to increase hours of operation from specified hours, a.m., to unlimited time, and install directional antenna for night use; frequency 560 kc., 1 KW night, 5 KW day (B4-P-2827).

Western Gateway Broadcasting Corp., Schenectady, N. Y.—Application for construction permit amended so as to request new station in Schenectady to operate on 1210 kc., 250 watts, unlimited time, to be heard with application filed by Van Curler Broadcasting Corp. requesting same facilities (B1-P-2690).

Parkersburg Sentinel Co., Parkersburg, W. Va.—Application for construction permit to establish a new station to operate on 1310 kc., 250 watts, unlimited time, exact location of transmitter and studio sites to be determined with Commission’s approval (B2-P-3013).

KOVO—Clifton A. Tobloe, tr/a Citizens Voice and Air Show (Assignor), KOVO Broadcasting Co., a corp. (Assignee), Prevo, Utah.—Application for consent to voluntary assignment of license of station KOVO to a corporation formed and controlled by that individual; 1210 kc., 250 watts; unlimited time (B5-AL-278).

WFNC—W. C. Ewing and Harry Layman, d/b as Cumberland Broadcasting Co. (Assignor), W. C. Ewing and T. K. Weyher, partners, d/b as Cumberland Broadcasting Co. (Assignee), Fayetteville, N. C.—Application for consent to voluntary assignment of license of WFNC from W. C. Ewing and Harry Layman, d/b as Cumberland Broadcasting Co., to W. C. Ewing and T. K. Weyher, a partnership, doing business under same firm name; (B-3-AL-288) and application for renewal of license to operate on 1310 kc., 250 watts, daytime.

Federated Publications, Inc., Grand Rapids, Mich.—Application for construction permit for new high frequency (FM) station to operate on frequency 46100 kc., service area 5,300 square miles, hours of operation day 4 hours, night 4 hours (B2-PH-60).

Federated Publications, Inc., Battle Creek, Mich.—Application for construction permit for new high frequency (FM) station to operate on frequency 48100 kc., service area 4,100 square miles, hours of operation day 4 hours, night 4 hours (B2-PH-59).

Federated Publications, Inc., Lansing, Mich.—Application for construction permit for new high frequency (FM) station to operate on frequency 47100 kc., service area 3,820 square miles, hours of operation day 4 hours, night 4 hours (B2-PH-61).

(RENEWAL OF LICENSES

W5XEP—RCA Manufacturing Co., Inc., Camden, N. J.—Granted renewal of television broadcast station license for the period ending February 1, 1942.

W5XUI—State University of Iowa, Iowa City, Ia.—Granted renewal of television broadcast station license for the period ending February 1, 1942.

W3XE—Philco Radio and Television Corp., Philadelphia, Pa.—Present television station license further extended upon a
temporary basis only, for the period ending April 1, 1941, pending determination upon application for renewal.

W3XN—Philco Radio and Television Corp., Portable area of Philadelphia, Pa.—Present television station license further extended upon a temporary basis only, for the period ending April 1, 1941, pending determination upon application for renewal.

W2XH—General Electric Co., Schenectady, N. Y.—Present television station license further extended upon a temporary basis only, for the period ending April 1, 1941, pending receipt of application for renewal.

W2XK—OKO, Inc., Albany, N. Y.—Granted renewal of facsimile broadcast station license for the period ending March 1, 1942.

W5XUM—WBXS, Inc., Columbus, Ohio.—Granted renewal of facsimile broadcast station license for the period ending March 1, 1942.

W9XWT—Courier-Journal and Louisville Times Co., Eastwood, Ky.—Granted renewal of facsimile broadcast station license for the period ending March 1, 1942.

W9XYZ—The Pulitzer Publishing Co., St. Louis, Mo.—Present facsimile broadcast station license extended to April 1, 1941, pending action on renewal application.

**MISCELLANEOUS**

WFLA—The Tribune Co., Tampa, Fla.—Adopted order authorizing The Tribune Co. to continue its program tests for a period not to exceed 30 days beyond February 22, 1941; denied petition in respect to issuance of a license (B3-P-2866).

KWW—Thomas Patrick, Inc., St. Louis, Mo.—Granted motion to dismiss the petition for rehearing filed November 19, 1940, directed against Commission action of October 29, 1940, granting without hearing the application of Brown County Broadcasting Co., for a new station in Brownwood, Texas, to operate on frequency 1350 kc., 500 watts, unlimited time (B3-P-2672).

J. C. Kaynor, Ellensburg, Wash.—Granted petition to advance hearing date now scheduled for April 2 to March 28 on application for new station to operate on 1210 kc., 250 watts, unlimited time.

J. C. Kaynor, Ellensburg, Wash.—Granted petition for order to take deposits in rehearing on application listed above.

Community Broadcasting Corp., Middletown, N. Y.—Granted motion for order to take deposits in rehearing on application for construction permit to operate on 1310 kc., 250 watts, unlimited time.

WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla.—Adopted order designating Commissioner Walker to preside at the hearing ordered by order revoking the license of Ocala Broadcasting Co., Inc., for the operation of station WTMC, said hearing to be held April 3, in a Florida city to be designated.

WDLP—Panama City Broadcasting Co., Panama City, Fla.—Adopted order designating Commissioner Walker to preside at the hearing ordered by order revoking the license of Panama City Broadcasting Co., for the operation of station WDLP, such hearing to be held April 3, in a Florida city to be designated.

KBPS—Benson Polytechnic School, R. T. Stephens, Agent, Portland, Ore.—Granted authority to install automatic frequency control apparatus (B5-P-172).

KWWKH—International Broadcasting Corp., Shreveport, La.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-408).

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Granted authority to determine operating power by direct measurement of auxiliary transmitter (B3-Z-666).

W4SY—Evansville on the Air, Inc., Evansville, Ind.—Granted modification of construction permit (B4-PH-11), which authorized a new FM station, for change in type of transmitter and change in location of transmitter from 519 Vine St. to 2nd Floor, 203 NW, 5th St., Evansville, Ind. (B4-MPH-10).

WEGQ—Broadcasting Service Organization, Inc., Mobile (area of Boston).—Granted construction permit for reinstatement of relay broadcast station WEGQ, make changes in equipment, and increase power from 5 to 15 watts; frequencies 30820, 33710, 35820, 37980 kc. (B1-PRE-382).

Piedmont Publishing Co., Portable-Mobile (area of Winston-Salem, N. C.).—Granted construction permit for new relay broadcast station to be used in connection with applicant's standard broadcast station WSJS; frequencies 1622, 2058, 2150, 2790 kc., 100 watts (B3-PRY-233).

WLOY—Loyola University, Portable-Mobile (area of New Orleans, La.).—Granted license to cover construction permit (B3-PRY-230), which authorized a new relay broadcast station to be used with applicant's standard broadcast station WLO; frequencies 1622, 3938, 2150, 2790 kc., 100 watts (B3-LRY-219).

WEND—WHNP, Inc., Portable-Mobile (area of Harrisburg, Pa.).—Granted license to cover construction permit (B2-PRY-228), to make changes in equipment, increase power to 2 watts, and change frequencies to 1500, 2584, 3300, 2538 kc., to be used with applicant's standard broadcast station WPNP. (Subject to condition no interference is caused to Government stations on adjacent frequencies.) (B2-LRY-220).

WDAC—State of Wis., Univ. of Wisconsin, Portable-Mobile, area of Madison, Wis.—Granted license to cover construction permit (B4-PRY-227), for new relay station to be used with applicant's standard broadcast station WHA, Madison; frequencies 1622, 2058, 2150, 2790 kc., 30 watts (B4-LRY-219).

WOML—Southland Industries, Inc., San Antonio, Tex.—To re-broadcast program consisting of conversations between Army planes and control tower flying in vicinity of Randolph Field, Texas, between 8 and 8:30 p. m., EST, February 21, to be carried over Blue network of affiliated NBC stations. (Action taken February 19, 1941 (B1-MP-1172).

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Granted modification of construction permit (B1-P-2704), for new transmitter, installation of directional antenna for night use, change in power and time from 500 watts daytime to 6 p.m., to unlimited, using 1 KW day and night, and move of transmitter, for extension of completion date to April 25, 1941 (B1-MP-1172).

WCBT—J. Winfield Grew, Jr., Roanoke Rapids, N. C.—Granted license to cover construction permit (B5-P-2647), which authorized a new station, 1200 kc., 250 watts, unlimited time. (B5-L-1313). Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-64).

WDBO—Orlando Broadcasting Co., Inc., Orlando, Fla.—Granted license to cover construction permit (B3-P-2734), which authorized increase in power, installation of directional antenna and equipment; 800 kc., 5 KW, unlimited time, using DA night. (B3-L-1328). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-665).

KFXM—J. C. Lee & E. E. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.—Granted license to cover construction permit (B3-P-2725), which authorized installation of new transmitter. (B5-L-1322).

KROD—Dorrance D. Roderick, El Paso, Texas.—Granted license to cover construction permit (B3-P-2725), for new equipment, increase in power from 250 watts to 500 watts night, 1 KW day, and change frequency from 1500 to 600 kc. (B3-L-1325). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-661).

KGBX—Springfield Broadcasting Co., Springfield, Mo.—Granted license to cover construction permit (B4-P-2510), which authorized installation of new transmitter, increase in power to 5 KW, and changes in directional antenna for night use. (B4-L-1331). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-672).

KYW—Westinghouse E & M Co., Philadelphia, Pa.—Granted license to cover construction permit (B2-P-2904), for increase in power from 10 to 50 KW, and changes in equipment (B2-L-1323). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-658).

WEOA—Evansville on the Air, Inc., Evansville, Ind.—Granted construction permit to move transmitter from 319 Vine St., to 2nd Floor YMCA Bldg., Evansville, Ind., 1370 kc., 250 watts, unlimited time (B4-P-3079).

February 28, 1941 — 209
APPLICATIONS FILED AT FCC

560 Kilocycles

KSF—The Associated Broadcasters, Inc., San Francisco, Calif.—Construction permit to change frequency from 560 kc. to 710 kc. under North American Regional Broadcasting Agreement; increase power from 1 KW night, 5 KW day, to 50 KW day and night; move transmitter from approximately southeast corner of Sawall Lot No. 344, San Francisco, Calif., to 2½ miles southwest of Alvarado, Calif.; install new equipment and directional antenna for day and night use; Class II station. Amended to change requested transmitter site to 2½ miles southwest of Alvarado, Calif., to 2 miles northwest of Redwood City, Calif., and make changes in requested directional antenna for day and night use.

610 Kilocycles

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—License to cover construction permit (B3-P-2476) as modified for new transmitter, increase in power, installation of directional antenna for day and night use, and move of transmitter.

620 Kilocycles

WAGE—Sentinel Broadcasting Corp., Syracuse, N. Y.—Modification of construction permit (B1-P-1934) for a new station, requesting change in type of transmitter and extension of commencement date to 30 days after grant and completion date 90 days thereafter.

NEW—Frequency Broadcasting Corp., New York, N. Y.—Construction permit for a new station to be operated on 629 kc., 500 watts, daytime. Amended to antenna system.

740 Kilocycles

WHEB—Granite State Broadcasting Corp., Portsmouth, N. H.—Voluntary assignment of license from Granite State Broadcasting Corp. to WHEB, Inc.

990 Kilocycles

WBZ—Westinghouse Electric & Mfg. Co., Boston, Mass.—License to cover construction permit (B1-P-2998) which authorized
new transmitter and directional antenna for day and night use, and move of transmitter.

WBZ—Westinghouse Electric & Mfg. Co., Boston, Mass.—Authority to determine operating power by direct measurement of antenna power.

1050 Kilocycles

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Modification of construction permit (B4-P-2886) for change in hours of operation; increase in power; installation of new transmitter; move of transmitter and installation of directional antenna for night use, requesting approval of directional antenna for night use: 1050 kc., 1070 kc., when North American Regional Broadcasting Agreement becomes effective.

1070 Kilocycles

WCAZ—Superior Broadcasting Service, Inc., Carthage, Ill.—Authority to install automatic frequency control equipment on 1080 kc. under North American Regional Broadcasting Agreement.

1120 Kilocycles

WTAW—Agricultural & Mechanical College of Texas, College Station, Tex.—Modification of construction permit (B3-MP-1006) as modified for new equipment and increase in power, requesting change in type of transmitter and 1130 kc. under North American Regional Broadcasting Agreement.

1160 Kilocycles

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Authority to install automatic frequency control equipment on 1190 kc. under North American Regional Broadcasting Agreement.

1210 Kilocycles

WBIR—J. W. Birdwell, Knoxville, Tenn.—Modification of construction permit (B3-P-2840) as modified for a new station, requesting authority to change type of transmitter.

WBIR—J. W. Birdwell, Knoxville, Tenn.—License to cover construction permit (B3-P-2840) as modified for a new station.

WBIR—J. W. Birdwell, Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

1230 Kilocycles

NEW—Scripps-Howard Radio, Inc., Houston, Tex.—Construction permit for a new station to be operated on 1210 kc., 350 watts, unlimited time, Class IV. Amended to request 1250 kc., under North American Regional Broadcasting Agreement.

1260 Kilocycles

KHSI—Golden Empire Broadcasting Co., Chico, Calif.—Construction permit to increase power from 500 watts night, 1 kW day, to 1 kW day and night, and install directional antenna for day and night use, requesting 1250 kc., 1290 kc. when North American Regional Broadcasting Agreement effective.

1300 Kilocycles

KFH—Radio Station KFH Co., Wichita, Kans.—Authority to determine operating power by direct measurement of antenna power on 1350 kc. under North American Regional Broadcasting Agreement.

1360 Kilocycles

KGER— Consolidated Broadcasting Corp., Long Beach, Calif.—Construction permit to make changes in equipment, increase power from 1 kW to 5 kW, install directional antenna for night use, requesting 1350 kc., 1390 kc. under North American Regional Broadcasting Agreement.

1370 Kilocycles

WGL—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Authority to install automatic frequency control equipment on 1450 kc. under North American Regional Broadcasting Agreement.

1400 Kilocycles

WARD—Unified Broadcasting Corp. of Brooklyn, Brooklyn, N. Y.—Modification of license to change hours of operation from shares with WLTH, WVFW and WBBC to unlimited time, requesting facilities of WLTH, WVFW and WBBC, and move studio. Contingent on grant of WARD's application B1-AL-302.

1420 Kilocycles

WPRP—Julio M. Conesa, Ponce, P. R.—Modification of construction permit (B-P-2977) which authorized new transmitter, move transmitter, increase power and hours of operation, requesting change in equipment and approval of transmitter site and antenna. Amended to specify 1520 kc. under North American Regional Broadcasting Agreement.

WLAG—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Modification of construction permit (B2-P-2900) to move transmitter and install new antenna, requesting extension of completion date from 3-16-41 to 5-1-41.

1450 Kilocycles

KJEM—Redwood Broadcasting Co., Inc., Eureka, Calif.—Authority to determine operating power by direct measurement of antenna power on 1450 kc., 1480 kc. under North American Regional Broadcasting Agreement.

1500 Kilocycles

NEW—Barclay Craighead, Butte, Mont.—Construction permit for a new station to be operated on 1500 kc., 150 watts, unlimited time, Class IV.

FM APPLICATION

W2XD—General Electric Company, Schenectady, N. Y.—License to cover construction permit (B1-PVB-55) as modified for a new relay television station.

MISCELLANEOUS APPLICATIONS

NEW—WGN, Inc., Chicago, Ill.—Modification of construction permit (B4-PHY-3) for new high frequency broadcast station, requesting approval of transmitter and antenna, and request multiplex transmission of facsimile.

KAQX—Central States Broadcasting Co., Portable-Mobile (area of Omaha, Nebr.).—License to cover construction permit (B4-PRY-210) as modified, for a new relay broadcast station.

WNYE—Board of Education, City of New York, Brooklyn, N. Y.—Construction permit to change frequency from 41100 kc. to 42100 kc., increase power from 500 watts to 1000 watts, and install new equipment. Amended: To change emission from A to special for frequency modulation.

NEW—Piedmont Publishing Co., Portable-Mobile (area of Winston-Salem, N. C.).—Construction permit for a new relay broadcast station to be operated on 30820, 33740, 33820, 37280 kc., 2 watts, A-3 emission.

NEW—Piedmont Publishing Co., Portable-Mobile (area of Winston-Salem, N. C.).—License to cover construction permit (B4-PRY-209) as modified for a new relay broadcast station.

NEW—Muzak Corporation, New York, N. Y.—Construction permit for a new developmental broadcast station to be operated on 117000 kc. or some channel not now allocated for some purpose, 1000 watts, special emission for frequency modulation.

February 28, 1941 — 211
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Helen Harrison Candies, Inc.—Use of lottery methods in the sale of candy is alleged in a complaint issued against Helen Harrison Candies, Inc., 325 North Wells St., Chicago.

The respondent corporation, according to the complaint, sells to wholesalers, jobbers and retail dealers certain assortments of candy so packed or assembled as to involve the use of a game of chance, gift enterprise or lottery scheme, when sold to the consuming public. Punch board devices are used, the complaint alleges.

Charging that the respondent’s practices have been of a sort which are contrary to Federal Government public policy and in violation of the Federal Trade Commission Act, the complaint grants the respondent 20 days for answering the charges. (4467)

Arthur Jacobson—A complaint has been issued charging Arthur Jacobson, Upsala, Minn., with dissemination of advertisements containing false representations to induce purchase of products represented as comprising a treatment for defective eyesight without resort to glasses, drugs or surgery. According to the complaint, the respondent sells “Eye Tester” and “Eye Adjuster” devices with printed instructions, charts and other paraphernalia.

The respondent allegedly represents that his system is new and revolutionary; that 90 per cent of the defects of the eye can be remedied by its use; that it will improve eyesight and eliminate headaches and nervousness, and that it will correct nearsightedness, astigmatism and strabismus.

Alleging that the respondent’s system is not new or revolutionary and that its use will not accomplish the results claimed, the complaint charges violation of the Federal Trade Commission Act and grants the respondent 20 days for answering the charges. (4466)

Parke, Austin & Lipscomb, Inc.—Misuse of the names of the Smithsonian Institution and the United States Flag Association, Washington, in connection with the sale of books of an encyclopedic nature, is alleged in a complaint issued against Parke, Austin & Lipscomb, Inc., and its subsidiary, Smithsonian Institution Series, Inc., both of 500 Fifth Ave., New York. Other respondents are Alfred Monett and Robert A. Hogan, Jr., officers of the two corporations, and Joseph M. McAndrews, an officer of the parent company.

The complaint alleges that use of the words “Smithsonian Institution” as a part of the corporate name of the respondent Smithsonian Institution Series, Inc., constitutes a misleading representation that the corporation is a part of, or connected with, the Smithsonian Institution, Washington, a non-profit organization devoted to scientific research and the promotion of learning.

According to the complaint, the respondents, through their salesmen and by other means, represent that such salesmen are employed by, or connected with, the Smithsonian Institution; that their publication “Smithsonian Scientific Series” is published and sold by that institution, and that it receives the entire profit from such sale, when such are not the facts. The complaint alleges that the books are sold by the respondents as an ordinary commercial enterprise, and that the Smithsonian Institution receives from the respondents only a royalty of 10 per cent on all gross sales of the books under a contract providing that the Smithsonian Institution furnishes the Smithsonian Institution Series, Inc., manuscripts and illustrations for use in its books.

The complaint further alleges that Parke, Austin & Lipscomb, Inc., and the individual respondents represent that their salesmen are representatives of the United States Flag Association, Washington, and that that organization receives the entire profit from the sale of the respondents’ “World Epic” books, which profits are used to maintain a lobby in Washington for combating anti-American and subversive organizations and influences, when such are not the facts.

According to the complaint, the respondents sell their books as an ordinary commercial enterprise for profit, and the only benefit derived by the flag association from such sales is a small royalty for issuing bulletins and letters recommending the books. The United States Flag Association, according to the complaint, is a patriotic non-profit organization and has not engaged in lobbying.

The respondents are further charged with wrongful use of letters from United States Senators and other prominent persons endorsing the aims and purposes of the United States Flag Association. Such letters allegedly are represented by the respondents as endorsements of their books, when in fact they relate to the association and not to the respondents’ books. (4465)

CEASE AND DESIST ORDERS

No cease and desist orders were issued by the Commission last week.

STIPULATIONS

Following stipulations have been entered into during the past week:

American Concrete Receptacle Company, trading as American Vault Company, 579 Kenilworth Ave., Detroit, a dealer in equipment and materials for use in manufacturing burial vaults composed principally of asphalt and concrete, has entered into a stipulation to cease representing that such vaults are better than competitive products in preventing or retarding the formation of “sweat” or moisture on their inner surfaces. (3037)

Gamble-Skoglund, Inc., 700 Washington Ave., North Minneapolis, entered into a stipulation to cease advertising that “Gamble’s Electric Fence Controller” has been approved, tested or certified by the Underwriters’ Laboratories, Inc., or by the National Bureau of Standards of the United States Department of Commerce. The stipulation recites that this product has not been so tested or approved. (02739)

Master Gas-Saver Company, 218 South Wabash Ave., Chicago, stipulated to cease advertising that any gain in power or miles per gallon will result from the use of its device “Master Gas-Saver,” on an automobile equipped with a correctly adjusted carburetor of proper size. The respondent also agrees to cease representing that the device stops gasoline waste, reduces carbon, makes starting easy, increases riding efficiency, operates as a super-charger, or is new or different from other devices used for the same purpose. The respondent further agrees to discontinue use of the words “Gas-Saver” to describe its device or as part of its corporate or trade name. (02744)

Merz & Co., Chemical Works, Inc., East Orange, N. J., stipulated that it cease advertising its medicinal preparation “Merz-Allium” as being bactericidal and as being effective in treating colitis, intestinal catarrh, diarrhea, coughs, bronchitis, arthritis, rheumatism, sciatica, colic, influenza, asthma or tuberculosis. The respondent corporation also agrees to cease representing that the results obtained from the use of its preparation are unobtainable from any other, and that Merz-Allium is recommended by the “drugless profession.” (02740)
E. W. Kahn, Harvard Avc., and East 42nd St., Cleveland, has entered into a stipulation to cease representing that “Rahnous Capsules,” “Rahnous Nasal Drops No. 1” and “Rahnous Nasal Drops No. 2,” alone or in combination, comprise a competent treatment for colds, hay fever, rose fever, asthma, or catarrh, in excess of affording temporary relief from symptoms and the discomforts associated with these conditions; that either of the products is a specific, and that the product Rahnous Capsules is of aid in building body resistance or that it regulates the body. (02738)

Sal-Fayne Corporation, Dayton, Ohio, entered into a stipulation to cease certain representations in the sale of “Sal-Fayne,” a medicinal preparation.

Under its stipulation, the respondent corporation agrees to cease advertising that use of its product banishes headaches, distress after over-indulgence, periodic pains or muscular pains; that it is an effective remedy for post-operative pains, or has therapeutic value in treating such disorders and conditions in excess of a palliative affording temporary relief; and that it is capable of stopping or preventing colds, preventing the development of “flu”, relieving mental or physical dullness, and effectively treating the nerves.

The respondent also agrees not to publish advertisements which fail to reveal that the frequent or continued use of its preparation may be dangerous, causing serious blood disturbances, and that no more than the dosage recommended should be taken. The stipulation provides that such advertisements need contain only a statement that the preparation should be used only as directed on the label, if and when the label either carries a warning to the same effect or specifically directs attention to a similar caution or warning statement in the accompanying labeling.

The Sal-Fayne Corporation further stipulates that it will desist from using the words “laboratory” or “laboratories” as part of any trade name, and from making any representations implying that it has a laboratory unless it owns and operates, or controls and operates, a laboratory properly equipped and supervised for scientific work. (02741)

Steel Storage File Company, 2216 West 63rd St., Cleveland, entered into a stipulation with the Federal Trade Commission to discontinue representing that the cost of its “Safe-T-Stack Steel Storage Files” is lower than that of cardboard file cases of comparable size together with shelving used therewith, and that use of its file cases instead of competitive products will result in records or files occupying one-fifth the space formerly used. (3038)

E. B. S. Manufacturing Company—Eva B. Smith, trading as E. B. S, Mfg. Co., and E. B. S. Co., 730 St. Nicholas Ave., New York, has entered into a stipulation in which she agrees to discontinue advertising that “Antiseptic Tar Hair Grower” will promote the growth of hair, possesses antiseptic properties, contains essential oils or vegetable oils, and will eliminate itching scalp or have any value in its treatment in excess of affording temporary relief. The respondent further stipulates to cease representing (1) by use of the word “eliminate” or similar words that the preparation is a remedy or cure for dandruff, and (2) by use of the words “antiseptic” or “grower” in the brand name, that it has antiseptic properties or will promote the growth of hair. (02743)

**FTC CLOSES CASES**

The Federal Trade Commission has closed its case against Louis Baskind & Co., Inc., 1220 Broadway, New York, without prejudice to its right to resume proceedings, should the facts so warrant. The respondent had been charged with violation of the Federal Trade Commission Act in the sale of shirts. According to information received by the Commission, the respondent corporation is no longer engaged in manufacturing or selling activity and is in process of liquidation.

The Commission dismissed a complaint charging the Royal Metal Manufacturing Co., 175 North Michigan Ave., Chicago, with violation of the Federal Trade Commission Act in the sale of furniture.
THE WEEK IN WASHINGTON

President Roosevelt appointed Ray C. Wakefield, of Fresno, Calif., to the FCC to succeed the late Thad H. Brown. Mr. Wakefield has been a member of the California Railroad Commission. (p. 215)

Judge Henry Goddard on Tuesday approved the Consent Decree entered into by ASCAP and the Justice Department. (p. 215)

Radio Movin' Day draws near, and hundreds of stations participate in the NAB promotion program. (p. 217)

New England and Texas broadcasters unanimously endorsed BMI's work and pledged their support for its continuance. (p. 220)

Frank E. Pellegrin of Omaha was appointed to head the new NAB Department of Broadcast Advertising. (p. 222)

Paul W. Morency, WTIC, and O. L. "Ted" Taylor, KGNC, were re-elected to the NAB Board at district meetings. (p. 223)

Thurman Arnold says that he will continue to prosecute labor unions' "make work" systems. (p. 224)

Senator Danaher, Republican, Connecticut, on March 5 introduced a "no censorship" amendment to the Lend-Lease Bill. (p. 225)

Chairman James Lawrence Fly of the FCC told a press conference this week that the Commission was studying the legal division's draft of the proposed "Monopoly Report." (p. 226)

National Defense

The Civil Service people told us today that over 300,000 have been put to work in National Defense agencies since broadcasters put their shoulders to the wheel to locate man power—last July.

The situation remains critical in various categories. For example all kinds of inspectors, various kinds of engineers and skilled craftsmen are all wanted. Radio searches them out in the highways and the byways. More will be required as the program goes into full swing.

In the defense program, first things come first; and the production of guns, ammunition, ships, tanks, airplanes and equipment are first things.

Your help is appreciated.

Wakefield New FCC Member

President Roosevelt sent to the Senate for confirmation this week the nomination of Ray C. Wakefield of Fresno, Calif., to succeed the late Thad H. Brown on the FCC.

A Republican, Mr. Wakefield is a member of the California Railroad Commission which regulates all public utilities in that state.

He was born in Fresno in 1895, practiced law there from 1918 to 1937, and was deputy district attorney from 1929 to 1932. He was appointed to the Railroad Commission in 1937, and was president from August, 1938, to December, 1940. While with the state commission he has had considerable contact with the FCC on telephone rate cases. He has a son, John, and a daughter, Doris.

At the NAB's request, Mr. Wakefield made the following statement for the NAB Reports:

"I appreciate the honor bestowed upon me by the President in nominating me to membership on the Federal Communications Commission, but I also appreciate the great responsibilities attached to the office.

"If my nomination is confirmed by the Senate, as yet must be done, I shall enter upon my new task with no preconceived notions regarding the radio industry. In other words, I have a completely open mind as to the industry's various problems and desire to approach them wholly in that spirit. An objective approach to these problems, it seems to me, can be of material assistance in preserving radio's present objective position in American life."

Court Approves ASCAP Decree

Judge Henry Goddard on Tuesday, March 5, approved the consent decree entered into by ASCAP and the Justice Department, in the U. S. District Court for the Southern District of New York.

The previous day, Neville Miller made a statement to (Continued on page 216)

March 7, 1941 — 215
COURT APPROVES ASCAP DECREE

(Continued from page 215)

The court in behalf of the broadcasting industry and filed the memorandum printed below.

The ASCAP decree was printed in full in last week’s NAB Reports (p. 195). The summary which preceded the text of the decree was prepared by the Justice Department, and not by NAB. The NAB’s opinion of the decree was expressed in Mr. Miller’s memorandum which follows:

"The National Association of Broadcasters is the trade organization of the broadcasting industry. It includes in its membership most of the broadcasting stations of the United States. The National Association of Broadcasters has for many years been one of the principal complainants against the illegal practices of the American Society of Composers, Authors and Publishers (herein­after called ASCAP) and it has, over the course of these years, consistently appealed to the Government to bring an end to ASCAP’s restraints of trade in connection with performing rights of popular music.

"ASCAP is a combination, operating in the form of a voluntary unincorporated society, consisting of over one hundred and forty publishing firms (with approximately three hundred and fifty subsidiaries), and of approximately twelve hundred composers and authors. All of its members, by contract, have assigned to ASCAP the entire exclusive performing rights in all of their works, both present and future, for successive terms of years, the most recent assignment expiring in 1950.

"Through the medium of ASCAP, therefore, the combination of publishers, composers and authors has been able to fix, and has consistently fixed, the price at which these performing rights have been and are licensed to users of music, as well as all other terms and conditions of license agreements.

"The Department of Justice, in both its civil complaint and its criminal information against ASCAP, has set forth, as its principal objectives (1) termination of ASCAP’s exclusive rights in the works of its members, by virtue of which ASCAP has been able effectively to prevent competition among its members and thus to restrain trade by price fixing and otherwise, and (2) elimination of certain of the most objectionable practices of ASCAP including, principally, its requirement that users pay for the privilege of using ASCAP music without regard to the extent of use and its requirement that users pay for rights in works which they do not want as a condition of having access to the works which they do want, a practice commonly called ‘block booking.’

"The proposed decree, in the opinion of the National Association of Broadcasters, fails to accomplish the Government’s objectives both with respect to price fixing and block booking.

Point I

"The proposed decree, in paragraph II (1), states that the defendant ASCAP is enjoined from asserting exclusive performing rights as agent, trustee or otherwise, on behalf of its members. The same paragraph, however, contains a number of permissive clauses, the most important of which, sub-paragraph (a), permits ASCAP to require that all moneys derived from the issuance of licenses by its members be paid to ASCAP for distribution in the same manner as the other revenues of ASCAP.

"The provisions with respect to the distribution of ASCAP’s funds are contained in II (10). This provision, in effect, makes mandatory ASCAP’s present practices by requiring that ASCAP shall provide in its By-Laws that ASCAP shall not distribute its moneys to its members on any basis other than the number, nature, character and prestige of the copyrighted musical compositions written or published by each member, the length of time in which the works of the member have been part of the catalog of the Society, and the popularity and vogue of such works. In other words, whether and to what extent any individual member of ASCAP will receive any share of ASCAP’s revenue is to be determined by the ASCAP management.

"When this provision is read in the light of paragraph II (9), its full vice becomes apparent. Sub-paragraph (9) of II provides that the board of directors of ASCAP shall be elected by a membership vote, in which all members shall have the right to vote, but that the number of votes of each member shall be determined in accordance with the classification of the member within the Society. The board of directors of ASCAP may, therefore, determine the number of votes which each member may cast and has, by this device, the power to insure the board’s self-perpetuation. This same board of directors will determine what share of ASCAP’s general funds each member will be permitted to receive.

"The proposed decree, therefore, while rendering lip service to non-exclusivity in the relationship between ASCAP and its members, and while technically permitting members to license non-exclusive performing rights to music users, sets up an insurmountable barrier against any such dealing. Sub-paragraph (1) of II of the proposed decree is, therefore, not only wholly ineffective in ending the practice of which the Government has complained, but it actually tends to perpetuate the very practice with respect to which complaint has been made.

"It may be useful to consider the proposed decree as being applicable to a patent pool rather than a copyright pool. So considered, the proposed decree expressly sanctions an arrangement by which hundreds of patent owners, prohibited by law from assigning their patents to a single patent exploitation society, could nevertheless assign the royalties from their patents to the patent exploitation society, such royalties to be distributed in accordance with the judgment of the patent exploitation society. Such an arrangement is obviously illegal. The analogy is, however, (Continued on page 220)
THREE WEEKS TO MOVIN’ DAY

All trade magazines read by dealers, servicemen, set and parts jobbers are cooperating with the industry in devoting pages to reallocation. All of them are pointing out that the switch is a major advance in broadcasting and explaining why. This will help all broadcasters in their contacts with the trade. The February articles will be followed by others in March.

Our thanks to the editors and publishers of:

- Radio Retailing
- Radio Service Dealer
- Radio Today
- Radio Weekly
- Service
- Sylvania News

The trade has also been “educated” by several mailings by Farnsworth, Ken-Rad, Motorola, Philco, RCA, Sylvania, Tung-Sol, Wells-Gardner and others.

The broadcasting industry is also having the assistance of various utilities—electric, gas, water, telephone. They have used their facilities to tell customers about the advantages of reallocation as well as to point out new dial settings. This is the first time broadcasting has noted much assistance from the telephone companies. The Ohio Bell Telephone Company in both Cleveland and Toledo will distribute reallocation stuffers.

The movies are helping.

So are the newspapers.

So are clients of broadcasters in their newspaper copy. In fact, the industry is finding out how many friends it has.

PROMOTION TIME TABLE

1. Begin telling Reallocation story to listeners.
2. Urge listeners to get non-push button sets checked and put in A-1 shape right now. This gets part of this necessary work out of the way before March 29, and will give servicemen more time to devote solely to resetting buttons after that date. A-1 sets mean more and better summertime listening.
3. Consider movie promotion like Richmond, Va., stations. Everybody is helping in Richmond—including picture houses.
4. Complete contacts with servicemen and dealers. Hold meeting or Radio Rally this week or next. Urge radio trade to use promotion plans furnished by their manufacturers.

STILL TIME TO GET LEAFLETS

Last call to get the 2-color Movin’ Day leaflets. They are being used to publicize dial locations in many, many cities and towns coast to coast. And we’re all prepared for last minute orders; for reorders as well. Almost 750,000 shipped to date. Order today.

EYE-CATCHING DISPLAY

Producers of Tung-Sol tubes are making available to servicemen and dealers a large eye-catching window display telling the public to “Keep in Tune with Radio Wave Length Changes.” A gummed window poster inviting the public to come in for a free radio log completes the window trim.

CLARKSBURG, W. VA.

G. C. Blackwell, manager, WBLK, Clarksburg, met with the radio servicemen of Harrison County, West Virginia, last Thursday evening. Plans were set in motion to change over all push button sets in record time and to put all sets in the territory in first class operating condition.

AMARILLO

KGNC, Amarillo, Texas, which increases power and changes dial location, simultaneously, has a powerful newspaper and radio campaign under full swing. Papers used are The Amarillo Daily News and The Amarillo Globe.

General Manager John Ballard also wrote that he would make good use of the 2-color leaflets, and the Mayor’s Movin’ Day Proclamation. He is completing arrangements with local servicemen for a vigorous radio repair and push button promotion.

MOVIES HELP RICHMOND, VA.

“Our three Richmond stations, WMBG, WRNL and WRVA, are proceeding with an extensive cooperative promotional campaign for Movin’ Day,” wrote C. T. Lucy, general manager, WRVA.

“Both the water and gas bills issued by the City of Richmond will carry Movin’ Day stuffers, and even our theaters are cooperating.”

OTHER PARTS OF VIRGINIA

Virginia Public Service Company, according to J. G. Bariesas, advertising manager, will distribute a total of 125,000 individual pieces headed: "RADIO MOVIN’ DAY—MARCH 29—What It Means to You.”

Then follows the story and two more lines of display: “Review Your Dial” and “Reset Your Buttons.”

This message to the customers of this aggressive Virginia utility is printed in red on the back of monthly bills being distributed between March 1-31. Customers receiving this promotion occupy one third of the area of Virginia.

GREENFIELD, MASS.

As a preliminary to other promotional plans in Greenfield and Franklin County, Mass., James L. Spates, man-
ager, WHAI, has arranged for the distribution of Movin’ Day stuffers. They are being enclosed with the bills sent by the Western Massachusetts Electric Company.

**OHIO BELL TELEPHONE—TOLEDO**

In Toledo the Ohio Bell Telephone Company will mail 50,000 stuffers to tell their customers of frequency changes, according to Gene Vaughn, WSPD.

Three thousand 2-color leaflets, recently shipped WSPD, have been included in statements sent out by: First Federal Savings & Loan, and The Financial Securities Corporation. WSPD was given a nice plug in the Kroger Grocery & Baking Company ad, in the Toledo Blade, February 28. “The Northwestern Ohio Natural Gas Company,” wrote Mr. Vaughn, “has made a special cut to use on their 130,000 March bills. It shows a radio tower, tells the story of Movin’ Day and mentions WSPD and our new frequency. The Toledo Edison Company has prepared a special rubber stamp with the same story for its 120,000 statements.”

**FORT WAYNE, IND.**

Westinghouse stations, WOWO-WGL, Fort Wayne, held the first meeting for servicemen of the Fort Wayne area Monday night, March 3. H. J. Beck of the Service Department of Farnsworth Television & Radio Corporation, Marion plant, discussed service obstacles and how to overcome them. Additional meetings are to be held.

**WOW—OMAHA**

The ten thousand copies of WOW’s *Radio News Tower*, March issue, contain in the center spread a complete list of old and new frequencies of every station in the United States. Column 1, page 1, is a story headed “Radio’s Movin’ Day Set for March 29.”

Station WOW at 590 kc, of course, does not change. Beginning late in February the station has carried two to four spot announcements per day calling attention to Radio’s Movin’ Day. As the Day approaches promotion will be stepped up and Movin’ Day news included in news stories and on regular newscasts.

Four thousand copies of *Radio News Tower* were distributed to agencies, clients, etc.; six thousand to WOW listeners.

**IN OKLAHOMA CITY**

KOCY, KOMA, K TOK and WKY, Oklahoma City’s four stations, have just about finished with the details of a cooperative campaign to handle frequency transitions. Toward the last of February, the four station executives met with the Servicemen’s Association of Oklahoma City.

“After the meeting,” said Mr. Barrett, “we were in accord on what I believe is a most important point, and that is the similarity of the wording and phrasing of air plugs. That way, we do not confuse the listeners as to the purpose of the plugs and changeover; nor the job the servicemen can do in changing push buttons, etc.”

**CHAIRMAN FLY’S RELEASE**

A mailing to all stations Thursday, March 6, contained a release by Chairman James Lawrence Fly, of the Federal Communications Commission. A second enclosure was a statement by Chief Engineer E. K. Jett. A statement by Neville Miller, NAB President, will be sent next week.

**MASON CITY, IOWA**

KGLO, Mason City, has a double-barreled promotion in full swing: (1) Movin’ Day and (2) power increase to 1000 watts.

Ralph B. Campbell, Jr., wrote that the station has set up a campaign of station-break spots, local newspaper inserts, network tie-ins, etc. Fifteen thousand 2-color envelope stuffers will be included in the bills of our local utility company. Localized stickers are being placed on all display material. A poster advertising the change will also appear on the Mason City Globe-Gazette trucks. Mayor Marshall has signed the Movin’ Day Proclamation.

“In twenty-seven north Iowa and southern Minnesota towns, boys will cover the downtown section on March 29 wearing signs saying, ‘Who am I listening to.’ They will carry a portable radio tuned to KGLO and will be supplied with pamphlets to hand out.”

**50,000 WINDOW POSTERS**

Fifty thousand red and black window posters, 14” x 22”, have been distributed by Sylvania Tubes to dealers and servicemen throughout the United States. The copy read:

“After March 29th

“Many of your favorite radio stations will change wave-lengths. Your radio dial settings must be changed too.

“Come in and get your radio station finder free!

“This information courtesy

“Sylvania set-tested radio tubes”

When posted in the window it is large enough to be seen by occupants of passing streetcars, busses and automobiles. In addition Sylvania is making available to its dealers a post-card campaign; a green and black
Radio Station Finder” (log) of all stations and red and black door-knob hangers, 4” x 9”.

KANSAS CITY, MISSOURI AND KANSAS, EXTRAVAGANZA

Greater Kansas City is carefully laying the groundwork for a successful Movin’ Day promotion.

Broadcasters, radio jobbers, dealers, servicemen, manufacturers and the Electric Association of Kansas City have all joined hands in an all-out campaign.

The Kansas City Star, owner of station WDAF, on 610 kc., has also agreed to cooperate with the radio front though WDAF does not change. Prior to the beginning of the public campaign of education and promotion the entire radio industry of Kansas City will hold a Radio Rally and party for servicemen, in the evening, at the President Hotel.

In addition to presenting the outstanding acts from each station in the area in a stage show, broadcasters are working out the details of a “Kilocycles Ballet.” The entertainment will be produced by Don Davis, president, WHB, who will also act as Master of Ceremonies.

Karl Koerper, vice president, KMBC, will handle the inspirational part of the meeting, indicating how Movin’ Day may be used to put all of the sets in the area in A-1 condition, as well as to change the push buttons.

There will also be a technical talk by an outstanding radio authority.

“Kilocycles Ballet”

The ballet will open the evening’s entertainment. As the curtain rises a girl representing WDAF “will be sitting pretty” on a pedestal labeled 610 kc. WDAF is the red network station; so, a ballet dancer in red will then dance on the stage leading a group of other dancers wearing masks representing Jack Benny, Charlie McCarthy, Fred Waring, Bob Hope, Kay Kyser and Bing Crosby.

These dancers will do a “Red Network” ballet routine and exit—leaving WDAF still “sitting pretty” on 610 kilocycles. She remains there throughout the rest of the ballet.

The curtain then parts to reveal WHB—a girl seated on a pedestal labeled 860 kilocycles. A ballet dancer in black and gold, representing Mutual, will then dance on stage and move WHB from 860 to 880 kilocycles. At the same time, she will beckon to her companions who will dance on stage wearing masks representing various Mutual Network programs, or WHB programs, such as Raymond Gram Swing, The Lone Ranger, Captain Midnight, Orphan Annie, The WHB Musical Clock, and the station’s “Kiddies’ Revue” (this program line-up—represented by masks—is tentative, subject to final decision at another meeting of the committee).

The third movement of the ballet will begin as the curtains part to reveal KMBC seated on a pedestal labeled 950 kilocycles—while WHB remains on 880, and WDAF on 610. A dancer in red, white and blue, representing Columbia Network, will then dance on stage—and move KMBC from 950 kilocycles to 980 kilocycles. Then her companions will enter—dancers wearing masks to represent Major Bowes, Kate Smith and so on.

This formula will be repeated for each of the other stations in the area—WREN, of the Blue Network—KCKN, owned by the Kansas City Kansas—KCMO, owned by the owners of the Crown Drug Company—and KITE, owned by First National Television.

Each station will be a “movement” in the ballet—with different costumes and a change in the tempo of the music.

PENNSYLVANIA CHAIRMAN

Dr. Leon Levy, president, WCAU, Philadelphia, is the Pennsylvania member of the Governors’ Movin’ Day Proclamation Committee. A compositor dropped the line out of last week’s listing of the entire committee in NAB Reports.

Eighteen (18) governors have now either issued Movin’ Day Proclamations or have promised to do so. State committee men are taking up the matter in eight (8) other states. No report is as yet available from the other states.

Station managers residing in states in which the chief executives have issued their proclamations have expressed their appreciation for copies of the document sent them by their state member of the committee. This system insures the widest publicity.

These are the governors who have issued proclamations since last week:

IOWA—Gov. George A. Wilson
Arranged by J. O. Maland, WHO, Des Moines
MINNESOTA—Gov. Harold E. Stassen
Arranged by Earl Gammons, WCCO, Minneapolis
NEBRASKA—Gov. Dwight Griswold
Arranged by J. J. Gillin, Jr., WOW, Omaha
OKLAHOMA—Gov. Leon C. Phillips
Arranged by Neal Barrett, KOMA, Oklahoma City
OREGON—Gov. Charles A. Sprague
Arranged by C. Roy Hunt, KOIN, Portland
TENNESSEE—Gov. Prentice Cooper
Arranged by Harry Stone, WSM, Nashville

MAYORS PROCLAIM

Mayor R. E. Riley, Portland, Ore.; Mayor Ben Stapleton, Denver, Colo.; Mayor Marshall, Mason City, Iowa; Mayor Don C. McCombs, Kansas City, Kans., and the Mayors of Kansas City, Mo., and Amarillo, Texas, have issued proclamations. Each Mayoral proclamation will list the call letters of all the stations within the city; the state proclamations will list all stations within a state. Tell us when your Mayor proclaims.

March 7, 1941 — 219
STATE EDUCATORS HELP

The heads of the Department of Education in many states are helping spread reallocation news throughout the entire school system. (The fact that letters were written to these men was reported in NAB REPORTS of February 21.)

Because this information is fanning out from the top, it would seem good tactics to put out information locally which would meet it on the way down.

Educators who have notified NAB that they are writing school executives under their jurisdiction are:

Elmer G. Sulzer, Director, Radio Activities, University of Kentucky, Lexington, Ky.

Y. D. Bain, Director of Curriculum and Elementary Education, State Department of Education, Salem, Oregon.

R. R. Ewerz, Director of Instruction & Supervision, Department of Education, Baton Rouge, La.

The letter from Superintendent Ewerz, of Louisiana, is typical of those from the above mentioned educators:

"I note that on March 29 ninety per cent of all the United States broadcast stations will change frequencies, thereby involving radio reception in Louisiana. We shall be glad to pass this information on to school principals who in turn can notify teachers and pupils with regard to changes indicated.

"We appreciate very much your advice in this matter."

COURT APPROVES ASCAP DECREE

(Continued from page 216)

precise, and the illegality exists as clearly in the case of copyright owners as in the case of patentees.

Point II

"The Proposed Decree Fails to Prevent ASCAP from 'Block Booking' Performing Rights in the Works of Its Members to Broadcasters.

"Paragraph II (6) provides that ASCAP shall not refuse to license, on prices to be fixed by ASCAP, the public performance for profit of the musical compositions of its members 'by users other than broadcasters.' ASCAP, by its consistent refusal to permit broadcasters access to compositions which they want to use unless they will also pay for the right to perform compositions which they do not want to use, has compelled broadcasters to accept the block booking of all of the works of the Society, a matter which has expressly been held illegal in other fields.

"The proposed decree prevents block booking for hotels, restaurants, motion picture theaters, cafes and others. It expressly excepts from the benefits of this provision the broadcasters. If block booking is an admitted vice with respect to all users other than broadcasters, it is difficult to see the basis for a distinction which expressly permits broadcasters to be made the victims of this illegal act.

"It is true that under the proposed decree broadcasters are assured of the benefits of the 'per program' basis of licensing which relieves them from the requirement that they pay a license fee in respect of programs which use no ASCAP music at all. Paragraph II (6) of the proposed decree, however, does not relieve broadcasters from the equally illegal requirement that they pay for musical programs on an 'all or none' basis, without the option of paying only for the use of the musical compositions which they desire to perform.

Conclusion

"It is respectfully submitted that the proposed decree does not cure the illegal practices of ASCAP as alleged in the Government's civil and criminal complaints, that the proposed decree sanctions illegal activity on the part of ASCAP in at least two vital respects, and that the proposed decree should not be approved or entered until these defects are cured."

TWO DISTRICTS PLEDGE UNANIMOUS SUPPORT

The meeting of the District 13 held on February 28 in San Antonio, Texas, and the meeting of the District 1 held March 4 in Worcester, Massachusetts, adopted resolutions complimenting BMI and also pledging those present to renewal of their BMI licenses. The BMI members present reported unanimously that their reliance on BMI music had been attended by an increase in their business. About sixty stations were represented in Texas and twenty-eight in Worcester.

BMI CONTINUITY'S HEAD DOES AIR SHOW

Alan Fishburn who heads BMI's Continuity Department was represented by a successful half-hour show on the Columbia Workshop program over the CBS network last Sunday evening, March 2nd. This work of the BMI script specialist was an adaptation of a play by Lynn Riggs called Roadside and dealt with a typical American comedy figure, a sort of Texas version of Paul Bunyan.

ALBUM FOR ORCHESTRAS

BMI is publishing in album form a collection of ten of the most popular BMI songs so arranged as to be used for solos, duets, trios, or any other combination of the various melody-carrying instruments of a dance band. The idea has met with a warm reception. The announcement brought in several thousand orders before publica-

Like Pete Rollins, Phil Kadison of Larchmont, N. Y., has a solid background of musical education from his studies at college and he has been unable to express himself in a popular vein until this year. What he considers his outstanding tune, Take It From a Woman Who Knows, is now in the hands of BMI. His other songs in the show are I Don't Know Where I Am, In Our New Hotel, and a rhumba as yet unnamed.

All the tunes for One on the House have been written by Rollins and Kadison with the exception of It Isn't Done by Robert Coleman, the leading lady in the show and Vice-President of the Hasty Pudding Theatricals. Bob's home is in Baltimore, Maryland.

Under the date of March 1 the following letter was addressed to BMI members:

"We are selecting two musical numbers from our repertory, one a lively, rhythmic tune called Wise Old Owl, and the other a ballad called Walkin' By the River, on which we are going to expend concentrated exploitation efforts. The cooperation of our subscribers in this campaign is necessary.

"The great diversity of material which BMI has recently put out has resulted in a shortage of new hits. We must meet this situation promptly.

"Both of the numbers we have selected have had substantial sales and have had a good reaction from band leaders, without exploitation. Recordings and transcriptions of both are available and a list of recordings and transcriptions is attached.

"We hope that you will be able (without adverse effect on such current hit numbers as You Walk By, I Hear a Rhapsody, High on a Windy Hill, and It All Comes Back to Me Now) to see that Wise Old Owl and Walkin' by the River receive the fullest exploitation on your station commencing immediately. Anything that you can do to increase performances of these numbers over your station is of genuine importance, and I hope that you will regard this as an urgent request."

The records and transcriptions of these two tunes are as follows:

BMI increases its leadership in the coin operated phonographs noticeably this week. According to the *Variety*
list, five of the ten leaders on the machines are published or licensed by BMI and six out of the next nine are also in the BMI catalogue. According to Billboard's survey, three out of the top five and six out of the next seven are covered by the BMI license, a fact on which comment is made in Billboard's Record Buying Guide. Nine of the ten best-selling records and ten or eleven of the fifteen sheet music best sellers are BMI numbers. Of the twenty songs with most radio plugs during the week ending February 28 five are Marks, three are Southern, one is Stevens, and the rest are BMI.

BMI LEADS ON TWO-LICENSE STATIONS

KRBC of Abilene, Texas, licensed by both BMI and ASCAP, reports that a recent check-up showed that 90 per cent of the music played over the station is BMI and the remaining 10 per cent is ASCAP. The same study showed that 85 per cent of the requests from listeners are for BMI numbers. In January WDAS of Philadelphia, which also has both licenses, reported that 85 per cent of its music was BMI. It is also authoritatively reported from the Canadian Broadcasting Corporation that "although we can use ASCAP tunes, most of our popular shows use BMI tunes almost exclusively."

VOLUME 2 OF THE INDEX

The second volume of the general index of numbers covered by the BMI license was shipped out on Wednesday, March 6. It contains an additional 36,000 titles together with a revised and augmented list of the available publications in the catalogue of the Edward B. Marks Music Corporation.

Announcement of this volume has already been made in a notice sent out to member stations. These notices of additions of new titles and new publishing houses to the BMI catalogue are now being sent out weekly as a routine matter instead of being issued merely from time to time, whenever circumstances made it necessary, as they have been issued previously.

Sales

PELLEGRIN HEADS NEW NAB BROADCAST ADVERTISING DEPT.

Frank E. Pellegrin, for the past three years general sales and promotion manager of the Central States Broadcasting System, operators of stations KOIL and KFOR, Omaha, and KFAB, Lincoln, Nebraska, has been named Director of the newly created NAB Department of Broadcast Advertising.

Mr. Pellegrin comes to NAB with a splendid background of radio and organization experience. He is a graduate of Creighton University. Following his graduation he became publicity director and alumni secretary for the University and later a member of the journalism faculty and director of promotion and public relations. He was for many years a member of the American College Publicity Association and actively affiliated with the organization activities of that group.

Mr. Pellegrin has been closely associated with Junior Chamber of Commerce activity and is now National Director for Nebraska. He was recently chosen as Omaha's outstanding young business man of 1940.

The NAB Department of Broadcast Advertising replaces the Bureau of Radio Advertising which was a sub-department. The new department will function with the assistance of the Sales Managers Executive Committee of which E. Y. Flanagan, WSPD, is chairman. The other members of the Executive Committee are Ellis Atteberry, KCKN, Charles Caley, WMBD, Eugene Carr, WGAR, Willard Egolf, KVOO and Craig Lawrence, KRNT.

Mr. Pellegrin will assume his duties at NAB Headquarters on April 1. Announcement of the vastly expanded activities of this department will be made after Mr. Pellegrin assumes his duties as a member of the staff.

STANDARD CONTRACT

On Wednesday final questionnaires were mailed to members of the NAB committee which has been conferring with the 4 A's Time Buyers Committee in an effort to redraft certain provisions of the facilities contract to meet AAAA objections. The poll was undertaken after Russell Place, NAB counsel, met in New York Tuesday with F. R. Gamble, W. R. Fricke and George Link, Jr., representing the 4 A's.

Col. H. C. Wilder, WSYR, chairman of the NAB committee, reported that he expects to release the revised contract next Friday. The committee will recommend, he said, separate forms for agency and local advertiser business; the forms will be supplements to next week's issue of NAB Reports.

COST-PER-INQUIRY

On the cost-per-inquiry front, more and more concerns are trying to get stations to accept contingent deals and guarantee a fixed return. Some of these are:

- Book-of-the-Month Club
- Better Vision Institute
- God Bless America Key Tag Co.

All three, in the opinion of the Bureau of Radio Advertising, are opposed to the best interests of radio stations, and the Bureau has written them accordingly. At the same time, it has invited each of the above-named companies to give serious consideration to a paid radio cam-
Barney Lavin, WDAY, chairman of the District 11 Sales Managers’ Committee will preside over a sales managers session held in conjunction with the broadcasters session.

All broadcasters of Minnesota, North Dakota and South Dakota, are urged to attend. President Neville Miller will be present. The election of District Director for the ensuing two-year term will be among the important items of business to which attention will be given.

DISTRICT 13

A meeting of the broadcasters of the 13th District was held at San Antonio, Friday, February 28. District Director O. L. “Ted” Taylor presided and the following were present:

L. L. Hendrick, KRRV; Glen Hewitt, KPC4; Carl Vaughan, KPAC; Charles Nethery, KXXZ; Jack McGrew, KPBC; M. E. Danbom, KGKB; Karl O. Wyler, KTSU; B. F. Orr, KTRH; T. Frank Smith, KXXZ-KRIS; Harry Grier, KTRH; Jack Keesler, WOA1; A. M. Herman, WBAP; Clyde Rembert, KRLD; Eugene J. Roth, KONO; Ellis Chaney, WOI; M. Tildor Jones, KXXZ-KRIS; James M. Moroney, WFAA-KKGO; Harold Hough, WBAP-KKGO; George Cranston, WBAP-KKGO; Merle H. Tucker, KROD; Joe B. Carrigan, WWFI; George W. Johnson, KTSX; C. B. Locke, KFDN; Charlie Barthropke, KTSX; Alex Reese, WFAA-KKGO; Ernest S. Lowan, KFDN; Martin Campbell, WFAA-WBAP-KKGO; Guy W. Bradford, KKVY; Wes Izzard, KGNC; DeWitt Landis, KFYO; R. B. McAllister, KFYO; M. D. Bourn, WOA1; Hugh A. L. Half, WOA1; Bill Laurie, KONO; Wendell Mayes, KBWD; James W. Pate, Lone Star Chain; Carl Haverlin, BMI; Ken L. Sihon, TAYLOR-HOWE-Snowden-Ganjo; Leonard David Callahan, SESAC, J. Chris Hetherington, John Blair & Co.; Clarence R. Brown, Lake-Spiro- Shuman.

Carl Haverlin, Stations Relations Director of BMI, reviewed the developments in the music situation and after considerable discussion, the following resolution with respect thereto was unanimously adopted:

BE IT UNANIMOUSLY RESOLVED by the members of the National Association of Broadcasters of the 13th District in meeting assembled at San Antonio, Texas, today, that we hereby pledge our positive allegiance to Broadcast Music, Inc.; that we congratulate it on making possible such a large catalogue of music which has been so universally accepted by the radio public as indicated in surveys. We reaffirm our contention that to maintain a high standard of program service, it is necessary that a free and competitive market in music always be available, and that the open door policy to opportunity for the creative talent of the men and women of American be continued as inaugurated by Broadcast Music, Inc. That we will never become a party to any arrangement which docs not definitely assure the continued development and perpetuation of Broadcast Music, Inc.

A resume of the activities of NAB was given by C. E. Arney, Jr., Assistant to President Neville Miller, after which the following resolutions were passed:

BE IT RESOLVED by the 13th District of National Association of Broadcasters in meeting assembled at San Antonio, Texas, on this the 28th day of February, 1941, that such District through its membership, express its sincere thanks and appreciation to Mr. Ted Taylor, the Director of the 13th District, and Mr. Harold Hough, Director at Large, of the National Association of Broadcasters for their conscientious and untrite efforts in behalf of National Association of Broadcasters and the excellent work that they have performed.

BE IT RESOLVED, by the members of the 13th District of the National Association of Broadcasters in meeting assembled in San Antonio, Texas, that they pledge their utmost efforts in
the seeking of additional memberships among Texas broadcasters in the National Association of Broadcasters.

BE IT FURTHER RESOLVED by the members of the 13th District of the National Association of Broadcasters in meeting assembled at San Antonio, Texas, on the 28th day of February, 1941, that we do hereby express our sincere thanks and appreciation to the officers and executive committee of Broadcast Music, Inc., and the National Association of Broadcasters for their excellent work they have performed, and for the crowning success the industry has enjoyed in connection with the year’s work.

Those in attendance were the guests of the Texas Broadcasters’ Association at a luncheon, following which election of District Director was held. This resulted in the re-election of O. L. “Ted” Taylor.

Following the adjournment of the business session, the Sales Managers convened for a discussion of problems peculiar to their phase of the operation. The meeting was presided over by Jack Keasler, Chairman of the Sales Managers Division for the 13th District, and the following participated:

Karl O. Wyler, KTSM; Charles Balthrop, KTSA; James W. Pate, Lone Star Chain; E. W. Lovain, KDMD; Guy Bradford, KRGV; M. E. Sanborn, KGKB; Merle Tucker, KROD; George Cranston, WBAK-KGKO; Alex Keese, WFAA-KGKO; R. B. McAlistier, KPYO.

A healthy discussion of agency recognition, AAAA contract, standard rate card, and other pertinent matters was held. The Sales Managers group went on record as desiring a special session devoted to sales managers problems at the NAB convention in St. Louis.

O. L. Taylor and George Johnson of KTSA, were hosts at a cocktail party following the session. It was a most successful and enthusiastic meeting.

LABOR NOTES

Appearing before the TNEC after the Supreme Court’s Hutcheson decision (NAB Reports, p. 127), Thurman Arnold said that the Justice Department would continue to prosecute “make work” systems instituted by labor unions as violations of the anti-trust law.

“For example,” he said, “in both New York and Philadelphia all trucks in the city have been compelled to pay the wages of an additional man from the local union who does no work. . . . No conceivable economic justification for it comes to our minds.”

Both the A. F. of L. and the C. I. O. hailed the Hutcheson decision. They said it freed labor from any prosecution under the anti-trust laws. When the A. F. of L. Executive Council, meeting in Miami, heard of Arnold’s TNEC testimony, it issued a statement calling Mr. Arnold’s statement “subtle propaganda based on distortion of law and fact.”

Mr. Arnold issued a statement saying he was going to prosecute James C. Petrillo, president of the American Federation of Musicians, networks, booking agencies, and others, for “conspiracy” in connection with the musicians jurisdictional dispute with the American Guild of Musical Artists (the concert artists’ union).

Mr. Petrillo insists that anyone who plays an instrument on the air should belong to his union, and the networks with their A. F. of M. closed shop contracts had to notify the artists of Mr. Petrillo’s edict.

Whether Mr. Arnold will look into other aspects of the musicians’ situation has not been disclosed.

There is no such thing as exempt work under the Wage and Hour law. Certain classes of workers are exempt—but not certain classes of work.

This question came up in this way this week:

A small Western station had a $25 a week announcer who was going to m.c. a one-hour program outside his 40-hour week, for a $10 fee. The m.c. work was clearly “professional.” Was that work “exempt”; should his overtime rate be based on $25 a week of $35 a week?

The answer was $35. Although the m.c. work was professional, the worker was not. He did not receive $200 or more a month, and he did more than 20 per cent of the same type of work performed by non-exempt employees each week.

How far can an employer go in talking with his employees about labor unions?

The question is still unanswered after the Supreme Court’s Ford decision. The government did not appeal that part of a Circuit Court decision which reversed the Labor Board. The Board had said Ford was guilty of an unfair labor practice in assailing labor unions and labor leaders.

The cost of living in the larger cities did not change from December 15 to January 15, the Labor Department reports. It is 2.1 per cent above August, 1939.
We went clear to Washington, D. C., to pick up a talk by Colorado’s Senator Ed Johnson for a Breakfast Club meeting. It is quite a bit farther from Denver to Washington than it is from Omaha to any point on the Pacific Coast, and considerably farther than from St. Louis to Havana.

Just look at your map, if you doubt it.

Cordially,

(Sgd.) GENE
Gene O’Fallon—KFEL.

SET PRODUCTION RECORD

In terms of the total number of radio receiving sets produced (10,352,865 reported in the last Census), 1939 was the biggest in the radio industry, according to the Bureau of the Census.

The number or sets made exceeded the comparable 1937 total of 7,802,399 sets by 2,550,466. The year 1935 ranked third with 5,645,162, and 1929 fourth with 4,980,090.

Total units of all kinds of radio receiving sets reported by number and their value, for all Census years for which separate figures are available, follow:

<table>

STOP WATCHES

C. S. Cutting, chairman of the American Committee for the Defense of British Homes, 10 Warren street, New York City, appeals to broadcasters to send stop-watches for use in defense against air raids.

PERUVIAN GOOD WILL

Victor Llona, director of “Peru Calls You,” a good-will program intended for U.S. listeners, asks broadcasters to listen on Monday, March 10, at 10:30 p.m., e.s.t. Meter wave 49.62.

CONVENTION

Reservations for accommodations at the Hotel Jefferson indicate a large attendance at the Nineteenth Annual Convention, St. Louis, May 12 to 15, inclusive. Chairman Ray Dady of the Housing Committee reports that every request for a reservation received to date has been given attention and tentative assignment has been made.

Broadcasters planning to attend should give immediate attention to the request for rooms. The accommodations at the Jefferson are adequate and many of the nearby hotels offer splendid facilities.

Program plans are progressing satisfactorily and an announcement with reference to both the business sessions and the banquet programs will be shortly forthcoming.

LEGISLATION

“NO CENSORSHIP”

Senator Danaher (R.-Conn.) on March 5 introduced the following “no censorship” amendment to the Lend-Lease bill (HR 1776):

77TH CONGRESS—1ST SESSION
H. R. 1776
IN THE SENATE OF THE UNITED STATES
March 5 (legislative day, February 13), 1941
Ordered to lie on the table and to be printed.

AMENDMENT

Intended to be proposed by Mr. Danaher to the bill (H. R. 1776) further to promote the defense of the United States, and for other purposes, viz:

On page 7, line 19, after the word “direct” insert a colon and the following new language: “Provided, That nothing in this Act shall be construed to confer upon the President or any such department, agency, or officer the power of the authority to establish control or censorship in any manner not now provided by law, over the use of the radio, the press, or other instrumentality engaged in the publication or dissemination of news, opinion, or information; and no rule or regulation shall be promulgated or fixed which shall abridge or interfere with the freedom of speech or of the press”.

FEDERAL LEGISLATION

HOUSE

H. R. 3577 (Barry, D-N.Y.)—To prohibit transmission of certain gambling information in interstate commerce by communication facilities. Referred to Committee on Interstate and Foreign Commerce.

STATE LEGISLATION

ARIZONA:

S. 131 (Haldiman) ADVERTISING—FALSE OR MISLEADING—Prohibits any type of false or misleading advertising and prescribes severe penalties. Referred to Committee on Judiciary.

MARYLAND:

H. 507 (Beachley) COPYRIGHT INFRINGEMENTS—To add Art. 21A to the Annotated Code (1939 Edition), relating to the protection and infringements of copyrights. Referred to Committee on Judiciary.

MASSACHUSETTS:

CCH S 20 (Public Document 144) DEFAMATION BY RADIO—Relating to the investigation requested by the general court of 1939 relative to defamation by radio. Referred to Committee on Constitutional Law.

OREGON:

S. 327 (Judiciary Com.) LOTTERY—TRADE STIMULANT PRIZES—Defining lottery; providing saving clause and trade stimulant prizes shall not be included. Referred to Committee on Judiciary.

S. 340 (Judiciary Com.) RADIO BROADCASTING—LIBEL—Defines liability for broadcasting libelary matter.

WISCONSIN:

S. 200 (Knowles) DECEPTIVE ADVERTISING—Adds Section 100.18(e) to the Statutes, relating to deceptive advertising. Referred to Committee on Education and Public Welfare.
FCC STUDIES "MONOPOLY"

Chairman James Lawrence Fly of the FCC told a press conference early this week that the Commission has received the Legal Division's draft of the proposed "Monopoly Report" and that preliminary discussion has been tentatively set for the Commission next Monday. He explained that this session will be of "general exploratory character."

Chairman Fly in answer to a question said that he did not think that the Commission would take any action on the report pending the absence of Commissioner Thompson, who is ill. He said that a draft of the report had been forwarded to Mr. Thompson, and Mr. Fly assumed, he said, "that he is studying it the same as his fellow Commissioners." The Chairman stated that "no quick action is contemplated as the report will require study in order to do a thorough job."

Mr. Fly told the newsmen that the week's delay in considering the Monopoly draft is due to the fact that the members of the Commission are making a television trip to New York and Philadelphia the latter part of this week preparatory to the television hearing on March 20.

ARMSTRONG RECEIVES FM GRANT

Three additional high frequency (FM) broadcast stations have been authorized by the Federal Communications Commission, making 42 such grants for this new type of program service to date.

Chief among the construction permits announced today was one to Edwin H. Armstrong, inventor, long identified with radio research and a pioneer in developing frequency modulation. He is authorized to utilize the site of his present experimental high frequency broadcast station W2XMN at Alpine, New Jersey, as the location for a Class D FM broadcast station to operate on 47,500 kilocycles to serve 15,610 square miles, embracing more than 12,300,000 population, in portions of New Jersey, New York, Connecticut, and Pennsylvania.

Chicago was granted another FM station, in this case to be operated by the Moody Bible Institute of that city, on the same non-commercial basis that it now conducts standards broadcast station WMBI in Chicago. The Institute's FM station will use 47,500 kilocycles to serve the 10,800 square miles, with 4,500,000 population, embraced in Chicago's metropolitan area. The proposed transmitter site is 36 miles west of downtown Chicago.

The Stromberg-Carlson Telephone Manufacturing Co., Rochester, N. Y., received a grant to operate on 45,100 kilocycles to serve 3,200 square miles of the neighboring area, with 585,000 population. The proposed location of the transmitter is 89 East Avenue, Rochester, where the company operates experimental high frequency broadcast station W8XVII.

BROADCAST RULE AMENDED

FCC has amended Section 3.406, paragraphs b and c, so as to waive the half-hour announcement of call letters when such announcement would interrupt a program of one-half hour duration or longer consisting of a single consecutive speech, play, religious service, symphony concert, or operatic production.

COMMISSION ASSIGNMENTS

The FCC has announced that the work, business and functions of the Commission for the month of March have been assigned as follows:

Commissioner Craven Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Case Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearing, including all motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

PROPOSED PUERTO RICAN BROADCAST GRANT

Finding that Enrique Abarca Sanfeliiz is in all respects qualified to construct and operate a proposed new standard broadcast station at San Juan, Puerto Rico, the FCC proposed to grant him a construction permit. At the same time the Commission found that United Theaters, Inc., another applicant for a new station at San Juan, is not financially qualified and its application was accordingly proposed to be denied.

Both applicants sought the same frequency—450 kilocycles. United Theaters, Inc., proposed to use power of 1 kilowatt, unlimited time. Abarca intends to use 5 kilowatts day and 1 kilowatt at night, unlimited time.

Even if the finances of United Theaters, Inc., could be considered adequate for the construction and operation of its proposed station, the Commission's "Proposed Findings of Fact and Conclusions" (B-134) holds that "from the facts of record we would still be compelled to deny the application and grant the Abarca application, since we find that (a) Abarca is better qualified financially than United Theaters, Inc.; and (b) the station proposed by Abarca would provide superior technical service than the one proposed by United Theaters, Inc."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings and oral arguments are scheduled to be heard before the Commission during the
week beginning Monday, March 10. They are subject to change.

**Monday, March 10**

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license, 1230 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAP.

Consolidated Hearing

WCAM—City of Camden, Camden, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAP.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, 1250 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAP.

WTNJ—WQAX, Incorporated, Trenton, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WCAP.

WCAM—City of Camden, Camden, N. J.—Renewal of license, 1230 kc., 1 KW night, 1 KW day, unlimited, DA day and night.

NEW—Trent Broadcast Corp., Trenton, N. J.—C. P., 1230 kc., 1 KW, unlimited, DA day and night.

**Wednesday, March 12**

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 890 kc., 1 KW night, 5 KW LS, unlimited time.

**Thursday, March 13**

Oral Argument Before the Commission

Rrroor No. B-115:

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Renewal of license, 1210 kc., 100 watts night, 100 watts LS, unlimited time.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future dates for broadcast hearings. They are subject to change.

**March 20**

Television

To be held in Room A, Interstate Commerce Commission Building, 12th St. and Constitution Ave., Washington, D. C.

**Docket No.**

5806 For the purpose of considering the various engineering standards suggested for television broadcast stations, to determine when television broadcasting shall be placed upon a commercial basis, and to afford all interested parties full opportunity to be heard on all pertinent problems related to the standardization and commercialization of television broadcasting.

April 11

NEW—J. Leslie Doss, Bessemer, Ala.—C. P., 1370 kc., 250 watts, unlimited.

April 14

NEW—Western Massachusetts Broadcasting Co., Pittsfield, Mass.—C. P., 1500 kc. (1490 kc. under NARA), 100 watts, unlimited.

May 5

KFJ—KJFJ Broadcasters, Inc., Klamath Falls, Oregon.—C. P., 600 kc., 500 watts night, 1 KW LS.

---

**FEDERAL COMMUNICATIONS COMMISSION ACTION**

**APPLICATIONS GRANTED**

WBLK—The Exponent Co. (Transferor), Charleston Broadcasting Co. (Transferee), Clarksburg, W. Va.—Grant of consent to voluntary assignment of license of station WBLK from The Exponent Company (licensee of WBLK) to the Charleston Broadcasting Company (licensee of WCHS), in exchange for $29,000 of the Charleston Broadcasting Company 7½% cumulative preferred stock to be issued. WBLK operates on 1370 kc., 250 watts, unlimited time (B2-AL-299).

WPAR—The Exponent Company (Transferor), Charleston Broadcasting Co. (Transferee), Ohio Valley Broadcasting Corp. (WPAR), (Licenee), Parkersburg, W. Va.—Granted authority to transfer 47 shares of common stock from The Exponent Company to Charleston Broadcasting Co., (present owner of 47%), set voting stock ownership in Ohio Valley Broadcasting Co. in exchange for $17,500 of Charleston Broadcasting Co. 7½% cumulative preferred stock to be issued. (The above are two of a series of applications toward the consolidation into Charleston Broadcasting Co. of radio stations controlled or held by Mr. A. Kennedy and his wife, Bruce Lee Kennedy (who together hold control over the licensee corporation through their control over The Exponent Company and the Charleston Broadcasting Company.) WPAR operates on 1420 kc., 100 watts, unlimited time (B2-TC-256).

KARM—Gilbert H. Jertberg, Execut. of estate of George Harm, deceased (assignor), KARM, The George Harm Station (assignee), Fresno, Calif.—Granted consent to assignment of license of Station KARM from Gilbert H. Jertberg, Executor of the estate of George Harm, deceased, to KARM, the George Harm Station, a corporation, 1310 kc., 250 watts, unlimited time (B5-AL-300).

KDAC—Gilbert H. Jertberg, Execut. of estate of George Harm, deceased (assignor), KARM, The George Harm Station (assignee), Fresno, Calif.—Granted consent to assignment of license of Station KARM from Gilbert H. Jertberg, Executor of the estate of George Harm, deceased, to KARM, the George Harm Station, a corporation, 1310 kc., 250 watts, unlimited time (B5-ALRY-12).

KDAS—Gilbert H. Jertberg, Execut. of estate of George Harm, deceased (assignor), KARM, The George Harm Station (assignee), Fresno, Calif.—Granted consent to assignment of license of Station KARM from Gilbert H. Jertberg, Executor of the estate of George Harm, deceased, to KARM, the George Harm Station, a corporation, 1310 kc., 250 watts, unlimited time (B5-ALRE-23).

WFHR—William F. Huffman, Wisconsin Rapids, Wis.—Granted modification of license to increase power from 100 watts night, 250 watts day, to 250 watts unlimited time, 1310 kc. (B4-ML-1042).

WJOB—O. E. Richardson and Fred L. Adair (a partnership), Hammond, Ind.—Granted modification of license to increase time of operation from shares WFA, to 1200 kc., 100 watts (B4-ML-1044).

KSO—Iowa Broadcasting Co., Des Moines, Iowa.—Granted construction permit to increase night power from 1 KW to 5 KW, move transmitter to Southeast 2nd and Park Ave. (same site as KRTN transmitter now under construction), Des Moines, Iowa, install new equipment and install new directional antenna for night use, 1130 kc. 5 KW LS (B4-P-2727).

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Granted construction permit to move transmitter to 86th St. and Kedzie Ave., Chicago, Ill., install new transmitting equipment, install directional antenna for day and night use, increase power from 500 watts night and day and 1 KW LS on Sunday, shares WSBT, to 5 KW, and increase hours of operation to unlimited (B4-P-3063).

WKZ—WKZO, Inc., Kalamazoo, Mich.—Granted in part construction permit to increase day power from 1 KW to 5 KW and install new transmitting equipment, 590 kc., 1 KW, unlimited time (B2-P-2889).

WLLL—Merrimac Broadcasting Co., Inc., Lowell, Mass.—Granted on regular basis license to cover operation of synchronous station at Lawrence, Mass., now on special experimental basis, 1370 kc., 10 watts, 100 watts, unlimited, synchronous with WLLL, 250 watts (B1-L-1116).

Edwin H. Armstrong, Alpine, N. J.—Granted construction permit for Class D high frequency (FM) broadcast station to operate on frequency 45100 kc., 15,610 square miles, population 12,200,000 (B1-PH-82).

The Moody Bible Institute of Chicago, Chicago, Ill.—Granted construction permit for a new high frequency (FM) broadcast station to operate on frequency 47500 kc., 10,600 square miles, 4,500,000 population (B1-PH-5).

March 7, 1941 — 227
DENISED FOR HEARING

WSNJ—Eastern States Broadcasting Corp., Bridgeton, N. J.—Application for construction permit for “booster” station in Camden, N. J., to operate with 100 watts to 250 watts power on 1360 kc., unlimited, synchronized with WSNJ (B1-P-2914).

WBRE—Louis G. Baltimore, Wilkes-Barre, Pa.—Application for construction permit to erect a synchronous station at Scranton, Pa., to operate with 100 watts, unlimited (B2-P-2982).

Mid-American Broadcasting Corp., Louisville, Ky.—Application for construction permit for new standard broadcast station to operate on 1610 kc., under NABBA, 1 Kw night, 5 Kw LS, directional antenna, unlimited time (B2-P-2760).

WMAS—WMAS, Inc., Springfield, Mass.—Application for construction permit to change frequency from 1420 kc. to 880 kc., increase power from 250 watts unlimited, to 1 Kw night 5 Kw LS, move transmitter site from West St., Springfield, Mass., to Riverdale St., opposite Morgan Road, West Springfield, Mass., and install directional antenna for day and night use (B1-P-3051).

MISCELLANEOUS

WSBT—South Bend Tribune, South Bend, Ind.—Adopted a memorandum opinion covering action of the Commission on October 1, 1940, in granting construction permit to make changes in transmitting equipment, change frequency from 1360 to 930 kc., and move transmitter site. This grant was made upon condition that license would not be issued unless and until applicant disposed of its interest in its other South Bend station, WFMAM (B4-P-900).

W3XAD—RCA Manufacturing Co., Inc. Portable (area of Camden, N. J.).—Present television station license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending April 1, 1941.

Stephen R. Rintoul, Stamford, Conn.—Granted motion for continuance of hearing now scheduled for March 6, until action on applicant’s petition to reconsider and grant application for new station to operate on 1370 kc., 250 watts, unlimited time.

Old Colony Broadcasting Co., Inc., Brockton, Mass.—Granted dismissal without prejudice of application for new station to operate on 1160 kc., 100 watts, daytime.

KMLB—Liner’s Broadcasting Station, Inc., Monroe, La.—Passed for one week motion to consolidate hearing on application of KMLB (Docket 5994) with application of KNOE, Inc., for new station in Monroe, La. (Docket 5995).

KGKB—East Texas Broadcasting Co., Tyler, Texas.—Withheld action on petition to intervene in hearing on application of Kiger Radio, Inc., for new station in Tyler, Texas, pending statement of issues.

WSOY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted petition for leave to amend application for construction permit to change frequency from 1310 to 1560 kc. (under NABBA); increase power from 250 watts, unlimited time, to 10 Kw, using DA at night.

WIXTG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Granted extension of special temporary authority to operate high frequency broadcast station WIXTG on 43490 kc., 1000 watts, special emission for period March 2 to not later than May 1, 1941, at Shrewsbury St., Worcester, Mass., pending action on application for new FM station.

WIXOJ—The Yankee Network, Inc., Paxton, Mass.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 14360 kc., 50000 watts, special emission, for period March 1 to not later than May 1, 1941.

W9XZR—Zenith Radio Corp., Chicago, Ill.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 12800 kc., 5000 watts power, special emission for frequency modulation, with transmitter located at 135 South La Salle St., Chicago, instead of at 505 N. Michigan Ave., Chicago, for period March 1 to not later than May 1, 1941.

W9XZ—Head of the Lakes Broadcasting Co., Superior, Wis.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 13000 kc., 1000 watts, special emission for frequency modulation, with transmitter located at 39th St. and Tower Ave., Superior, Wis., for period March 1 to not later than May 1, 1941.

W9XAO—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 12500 kc., 1000 watts, special emission for frequency modulation, with transmitter located at 606 W. Wisconsin Ave., Milwaukee, Wis., for period March 1 to not later than May 1, 1941.

W2XWG—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate W2XWG on 43200 kc., 1000 watts power, special emission for frequency modulation, for period March 1 to not later than May 1, 1941, pending final authorization and completion of construction of applicant’s new high frequency broadcast station.

W2XON—Edwin H. Armstrong, No. of Alpine, N. J.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W2XON on 43800 kc., 1000 watts power, special emission for frequency modulation, for period March 1 to not later than May 1, 1941, in order to continue rebroadcasting experiments.

W2XMO—Edwin H. Armstrong, No. of Alpine, N. J.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W2XMO on 43200 kc., 2500 watts power, special emission for frequency modulation, for period March 1 to April 1, 1941, conditionally.

W2XMR—John V. L. Hogan, Long Island City, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W2XMR on 43200 kc., 1000 watts power, special emission for frequency modulation (facsimile modulation may be employed in connection with the program of research and experimentation); authority to be from March 1 to not later than May 1, 1941.

W3XOJ—Jansky & Bailey, Washington, D. C.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W3XOJ on 43200 kc., 1000 watts power, special emission for frequency modulation, for period March 1 to not later than May 1, 1941.

W8XVB—Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W8XVB on 43200 kc., 1000 watts power, special emission for frequency modulation, for period March 1 to not later than May 1, 1941.

W1XEN—Buffalo Broadcasting Co., Hartford, Conn.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W1XEN on 43700 kc., 1000 watts power, special emission for frequency modulation, for period March 1 to not later than May 1, 1941.

W1XSO—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W1XSO on 43700 kc., 1000 watts power, special emission for frequency modulation, for period March 1 to not later than May 1, 1941.

W1XFW—WDRS, Inc., Hartford, Conn.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station W1XFW on 46500 kc., 1000 watts power, special emission for frequency modulation, for period March 1 to not later than May 1, 1941.
W2XAG—Carman R. Runyan, Jr., Yonkers, N. Y.—Granted extension for time of file proposed findings now due March 8, to March 29, in re application for renewal of license.

W8XAD—WHEC, Inc., Rochester, N. Y.—Granted extension of special temporary authority to rebroadcast certain programs of Station W5XPD for a period March 1, 1941, to not later than May 1, 1941.

WORE—Broadcasting Service Organization, Inc., Boston, Mass.—Granted special temporary authority to remain silent from 2 to 3 p. m. on March 4, 5, 6, 11, 12, 13, 18, 19, 26, 25, 26, and 27; from 2 to 3:15 p. m. on March 3, 10, 17, 24; from 8 to 10:30 p. m. on March 14 1941, in order to conduct experimental tests for the National Television Standards Committee and the National Broadcasting Co., Inc., for the period March 2, 1941, to not later than March 31, 1941.

W1KX—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to remain silent from 2 to 3 p. m. on March 4, 5, 6, 11, 12, 13, 18, 19, 26, 25, 26, and 27; from 2 to 3:15 p. m. on March 3, 10, 17, 24; from 8 to 10:30 p. m. on March 14 1941, in order to permit WNWX to broadcast the Golden Gloves Boxing Bouts, sponsored by the Daily News A.A., from Madison Square Garden only.

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted special temporary authority to operate from local sunset (March 5:45 p. m. EST) to 6 p. m. on March 2, 9, 16, 23, and 30, 1941, in order to broadcast the Rosary Hour programs only.

WIN—WLS, Chicago, Ill.—Granted special temporary authority to broadcast basketball games only.

W2XBS—National Broadcasting Co., Inc., New York City—Granted extension of special temporary authority to rebroadcast certain programs of Station W2XBS for a period March 1, 1941, to not later than May 1, 1941.

W2XBS—National Broadcasting Co., Inc., New York City—Granted extension of special temporary authority to rebroadcast certain programs of Station W2XBS with special emission in addition to A3 emission on Channel No. 1, in order to conduct experimental tests for the National Television Standards Committee and the National Broadcasting Co., Inc., for the period March 2, 1941, to not later than March 31, 1941.

KWAM—A. W. Mills, Gallup, New Mexico.—Granted extension of special temporary authority to operate from 7:30 to 11:00 p. m. on March 8, 1941, pending action on revocation order.

KGGF—Hugh J. Powell, Coffeyville, Kans.—Granted special temporary authority to operate from 7:30 to 11:00 p. m. on March 8, 1941, in order to permit WNAD to broadcast basketball games only.

WNYE—Board of Education, New York City.—Granted extension of special temporary authority to broadcast basketball games only.

WJRM—WJRM, Inc., Marquette, Mich.—Granted extension of special temporary authority to rebroadcast certain programs of Station WJRM for a period March 1, 1941, to not later than May 1, 1941.

WFAN—National Broadcasting Co., Inc., New York City—Granted extension of special temporary authority to rebroadcast certain programs of Station W2XBS with special emission in addition to A3 emission on Channel No. 1, in order to conduct experimental tests for the National Television Standards Committee and the National Broadcasting Co., Inc., for the period March 2, 1941, to not later than March 31, 1941.

WHXVH—WBNS, Inc., Columbus, Ohio.—Granted special temporary authority to operate from 7:30 to 11:00 p. m. on March 8, 1941, pending resubmission and action on application to change frequency from 12100 to 11700 kc.
APPLICATIONS FILED AT FCC

580 Kilocycles

WIBW—Topeka Broadcasting Assn., Inc., Topeka, Kans.—License to cover construction permit (B4-P-2674) for increase in power using directional antenna at night.

WIBW—Topeka Broadcasting Assn., Inc., Topeka, Kans.—Authority to determine operating power by direct measurement of antenna power.

700 Kilocycles

WLW—The Crosley Corporation, Cincinnati, Ohio.—Modification of construction permit (B2-P-2460) as modified, to install new equipment, requesting authority to extend completion date from 2-22-41 to 10-22-41.

780 Kilocycles

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—Modification of construction permit (B5-P-2701) for installation of directional antenna for night use and increase in power, requesting 790 kc., under North American Regional Broadcasting Agreement and extension of completion date from 6-8-41 to 90 days after grant.

WMC—Memphis Publishing Co., Memphis, Tenn.—Authority to install automatic frequency control equipment on 790 kc., under North American Regional Broadcasting Agreement.

790 Kilocycles

WGY—General Electric Co., Schenectady, N. Y.—Authority to install automatic frequency control (main transmitter) on 810 kc., under North American Regional Broadcasting Agreement.

WGY—General Electric Co., Schenectady, N. Y.—Authority to install automatic frequency control (auxiliary transmitter) on 810 kc., under North American Regional Broadcasting Agreement.

990 Kilocycles

WTAD—Illinois Broadcasting Corp., Quincy, Ill.—License to cover construction permit (B1-P-1984) for change in hours of operation, installation of directional antenna for night use and move of transmitter.

WBEN—WBEN, Incorporated, Buffalo, N. Y.—Modification of construction permit (B1-P-2757) as modified, to install new transmitter, directional antenna for night use, increase in power and move of transmitter, requesting extension of completion date from 4-14-41 to 6-1-41.

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Authority to determine operating power by direct measurement of antenna power.

920 Kilocycles

WAFF—Drovers Journal Publishing Co., Chicago, Ill.—Construction permit to increase power from 1 KW to 1 KW night, 5 KW day, change hours of operation from daytime to unlimited time, install a new transmitter, install directional antenna for day and night use, and move transmitter. Amended: To change requested power from 1 KW night, 5 KW day to 1 KW day and night, change type of requested transmitter and make changes in directional antenna for night use.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Authority to determine operating power by direct measurement of antenna power for auxiliary transmitter on 950 kc., under NARBA.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Authority to determine operating power by direct measurement of antenna power for main transmitter on 950 kc., under NARBA.

930 Kilocycles

WDBJ—Times-World Corp., Roanoke, Va.—Modification of construction permit (B2-P-2522) as modified, to install directional antenna for night use increase power to 5 KW, requesting change in frequency to 960 kc., under NARBA.

WAF—Drovers Journal Publishing Co., Chicago, Ill.—License to cover construction permit (B4-P-2753) as modified, to install new transmitter, directional antenna, and increase in power, requesting 1130 kc., under North American Regional Broadcasting Agreement.

WDEL—WDEL, Inc., Wilmington, Del.—Modification of construction permit (B3-P-2881) for installation of directional antenna for night use, increase in power, change in frequency and hours of operation, requesting approval of directional antenna to be used both day and night, and approval of present site.

1100 Kilocycles

WGBK—Greater New York Broadcasting Corp., New York, N. Y.—Authority to determine operating power by direct measurement of antenna power for main transmitter, on 250 watts night, 1 KW day, to 5 KW day and night; install new transmitter and directional antenna for day and night use, requesting approval of directional antenna for day and night use. Amended to request 1150 kc., under North American Regional Broadcasting Agreement.

WISN—Hearst Radio, Inc., Milwaukee, Wis.—Modification of construction permit (B1-P-2758) for increase in power from 230 watts night, 1 KW day, to 5 KW day and night; install new transmitter and directional antenna for day and night use, requesting approval of directional antenna for day and night use. Amended to request 1150 kc., under North American Regional Broadcasting Agreement.

KSDK—Willard Carver and Byrne Ross, Lawton, Okla.—Modification of construction permit (B3-P-2664) for a new station, requesting authority to install new transmitter, approval of antenna, approval of transmitter and studio sites, requesting 1150 kc., under North American Regional Broadcasting Agreement.

KRD—Radio Broadcasters, Inc., Los Angeles, Calif.—Authority to determine operating power by direct measurement of antenna power on 1150 kc., under North American Regional Broadcasting Agreement.

1140 Kilocycles

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Construction permit to change frequency from 1140 kc. to 1070 kc., under North American Regional Broadcasting Agreement; install a new transmitter; increase power from 5 KW to 50 KW;
change hours of operation from simultaneous day, share night with KV00, to unlimited time; install directional antenna for night use and move transmitter.

1170 Kilocycles

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Construction permit to install new auxiliary transmitter for emergency use only.

1180 Kilocycles

WDGY—Dr. George W. Young, Minneapolis, Minn.—Construction permit to install directional antenna for night use; increase power from 1 kW night, 5 kW day, to 5 kW night, 10 kW day; change hours of operation from limited to unlimited time; change frequency from 1180 kc. to 1100 kc.; install new transmitting equipment; and move transmitter from Minneapolis, Minn., to Richfield Twp., Minn. Amended to move transmitter 1 mile from requested site at same address, make changes in directional antenna for night use, and request frequency 1130 kc., under North American Regional Broadcasting Agreement.

1200 Kilocycles

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Modification of license to change frequency from 1360 kc. to 1180 kc. under North American Regional Broadcasting Agreement; increase power from 100 watts night, 250 watts day, to 250 watts day and night; and change hours of operation from specified hours to unlimited time.

NEW—Roy S. Lewis, Norfolk, Va.—Construction permit for a new station to be operated on 1200 kc., 1250 kc., when North American Regional Broadcasting Agreement becomes effective, 250 watts, unlimited time.

KLAC—Lake Region Broadcasting Co., Lakeland, Fla.—Authority to install directional antenna for night use; and extension of commencement and completion dates from 8-18-40 to 60 days after grant and 180 days thereafter.

KMYR—F. W. Meyer, Denver, Colo.—Modification of construction permit (B3-P-2067) as modified for a new station, requesting 1340 kc. under North American Regional Broadcasting Agreement; changes in antenna, change transmitter site, and extend completion date from 4-28-41 to 180 days after grant.

1310 Kilocycles

WJPR—John R. Pepper, Greenville, Miss.—Construction permit to change frequency from 1310 kc. to 1690 kc. under North American Regional Broadcasting Agreement; increase power from 250 watts to 1 KW; install a new transmitter, and move transmitter. Amended to omit request for move of solicitation.

W9XG—Purdue University, West Lafayette, Ind.—Modification of construction permit (B4-PBV-52) for change in equipment frequency, decrease power and add A-3 emission, requesting extension of completion date from 3-24-41 to 9-24-41.

NEW—Columbus Broadcasting Co., Inc., Portable-Mobile (area of Columbus, Ga.)—Construction permit for a new relay station to be operated on 1622, 2058, 2150, 2790 kc., 50 watts, A-3 emission.

**FEDERAL TRADE COMMISSION ACTION**

**COMPLAINTS**

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**Jeddo-Highland Coal Company, Jeddo, Pa., and three Providence, R. I., coal dealer corporations, are charged, in a complaint, with an agreement and conspiracy to control the sale of "Jeddo-Highland" coal in the Providence area.**

The complaint alleges that under the respondents' agreement, Jeddo-Highland Coal Company confined its sales and shipments of Jeddo-Highland coal in Providence exclusively to the three respondent coal dealers, Eastern Coal & Oil Company, Sayles & French, Inc., and Atlantic Coal Company; the three dealers designated one or more other Providence anthracite coal dealers to whom Jeddo-Highland should not sell its Jeddo-Highland coal, and Jeddo-Highland refused further to sell Jeddo-Highland coal to Providence anthracite dealers who sell that brand of coal at a retail price less than the three respondent dealers' retail price. (4468)

**United States Raw Skins Corp.—A complaint has been issued charging the United States Raw Skins Corporation, 12 East 33d St., New York, with misrepresentation in the sale of leather, and the Lieberson Novelty Co., Inc., 325 South Market St., Chicago, with misrepresentation in the sale of ladies' handbags and other articles made from leather purchased from the New York corporation.**

The complaint alleges that in advertisements disseminated by the respective respondents the leather sold by the United States Raw Skins Corporation to the Lieberson Novelty Co., Inc., and to others was represented as having been produced by the tanning of antelope hide, and that the same was made therewith by the Lieberson Company as having been manufactured from such leather so produced.

According to the complaint, the leather sold by United States Raw Skins Corporation was not produced from antelope hide, and the Lieberson Novelty Co., Inc., made its articles from leather tanned to simulate antelope hide. (4469)

**AR. Winarick, Inc.—A complaint has been issued alleging that a New York manufacturer of beauty parlor and barbers' supplies and three Washington, D. C., wholesalers and jobbers entered into an agreement, combination and conspiracy under which they restrained competition and fixed prices in Washington and nearby areas of Virginia and Maryland, pursuant to which they carried on certain acts and practices in the sale of such products.**

The complaint alleges that due to their position in the wholesaling and jobbing business the three Washington distributing companies are able to control and influence the flow of trade in beauty parlor and barbers' supplies in their territory.

The complaint alleges that in pursuance of their agreement or conspiracy, the respondents sold such products in that territory at agreed-upon uniform prices set forth in price lists circulated by and among them; ceased to compete among themselves or with others in the sale of such products in Washington and nearby areas, and threatened to and did cut off supplies from those jobbers or wholesalers and retailers who refused or failed to sell such products at the fixed prices. (4470)

**CEASE AND DESIST ORDERS**

Commission has issued the following cease and desist orders:

**Macher Watch & Jewelry Company—Caroline R. Macher and Robert J. Macher, trading as Macher Watch and Jewelry Co., and as Wholesale Watch and Jewelry Co., 15 Malden Lane, New York, have been ordered to cease and desist from misrepresentations in the sale of watches, jewelry, silverware or other merchandise.**

Commission findings are that the respondents, who traded under the name Wholesale Watch and Jewelry Co. until April, 1939, represented in catalogs and other advertising material that they are manufacturers and jobbers than wholesalers and jobbers whose prices which allow the purchaser large discounts from customary retail prices. However, according to findings, the respondents are neither wholesalers nor jobbers but retailers, and their prices are retail prices.

March 7, 1941 — 233
The Commission order directs the respondents to cease and desist from using the word "Wholesale" or "Jobbers" or similar words as part of or in connection with their trade names, and from representing that their prices are wholesalers' or jobbers' prices or provide any substantial discount from customary retail prices.

Under the order the respondents further are directed to cease representing that their business is "over half a century" old or was started at any time prior to 1936, and that their rings or other jewelry are set with rubies, sapphires or other precious stones, when in fact such settings are only artificial or synthetic stones. (4087)

Ru-Ex Co., 500 Foot-Schulze Building, St. Paul, Minn., has been ordered to cease and desist from disseminating any advertisement which represents that its medicinal preparation "Ru-Ex" is in all cases safe or harmless, or that its use fails to reveal that the preparation should not be used by persons having tuberculosis or goitre. The order provides that such advertisement need contain only a statement that the preparation should be used only as directed on its label, when the label warns that the preparation should not be used by those having tuberculosis or goitre.

According to Commission findings, the respondent's product, advertised as a rheumatism, arthritis and neuritis remedy, contains the drug potassium iodide in a quantity sufficient to cause, in some instances, injury to health if used under conditions prescribed in the advertisements or under customary or usual conditions. (4387)

Stetson Shoe Co., Inc., trading as M. N. Arnold Shoe Co., South Weymouth, Mass., has been ordered to cease and desist from certain representations in the sale of its products.

Commission findings are that the respondent corporation falsely designated shoes as "Alligator Call" when in fact they were not made from the hide of an alligator but from a leather material other than that hide, which had been embossed to simulate alligator leather.

The Commission order directs the respondent to cease and desist from using the word "alligator" or any similar word to describe shoes not made from alligator hide, and provides that the word "alligator" may be used to describe the finish of shoes which are made from other materials and are finished or embossed to resemble alligator leather, when such word is immediately accompanied by other words clearly indicating that the designation refers only to the pattern embossed on such materials (4650).

Worthmore Sales Promotion Service, Inc., 221 East 20th St., Chicago, manufacturer of "Rap-A-Pak" novelty holders for cigarette packages, has been ordered to cease and desist from representing as profits of agents selling its products any amount in excess of the average net earnings regularly made by its salesmen or distributors in the normal course of business. Commission findings are that the respondent falsely represented its periodical advertising circulated in various States that salesmen selling its device customarily earn from $75 to $100 a week in the usual course of business, when in fact such earnings under those conditions are impossible. (4430)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Arco Publishing Company—Milton Gladstone, trading as Arco Publishing Co., 480 Lexington Ave., New York, publisher of manuals containing questions and answers and other materials designed to prepare persons for Civil Service examination, entered into a stipulation in which he agrees to cease representing that such publications contain questions and answers, new type or otherwise, which will be used in forthcoming Civil Service examinations, or that he has access to questions contemplated by the United States Civil Service Commission for any future examination. The respondent also stipulates that he will desist from representations causing the impression that his publications or their issuance have been authorized or approved by any agency, governmental or otherwise, when in fact they have not been so sanctioned. (3040)

Edison General Electric Appliance Co., Inc., 5000 West Taylor St., Chicago, stipulated that in the sale of "Hotpoint Electric Refrigerators" it will cease using any statement the effect of which tends to cause the belief that it has a contract with the United States Government or any agency thereof to furnish electric refrigerators in number, quantity or percentage other than a fact. According to the stipulation, it is further understood that no provision of the respondent's agreement with the Commission shall be construed as authorizing the advertising of United States Government awards when such advertising is prohibited by agreement with the Government or is in violation of law. (3041)

Emerson Radio & Phonograph Corporation, 111 Eighth Ave., New York, manufacturer of radios and radio-phonograph combination sets, entered into a stipulation to cease representing that certain radio sets have a "list price" of a designated amount, when in fact such designated amount is fictitious or in excess of the established price for which the products are customarily sold in retail trade.

The respondent corporation also agrees to cease using the word and figure "Now $9.9S" or similar phraseology to designate products regularly sold at that price so as to imply that the price referred to has been recently reduced. The respondent also agrees to desist from using the phrase "Save $10.00" or any similar phrase in referring to products having a specified alleged "list price" or which are sold at a designated amount, so as to imply that the products are customarily sold in retail trade for such list price or that their selling price is $10 less than the price for which they are customarily sold in retail trade. (3039)

Hess Hair Milk Laboratories—Frank X. Hess, trading as Hess Hair Milk Laboratories, St. Paul, Minn., has entered into a stipulation in which he agrees to cease representing through the use of testimonials or in any manner, that "Hess Hair Milk," is a "natural treatment" or natural product; that it will prevent falling hair; that it is a hair tonic or scalp conditioner or has any remedial or tonic effects on the scalp or hair; that its use will restore the original, natural or youthful color to gray or faded hair; that it will cause hair to have a youthful appearance, or that it will prevent the appearance of age. (3042)

Middle West Supply Company—Charles T. Pike, Elbert C. Pike, and Ernest C. Pike, trading as Middle West Supply Company and as The Best Gardens, 310 Prairie St., St. Charles, Ill., have been directed to cease and desist from misrepresentations in the sale of face powder and flower seeds.

Commission findings are that under the name Middle West Supply Company, the respondents have sent prospective customers products by postal cards bearing so-called "special" or "introductory" offers of "free" face powder allegedly valued at $1, provided the customer remits 10 cents to cover handling charges, and sends the respondents six postal cards addressed to friends; and that the respondents advertised that customers responding in 10 days would receive a "promptness prize." Further findings are that in a large number of cases no face powder is sent upon receipt of the dime, or if the powder is sent it is not reasonably worth more than the customer's dime, and that the respondents require an additional 24-cent payment before sending the "promptness prize." Still further, offers with respect to flower seeds were made by the respondents under the trade name of The Best Gardens, according to findings. In a large number of cases, the findings continue, no flower seeds were sent, or, if actually sent, were worthless hulls and would not grow.

According to Commission findings, the United States Post Office Department received almost 5,000 complaints regarding the respondents' failure to live up to their offers and during one year the respondents bought more than 3,000,000 postal cards, at one time mailing about 50,000 a day.

The Commission order directs the respondents to cease using the words "free," "free offer," "gift," "prize," or "premium" to refer to any of their merchandise; to discontinue representing that amounts charged for goods are anything other than their full retail price; to cease marking up regular prices of merchandise, and to desist from the representation that the respondents are conducting a special, introductory or advertising offer. (3996)
Rumagol Laboratories—Trading as Rumagol Laboratories, Rio Grande Company, and Rio Grande Drug Co., A. Medrano, 4164 Brooklyn Ave., Los Angeles, entered into a stipulation in which he agrees to cease certain representations in the sale of the preparation “Rumagol.”

The respondent agrees to cease disseminating advertisements representing that Rumagol is a competent remedy or effective treatment or analgesia for rheumatoid arthritis, muscular pains, lumbago, sciatica, gout, neuritis, arthritis, and pain from twisted joints or nerves, or so-called rheumatism, and that preparations sold in competition with Rumagol such as rubefacient or counterirritating liniments or ointments are ineffective in the treatment of such ailments. The respondent also agrees to desist from advertising that the preparation will not reveal that frequent or continued use may result in dependence upon laxatives. The stipulation provides that such advertisements must contain a statement that the preparation should not be used when abdominal pain, nausea, vomiting or other appendicitis symptoms are present, or which fail to reveal that frequent or continued use may result in dependence upon laxatives. The stipulation provides that such advertisements must contain only a statement that the preparation should not be used when abdominal pain, nausea, vomiting or other appendicitis symptoms are present, or which fail to reveal that frequent or continued use may result in dependence upon laxatives. The stipulation is supplemental to a stipulation accepted by the Commission in May, 1956, in which the respondent agreed to cease making other representations concerning “Thoxine.” (02745)

Reese Chemical Co., 10517 Frank Ave., Cleveland, has entered into a supplemental stipulation in which it agrees to cease representing that its preparation “Thoxine” is a remedy or cure for sore throat or is of any value in its treatment except as it may afford temporary relief for certain aches and discomforts associated with a cold. The respondent also agrees to cease representing that its product soothes congested membranes all the way down, or works quickly through the entire system, and that it is the ideal preparation for children. The stipulation is supplemental to a stipulation accepted by the Commission in May, 1936, in which The Reese Chemical Co. agreed to cease making other representations concerning “Thoxine.” (01395)

Restmore Mattress Company—Isadore Galitzky, trading as Restmore Mattress Co., 1121 Holmes St., Kansas City, Mo., mattress manufacturer, has entered into a stipulation in which he agrees to cease disseminating advertisements which purport to be the retail sales price of certain mattresses but which in fact, exceeds the customary retail price. (3045)

F. A. Stuart Co., Marshall, Mich., has entered into a supplemental stipulation in which it agrees to cease disseminating certain representations concerning “Stuart’s Laxative Compound Tablets.”

The respondent agrees to cease disseminating advertisements which represent that these tablets will in no case have any deleterious effects or are safe to use in all cases, or which advertisements fail to reveal that (1) use of the preparation should be discontinued when a skin rash appears; (2) the preparation should not be used when abdominal pain, nausea, vomiting or other symptoms of appendicitis are present, and (3) frequent or continued use may result in dependence upon laxatives.

The stipulation provides that the advertisement must contain only a statement that the preparation should be used only as directed on the label, if and when the label either contains warning statements of the consequences that may result from the preparation’s use, or certain conditions, or specifically directs attention to similar warning statements in the accompanying labeling. The stipulation is supplemental to a stipulation accepted by the Commission from the respondent in December, 1936. (01589)

Weller Company—H. Pierce Weller, trading as Weller Co., Atascadero, Calif., has entered into a stipulation in which he agrees to cease advertising that the preparation “Vitey Perles” will increase energy, and that the product has any effect whatever without expressly limiting such claims to cases where there is a lack of vitamin E. The respondent further stipulates that he will cease representations to the effect that Vitey Perles stimulates sexual desire or ability. (02746)

236 — March 7, 1941
THE WEEK IN WASHINGTON

The NAB Board will meet Monday and Tuesday, March 17 and 18, at the Roosevelt Hotel, New York City. (p. 237.)

Lanny Ross, radio tenor, has written a new song, "The Smile of the Irish", which BMI will make available for broadcasting in time for St. Patrick's Day. (p. 237.)

Public promotion for Radio's Movin' Day gets under way. (p. 239.)

A study of urban radio listening in the United States will be mailed to all members next week. (p. 244.)

Members who wish to propose amendments to NAB By-Laws should send them to NAB headquarters immediately. District 3, 5 and 7 meetings are scheduled.

The Code Committee replies to objections to beer advertising. (p. 244.)

Delaware's "Blue Laws" were repealed after a strict enforcement campaign involving broadcasting stations. (p. 246.)

James Lawrence Fly, FCC Chairman, said that the Commission was working on a brand new "monopoly" report. (p. 246.)

Board Meets March 17-18

The NAB Board will meet Monday and Tuesday, March 17-18, at the Roosevelt Hotel, New York City, to consider the whole music situation.

In connection with the meeting, Neville Miller issued the following statement:

"On February 26 we were informed that the American Society of Composers, Authors and Publishers had signed a consent decree requiring the Society to offer its music to broadcasters on a per program basis. I immediately wrote Mr. Gene Buck that if the Society cared to submit terms by which broadcasters could obtain licenses to use ASCAP music on radio programs I would call a special meeting of our Board of Directors to consider such proposals. Mr. Buck replied promptly, and since that time we have had another exchange of letters on the subject.

"It is understood that no broadcaster has delegated to the National Association of Broadcasters the right of negotiation and that any proposal must eventually be submitted to individual broadcasters. Several broadcasters, I am told, have themselves made this clear to ASCAP by writing ASCAP to that effect. However, Mr. Buck feels that it would be helpful if our Board of Directors were to appoint a committee to sit with ASCAP's representatives to assist in formulating a proposal for submission to broadcasters.

"I have therefore called a meeting of our board for next Monday, March 17, in New York to consider the whole question. As members of the board will assemble here from all parts of the country, I have also told Mr. Buck that I think it important that he get into concrete form the alternative bases of licensing which the Society is prepared to offer to broadcasters so that they can be considered in general terms by the members of our board at their meeting."

THE SMILE OF THE IRISH

Lanny Ross, radio tenor, has written a new song, The Smile of the Irish, which BMI will make available for broadcasting in time for St. Patrick's Day. Mr. Ross has already introduced the song in vaudeville and over the air with notable success and it will be featured in the St. Patrick's Day parade in New York by a group of Irish girls chosen for their ability to represent the beauty as well as the smiles of the Irish.

The lyrics of the song are well adapted to parody and Mr. Ross has developed special lines for the use of the Army, the Navy, and the Marine Corps. The version which begins, Oh, There's Nothing Like the Smile of a Soldier, bids fair to become a familiar bit of bellowed melody in the Army camps along with BMI's other gift to the service man's amusement, Where's the Captain's Hat?

HEARTBREAK FOR HOLLAND

A new song, My Sister and I, based on the book of the same title which is the diary of a Dutch boy refugee has created a furor among band leaders and vocalists in their eagerness to be among the first to record it.

Dick Jergens first heard the song at the offices of the (Continued on page 238)
BMI
(Continued from page 237)

publishers, BMI, and asked that a recording be sent to him in Chicago where he was playing. He played it for Eddy Duchin and they both immediately put in a bid to record the tune. In the meantime, Tommy Tucker became interested in it and mentioned it to Bea Wain. Bea liked the idea so well that she phoned the composers and asked them to come up to her apartment and play it for her. As a result, Victor announced next day in its record releases, “Bea will disc ‘My Sister and I,’ a refugee song based on the best-selling novel of the same name.” And while this was going on, Bob Chester was assigned to record the tune by Bluebird and Benny Goodman beat all the bands to an air performance by doing it Monday night, March 3rd, on WJZ. All in all, eight top-flight band leaders have reserved My Sister and I for recording, and orchestrations are not yet off the printing press.

There is something timely, tender, and poignant about the lyrics which bring home to the listener what the war has meant to the people of the peaceful little countries. Yet there is nothing that the strictest censor could delete on the ground that it told of the horror of war.

The writers, Alex Kramer, Joan Whitney, and Hy Zaret, also wrote So You’re the One and It All Comes Back to Me Now. Joan Whitney left last week for Hollywood in company with Aileen Stanley, agent for the motion picture rights of the book, to complete negotiations under way calling for production of a motion picture based upon the book.

The song will be released to BMI stations in the near future.

In Billboard’s Music Popularity Chart this week we took a red pencil to check off the BMI numbers on the list of Leading Music Machine Records, National Best Selling Retail Records, and National Sheet Music Best Sellers. By the time we had finished, it was hard to find the numbers which had not been checked. Nine out of the eleven leaders in the coin machines, eight out of ten best selling records, and twelve out of fifteen sheet music best sellers are covered by the BMI license. Billboard reports that High on a Windy Hill has this past week taken a sudden jump upward to land “among the blue-ribbon winners in the current automatic phono picture” and it is now “a prime favorite among nickel droppers.”

NEW BMI REPRESENTATIVES

Broadcast Music, Inc., announces the appointment of Mr. Harold Seader of 6 Wales Street, Dorchester, Mass., as New England representative, and Mr. J. Robert Miller, 10410 East Jefferson Avenue, Detroit, Mich., as roving representative covering from Kansas City to Pittsburgh.

FAMOUS COMPOSER SIGNS BMI CONTRACT

Broadcast Music, Inc., has completed a contract with Dr. Ralph Benatzky for his previously unpublished compositions. Composer, dramatist, novelist, and poet, Dr. Benatzky is best known in this country for such recent productions as Meet My Sister, with Walter Slezak, Cocktail, with Mady Christians, and White Horse Inn. He has the phenomenal record of having written 92 plays, about 200 one-act plays, about 5000 songs, 11 books, 150 motion pictures, and enough other items to make up the life work of an average man. For his operas and music plays he himself writes book, lyrics, and music.

Dr. Benatzky is a Czech by birth and has for years been a Swiss citizen, but he is now living in New York and has taken out his first naturalization papers to become a citizen of this country.

He began his work as an author and composer when (Continued on page 243)
TWO WEEKS TO MOVIN' DAY

Since last NAB REPORTS thirteen additional governors have either issued Movin' Day proclamations or have promised to do so. These governors, together with the station executive, securing the proclamation, on behalf of the industry, are:

ALABAMA—Gov. Frank M. Dixon
Arranged by Howard E. Pill, WSFA, Montgomery

FLORIDA—Gov. Spessard L. Holland
Arranged by W. Walter Tison, WFLA, Tampa

IDAHO—Gov. Chase A. Clark
Arranged by C. G. Phillips, KIDO, Boise

LOUISIANA—Gov. Sam Houston Jones
Arranged by James A. Noe, WNOE, New Orleans

MICHIGAN—Gov. Murray Van Wagoner
Arranged by John E. Fetzer, WKZO, Kalamazoo

NEW HAMPSHIRE—Gov. Robert O. Blood
Arranged by Earle Clement, WLNL, Laconia

NORTH CAROLINA—Gov. J. M. Broughton
Arranged by Edney Ridge, WBIG, Greensboro

NORTH DAKOTA—Gov. Harlan J. Bushfield
Arranged by A. A. Fahy, KABR, Aberdeen

SOUTH DAKOTA—Gov. H. B. Maw
Arranged by S. S. Fox, KDYL, Salt Lake City

VIRGINIA—Gov. J. M. Broughton
Arranged by Edney Ridge, WBIG, Greensboro

WASHINGTON—Gov. John Moses
Arranged by F. E. Fitzsimonds, KFYR, Bismark

SOUTH DAKOTA—Gov. Harlan J. Bushfield
Arranged by A. A. Fahy, KABR, Aberdeen

Utah—Gov. H. B. Maw
Arranged by S. S. Fox, KDYL, Salt Lake City

Virginia—Gov. James H. Price
Arranged by C. T. Lucy, WRVA, Richmond

WASHINGTON—Gov. Arthur Langlie
Arranged by H. J Guilliam, KIRO, Seattle

WYOMING—Gov. Nels H. Smith
Arranged by H. L. McCracken, KYAN, Cheyenne

These additions bring to thirty-one the number of proclamations secured and promised. Nine additional proclamations are being negotiated in eight states and the District of Columbia as follows:

Georgia, Illinois, Maryland, Missouri, New Jersey, New York, Pennsylvania, Wisconsin, District of Columbia. No information has been received from nine other states.

With the progress thus far reported, there is every possibility that the industry will secure a clean sweep in continental United States.

MORE MAYORS PROCLAIM

Several additional mayors are reported as issuing proclamations:

The Mayor of Lima, Ohio
Mayor T. W. Harris, Columbus, Miss.
Mayor Ed Warren, Cheyenne, Wyo.
Mayor Rex P. Barrett, Columbia, Mo.
Mayor of Rochester, N. Y.
The Mayor of West Palm Beach, Fla.
The Mayor of Palm Beach, Fla.
The Mayor of Lake Worth, Fla.
Mayor Ira Kruger, Aberdeen, S. D.
The Mayor of Rock Island, Ill.

EDUCATORS HELP

We have received word of cooperation from state superintendents of education in the following states since the last NAB REPORTS:

Florida
New Mexico

Some "out" states have proclamations in negotiation.

TAMPA—ST. PETERSBURG

A full page of copy in the Tampa Tribune, Tampa Times and the St. Petersburg Times is part of the Movin' Day promotion arranged by WDAE, WFLA and WTSP. The Peninsular Telephone Company bills and the statements issued by Tampa Electric Company contain Movin' Day stuffers. Plans for the broadcast barrage...
have already been completed. In addition Spessard L. Holland, Governor of the State of Florida, issued a Movin’ Day proclamation on March 5, arrangements for which were made by Walter Tison, WFLA and NAB District 5 Director.

**LIMA, OHIO**

WLOK, Lima, started promotion of Radio Movin’ Day on March 10, with a big meeting and open house for all radio servicemen in northwestern Ohio. Invitations urged servicemen to come early and stay late. They inspected WKOL’s new 250-watt transmitter and heard talks on Movin’ Day by Russ Shettler, WLOK’s chief engineer, and by Kent Richey, Lima radio parts jobber. Meeting was strictly informal, and was followed by special entertainment by WLOK staff. Elaborate refreshments and dutch lunch were served. At conclusion of meeting visitors were invited to remain for early morning frequency check.

WLOK has arranged consistent follow-up by dramatized broadcasts, announcements, mayor’s proclamation and various stunts. Advertisers are cooperating in allowing mention of Movin’ Day on their programs.

**TRANSCRIPTION IDEA**

When V. J. LeBarron, secretary-treasurer, KGNF, North Platte, Neb., received the Movin’ Day tune recently released to all stations, he sent it to C. P. MacGregor transcription company in Hollywood. There, Anita Boyer “sang it in three different rhythms, making three different tracks on the transcription. We are going to use it ‘loud and often’ until everyone will be singing it when Movin’ Day gets here.

“Maybe some other station would like the idea.”

**1400 KILOCYCLE CLUB**

Bob McRaney, general manager, WCBI, Columbus, Miss., has come up with an outstanding idea to publicize his new dial location. It is passed on in the belief that it will be useful to other stations. Here it is in Mr. McRaney’s own words:

“We have organized a radio fan club called the 1400 Kilicycle Club. We are endeavoring to secure 1400 charter members; one member for every kilocycle we have after March 29. Regular membership cards are being printed and mailed to those requesting them, the first 1400 being charter members of the club. The idea seems to have caught on splendidly, and we are being besieged with requests for membership cards. Thirty minutes every day has been set aside on WCBI during which time requests of the membership are answered, details of the organization given, names of new members read, and special emphasis made on Movin’ Day angle of WCBI to its new frequency 1400 kilocycles.

“This coupled with our regular newspaper publicity, plus distribution of stuffers in power bills, plus the Mayor’s proclamation should certainly bring to the attention of our listeners the facts of Movin’ Day.”

**PROMOTION TIME TABLE**

1. Increase promotion tempo in accordance with your plans.
2. Make a recording of the Movin’ Day Theme. Get everybody whistling it!
3. Plan for promotion on and after March 29. As a precaution the use of newspapers may be in order.
4. Try your telephone company again for April insertion of stuffers. From reading NAB Reports you have noticed that some telephone companies are now cooperating with the industry. A great many people say “no” the first time.

**PROMOTES MAYORALTY “PROCS”**

When the Hon. Harland J. Bushfield, Governor of the State of South Dakota, signed the Movin’ Day proclamation he agreed to cooperate further with the radio industry. On the day after the signing of the proclamation, on March 5, he wrote A. A. Fahy, general manager, KABR, that he would issue the proclamation on March 15 as requested. Mr. Fahy is also promoting the idea of having the Mayors of South Dakota cities and towns issue similar proclamations.

**STRANGE COINCIDENCE**

By coincidence Governor John Moses of North Dakota also selected March 15 for the issuance of his Radio Movin’ Day proclamation. So said his letter to F. E. Fitzsimonds, manager, KFYR, Bismarck, N. D.

**MAILED COPIES OF IDAHO “PROC”**

Immediately after Governor Chase A. Clark, of Idaho, issued his proclamation, C. G. Phillips, manager, KIDO, Boise, mailed a copy to all stations in the state. Reports have it that it is being used effectively.

**COLUMBIA, MO.**

Foster H. Brown, Jr., KFRU, Columbia, Mo., is taking no chance that any listeners will be ignorant of the arrival of Movin’ Day. Here’s what has been arranged so far:

Spot announcements beginning same date. On April 1 the telephone company will include reallocation stuffers in its bills.

Telephone calls to all radio servicemen to stimulate their interest and cooperation are currently being made.
KENTUCKY UTILITIES

Kentucky utilities which services a huge part of the state of Kentucky is cooperating aggressively in spreading reallocation news via the enclosure route. Officials were contacted by Ted Grizzard, station director of WLAP, Lexington.

SPECIAL MOVIN' DAY SECTION

Douglas Fellows, radio editor, Hartford Courant, is busy compiling material for a special section in the Courant to be issued March 23. The Courant is Hartford's only Sunday newspaper.

Decision to publish the special section was made after conference with James F. Clancy, WTIC Sales Promotion Manager, Walter Haase, program manager, WDRC, and officials of WTHT.

ROCHESTER

William Fay, general manager, WHAM, Rochester, N. Y., has prepared an impressive educational and promotional schedule over his station. Account of “additional promotion incidental to Movin’ Day” covers several pages. Some of the highlights are:

Each day WHAM's full column promotion ad in Rochester's morning and evening newspapers, total circulation 173,000, plugs new frequency, as well as programs.

The station is offering a new log book in cooperation with the Stromberg-Carlson plant. The book will also be available through Stromberg-Carlson dealers throughout the United States.

Announcements on WHAM between March 16 and 20 will call attention to the fact that the station shifts to 1180 kilocycles. From March 22 all sustaining programs will give similar information. A representative of the local radio servicemen's group will be presented to discuss “Seven Days—300,000 Sets.” There will also be courtesy announcements.

March 23, church services will mention frequency shifts. Also courtesies. March 24, radio servicemen's talk No. 2. Also courtesies.

March 25, Lee McCane, assistant to the general manager of Stromberg-Carlson will discuss “Station Interference and Frequency Reallocation.” Also courtesies. On this day tests will be made on 1180 kc. between 1:00 a.m. and 2:00 a.m. to assist dealers and servicemen in locating the frequency on push button receivers.

March 26, Ken Gardner, chief engineer, will discuss radio Movin' Day. On the same date radio servicemen's talk No. 3 is scheduled. Also courtesies. Next day WHAM will broadcast from the transmitter telling how the retuning of the 50 kw transmitter was achieved. Members of the engineering staff will be interviewed. More courtesies.

On March 28, the station will present the proclamation of the Mayor of Rochester.

The mobile transmitter will be used to conduct a man-on-the-street program. Quiz questions will deal with such common but little understood words as “crystal,” “frequency,” “carrier,” “microphone,” “clear channel,” etc.

A science program of the Rochester School of the Air will explain to the boys and girls what the frequency shift means. More courtesies.

March 29, servicemen’s talk No. 4—“Radio's 'M' Day.” The Stromberg-Carlson company's sales manager will broadcast a second show “Radio Sets Five Years Ago and Now.” More plugs.

March 30 through April 5, WHAM will continue to announce the station's new frequency.

WEST PALM BEACH

Steve Willis, general manager, WJNO, West Palm Beach, Fla., has no interest in a printing plant but just the same he's having 40,000 dodgers printed on reallocation and will distribute 400 window cards in 2-color silk screen process.

He has secured proclamations from the mayors of West Palm Beach, Palm Beach and Lake Worth. Similar resolutions were issued by the local Board of Public Instruction, Boy Scouts, Girl Scouts, Unified Drive, Red Cross, the Woman's Club of West Palm Beach, the Woman's Club of Lake Worth and 15 additional community groups connected with educational, civic, religious and charitable activities.

Between March 7 and 11 inclusive WJNO conducted a teaser announcement campaign—“Wait for THE day! It's Coming.” From March 12 to 15 the copy read—“Wait for THE day! We have a date at twelve-thirty.” Beginning March 16 and continuing through the 20th the announcement will read “Wait for WJNO Day! We have a date at twelve-thirty.”

Beginning March 20 the ten daily news periods will carry a straight news story reporting events pointed to “WJNO Day,” March 29. First news stories will be the mayor's resolution and those of the civic groups.

March 20 will emphasize the retailers' anxiety to cooperate by displaying the “WJNO Day” window and counter cards.

The majority of the 40,000 dodgers will be distributed by Boy Scouts throughout the county, the time being credited toward their civic award. The dodgers will also be distributed to all churches on “WJNO Sunday,” March 30, and at the schools. Dodger distribution will cover the March 20-29 bracket. The distribution of window and counter cards begins on March 20.
Newspaper advertising begins March 28. This will be a 3-column ad reproducing the mayor’s resolutions and signed by all civic groups. Sunday papers will contain smaller ads.

On March 29 the Station will present a program which pays tribute to the community for the way it has been honored by citizens and civic groups.

CHICAGO

Chicago stations are working closely with the Chicago chapter, Radio Servicemen of America. They have provided RSA members with printed call letters for use as station tabs. This service organization has a large membership in Chicago and should prove most helpful to all Chicago stations.

PHILCO 30,000 MAILING

The service department of Philco Corporation, reports through J. R. Jackson, manager, service department, that 30,000 radio dealers and servicemen throughout the United States and Canada have been mailed a four page Movin’ Day promotion.

COLUMBUS, OHIO

Here’s the outline of WBNS’ promotion for Columbus and adjacent territory as relayed by Jim Yerian, promotion manager:

Will plug a single telephone number for local radio servicemen’s association. Line terminate in a clearing house office for service calls to be routed according to the location.

An elaborate program of spots begins March 17. The copy will be short if a commercial spot follows, longer for breaks which do not precede a spot; one-minute on station breaks not preceding commercial spots or commercial programs. Some of them will be transcribed spots for use is being made of the NAB Movin’ Day theme song. Listeners are urged to make a reservation with their radio repairman for service to be performed as soon after March 29 as possible.

Prior to March 29 radio will be the only medium used. But beginning with that date and continuing to April 10 a thorough newspaper campaign has been prepared. A ten-inch ad will appear in the Ohio State Journal and eight county dailies with three such insertions in county weeklies and semi-weeklies.

Another series of two-inch ads will appear in the Ohio State Journal and eight county dailies for ten consecutive days following the change. The same design in same size will be used on colored stickers. Some of them will appear on news releases going to over 1,000 schools in central Ohio.

Irwin Johnson is preparing a script for the educational program, “Liberty Under Law,” which will include a history of frequencies in radio and which will point out the advantages of reallocation. This program now carried by seven Ohio stations will probably be carried by twelve as of March 29.

Thirty thousand rural families will receive a booklet which includes a complete station log, picturization of the staff and information relative to frequency changes.

Ten large billboards will be used; the lobby will be decorated; posters will be prepared suitable for sponsors’ windows; the house organ will promote the new wave lengths and auto license plates for all staff members have been designed.

Letters will be sent, outlining the promotion campaign, to all radio dealers in central Ohio. Another letter will go to automobile dealers in the same territory. It urges them to notify owners of auto radios to have their sets changed.

The grocer and druggist letters, also containing frequency change information, will suggest that these merchants discuss changes with their customers so they will not miss a single program which sells the advertised goods in stock.

Every individual user of WBNS’ time will get a selling story.

SACRAMENTO, CAL.

The Radio Movin’ Day promotion plan being undertaken by KFBK, Sacramento, covers five sheets. Highlights are:

A meeting of servicemen on March 15. Invitations were extended to 730 servicemen north of Sacramento as far as the Oregon line.

Magazine articles in: California State Grange publication; Pacific Rural Press, California State Employees’ Magazine.

A full page layout is scheduled for the magazine section of the Sacramento Bee on March 29. A technical story will appear in the Bee on March 25 and a general story March 27.
The daily publication of one-inch teaser ads in the Sacramento Bee covers March 10-18. Six-inch ads appear 19, 20, 21 and 22. A thirty-inch ad is scheduled for March 25 and a double truck in the Bee is set for March 26. This is a cooperative ad with servicemen and dealers’ tie-in.

The tempo of spot announcements is stepped up from two daily, March 10 to 15, to three daily, March 16 to 23; and five daily, March 24 through 29.

Jointly with Sacramento’s other station, KROY, 20,000 of the 2-color NAB stuffers are being distributed by department stores.

Single card radio logs printed on two sides will be distributed throughout northern California. At the meeting of servicemen Norman Webster, chief engineer of the McClatchy engineering department, will give a technical explanation of frequency allocation.

Howard Lane, business manager of the McClatchy Broadcasting Company, will urge radio servicemen’s fullest cooperation. The station’s powerful 300 watt PA system, just completed, will be demonstrated at the meeting.

ROCK ISLAND, ILL.

Ivan Streed, program manager, WHBF, reports that promotion plans are already set in motion in Rock Island.

First, he reports, that the Mayor’s resolution has been printed in the Davenport (Iowa) Democrat, Moline Dispatch and the Rock Island Argus.

The Peoples Power and Light Company has distributed stuffers with their bills mailed to the consumers in the Tri-Cities. Cards have also been placed in the Tri-Cities’ busses; the Tri-Cities’ leading theaters are running a two frame trailer. “We are using the NAB ‘Movin’ Day theme’ and have made a male trio transcription of it in connection with other spot announcements.”

The Rock Island high school will do one of the scripts sent by NAB, while the station will produce the other two. During the week of March 24 Chief Engineer R. J. Sinnett will broadcast directly from the transmitter. He also advised that many radio service shops are running special announcements.

WINSTON-SALEM

When station WSJS, operated by the Piedmont Publishing Company, Winston-Salem, N. C., moves to its new spot on the dial it changes from 1310 to 600 kc.

Harold Essex, commercial manager, has already published three full pages on Movin’ Day and the station’s new affiliation with the Red Network. Three more are scheduled. Then follows a series of small “scatter ads” from March 27 to 31, inclusive. These deal exclusively with Movin’ Day.

Broadcast promotion, because of the amount of prior newspaper promotion, will be held under leash until March 23. On the “Club 600”, afternoon show, however, a 2-color log is being offered listeners.

The call letters and dial location of four columns of stations are included in this log. On this program the announcer gives information concerning Movin’ Day.

DUKE POWER COMPANY

According to E. C. Marshall, vice president, Duke Power Company, reallocation information has been printed on all post card statements going to consumers. This company serves Charlotte, Greensboro, Winston-Salem, as well as a large number of other North Carolina communities.

WASHINGTON RALLY

Washington D. C. stations, WJSV, WMAL, WOL and WRC, servicemen and members of the Electric Institute held their Radio Rally in the auditorium of the Potomac Electric Power Company, March 12.

Speakers were Art Stringer and Lynne Smeby, of NAB, E. K. Jett, FCC chief engineer, and A. D. Ring, assistant chief engineer.

After outlining the national promotion and education which will be placed behind Movin’ Day, Mr. Stringer called upon representatives of the four stations to reveal their individual plans. These speakers were John Dinwiddie, WMAL-WRC, Charles Zurhorst, WOL, and John Heiney, of WJSV.

CBS, MBS and NBC provided the program of live talent. Mr. Jett asked the servicemen to tell their customers to give the reallocation plan a reasonable time to prove itself before registering complaints with the Commission.

He said that foreign interference should disappear from the broadcast band and “that is the main thing we are endeavoring to adjust.”

BMI

(Continued from page 238)

his career as an officer in the Czech Army was broken up by a long bout with blood poisoning caused by a minor wound. Ultimately he recovered his full health and, although he holds decorations from three governments, many broadcasters will envy him most of all the fact that he keeps his golf score down to 74.

The announcement of numbers by Dr. Benatzky to be published by BMI will be made in the near future.

BOY OF THE MONTH

Ernest Gold, composer of eighteen BMI compositions was chosen “boy of the month” by the magazine Youth March 14, 1941 — 243
Today for their March issue. Mr. Gold's compositions include *Practice Makes Perfect*, *Accidently on Purpose*, *Come Down to Earth My Angel*, *Montevideo*, *Shining Hour*, and other numbers familiar to all BMI subscribers. He is nineteen and is now studying theory with Otto Cesana. He began the study of music at the age of four.

**DEMAND FOR BMI'S MUSIC**

Twenty-seven thousand requests for particular BMI numbers in ten weeks is the record reported by Nathan Frank, Manager of WCBT at Roanoke Rapids, North Carolina.

**TRICK HORSES LIKE BMI**

The trick horses at the Forth Worth Spring Rodeo recently did their stuff to the tune of BMI licensed music. Harold Hough, WBAP-KGO, reports that they experienced little difficulty in learning their new cues, even though they were fetched up on ASCAP music.

---

**URBAN SURVEY PUBLICATION**

The publication "Urban Radio Listening in the United States" will be put in the mails next week. This forty-page booklet will present the results of quarterly surveys conducted during the years 1938 and 1939. It is published on behalf of the broadcasting industry by the National Association of Broadcasters in cooperation with the Columbia Broadcasting System and the National Broadcasting Company. The surveys were conducted by Crossley, Inc.

The publication of this survey was a project of the NAB Research Committee with membership as follows: William J. Scripps, WWJ, Chairman; H. M. Beville, Jr., Research Manager, NBC; Arthur B. Church, President, KMBC; James D. Shouse, Vice President, WLW-WSAI; Dr. Frank N. Stanton, Research Director, CBS; Theodore C. Streibert, Vice President, MBS; Lee B. Wailes, Manager, Westinghouse Radio Stations, Inc.; J. W. Woodruff, Jr., President, WRBL; Paul F. Peter, NAB Director of Research, ex officio.

Mr. Peter, in cooperation with Mr. H. M. Beville, Jr., and Dr. Frank Stanton, supervised the technical detail and, in cooperation with Mr. E. P. H. James, NBC, and Mr. Victor M. Ratner, CBS, supervised the publication.

"Urban Radio Listening in the United States" will contribute materially to the knowledge of radio ownership and listening habits of the urban population of the country. It is a counterpart to the rural survey published by the Joint Committee on Radio Research in 1938.

**COST-PER-INQUIRY**

On the cost-per-inquiry front, every day more and more concerns are trying to get stations to accept contingent deals and guarantee a fixed return. Some of these are:

- Driver and Company, Omaha, Nebraska, on behalf of an unknown stationery company.
- Two Creek Ranch, Ovando, Montana.
- Norman B. Furman, Inc., 117 West 46th Street, New York City, on behalf of "Let's Visit Lee Sims."

All four, in the opinion of the Bureau of Radio Advertising, are opposed to the best interests of radio stations, and the Bureau has written them accordingly. At the same time, it has invited each of the above-named companies to give serious consideration to a paid radio campaign, if they wish to obtain maximum results and maintain the continued goodwill and cooperation of the broadcasting industry.

**AGENCY CONTRACT FORM**

Results of the final questionnaire on the revision of the agency contract form to be recommended by the NAB were received too late for inclusion with this issue of the Reports. The recommended form will be printed as a supplement to next week's issue.

**SALES MANAGERS LAY PLANS**

The Sales Managers Executive Committee held an all-day session at the Palmer House, Chicago, on Wednesday, March 12. Frank Pellegrin, newly appointed Director of the Department of Broadcast Advertising, and C. E. Arney, Jr., Assistant to President Neville Miller, met with the committee. Plans for the Commercial session at the 19th NAB Convention were discussed. As a result a most interesting program is promised. Details will be announced as soon as the necessary arrangements have been perfected. Those present were:

- E. Y. Flannigan, WSPD, Toledo, Ohio, Chairman;
- Ellis Atteberry, KCKN, Kansas City, Kansas;
- Charles Caley, WMBD, Peoria, Illinois;
- Eugene Carr, WGAR, Cleveland, Ohio; and
- Craig Lawrence, KRNT, Des Moines. Willard Egolf, KVOO, Tulsa, Oklahoma, was prevented from attending by reason of a last minute change in the date of the meeting.

**NAB**

**AMENDMENT OF BY-LAWS**

The attention of all NAB members is directed to the provision of the By-Laws respecting proposed changes. This reads as follows:
“Article XIII—Amendments

“Section 1. These By-Laws may be amended, repealed, or altered, in whole or in part, by a two-thirds vote at any annual meeting of the Association provided the proposed change is submitted by mail to the last recorded address of each member at least thirty days before the time of the meeting which is to consider the change.”

Should any members desire to submit proposed amendments for consideration of the membership, they should be sent in immediately in order that the notice provided may be given the membership of the Association.

DISTRICTS 3, 5, 7 MEET

District 3 broadcasters will meet April 7 at the Benjamin Franklin Hotel, Philadelphia.

District 5 will meet April 11 at Ponte Vedre Beach, Fla.

District 7 will meet at the Netherland-Plaza, Cincinnati, on April 4.

Directors will be elected at all three meetings. Discussion of music and other industry problems will make these meetings of prime interest to all broadcasters.

CODE RULINGS

Rulings released by the Code Compliance Committee this week are of general interest to members. A temperance group had inquired if beer advertising in and of itself did not violate the Code, and several stations raised the question whether talks by Norman Thomas, Socialist candidate for President, would also violate the controversial public issues section if aired under sponsorship.

In brief, the principles involved are that the mere advertisement of any individual product in a competitive field could not amount to a violation of the Code, and that whether a sponsored talk would contravene the public controversial section depends on the content of the script as interpreted by the individual licensee.

The Committee’s releases:

Radio Station ———.

If Thomas talks involve an editorial presentation of his views or those of Socialist Party on currently controversial public issues it would violate Code to sell time under whatever sponsorship.

Russell P. Place, Secretary,
NAB Code Compliance Committee.

March 10, 1941.

Mr. Herbert H. Parish, Executive Director
Minnesota Temperance Movement
204 Hodgson Building
Minneapolis, Minnesota

Dear Mr. Parish:

With reference to your letter of February 14 to Mr. Edgar Bill, Chairman of the NAB Code Compliance Committee, I am writing to advise you of the results of a poll of that committee on the question raised in your letter.

It is not the policy of the Committee to give opinions or rulings to anybody other than broadcasting stations, and even then the Committee acts only in an advisory or interpretive capacity to the station licensees with whom final responsibility rests under the law.

However, the thinking of the Committee on the question of beer advertising violating the Code as selling time for a controversial public issue runs about as follows:

We firmly believe that our principles regarding the handling of controversial questions are sound and should be maintained. In the practical application of those principles we, for instance, sell time to commercial sponsors solely for the advertising of the sponsors’ goods or services. Conversely, we do not sell time to commercial sponsors, individuals, or special interest groups to be used to argue controversial issues or promote viewpoints in connection with arguable social ideas. Obviously, the material that would be used by your group falls in this category. Your letter errs in inferring that this type of subject matter is “barred from the air.” It is merely a type of subject matter for which, if discussed, we refuse to accept money. Instead it is handled, just as all other discussion in similar fields, on time provided for such discussion and in the light of the legitimate demands on our discussion time and the public interest in the subjects proposed.

There is nothing in the Code one way or the other with regard to the advertising of beer. This naturally is a matter for the decision of the individual licensee and no violation of the Code would be involved if he accepts beer advertising which does not use the time to argue any controversial issues that might arise. In this respect this seems to be similar to the principle by which stations would gladly sell time to a common carrier for the promotion of its services in connection with travel, whereas they should refuse to sell time to the same carrier to be used to agitate for new rates, different regulation, taxation, legislation or the like.

To sum up, it hardly seems possible that the advertisement of any product could raise a controversial issue; any controversy that might arise would naturally deal with the laws permitting the sale of the product and not the advertisement itself of an individual product in a competitive field.

Cordially yours,

Russell P. Place, Secretary,
Code Compliance Committee.

INSURANCE COMMITTEE

In a release which has gone forward to NAB members, Roger W. Clipp, WFIL has announced that the NAB Insurance Committee has completed a tabulation of the answers received to the Insurance Questionnaire that was mailed the last of October. Included with the release was a summary of the questionnaire results. It is thought that the questionnaire tabulation may elicit further comment about insurance from broadcasters, and if so, they are requested to send comments to Roger Clipp, WFIL, Widner Building, Philadelphia.

The comprehensive questionnaire contained questions about 52 different types of broadcast station insurance. The percent of the stations carrying various types of insurance ranged all the way from 94.2% for those carrying workmen’s compensation down to 1.82% for those carrying check-room insurance. It was also interesting to note that insurance risks of various kinds associated with fire and loss due to the elements, ran high. Risks in connection with using automobiles for business were covered to a high percent also.

Other items such as insurance to cover loss of income from interruption to broadcast service due to mechanical failure, libel and slander, copyright infringement, war and bombardment, parcel post and registered mail, house musicians’ instruments and borrowed property insurances, all ran to low percentages.

The final tabulation of the information received in answer to the Insurance Questionnaire, contains the re-
quired data for carrying on the standardization work of the Committee with the insurance companies.

As soon as comments from the membership on the Insurance Questionnaire have had time to come in, another meeting of the Insurance Committee will be called. Chairman Clipp anticipates that this will be about March 24. The other members of the Insurance Committee are: Wm. I. Moore, WBNX; Charles A. Wall, NBC; C. R. Dean, CBS; J. R. Poppele, WOR and MBS.

THANK-YOU NOTE

The National Tuberculosis Association wishes to convey, through NAB, its gratitude to the broadcasting industry for support of its work during the past year.

LABOR BOARD ORDERS

The Labor Relations Board today announced certification of Associated Broadcast Technicians Unit, International Brotherhood of Electrical Workers (AFL), as the sole bargaining agent of the transmitter operators employed by WDEL, Incorporated, Wilmington, Delaware.

At the same time the Board dismissed the petitions for investigation and certification of representatives of employees of WGAL, Incorporated, Lancaster, Pennsylvania, and York Broadcasting Company, York, Pennsylvania, filed by Associated Broadcast Technicians Unit, International Brotherhood of Electrical Workers, (AFL).

The Board's actions were based on the results of secret ballot elections conducted on October 14.

The Labor Relations Board this week announced a decision requiring the Capital Broadcasting Company, Inc., Montgomery, Alabama, operating Station WCOV, upon request, to bargain collectively with International Brotherhood of Electrical Workers (AFL) as the sole bargaining agency for its radio engineers, and to offer reinstatement with back pay to four employees.

Legislation

DELAVORE BLUE LAW CASE

Repeal of the Delaware Blue Law last Friday sets at rest the right of the two Delaware stations, WDEL and WILM, to broadcast on Sundays. That morning Judge Isaacs had dismissed complaints against J. Gorman Walsh, manager of both, and Harvey C. Smith, program director of WDEL, on the grounds that radio was a necessity on Sundays as much as on other days. H. Albert Young, their attorney contended that radio was interstate commerce and the Blue Law an unreasonable exercise of the police power of the state which interfered with interstate commerce.

Although the arrests were clearly only part of a campaign to repeal the Sunday Law by enforcing it, the complaints were brought in the police court in Wilmington, from which, under the Delaware constitution there is no appeal. Clair McCollough was determined to fight the principle involved, and the defendants, if convicted, were prepared to spend the night in jail rather than pay the four dollar fine. The telephone wires buzzed between Lancaster, Penna., Wilmington, Washington and New York. NAB counsel, Washington counsel and Mr. Young laid their plans. The results—Messrs. Walsh and Smith were released.

DANAHER AMENDMENT

Amendment to the Lend-Lease bill introduced by Senator Danaher of Connecticut for “no censorship” of both radio and the press failed to pass with the bill and there was no substitute for it. (NAB REPORTS, p. 225.)

COMMITTEE FAVORS WAKEFIELD

The Senate Committee on Interstate Commerce on Thursday favorably reported the nomination of Ray C. Wakefield to succeed the late Col. Thad H. Brown as a member of the FCC. Mr. Wakefield was nominated by the President last week for a 7-year term beginning July 1941.

FEDERAL LEGISLATION

H. R. 3789 (McLean, R-N. J.) DAYLIGHT SAVING—To save daylight and to provide standard time for the United States. Referred to Committee on Interstate and Foreign Commerce.

STATE LEGISLATION

Texas:

H. 659 (BRIuhl) (Same as S. 210) DENTISTRY—Amend Sec. 2 of Chap. 501, page 1346, of the Acts of the Regular Session of the 45th Legis., and making it unlawful for any dentist to obtain business in connection with the practice of dentistry by employing "cappers" or "steerers," etc. Referred to Committee on Public Health.

Washington:

S. 220 (Roberts) SUBVERSIVE ACTIVITIES—An act to curb Nazi, Fascist, Communist and other subversive activities and to provide penalties for violations of this act, and declaring an emergency. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION

"MONOPOLY" REPORT

James Lawrence Fly, Chairman of the FCC, referring to the "Monopoly" Report on which the Commission began conferences on Monday, said that the report is
not intended to be a revision of the original Committee report, but is a new report for the Commission as a whole. This, he told newsmen at a press conference early this week, does not imply any reflection on the Committee report as such but simply that the full Commission is preparing its own report. At the moment, of course, the report is still in preliminary draft stage. There was no indication early in the week how long it will take the Commission to complete its work on the Monopoly Report.

Mr. Fly told the newspaper correspondents that last week's television trip to Philadelphia-New York was one of the most constructive yet taken. The Commissioners saw, he said, three demonstrations, all of which were impressive. Mr. Fly feels, he stated, much encouraged by the progress which he noted on the trip.

The Chairman said that he hoped the television hearing which begin on March 20 will take only a day or two. He told the newsmen that he sees a definite trend toward agreement in the industry on the engineering problems of television.

**FM SERVICE PROPOSED**

High frequency (FM) broadcast service to approximately half of North and South Carolina and smaller portions of Virginia, West Virginia, Kentucky, Tennessee and Georgia is proposed by Grodon Gray of Winston-Salem, N. C., who was today granted a construction permit by the FCC for this purpose.

Service to this 69,400 square miles of area embracing 4,346,000 population is made possible by selection of an antenna site on one of the highest points east of the Rocky Mountains—atop Clingman’s Peak (6,600 feet), two miles southwest of Mt. Mitchell and 19 miles northeast of Asheville, N. C. Here the applicant contemplates erecting a 200-foot tower to be surmounted by a 75-foot antenna, thereby giving the antenna an over-all height above sea level of 6,875 feet. Mt. Mitchell, being state owned, could not be used for the antenna location.

The applicant, who is president of the Piedmont Publishing Company, which is licensee of standard broadcast station WSJS at Winston-Salem, is authorized to use the frequency 44,100 kilocycles for this FM station.

**FM AUTHORIZATION**

Pursuant to preliminary announcement of January 12, the FCC has adopted rules to permit FM programs to be relayed from the main studio to the transmitter by means of low-power transmitters employing highly directive antenna.

The term “STL” designates this new “studio-transmitter link,” which is provided to meet the requests of FM broadcasters for such service. Under the rules as adopted, this class of station is limited to licensees of high frequency broadcast stations. Only one such station, in a fixed location, will be licensed to a single FM broadcaster. Frequency modulation must be employed, and experimentation tending to develop this type of relay service is required.

Twenty-three frequencies above 330,000 are allocated for “STL” experimental use.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following hearings are scheduled to be heard before the Commission in broadcast and television cases during the week beginning Monday, March 17. They are subject to change.

**Wednesday, March 19**

NEW—Butler Broadcasting Corporation, Hamilton, Ohio.—C. P., 1420 kc., 250 watts, unlimited.

**Thursday, March 20**

Television

To Be Held in Room A, Interstate Commerce Commission Building, 12th St. and Constitution Ave., Washington, D. C.

For the purpose of considering the various engineering standards suggested for television broadcast stations, to determine when television broadcasting shall be placed upon a commercial basis, and to afford all interested parties full opportunity to be heard on all pertinent problems related to the standardization and commercialization of television broadcasting.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

**April 21**

Consolidated Hearing

WPAY—Chester A. Thompson (Transferor) and The Brush-Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio.—Transfer of control of corporation; 1370 kc., 100 watts, unlimited time.

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Renewal of license; 1370 kc., 100 watts, unlimited time.

**May 1**

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary); 890 kc., 1 KW night, 5 KW LS, unlimited.

**May 19**

WAGA—Liberty Broadcasting Corporation, Atlanta, Ga.—C. P., 590 kc., 1 KW night, 5 KW day, DA night, unlimited. Present assignment: 1150 kc., 500 watts night, 1 KW day, unlimited.

**March 24**

WARM—Union Broadcasting Company, Scranton, Pa.—License to cover C. P., 1370 kc., 250 watts, unlimited.

**April 10**

NEW—Granite District Radio Broadcasting Co., Murray, Utah.—C. P., 1300 kc. (1400 kc. when Havana Treaty is effective), 250 watts, unlimited.
FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WLZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Granted construction permit to increase power from 500 watts night, 1 KW day, to 5 KW; install new equipment and direct antenna for day and night use, for operation after March 29, 1941 (B1-P-26868).

WJAS—WSIX, Inc., Nashville, Tenn.—Granted construction permit to install new transmitter and directional antenna for night use; increase power from 250 watts, unlimited time, to 1 KW night, 5 KW day; change frequency from 1210 kc. to 980 kc. under NARBA; and move transmitter to Buena Vista Pike and Moorman Arm Road, Nashville, Tenn.; for operation after March 29, 1941; granted upon condition to compliance with certain engineering requirements (B3-P-3051).

WHN—Marcus Loew Booking Agency, New York, N. Y.—Granted construction permit to change frequency from 1010 kc. to 1050 kc. under NARBA; increase power from 1 KW night, 5 KW day, to 5 KW day, 50 KW; install new transmitter equipment and directional antenna for both day and night use; for operation after March 29, 1941 (B1-P-26999).

Midland Broadcasting Co., Kansas City, Mo.—Granted construction permit for new FM developmental broadcast station, subject to meeting such requirements, to operate on frequency 43500 kc., 1500 watts, special emission for frequency modulation (B4-P-51)

Thomas J. Watson, Endicott, N. Y.—Granted amended application for construction permit for new standard broadcast station, subject to use of synchronous amplifiers to cover Endicott and Binghamton, which will meet engineering approval, to operate on 1120 kc., with 250 watts, unlimited time; change transmitter site to be determined with Commission's approval (B1-P-1679).

KBX—Oklahoma Press Publishing Co., Muskogee, Okla.—Granted construction permit to install new transmitter and increase power from 100 to 250 watts (change frequency from 1490 kc. under NARBA) (B3-P-3112).

KSTP—KSTP, Inc., St. Paul, Minn.—Granted modification of license to modify the directional antenna for daytime use (B4-ML-1043).

KFBC—Frontier Broadcasting Co., Cheyenne, Wyo.—Granted modification of license to increase nighttime power from 100 to 250 watts and change frequency from 1120 kc. to 1210 kc., 250 watts day, unlimited time (B5-ML-1050).

DESIGNATED FOR HEARING

Triple Cities Broadcasting Co., Inc., Binghamton, N. Y.—Designated for hearing application for construction permit for new station to operate on 1420 kc., 250 watts, unlimited time (B1-P-2990).

Utica Observer-Dispatch, Inc., Utica, N. Y.—Designated for hearing application for construction permit for new station to operate on 1120 kc., 250 watts, unlimited time, exact transmitter site and type of antenna to be determined (B1-P-2702).

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Designated for hearing application for modification of construction permit for new station to increase hours of operation from daytime to unlimited, using 500 watts at night; make changes in equipment and extend commencement and completion dates to 10 and 30 days after grant, respectively. Requests facilities of WTVS, Jackson, Tenn. (station operates on 1500 kc., 1 KW, daytime only) (B1-MS-1150).

miscellaneous

KMB—Liners Broadcasting Station, Inc., Monroe, La.—Passed motion to consolidate hearing on application of KMB for construction permit to change frequency and increase power with application of KNOE, Inc., for a new station in Monroe.

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Granted in part motion to grant hearing now scheduled for March 18 to May 19 on application for construction permit to change frequency from 1150 kc. to 590 kc.; increase power from 500 watts night, 1 KW day, to 1 KW day, 5 KW night, unlimited time, using DA for night.

WARM—Union Broadcasting Co., Scranton, Pa.—Granted in part motion for continuance of hearing now set for March 10 to March 24 in re application for license to cover construction permit of 1570 kc., 250 watts, unlimited time.

KFRO—Voice of Longview, Longview, Tex.—Passed for one week petition to intervene in the hearing on application of KGNQ, Dodge City, Kans., for modification of license.

Granite District Radio Broadcasting Co., Murray, Utah.—Granted motion for order to take depositions in re application for new station to operate on 1300 kc., 250 watts, unlimited time.

WLAK—J. P. Marchant, D. J. Carey, Melvin Myer (Transferees), and The Tribune Co. (Transferee), Lakeland, Fla.—Granted joint motion to dismiss application of applicants to transfer control of Lake Region Broadcasting Co., licensee of Station WLAK, Lakeland, Fla.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Dismissed motion to continue hearing now scheduled for March 10 on applications of WCMC, WCAP and WTNJ for renewal of licenses, and applications for construction permits of Trent Broadcasting Corp., and WTNJ, as this hearing was continued by the Commission on March 4, 1941.

WGST—Georgia School of Technology, Atlanta, Ga.—Granted motion for continuance of hearing now scheduled for March 12 on application for renewal of license and directed continuance to May 1, 1941.

Continued for one month the consolidated hearing now scheduled for March 10 on applications for renewal of license for WCMC, Camden, N. J., WCAP, Ashbury Park, N. J., WTNJ, Trenton, N. J., and for construction permit of Trent Broadcasting Corp., Trenton, N. J., for new station, and WTNJ, Trenton, N. J., for change in operating assignment.

Upon consideration of objections filed to Commission Orders of February 4, 1941, the Commission determined that any application for renewal of license of WROC, Salisbury, Md., which may be granted for the period beginning March 29, 1941, should specify the frequency 1250 kc.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with 100 watts power from 7:30 m. to 11 p.m. CST, on March 4, 5, 6, 7 and 8, 1941, in order to broadcast Illinois State High School Elimination Basketball Tournament games only.
W6XFM—The Crosley Corp., Cincinnati, Ohio.—Granted special temporary authority to operate a high frequency experimental broadcast station on 13200 kc., 1000 watts power, special emission for frequency modulation, with the transmitter located at corner Vine and Fifth Streets, Cincinnati, Ohio; Crosley, Type EBS-213-M, maximum rated carrier power output 1000 watts; for the period March 3, 1941, and ending in no event later than May 1, 1941.

KOB—Don Lee Broadcasting System, San Diego, Calif.—Granted modification of construction permit (B5-P-2940) which authorized changes in equipment, for extension of commencement and completion dates to April 10 and June 9, 1941, respectively (B5-MP-1178).

WBIZ—J. D. Flavey, Ottumwa, Iowa.—Granted modification of construction permit (B4-P-2499, which authorized a new station on 1210 kc., 100 watts, unlimited time), for approval of vertical antenna, transmitter and studio sites and modification of new transmitter (B4-MP-1167).

WSPR—WSPR, Inc., Springfield, Mass.—Granted license to cover construction permit (B1-P-2509) which authorized change of frequency to 1210 kc., hours of operation to unlimited, and installation of DA for day and night use (Bi-L-1329). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-667).

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted license to cover construction permit (B1-P-2509) which authorized change of frequency to 1210 kc., hours of operation to unlimited, and installation of DA for day and night use (Bi-L-1329). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-667).

WHLD—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-667).

WKBI—United Broadcasting Co., Cleveland, Ohio.—Granted license to cover construction permit (B2-P-2670) for increase in power from 1 kw day and night, 5 kw day and night, and installation of directional antenna for day and night use (B2-L-1335). Also granted authority to determine operating power by direct measurement of antenna power (B2-Z-670).

KFDY—South Dakota State College, Brookings, S. Dak.—Granted authority to make changes in automatic frequency control equipment (B4-F-177). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-682).

KPLC—Calcasieu Broadcasting Co., Lake Charles, La.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-653).

WJBO—O. E. Richardson & F. L. Adair, Hammond, Ind.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-666).

KELD—Radio Enterprises, Inc., El Dorado, Ark.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-654).

WDG—Joe W. Engel, Chattanooga, Tenn.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-690).

KLMB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-684).

WBAP—Carter Publications, Inc., Fort Worth, Tex.—Granted authority to determine operating power by direct measurement of antenna input on frequency 820 kc, under NARBA (B3-Z-683).

WHLD—The Niagara Falls Gazette Publishing Co., Niagara Falls, N. Y.—Granted authority to determine operating power by direct measurement of antenna input on frequency 1290 kc, under NARBA (B1-Z-681).

KGFW—Central Nebraska Broadcasting Corp., Kearney, Nebr.—Granted authority to determine operating power by direct measurement of antenna input on frequency 1330 kc, under NARBA (B4-Z-601).

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted authority to determine operating power by direct measurement of antenna input on frequency 1170 kc, and under NARBA (B2-Z-685).

W75NY—Metropolitan Television, Inc., New York City.—Granted modification of construction permit for new FM station, for approval of transmitter, changes in antenna, and change in population from 11,010,372 to 11,814,746 (B1-MPH-7).

KGHB—Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—Granted construction permit to move formerly licensed RCA 1-D 1 kw transmitter from Fronting on Kapiolani Blvd. to Kapiolani Blvd, Honolulu, for use as an auxiliary (B-P-3089).

KGHB—Echo Park Evangelistic Assn., Portable-Mobile, area of Los Angeles.—Granted construction permit for new relay broadcast station to be used with applicant's standard broadcast station KFSG frequencies 1265, 2638, 2150, 2790 kc., 40 watts (B5-PY-235).

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.— Granted modification of construction permit for increase in power from 10 to 50 kw and changes in equipment, for extension of complete date from March 8 to May 7, 1941 (B5-MP-1179).

W3XMC—McNary and Chambers, Washington, D. C.—Granted special temporary authority to operate high frequency experimental broadcast station on 125600 kc., 100 watts power, special emission for frequency modulation, with transmitter located at 2701 14th St., Washington, D. C., for a period not lasting later than May 1, 1941.

W3XMC—Northwest Airlines, Inc., Washington, D. C.—Granted special temporary authority to operate aircraft station KHDIW on 2709 kc. on March 6, 1941, in order to conduct tests, and from 10 p.m. to 11 p.m. PST, on March 7, 1941, in order to relay broadcast Seattle Blackout to Radio Station KIRO.

WCNW—Arthur Foske, Brooklyn, N. Y.—Granted special temporary authority to operate with power of 250 watts from 9 p.m. to 10 p.m. EST March 10, 17 and 24, 1941, in order to broadcast Brooklyn Jewish Center Forum only.

WCOP—Massachusetts Broadcasting Co., Boston, Mass.—Granted special temporary authority to operate from 6:15 p.m. to 6:30 p.m. EST on March 9, 16, 23, and 30, 1941, in order to broadcast the American Legion Auxiliary program only.

APPLICATIONS FILED AT FCC

550 Kilocycles

NEW—Fort Smith Newspaper Publishing Co., Fort Smith, Ark.—Construction permit for a new broadcast station to be operated on 350 kc., 1 kw, unlimited time, directional antenna for day and night use, Class III.

580 Kilocycles

NEW—Martha M. Russell, d/b as Russell Plantation, Russelltown, Tex.—Construction permit for a new broadcast station to be operated on 580 kc., 1 kw, and unlimited hours, Class III-B.

610 Kilocycles

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—License to cover construction permit (B2-P-2997) to use old RCA transmitter as auxiliary.

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Authority to determine operating power by direct measurement of antenna power.

680 Kilocycles

WLAB—Hildreth & Rogers Co., Lawrence, Mass.—Construction permit to increase power from 5 to 50 kw, install new transmitter, make changes in directional antenna for day and night use, and change location of transmitter from Andover to Burlington, Mass.

710 Kilocycles

NEW—Park Cities Broadcasting Corp., Dallas, Tex.—Construction permit for a new standard broadcast station to be operated on 710 kc., 500 watts, unlimited time. Class III-B. Amended re stock ownership and to request 710 kc., 5 kw, Class II, new transmitter, installation of directional antenna for night use, and to specify transmitter site.

780 Kilocycles

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Transfer of control of corporation from R. E. McDonald and Barbara McDonald to Midnight Sun Broadcasting Co., 532 shares of common stock.

March 14, 1941 — 249
900 Kilocycles

WKY—WKY Radioiphone Co., Oklahoma City, Okla.—Construction permit to install directional antenna for night use, and of antenna at 930 kc. under NARBA.

WKY—WKY Radioiphone Co., Oklahoma City, Okla.—Authority to determine operating power by direct method, on 930 kc. under NARBA.

1120 Kilocycles

KFSG—Echo Park Evangelistic Assn., Los Angeles, Calif.—Authority to determine operating power by direct method of antenna power, on 1120 kc. under NARBA.

1140 Kilocycles

KVOS—Southwestern Sales Corp., Tulsa, Okla.—Construction permit to install new transmitter, directional antenna for night use, and increase power from 25 to 50 KW, change hours from simultaneous day, share WRVOK night, to unlimited. Amended to request 1140 kc. under NARBA, and make changes in antenna system.

1160 Kilocycles

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Construction permit to install new transmitter, directional antenna for day and night use, change frequency from 1170 kc. to 1140 kc.; increase power from 5 to 50 KW; change hours from simultaneous day, share WWOVO night, to unlimited; and move transmitter from Liberty, W. Va., to St. Clairsville, Ohio. Amended to request 1170 kc. under NARBA, and antenna changes.

1200 Kilocycles

WITH—The Maryland Broadcasting Co., Baltimore, Md.—License to cover construction permit (B1-P-2792) as modified, for a new standard broadcast station and to change location of studio.

WITF—The Maryland Broadcasting Co., Baltimore, Md.—Authority to determine operating power by direct method.

1230 Kilocycles

NEW—Roy St. Lewis, Norfolk, Va.—Construction permit for a new broadcast station to be operated on 1200 kc. (1230 kc. under NARBA), 250 watts, unlimited time. Amended: transmitter and studio sites to be determined, Norfolk, Va.

WMFR—Radio Station WMFR, Inc., High Point, N. C.—Authority to determine operating power by direct measurement of antenna power.

WFBB—WFBB, Inc., Indianapolis, Ind.—Relinquishment of control of licensee corporation by H. M. Bitter, of 1012½ shares common.

1250 Kilocycles

WNEW—WDAAM Corp., New York, N. Y.—Modification of construction permit (B1-P-2687) for authority to install directional antenna for day and night use and increase power from 1 kw day, 5 kw day and night, requesting 1250 kc. under NARBA, and extension of completion date from 6-1-41 to 180 days after grant, and make changes in directional antenna.

WKST—WRST, Inc., New Castle, Pa.—Modification of construction permit (R3-P-2809) to install directional antenna for night use, change hours from daytime to unlimited using 1 kw power day and night; requesting changes in directional antenna system and requesting 1250 kc. under NARBA.

1280 Kilocycles

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Authority to install automatic frequency control equipment, on 1510 kc. under NARBA.

1310 Kilocycles

KRJF—Star Printing Co., Miles City, Mont.—Transfer of control of corporation from Sarah M. Scanlan, executrix of the estate of Joseph D. Scanlan, deceased, to Sarah M. Scanlan (403 shares).

1340 Kilocycles

KJTH— Telegraph Herald, Dubuque, Iowa.—Modification of construction permit (B4-P-960) as modified, which authorized a new station, requesting changes in directional antenna, extension of commencement and completion dates from 3-7-41 to 9-7-41 to one day after date of grant and 180 days thereafter, respectively, and 1370 kc. under NARBA.

1370 Kilocycles

KEVR—KVL, Inc., Seattle, Wash.—Construction permit to change frequency from 1370 kc. to 1370 kc., make changes in equipment, and increase power from 100 watts to 250 watts day, 100 watts night, and change hours of operation from share—KRKO to unlimited time. Amended to request 1090 kc. under NARBA, 250 watts day and night, changes in equipment, install new antenna, change name to Evergreen Broadcasting Corp., move studio and transmitter.

KRKO—Everett Broadcasting Co., Inc., Everett, Wash.—Modification of construction permit (B5-P-2027) for new transmitter, antenna, increase in power, and move of transmitter, requesting changes in antenna and extension of commencement date to 30 days after grant and completion date to 90 days thereafter. Amended to request 1300 kc. under NARBA.

1400 Kilocycles

WBBC—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—License to use WARD's transmitter at 563 Meseoke St., Brooklyn, N. Y.

WVFV—Paramount Broadcasting Corp., Brooklyn, N. Y.—License to use WARD's transmitter at 563 Meseoke St., Brooklyn, N. Y.

1420 Kilocycles

KNET—John C. Welch, Wm. M. Keller, and Bonner Frizzell, d/b as The Palestine Broadcasting Assn., Palestine, Tex.—Authority to install automatic frequency control equipment, on 1420 kc. under NARBA, and move transmitter.

WHLN—Blanfox Radio Co., Inc., Harlan, Ky.—Modification of construction permit (B2-P-2885) which authorized construction of a new broadcast station for approval of transmitter site and antenna.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Construction permit to change frequency from 1390 kc. to 1430 kc. (1160 kc. under NARBA), increase power from 250 watts to 1 kw, install new transmitter, and changes in antenna.

1450 Kilocycles

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Construction permit to make changes in equipment, changes in directional antenna (for use night and day), change frequency and power from 1150 kc. 1 kw day, to 730 kc., 10 kw day and night, and move transmitter from...
Cuyahoga Hts. to Dover, Ohio. Amended to request 1220 kc. under NARBA, 50 KW, changes in equipment and directional antenna, and move transmitter to Strongsville Village, Ohio.

1480 Kilocycles

WHIP—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Authority to install automatic frequency control equipment on 1520 kc. under NARBA.

1500 Kilocycles

KAWM—A. W. Mills, Gallup, N. Mex.—Construction permit to install new transmitter and make changes in antenna.

KBIX—Oklahoma Press Publishing Co., Muskogee, Okla.—Construction permit to install new transmitter, increase power from 100 watts to 250 watts, and request 1190 kc. under NARBA.

WWRL—Long Island Broadcasting Corp., Woodside (L. I.), N. Y.—Construction permit to install new transmitter, new antenna system, change in frequency from 1500 kc. to 1600 kc. under NARBA, increase power from 250 watts to 5 KW, move transmitter from Woodside (L. I.) to New York, N. Y.

1530 Kilocycles

WAKR—Summit Radio Corp., Akron, Ohio.—Construction permit to increase power from 1 to 5 KW, using directional antenna day and night, install new transmitter, and changes in directional antenna. Amended to request 1550 kc. under NARBA and to make changes in directional antenna to be used night only.

1550 Kilocycles

KPMC—Pioneer Mercantile Co., Bakersfield, Calif.—Construction permit to change frequency from 1550 kc. to 1560 kc. (Class I-B), increase power from 1 to 10 KW, install new transmitter and new antenna, and change location of transmitter.

FM APPLICATIONS

K45LA—Don Lee Broadcasting System, Los Angeles, Calif.—Modification of construction permit (BS-PH-26) to change coverage from 7,000 to 7,558 square miles, population from 2,604,104 to 2,612,000, make changes in antenna and move studio.

NEW—United Broadcasting Co., Cleveland, Ohio.—Construction permit for a new high frequency broadcast station to be operated on 4850 kc., coverage 8,420 square miles, population 1,314,595.

MISCELLANEOUS APPLICATIONS

NEW—Muzak Corp., New York, N. Y.—Construction permit for a new developmental broadcast station to be operated on 117000 kc., or some channel not now allocated for some purpose, 1000 watts and special emission for frequency modulation. Amended re corporate structure.

Under its stipulation, the respondent corporation agrees to cease using the words “Asphalt Grave Vault” or other words of similar meaning to describe its vaults when they are composed in whole or in part of, or contain ingredients other than, asphalt, and to desist from employing the phrase “Asphalt Concrete Grave Vault” or words of similar import to designate its vaults when in fact the binding agent for the aggregates in such vaults consists of Portland cement, or when such binding agent does not consist of asphalt. The respondent further stipulates that it will cease using the word “asphalt” or similar words in any manner to mislead buyers into believing that the binding agent of the vaults consists of asphalt or that such vaults are made of a mastic composed of asphalt and aggregates.

Further representations which the respondent agrees to discontinue are statements tending to convey the impression that its vaults are indestructible or will afford everlasting protection. The respondent also stipulates that it will cease representing that, at the time of interment, its vaults are waterproof or airtight or that they will remain impervious to water, moisture or dampness, unless such are the facts. (3044)

Consolidated Royal Chemical Corporation, 544 South Wells St., and Benson & Doll, Inc., an advertising agency, 327 South LaSalle St., both of Chicago, entered into stipulations in which they agree to cease disseminating advertisements which contain certain representations concerning “Zymole Trokeys,” a medicated lozenge sold by the Consolidated corporation.

Each respondent agrees to cease advertising that “Zymole Trokeys” will go twice as far as cough syrup at half the cost; that it constitutes a new way to relief, and that the syrupy solution obtained by melting this product in water will be beneficial to children suffering from croup. (02742-02749)

Burke Edwards, 4733 Bethesda Ave., Bethesda, Md., has entered into a stipulation in which he agrees to cease representing that “Berkeley Springs Mineral Water” is beneficial in the treatment of, or is indicated as a treatment for, arthritis, diabetes, skin diseases or rheumatism, or constitutes a competent remedy for any of such maladies, diseases or ailments. (3046)

Duplan Silk Corporation, 498 Seventh Ave., New York, entered into a stipulation in which it agrees that in the sale of a fabric made from or containing rayon, it will cease using the names “Toujours,” “Toot Sweet” or “Evergrand” or other names, fanciful or otherwise, in referring to such fabric, without disclosure of the fact that such product is made of or contains rayon, as the case may be. Such disclosure, according to the stipulation, is to be made clearly and unequivocally in all printed matter and sales representations. The respondent corporation further stipulates that it will desist from employing the term “Reg. U. S. Pat. Off.” or any other term of similar meaning in conjunction with a purported trade name or mark which has not been registered as such in the United States Patent Office. (3047)

Hamilton Ross Factories, Inc., 666 Lake Shore Drive, Chicago, stipulated it will cease certain representations in the sale of blankets.

The respondent agrees to desist from quoting fictitious and excessive prices as the customary or regular prices or values of blankets or other merchandise; to cease employing the words “Silky Rayon” or similar words to describe its blanket binding or other fabrics or merchandise made of cotton, and to discontinue the use of the words “Wooly” or wool or other similar words to designate blankets or other products which are composed of or contain fibers other than wool.

According to the stipulation, none of its provisions shall be construed as authorizing the labeling of any wool product in any manner other than in strict conformity with the provisions of the Wool Products Labeling Act of 1939, after its effective date, July 14, 1941. (3043)

McDonald's Hatchery—Raymond McDonald and Roy McDonald, trading as McDonald's Hatchery, 2830 Evans Ave., Fort Worth, Texas, have entered into a stipulation in which they agree to cease advertising that the flocks of baby chicks which they sell are inspected by the United States Department of Agriculture, and

March 14, 1941 — 251
are inspected or mated by a disinterested judge of the American Poultry Association.

The stipulation recites that the United States Department of Agriculture has not actually inspected the respondents' flocks of chicks although such inspections have been made by an official State agency recognized by the Department of Agriculture as cooperating with the National Poultry Plan. According to the stipulation, the A.P.A. judge who mates the flocks is Roy McDonald, of the respondent co-partnership, and therefore not a disinterested party. (02750)

Petinella Advertising Company—Ferdinand Petinella, who conducts an advertising agency under the name Petinella Advertising Co., 15 Sheridan Square, New York, has entered into a stipulation to cease certain representations in the advertisement of the medicinal preparations "Fernet Vittone" and "Acqua Fiuggi" on behalf of E. Fucini & Co., Inc., New York. The respondent Petinella agrees to desist from disseminating advertisements which represent that Fernet Vittone is a tonic, unless expressly limited to its effect as a gastric tonic; that everyone requires a tonic, stomachic and digestive; that Fernet Vittone is a competent treatment for intestinal disturbances or has any effects beyond those of a laxative, stomachic and gastric tonic, and that Acqua Fiuggi is an effective remedy for gallstones, kidney troubles, gout, and antiseptic, purifies the breath, mitigates inflammation of the mouth resulting from artificial teeth, and stops perspiration odors or foot odors; that the preparation is a competent treatment for itching scalp or itching skin due to skin bites, pox, or hives; that it is effective in treating athlete's foot, and that it is an effective germicide when used as gargle. (02748)

Thymo Borine Laboratory, 810 Plankinton Ave., Milwaukee, has entered into a stipulation in which it agrees to cease advertising that "Thymo Borine," sold for use as a mouth wash, deodorant and antiseptic, purifies the breath, mitigates inflammation of the mouth resulting from artificial teeth, and stops perspiration odors or foot odors; that the preparation is a competent treatment for itching scalp or itching skin due to skin bites, pox, or hives; that it is effective in treating athlete's foot, and that it is an effective germicide when used as gargle. (02747)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Coal Carburetor Co., New Brunswick, N. J., and Thornton W. Price, its president, has been ordered to cease and desist from making representations in the sale of "Coal Carburetor," a device designed for facilitating the combustion of coal and gases in furnaces.

The Commission order directs the respondent to cease representing that its Coal Carburetor equipment has been endorsed or recommended by the United States Government or any of its branches, or that its use has been advocated by the United States Bureau of Mines, or that it has been recommended by any public health authority or other recognized group organized for the preservation of health.

The respondent also is directed to cease advertising that its equipment is the most efficient means known for producing heat from coal or that such efficiency has been established by comparative tests with other equipment and devices designed for the same general purpose, unless the truth of such representation shall have been actually established by such tests. (4070)

General Motors Corporation, Detroit, and its sales subsidiary, General Motors Sales Corporation, have been ordered to cease and desist from making representations of prices in the sale of automobiles.

Commission findings are that prices featured in the advertisement, either with assortments of merchandise or separately, which devices may be used in selling or distributing such merchandise by any other language on the face of the advertisement. The public was charged $901.50 for this car at the place of manufacture, the price having been built up as follows: List price of car illustrated, $820; standard accessories, $37.50; factory handling charge, $3; Federal taxes, $22.25; delivery and handling charge (including advertising), $17.25; and transportation, $1.50.

Another advertisement illustrated a Chevrolet Standard Sedan with a price of $465 in large type and nearby in small, inconspicuous place words "and up." It followed in yet smaller lettering with the statements: "List price of new Standard Roadster at Flint, Michigan, $465.00. With bumpers, spare tire and tire lock the list price is $2,00.00 additional." However, the car illustrated actually cost purchasers at Flint $605.40 and the roadster described in the advertisement would have cost $518.50 instead of $465, which was its "list price" at Flint without delivery, handling, conditioning, spare tire and other items.

A widely published advertisement of an Oldsmobile appearing in 1939 featured the price of $777 in large figures adjacent to the illustration accompanied by the words "and up" in smaller lettering. By means of an asterisk, this price was connected with another fine print legend which advised that this was the "Delivered Price at Lansing, Michigan." However, the car illustrated was not sold at Lansing for $777 but for $889, the actual selling price having been shown in very fine print inconspicuously placed below the place where the car price was featured.

Commission findings are that the respondents' advertisements have led the public erroneously to believe that the cars illustrated or described can be purchased at the point of manufacture for the price featured in the advertisement and at points distant for the featured price plus transportation charges.

DETAILS OF THE CEASE AND DESIST ORDER

The Commission order directs the General Motors Corporation and General Motors Sales Corporation to cease and desist from representing as the price of any automobile in any advertisement promoting retail sales, any price other than the true retail price at the place designated as the point of sale referred to in the order, or that such retail price is to include all charges for any equipment or accessories illustrated or described in the advertisement or necessary for the operation of the car, or customarily included as standard equipment. This price, according to the order, is also to include charges for advertising, delivery, handling, or similar items, except transportation charges where the advertised car is transported from the point where advertised for sale to another or different point for delivery to a retail purchaser.

The order further directs the respondents to cease using a designated price in any advertisement illustrating an automobile offered for sale at retail where the price of the illustrated car is set out in juxtaposition thereto in words and figures equal in size and conspicuousness to the terms designating the price of any other automobile referred to in the advertisement.

The order further prohibits the respondents from advertising automobiles for sale or designated retail price, unless such price includes all federal, State and local taxes, unless the advertisement clearly and legibly states, immediately adjacent to the price quoted, that the price is subject to additional charges for such taxes; and directs the respondents to cease advertising or representing an automobile as being for sale at retail at a designated price unless such car is in fact made available and sold to the public, at the point specified, for the price stated, or at a point distant therefrom for the price stated plus transportation charges thereto. (3173)

Husco Manufacturing Company—Jvan D. Hussey, trading under the name Husco Manufacturing Co., and under other names, 85 Broad St., S. W., Atlanta, has been ordered to cease and desist from using lottery methods in the sale of hosiery, knives, fountain pens and other merchandise. The respondent is also in business under the names The Hussey Manufacturing and Distributing Co., The Hussey Distribution Co., Hussey Co., Hussey Manufacturing Co., and Terry Products Co.

The Commission order directs the respondents to cease and desist from selling and distributing such products so packed and assembled that sales may be made by means of a lottery; from supplying others with push or pull cards, punch boards or other lottery devices, either with assortments of merchandise or separately, which devices may be used in selling or distributing such merchandise
to the public, and from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme.

The Commission order further directs the respondent to discontinue using the words “manufacturer” or “manufacturing” as part of any trade name used by him unless and until he shall operate a factory in which such merchandise is wholly manufactured. (4386)

Rabbor Corporation, 1450 Broadway, New York, has been ordered to cease and desist from misrepresentations in the sale of men’s robes, jackets, lounge suits and other wearing apparel.

Commission findings are that the respondent, in advertising literature and other printed matter, has represented that its garments are made entirely of silk, when in fact they have consisted of various combinations and mixtures of cotton, rayon, silk and fibers other than silk, a portion of them having been manufactured from a material composed of 70 per cent cotton and 30 per cent silk.

The Commission order directs the respondent to cease using the words “silk” or other words descriptive of silk to designate any fabric or product not composed wholly of silk; provided, that such terms may be used as descriptive of the silk content of fabrics or products composed in part of silk and in part of other fibers if, in immediate connection, there is also employed conspicuous lettering truthfully designating each constituent fiber or material.

The order further directs the respondent to cease employing the unqualified term “satin” or other similar term indicative of silk to describe any fabric or product not composed entirely of silk; provided that when such term is used truthfully to designate the type of weave, construction, or finish, it shall be qualified by employing in immediate connection therewith other words of equal conspicuousness accurately naming the fibers or materials from which such products are made.

The respondent also is ordered to cease advertising, offering for sale or selling fabrics, garments, or other products composed in whole or in part of rayon without clearly disclosing, by use of the word “rayon”, the fact that such fabrics or products are composed of rayon. According to the order, when such fabrics or products are composed in part of rayon and in part of other fabrics or materials, such fabrics or materials shall be designated in immediate conjunction with the word “rayon” in letters of at least equal conspicuousness which shall truthfully describe each constituent fiber or material. (3619)

Schnutter Candy Co., 1013 North Cicero Ave., Chicago, has been ordered to cease and desist from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise or lottery scheme.

The order directs the respondent to desist from selling or distributing any merchandise so packed and assembled that sales to the public may be made by means of a lottery; from supplying others with lottery devices which may be used in selling or distributing the respondent’s merchandise to the public by means of a game of chance, and from supplying others with packages or assortments of candy which may be used to conduct a lottery or gift enterprise in the sale to the public of the candy contained in such packages or assortments.

The respondent is further ordered to cease supplying to others for sale to the public assortments of candy, whether contained in one or more than one package, composed of different colored pieces of candy of uniform size and shape individually wrapped in opaque wrappers, and larger pieces of candy or other merchandise, which larger pieces or other merchandise may be given as prizes to the purchasers procuring pieces of candy of a particular color. (3636)

FTC CASE CLOSED

The Federal Trade Commission closed its case against Nu-Age Co., formerly of 309 Castle Building, Tulsa, Okla., without prejudice to its right to resume proceedings, should the facts so warrant. The respondent corporation had been charged with violation of the Federal Trade Commission Act in the sale of a medicinal preparation, “Nu-Age,” also described as “Natural Mineral Extract.”

According to information received by the Commission, the respondent corporation had discontinued the sale of its “Nu-Age” preparation and its license to engage in business had been cancelled by the State of Oklahoma.

The Commission also has dismissed without prejudice a complaint charging Interstate Ribbon and Carbon Corporation, 2202-2210 Superior Ave., East Cleveland, Ohio, with the dissemination of misrepresentations in the sale of typewriter ribbons and carbon paper.
THE WEEK IN WASHINGTON

The broadcasters’ conference committee met four hours with an ASCAP committee in New York on Thursday, and ASCAP agreed to attempt to work up proposals to submit to the broadcasters’ committee (p. 255).

One Week Till Movin’ Day (p. 257).

The FCC this week ordered a hearing to determine “whether or not joint control of newspapers and radio broadcasting stations tends to result in an impairment of radio service under the standard of ‘public interest, convenience and necessity’ ” (p. 255).

The NAB Board approved the committee revision of the agency contract form, a copy of which is included in this issue (p. 256).

Plans for the NAB’s annual convention in St. Louis, May 12, are going forward (p. 260).

Requests for BMI tunes are running far ahead of those for ASCAP tunes, a survey shows (p. 260).

District 11 broadcasters re-elected Earl H. Gammons, WCCO, as Director (p. 265).

A new libel law for broadcasting in Oregon was approved March 14 (p. 265).

Ray C. Wakefield was confirmed as a new member of the FCC. The Commission amended its FM rules. The FCC warns stations against private negotiations with stations in neighboring countries in an effort to solve re-allocation problems. Chairman James Lawrence Fly said that the Commission was still meeting on the “monopoly report” (p. 266).

The latest unit volume report is included with this issue (p. 290).

Broadcasters, ASCAP Meet

A conference committee appointed by the NAB Board of Directors met with an ASCAP committee on Thursday, March 20, for a general discussion of all points in the current controversy.

The meeting, held in a New York hotel, was suggested by the broadcasters after a meeting of their committee Wednesday afternoon. The joint meeting lasted nearly four hours.

The broadcasters pointed out to the ASCAP committee that the best way to make progress was for ASCAP to submit proposals for the broadcasters’ committee to study and pass out to the industry with its advice.

The ASCAP committee agreed to consider the matter and to attempt to work up proposals. There was no understanding as to how long it would take ASCAP to do this, and no date was fixed for the next joint meeting. When the proposals are received, the broadcasters’ committee will meet to consider them. The industry will be kept advised of all developments.

The conference committee appointed by the NAB Board to meet with ASCAP was made up of the following:

Neville Miller, chairman
John Shepard, 3rd, Yankee Network
Walter Damm, WTMJ
Mark Ethridge, WHAS
Harold Hough, WBAP
John Elmer, WCBM
Sam Rosenbaum, WFIL
Edwin W. Craig, WSM
Paul Morency, WTIC
Theodore Streibert, MBS
William West, WTMV
Niles Trammell, NBC
John J. Gillin, Jr., WOW
Edward Klauber, CBS
Herbert Hollister, KANS

The NAB Board voted to extend the current associate membership campaign to April 12. Several amendments to the NAB By-Laws were considered. These will be discussed in a future edition of the NAB Reports.

The Board instructed the staff to draw up a strong resolution endorsing Daylight Saving on a nationwide basis in the interest of national defense.

Membership, convention plans and a public relations campaign also were discussed by the Board.

Newspaper Ownership Questioned

The FCC this week ordered a hearing to determine “whether or not joint control of newspapers and radio broadcasting stations tends to result in an impairment of

(Continued on page 256)
radio service under the standard of ‘public interest, convenience and necessity.’"

Through the hearing, the Commission said, it would "seek to obtain full and complete information for its guidance in passing upon applications for high frequency broadcast stations (FM) and for future acquisition of standard broadcast stations by newspapers."

The text of the Commission's statement:

In view of the increasing number of applications by newspapers to operate radio stations in the new high frequency (FM) broadcast service, the Federal Communications Commission today ordered public hearings and an investigation to determine what policy or rules, if any, should be promulgated in this connection.

Through such hearings and investigation, the Commission will seek to obtain full and complete information for its guidance in passing upon applications for high frequency broadcast stations (FM) and for future acquisition of standard broadcast stations by newspapers. Hearings will be conducted with the objective of determining whether or not joint control of newspapers and radio broadcasting stations tends to result in an impairment of radio service under the standard of "public interest, convenience and necessity." The hearings to be held on this issue will be of a broad, public character open to all applicants, prospective applicants, grantees, existing licensees, representatives of trade groups affected, and such other witnesses as the Commission may wish to call.

The question of newspaper ownership of radio stations has long been debated before the Commission and elsewhere and has been an issue in a number of specific cases presented to the Commission. The Commission has in the past denied licenses to newspapers where there was a well qualified applicant asking for the same facilities. In one case, for example—at Port Huron, Michigan—the Commission favored a non-newspaper applicant for a radio station because it would afford the community "a medium for the dissemination of news and information to the public which will be independent of and afford a degree of competition to other such media in the area."

In undertaking public hearings, the Commission does not imply that it is opposed to newspaper ownership of radio stations in general or in any particular situation. The purpose of the hearings and the investigation is to obtain for the Commission sufficient information so that it will have a rational basis for the determination of future cases. At this time, when the FM field is just beginning to open up, the opportunity is presented for an evaluation of policy without impairment to existing investments.

Commission records indicate that approximately one-fourth of all commercial FM applications are filed in behalf of newspaper interests. Of 94 applications received up to the present month, 27 were from concerns or persons in the newspaper business.

In the older field of standard broadcast, more than one-third of the existing stations are now identified with newspapers to a greater or lesser extent. At least 100 standard broadcast stations are owned by publishers with more than one newspaper and more than one radio station connection. In more than 90 localities the only radio outlet is in the hands of the only local newspaper.

Commissioners Case and Craven dissented.

The text of FCC Order No. 79:

WHEREAS, under the provisions of the Communications Act of 1934, as amended, the Federal Communications Commission is empowered and directed to grant licenses for radiobroadcast stations only after a determination that "public interest, convenience, or necessity" would be served thereby; and

WHEREAS, the question whether the granting of a license is in the "public interest, convenience, or necessity" where it results in common control of one or more radio stations and one or more newspapers has been presented to the Commission from time to time and has been the subject of debate before the Commission and elsewhere; and

WHEREAS, there are now pending before the Commission a large number of applications for high frequency broadcast stations (FM) with which are associated persons also associated with the publication of one or more newspapers; and

WHEREAS, the Commission desires at this time to obtain full and complete information for the guidance of the Commission in passing upon applications for high frequency broadcast stations (FM) with which are associated persons also associated with the publication of one or more newspapers; and

WHEREAS, the Commission deems it advisable at this time, when the public service of frequency modulation is in its early stages, to consider the adoption of a policy with respect to joint control of radio stations and newspapers, such policy to be applied by the Commission in passing upon high frequency broadcast applications (FM) coming before it and to guide and inform future applicants; and

WHEREAS, the Commission deems it advisable at the same time that it undertake consideration of the question of joint control of newspapers and radio with respect to applications for high frequency broadcast stations (FM) to consider the adoption of a policy to be applied by it in passing upon applications for the future acquisition of standard broadcast stations by newspapers; and

NOW, THEREFORE, IT IS HEREBY ORDERED That the Federal Communications Commission undertake an immediate investigation to determine what statement of policy or rules, if any, should be issued concerning applications for high frequency broadcast stations (FM) with which are associated persons also associated with the publication of one or more newspapers and that public hearings with respect thereto be held at such times and such places as the Commission may direct, and that such investigation and public hearings shall also include consideration of statements of policy or rules, if any, which should be issued concerning future acquisition of standard broadcast stations by newspapers.

IT IS FURTHER ORDERED That in those few cases in which the Commission has heretofore granted applications for high frequency broadcast stations (FM) with which are associated persons also associated with the publication of one or more newspapers, the construction permits to be issued shall contain the condition that no construction of the facilities authorized therein shall be undertaken or continued until after the Commission shall have completed the above-stated investigation and shall have taken action upon the basis thereof; Provided, however, that, upon a showing that the public interest, convenience or necessity will be served thereby, construction at an earlier date may be authorized.

BY THE COMMISSION.

T. J. Slowik, Secretary.

AGENCY CONTRACT FORM

On Tuesday the NAB Board of Directors voted approval of the NAB Committee's revision of the agency (Continued on page 259)
ONE WEEK TO MOVIN' DAY

NETWORK SHOWS

According to Bill Hedges' March 13 bulletin to all NBC stations, the Red and Blue networks will carry a special Movin’ Day program, 7:15-7:30 p.m., Friday, March 28. He urged every station to take “this outstanding broadcast.”

A. Opfinger, IMBS’s program service manager, has scheduled Mutual’s coast-to-coast show for 9:15-9:30 p.m. same night. E. K. Jett, FCC chief engineer, will explain the advantages of reallocation. Fulton Lewis, Jr., 7:00-7:15 p.m., same night, will also plug the move.

According to Columbia’s Washington office, CBS is thinking in terms of two programs. The initial show, providing for local cut-ins, is set for Thursday, March 27, 10:15-10:45 p.m. The other show, for which the exact hour was unknown at press time, would probably be broadcast on Friday, just prior to Movin’ Day.

BEARD DISPLAYS CRYSTAL

Jay P. Beard, owner, KBTM, Jonesboro, Ark., has his station in readiness for change-over. Daytimes the new crystal is on display in the front window of the city’s leading jewelry store.

The subject of frequency changes is now a topic of general conversation throughout the United States and territories. Under the impetus of next week’s big push, the success of the educational and promotional campaign will be assured.

Looking over the data sheets with information for the brochure, to be mailed agencies and stations next week, is an inspiration for any man in the broadcasting business. Everybody “has done his duty” and then some. That will be apparent when the brochure, “56 Days”, reaches you.

If six state members of the Governors’ Movin’ Day Proclamation committee are fortunate and are able to secure the desired documents, the industry will have received unusual support those first in command of the home front.

The cities in which Mayoralty proclamations have been issued will be listed in the brochure. Their number will be a surprise.

Below are Governors whose proclamations have been received during the last week, together with the names of broadcasters who acted as industry representative in securing them. Total this week is eleven from states and one from Puerto Rico.

ARIZONA—Gov. Sidney P. Osborn
Arranged by Dick Lewis, KTAR, Phoenix

GEORGIA—Gov. Eugene Talmadge
Arranged by Leonard Reinsch, WSB, Atlanta

ILLINOIS—Gov. Dwight H. Green
Arranged by Leslie C. Johnson, WHRF, Rock Island

MAINE—Gov. Sumner Sewall
Arranged by George F. Kelley, Jr., WCHS, Portland

MARYLAND—Gov. Herbert R. O’Conor
Arranged by John Elmer, WCBM, Baltimore

MISSOURI—Gov. Forrest C. Donnell
Arranged by Merle S. Jones, KMOX, St. Louis

NEVADA—Gov. E. P. Carville
Arranged by W. D. Warren, KOEL, Reno

NEW MEXICO—Gov. John E. Miles
Arranged by Ivan R. Head, KSDF, Santa Fe

NEW YORK—Gov. Herbert H. Lehman
Arranged by Harold E. Smith, WOKO, Albany

PUERTO RICO—Gov. Guy J. Swape
Arranged by John A. Zerbe, WKAM, San Juan

TEXAS—Gov. W. Lee O’Daniel
Arranged by Harold Hough, WIP, Fort Worth

VERMONT—Gov. William H. Wills
Arranged by Charles P. Hasbrook, WCAV, Burlington

RADIO GUIDE

All editions of Radio Guide which hit the newsstands on Wednesday, March 19 carry the first installment of the reallocation story. The second installment will appear in the following issue. This issue will also contain a complete log with the new frequencies. Radio Guide reaching readers on Wednesday, April 2, will contain another log with stations listed by frequencies.

This week’s issue has prominently displayed on the front cover “Prepare for Radio’s Moving Day, page 37.” Martin Lewis, executive editor, says, “I hope you like it.” To which we reply, on behalf of the industry, “We certainly do, Mr. Lewis, your assistance is appreciated by all of us.”

RCA-S.E.P. PAGE

The Saturday Evening Post for delivery Wednesday, March 26, is scheduled to have a page on the subject of reallocation.

It was prepared under the direction of Dave Finn, RCA advertising manager, along last December and necessarily held for release until the FCC reallocation order came through.

“CIRCUS” PUBLICITY

Many broadcasters with an eye to showmanship are using huge moving vans, sometimes with equally large trailers, as cruising bulletin boards to advertise the moving of their kilocycles. Since the moving van is particularly appropriate to the present promotion, the stunt is being well received.

ARIZONA STATIONS ACTIVE

The story of Radio Movin’ Day Proclamation by Governor Sidney P. Osborn of Arizona has received widespread publicity in the state and southwest. In Phoenix Mayor Reed Shupe is also issuing a proclamation.

“All Arizona stations will follow NAB suggestions in publicizing event,” wired Dick Lewis, KTAR, state chairman of the Governor’s Movin’ Day Proclamation Committee.

Some "out" states have proclamations in negotiation.

RAYTHEON STATION GUIDE

Three-colored window posters promoting reallocation have been mailed to dealers handling Raytheon tubes. The company is also distributing vest-pocket station guides listing present frequencies with the corresponding new dial location.

MAINE PROCLAIMS TUESDAY

The Radio Movin' Day Proclamation for Maine will be issued on Tuesday, March 25, by Governor Sumner Sewall. It will be made public during the Governor's press conference according to George F. Kelley, Jr., WCSH, who engineered the proclamation on behalf of Maine's broadcasters.

TUNG-SOL WINDOWS

Thousands of set owners are going to be "stopped" by the four-colored easel window display that Tung-Sol has made available to dealers. Extending the full length of the center panel is a scantily clad drum major asking you to "Keep in tune."

PUERTO RICO PROCLAIMS

The Honorable Guy J. Swope, Governor of Puerto Rico, has joined with the chief executives of the states in issuing a proclamation and thus cooperating with the broadcasting industry.

Yesterday's air mail brought the news from John A. Zerbe, vice president and general manager of Station WKAQ, that Governor Swope would issue the proclamation on Monday, March 24. Mr. Zerbe's station at 620 does not change frequency.

MARKET REPORTERS HELP

All market newsmen have been bulletined by the U. S. Department of Agriculture to help in spreading reallocation information among listeners. Scores of programs will carry tag lines telling listeners where the market news reporter will be found on the dial on and after March 29. Printed market reports will also contain the new frequencies of stations carrying the market news programs.

SPECIAL SECTION IN DETROIT

The Detroit News will issue a special Movin' Day section. Among participating advertisers are: WJBK, WJR, WJLB, WWJ and WXYZ, Detroit; WCAR, Pontica; WEXL, Royal Oak; and CKLW, Windsor, Ont.

N. Y. CHILDREN INFORMED

Top ranking educators, generally, have proved to be sympathetic to NAB's suggestion that they assist in publicizing reallocation. Here's an interesting paragraph quoted from a letter by Max U. Bildersee, associated supervisor of radio education, New York State:

"I am happy to tell you that within a few days a letter will go forward to the City, Village and District Superintendents of Schools, telling them of the change in broadcast frequencies and suggesting that they transmit this
information to the principals and teachers in the schools of the State.” That IS cooperation.

SCRANTON PROMOTIONS

To impress the new wave length of station WGBI, Scranton, Pa., on the youngsters, George D. Coleman, commercial manager, arranged for a broadcast in front of the studio building. Ten thousand (10,000) youngsters came and received a ruler carrying the station’s new frequency and a CBS map.

During another promotion, he gave a new $5 bill to the first 100 persons that presented a $1 bill having the last three figures of the serial number identical with the new frequency, 910.

The station sent letters to 200 school principals; and 30,000 letters were sent out by United Churches. Re- allocation news was contained in 33,000 copies of church bulletins.

TWO SPECIAL SECTIONS

Two special Movin’ Day sections will be produced in Hartford, Conn., by the Courant and the Times. The former will be published on Sunday, March 23, and the latter on the following Wednesday. They are expected to run from 12 to 16 pages, and will be complete with art and appropriate copy. Managers and department heads of WTIC, WDRC, WTHIT and WNBC are contributing stories. Out of town advertising on the part of WTIC will include eight state newspapers and several in Massachusetts.

NOTES

J. B. Plumley, WSNJ, Bridgeton, N. J., announces a proclamation by the city’s mayor. . . . Grays Harbor Public Utility District has distributed 10,000 stuffers for Harry R. Spence, KXRO, Aberdeen, Wash. . . . 30,000 special cards will be inserted in department store April statements to Peoria housewives on behalf of WMBD and 100 car and bus cards have been placed. . . . Manager Wilt Gunzendorfer, KSRO, Santa Rosa, Calif., launched Movin’ Day early in March with a quarter-hour show which resulted in publication in all local papers. . . . Joe Maland, vice president, WHO, Des Moines, sent photostat copies of Governor Wilson’s proclamation to all radio stations in Iowa. . . . Mayor Reed Shupe, of Phoenix, Ariz., has issued a proclamation.

A total of 90,000 stuffers were mailed to customers of Duke Power Company from the main office in Charlotte, N. C., according to Earle J. Gluck, general manager, WSOC, who is working closely with A. E. Joselyn, manager, WBT.

Emerson S. Smith, program director, KDYL, Salt Lake City, brought Governor Herbert B. Maw to the studio and transcribed his Movin’ Day proclamation. Afterwards copies of the recording were sent to every Utah station involved in change-over.

From Major Edney Ridge, WBIG, Greensboro, N. C., comes a platter with two interpretations of the Movin’ Day theme, one by the station’s octette and the other by its hillbilly band.

SALES

(Continued from page 256)

contract form. The recommended form is included in this issue, and an extra copy is supplied herewith.

Renewal of discussions with the AAAA Time Buyers’ Committee followed 4 A’s request for certain changes in the contract form recommended by NAB January 9.

Following several meetings of sub-committees of both groups, a joint meeting of both full committees, and a meeting of staff members and attorneys, final poll of the NAB Committee resulted in this recommended form for agency business which meets the Board’s approval.

The changes embodied in the revision were of minor character or to clarified agreed intent. The 4 A’s, it is said, still object to the new form in three principal respects: (1) Station’s right to substitute commercially sponsored programs of public importance. They contend that only political or governmental programs should be substituted on a sponsored basis, and that all other programs of public importance should be substituted on a sustaining basis. (2) No reference in the contract to the services of a regular staff announcer. NAB thinks this should be handled in each case on the face of the contract. (3) Station’s obligation to reimburse agency for non-cancellable talent costs only when station itself has contracted for the talent. The NAB Committee unanimously favored these provisions as drafted in the new form, and deemed further meetings would be unavailing because of their firm conviction on these points.

Stations are again reminded that the recommended form is supplied merely as an indication of the preponderant practice of a majority of broadcasters, and one that will be acceptable to most agencies. Some stations, it is believed, will vary certain of the recommended provisions to conform to their established policies. Other arrangements will naturally be made in terms on the face of the contract in individual deals. Inasmuch as the NAB Committee believes a certain amount of “rubber-stamping” and bargaining for terms in individual cases to be inevitable, it feels that it has brought out a form that meets as nearly as possible the agency practice and wishes, and that most agencies will use it substantially as recommended.

For local business direct with advertisers, stations will want to consider using the January 9 form. That form calls for payment by the twentieth of the month, but in many cases stations will prefer to make appropriate change to provide for payment at an earlier date. Stations which have not as yet printed that form should

March 21, 1941 — 259
consider the advisability of striking out the word “agency” wherever it appears on the back and substituting the word “advertiser,” and also striking all references to agency and commissions on the face. Those which have already printed it can continue to use it on local advertiser business by striking out the reference to agency commissions. The Committee believes it desirable for stations to use two forms, one for agency business and one for business direct with the advertiser.

The NAB-AAAA Conference Committee stands discharged, with the understanding that the sub-committee on the Invoice Form will confer with the Accounting Committee. That committee is in process of ironing out details in the invoice for further discussion with the AAAA Fiscal Committee. Release of the form is expected within the next month.

NAB Convention

Promotion Exhibit Question Box No. 1

Question: Are all entries to be on standard size panels?
Answer: Yes; all entries must be on standard size panels, 28 x 44 inches.

Question: Can they be used vertically or horizontally?
Answer: Yes; both arrangements are acceptable.

Question: Are there any rules in regard to the treatment of the panels within the standard size shape?
Answer: No. Use any color scheme, arrangement, or device that you like.

Question: Will many of the smaller stations enter this exhibit?
Answer: Yes. Because of the standard size panels, and the seven classifications of entries, many small stations will enter in at least one classification.

The closing date for entries is May 3. Shipment is to be made to the New Jefferson Hotel, St. Louis, c/o NAB Promotion Exhibit Committee.

HOTEL RESERVATIONS

The advance reservations for rooms at the St. Louis hotels during the convention far exceed the record of any previous convention. In other words, a bumper attendance is indicated. The convention opens Monday, May 12. That is just seven weeks away. Those who have not already arranged for rooms at St. Louis are urged to get their requests in promptly. There are plenty of rooms available in the various hotels and still a considerable number at the Jefferson.

Address communications direct to the hotel at which accommodations are desired or to the Housing Committee, Ray Dady, KWK, Chase Hotel, St. Louis, Chairman.

GOLF TOURNAMENT

The NAB Golf Tournament with the Broadcasting Magazine trophy has aroused considerable interest. It will be held this year on Monday afternoon, May 12, so those who plan to enter must remember to bring along their golf togs and clubs.

CONVENTION PROGRAM

The program is rapidly taking shape and promises to be one of the most interesting and constructive ever offered at an NAB convention. It will include topics that vitally concern every broadcaster. No one can afford to miss this Nineteenth Annual Convention at St. Louis, May 12 to 15, inclusive. Make your plans now.

BMI

BMI WINS IN OPEN MARKET

Requests for BMI tunes are running far ahead of those for ASCAP tunes not only on BMI stations but on those stations having both BMI and ASCAP licenses. This preference for BMI hits is not confined to the United States but has been strikingly apparent in Canada where, aside from the war songs, 85% of the requests currently received for popular tunes are for BMI numbers.

Sheet music sales in Canada as well as those in the United States are reflecting this preference. For example, printings and sales in Canada of I Hear A Rhapsody are double that of ASCAP’s best seller. Foreign publishers and foreign societies have noted this preference and are, at the present time, negotiating with BMI for exclusive rights in their respective territories. A deal has been consummated with Campbell, Connelly & Co., Ltd., one of the three leading British publishers and the house issuing There’ll Always Be An England, calling for exclusive rights in the British Isles and guaranteeing five publications a month. There is also spirited bidding going on for BMI’s Australian rights.

Programs devoted to the performance of request numbers and operating throughout the night report that there has been no slackening of interest where the music has been chosen principally from that licensed by BMI. Outstanding testimony is furnished by the program entitled, Dawn Patrol, operating out of Philadelphia and Washington on BMI stations. This program has established listening posts at many restaurants, taverns, and points (Continued on page 263)

LESS AGENCY COMMISSION ( % of Net Station Time Charge):

The conditions on the reverse side are part of this contract.

(Station) ___________________________ (Agency) ___________________________

(over)
1. PAYMENT
(a) Agency agrees to pay station and station agrees to hold agency solely liable for payment for broadcasting covered by this contract unless otherwise expressly agreed in writing.
(b) Agency agrees to pay for such broadcasting at the office of station or its representative authorized to collect on or before the twentieth day of the month following that in which broadcasting is done; provided, however, that if the postmark date on the invoice envelope is later than the seventh day of the month, agency shall not be deemed in default if it makes payment on the twenty-eighth day of that month. In all cases date of payment is material and unless otherwise stipulated the postmark date on the envelope properly addressed to station or to its representative authorized to collect shall be considered the date when payment was made.
(c) Station's invoices for such broadcasting shall be rendered not less often than monthly and shall be in accordance with station's log.
(d) If there is any cancellation charges in respect of all broadcasting done hereunder and unpaid shall become immediately due and payable. Such cancellation shall not prejudice any other right of station against agency.
(e) Agency reserves the right to cancel this contract forthwith at any time in the event of default or material violation by agency of any of the provisions of this contract, or in the event of default or material violation by station of any of the provisions of this contract which the agency would have earned had it been allowed to complete the contract.

2. TERMINATION
This contract may be terminated by either party by giving the other fourteen (14) days' prior written notice; provided that no such notice shall be effective unless twenty-eight (28) days after start of broadcast service hereunder. If agency so terminates this contract it will pay station according to station's rate card on which this contract is based for such substitute time, or, if no such agreement can be reached agency will make the specified station time charge and a reasonable talent charge to agency.

3. INABILITY TO BROADCAST
Should any broadcast hereunder be omitted or interrupted by reason of labor disputes, strikes or riots or by failure or impairment of facilities arising from any cause, or by reason of any cause beyond station's control, station shall not be liable to agency except to the extent of allowing in each case either (1) a pro rata reduction in the time charges hereunder, or (2) if an interruption occurs during the commercial announcement portion of any broadcast a credit to agency in the same proportion to the total commercial time charge that the omitted commercial portion bears to the total commercial portion of the broadcast, it being mutually agreed that station shall credit agency on whichever basis is more favorable to agency. In the event of such interruption, station shall continue until the omission occurs as a result of an agreement reached between station and agency, based for such substitute time, or, if no such agreement can be reached agency will make the specified station time charge and a reasonable talent charge to agency.

4. SUBSTITUTION OF PROGRAMS OF PUBLIC IMPORTANCE
Station shall have the right to cancel any broadcast covered by this contract in order to broadcast programs of public importance. It is understood that a commercial program will not be substituted unless deemed by station to be of the utmost public importance to the public at the time. In such case, upon giving thirty days' written notice as far in advance as station's facilities permit, station shall be considered as cancelled without affecting this contract except that in each such case station shall allow agency a pro rata reduction in the time charges hereunder. If the talent have been used on the cancelled program to be furnished by station, station shall not be liable for any non-cancelable cost of such talent; it is mutually agreed that in no case shall station be liable for cost of any talent for which station itself does not contract. Such cancellation shall not affect rates of discount; that is, the agency shall have the benefit of the same discounts which the agency would have earned had it been allowed to complete the contract.

5. RATES
(a) It is agreed that the rates named in this contract are the lowest rates and that the discounts named are the maximum discounts made by station at the date of execution of this contract for like services and that if at any time during the life of this contract rates of discount or increased rates of discount are increased on like services, this contract shall be completed from the effective date of such reduction in rates or increase in discounts at such reduced rates or increased discounts.
(b) If this contract is cancelled under the provisions hereof, all previously broadcast shall be considered part of this contract and the same rate shall apply until any lower rate prevailing at the time this contract is made shall have been effective. Such lower rates shall be effective at the time they are effective in如同 the station and shall not, however, cover a service rendered by station later than one year from the date of the first broadcast.

6. PROGRAMS
(a) Agency undertakes to deliver to station seven days in advance of each broadcast, a change sheet of programs in which the agency shall have the benefit of the same discounts which the agency would have earned had it been allowed to complete the contract.
(b) Any broadcast hereunder and all other programs broadcast hereunder will be done in accordance with the Broadcast Code of the National Association of Broadcasters.

7. INDEMNITY
(a) Any litigation against agency or advertiser, or the employees of either, brought to enforce the rights of any third party alleged to have been violated by broadcasting matter described herein as station material will be defended by station and make the specified station time charge and a reasonable talent charge to agency.
(b) Agency program material shall comply with the Broadcast Code of the National Association of Broadcasters.

8. GENERAL
This contract is made subject to all Federal, State and Municipal laws and regulations now or hereafter in force, is not assignable without the consent of station, and any assignments made hereunder or hereafter without the consent of station shall be null and void. Waiver of any provision hereof in any instance shall not constitute a general waiver of any right hereunder.

(Over)
where men gather together throughout the night. Despite the fact that these listeners hear ASCAP tunes at the motion picture houses, the Dawn Patrol seldom receives a request for one.

Every BMI song has been judged not according to its value in a Broadway production or a Hollywood movie, but according to the number of people who would be interested in it. This standard, BMI officials feel, was reflected almost immediately in the response of the listening audience. In the coin boxes and in those new inventions where the patron is permitted to name a tune for performance, the current score stands about eight to two in favor of BMI. BMI's top eight headed by *I Hear a Rhapsody* and *You Walk By* are the current favorites.

**BMI HEADS FOR NEW YEAR**

Carl Haverlin, BMI's Station Relations Director, reports that renewal licenses from BMI stations have been coming in during the past week at a greatly increased rate. A large majority of all stations have already sent in their renewals and Mr. Haverlin hopes to get the rest of the renewals cleared up within the coming week or ten days.

On March 14th the Eleventh District meeting at Minneapolis adopted a resolution expressing unanimous support for BMI and pledging those present to renewal of their licenses.

**BMI BATS HIGH FOR WEEK**

The popularity record for the week proves that BMI music holds the commanding lead which it has been building up for the past several months. *Billboard* shows that nine of the most popular records in the coin machine list are published or licensed by BMI and again nine of the ten best selling retail records are also in the BMI catalogue. Both *Billboard* and *Variety* agree in giving BMI thirteen of the fifteen sheet music best sellers.

The efforts made by BMI to stimulate program diversification show results in the *Billboard* list of radio plugs. Out of the twenty leading songs for this week twelve were BMI publications and eight were in the catalogues of affiliated publishers.

Julius P. Witmark, Jr., BMI's Sales Manager, reports that *You Walk By* has now been added to the list of the BMI songs which have gone over the one-hundred-thousand mark in sheet music sales.

**MARKS SETS RECORD FOR NETWORK PERFORMANCE**

A new high record for the number of individual compositions performed on any one evening over the major networks was set last Friday night, March 14, by the Edward B. Marks Music Corporation. No less than 32 songs, running all the way from hot swing to "long-hair" classics and from the Latinest of Latin to the most American rhythms, were included in the programs broadcast over the chief stations. All of these numbers were licensed through BMI.

The most important commercial hours had a full quota of Marks tunes. Jimmy Dorsey on his Twenty-Grand program featured his inimitable arrangement of Amapola as recorded on the Decca disc, which is establishing a new high. On the same program Mary Small performed Para Vigo Me Voy (Say Si Si) in Spanish in truly Latin style.

The Philip Morris program, directed by Ray Bloch, featured a beautiful version of Two Hearts That Pass in the Night, the new Ernesto Lecuona tune, followed immediately by that classic of early rhythm, Jazz Me Blues. The same program ended with a brilliantly conceived medley of Manhattan and Sentimental Me, two of the best songs ever written by Rodgers and Hart.

The Alka Seltzer program had *Ida, Sweet As Apple Cider*; Frank Black played Para Vigo Me Voy on his Cities' Service program; the Phillips hour had Abe Lyman playing an old waltz that has not been heard much of late, Kentucky Dream; the Camel program from Hollywood listed a brand new song Why Cry Baby, as well as the familiar El Rauchao Grande; and various other commercial and sustaining programs were enhanced by such other

---

**BMI FEATURE TUNES**

March 24-31

1. WALKIN' BY THE RIVER
2. WISE OLD OWL
3. HIGH ON A WINDY HILL
4. YOU WALK BY
5. HERE'S MY HEART
6. FRIENDLY TAVERN POLKA
7. IT ALL COMES BACK TO ME NOW
8. MAY I NEVER LOVE AGAIN
9. I CAN'T REMEMBER TO FORGET
10. G'BYE NOW
11. LOAFING ON A LAZY DAY
12. ALL I DESIRE
13. LET'S DREAM THIS ONE OUT
14. TALKING TO THE WIND
15. BREAKFAST FOR TWO
16. STONE'S THROW FROM HEAVEN, A
17. WITH A TWIST OF THE WRIST
18. WHERE'S THE CAPTAIN'S HAT

In preparation—what promises to be 1941's biggest song hit—*My Sister and I*
Marks standard and popular successes as There'll Be Some Changes Made Today, Yours, For Want of a Star (another new Leonora song based on his celebrated La Comparsa), Blues My Naughty Sweetie Gives to Me, Song of the Islands, Mama Inez, Ballin' the Jack, It Was Wonderful Then, Let's Dance (Benny Goodman's theme), Salud, Duyero y Amor, Shim-Me-Sha-Wabble, The Peanut Vendor, Everybody Works But Father, My One Romance, My Shovel, Story of a Horn, Tishomingo Blues, and several others.

This broad representation of Marks music on the air was by no means unusual. While there may not be as many as 32 different Marks copyrights broadcast over the major networks every night, there are usually from 20 to 30 and these are performed anywhere from one to six times. As a result, the Marks catalogue is booming in sales and in general all-around popularity.

LONGFELLOW MUSIC BY MERRIMAN

BMI has recently published in its standard catalogue a musical setting by its own Dana Merriman of Henry Wadsworth Longfellow's poem, The Legend of the Crossbill. Orchestrations and mixed chorus arrangements made by Mr. Merriman himself will be released within a few days.

In 1934 Mr. Merriman, as an NBC conductor, had to build some programs which, although not of sacred music, should nevertheless be suitable to the Lenten Season. He remembered The Legend of the Crossbill, and included it on a program as a vocal solo with orchestral accompaniment, and then went home to write the music. The poem concerns the story of a little bird who pecked at the nails of the Cross and stained the feathers of its throat with blood so that all its winged descendants carry the red mark to this day.

Mr. Merriman has just received a letter from the poet's grandson, Henry Wadsworth Longfellow Dana, telling him he has received the new BMI song just in time for inclusion in a bibliography of Longfellow Music.

SEARS' SWEET SWING

Sweet Swing and Jerry Sears are synonymous. This active young conductor of orchestras for radio transcriptions will always be identified with the swinging of the classics no matter how many other interesting things he does in music. It all began when George Marlo, BMI's Professional Manager, heard some transcription recordings with an unusual combination for dance music, string quartet, harp, and bass, which Jerry had arranged for World Broadcasting System, Inc. Mr. Marlo thought they would make good material for regular dance orchestras so Jerry did a series for BMI which have been heard from coast-to-coast during the past few months.

Some people like them very much and some people don't like them at all, but judging from the requests that come in from broadcasting studios they are growing in popularity. Particularly the old timers like I Dreamt I Dwelt In Marble Halls, Loch Lomond, and My Heart At Thy Sweet Voice.

Coming to BMI was like starting over again for Jerry. His abbreviated business career began and ended with Brentano's which is in the same building with BMI. It was all due to the fact that a musician needs too much sleep. Jerry played professionally during the time he was employed as a salesman at Brentano's and after he was threatened several times with being fired, he decided it was better to work by night than by day and devoted himself to his orchestra.

Jerry Sears might be termed a serious musician who has gone "modern." By combining the best in musical idiom with the best of the popular classics, he has developed a unique style of music. His clever modernizations of classical and traditional selections are strikingly original, with an insistent rhythm that captivates your ears and sets your feet to dancing.

One of the youngest radio conductors, Jerry has an enviable background of training and experience. He attended Cornell University, where he majored in philosophy, but at the same time he took all the music courses at the Ithaca Conservatory, studying piano under Leon Sampaix. It finally got to the point where his activities as piano accompanist for glee clubs, and arranger and conductor of college orchestras, made such demands that he hardly had time for his college courses.

After graduation, convinced that he was definitely interested in a musical career, he was engaged by Cass Hagan's orchestra at the Park Central in New York, as saxophonist and arranger. In this same band were Lennie Hayton, pianist, and Red Nichols, trumpeter. Subsequently he spent several years conducting, composing, and arranging for Paramount Pictures and for Publix Corporation.

He has been arranger for Paul Ash at the New York and Brooklyn Paramount theaters, for Phil Baker, and for Ray Noble; pianist and arranger for Nathaniel Shilkret, and for Roger Wolfe Kahn's Pennsylvania Orchestra when it was signed for the first NBC Lucky Strike series. For more than five years he was a regular conductor for NBC.

Just recently, Jerry assembled a new band of thirteen pieces, all carefully selected musicians of proven ability. Frankie Signorelli, his pianist, was formerly with Paul Whiteman and has played for the famous Memphis Five and other well-known groups. Paul Ricci, his first saxophonist, formerly a member of the Andre Kostalanetz orchestra, is now in demand by all the top-flight orchestras. The other members are equally outstanding.
NEW YORK SALES MANAGERS

Charles F. Phillips, commercial manager of WFBL, Syracuse, and chairman of the Second District Sales Managers Committee (all stations in the State of New York) advises that a sales managers meeting will be held in Syracuse on Wednesday, March 26. All stations in the District are urged to have their sales manager on hand. This will be an important meeting.

CORRECTION

Owing to a typographical error, the NAB REPORTS, page 121, listed the new frequency of Station WPID, Petersburg, Virginia, under the reallocation as 790 kc. This should have been 1240 kc.

ALUMINUM DISCS

Manufacturers of aluminum discs have attempted in a series of discussions with the Office of Production Management to secure a priority rating and some assurance that their aluminum requirements will be safeguarded. While NAB has followed these discussions closely it has taken no active part.

It appears at the present writing that there is little possibility that the appeal of the manufacturers will be favorably considered and that the supply of aluminum for disc purposes may be seriously curtailed.

In view of this situation which has as yet produced no serious effect upon stations using these discs, it seems advisable to caution in an attempt to conserve the supply on hand. Such conservation may be accomplished by use of other material for reference recording. It has also been suggested that station operators carefully inspect their supply of used discs to determine if some of these cannot be returned to manufacturers for reprocessing. We are advised that it requires approximately two months to assure reprocessing and, therefore, prompt action is necessary. The return of used discs and the judicious use of the present supply coupled with the substitution of other methods where possible will contribute to a solution of this problem.

The Engineering Committee at the direction of the Board will look into the matter of the price to be allowed for disc purposes may be seriously curtailed.

The Long Committee at the direction of the Board will look into the matter of the price to be allowed for disc purposes may be seriously curtailed.

Legislation

OREGON LIBEL LAW

Oregon Senate Bill No. 340 relating to the broadcasting of defamatory matter passed both branches and was approved March 14. We print the Act:

An Act relating to the broadcast of defamatory matter over the facilities of radio and television broadcasting stations, and defining the liability therefor.

March 21, 1941 — 265
Be It Enacted by the People of the State of Oregon:

Section 1. The owner, licensee or operator of a radio station or television broadcasting station, and the agents or employees of any such owner, licensee or operator, shall not be liable for any damages for any defamatory statement published or uttered in or as a part of a radio or television broadcast, by one other than such owner, licensee or operator, or agent or employee thereof, unless it shall be alleged and proved by the complaining party, that such owner, licensee, agent or employee, has failed to exercise due care to prevent the publication or utterance of such statement in such broadcast.

FEDERAL LEGISLATION

H. R. 3997 (Sacks, D-Pa.) COPYRIGHT—To amend the Act entitled “An Act to amend and consolidate the Acts respecting copyrights,” approved March 4, 1909, as amended, and for other purposes. Referred to Committee on Patents.

H. R. 4016 (O’Neill, R-N.) COPYRIGHT—To reduce the amount of damages for infringement of copyright of musical compositions in certain hotels and other places. Referred to Committee on Patents.

STATE LEGISLATION

ARIZONA:

H. 144 (Phillips) FARM PRODUCTS—FALSE ADVERTISEMENT—To prohibit the false advertisement of agricultural commodities sold for human consumption. Referred to Committees on Judiciary, Agric. & Irrig., County and County Aff.

ILLINOIS:

H. 360 (Crowley) MUSICAL COPYRIGHT SOCIETIES—Makes it unlawful for authors, composers, etc., of any copyrighted vocal or instrumental musical composition to form a combination, society, firm, partnership, etc., either within or without the state, when one of the objects of such combination is the determination and the fixation of license fees and other exactions and the amounts thereof required, by such combination for itself or its members. Referred to Committee on Judiciary.

MARYLAND:

H. 591 (Dempsey) FOOD, DRUG AND COSMETIC—Food and Drug Law. To repeal Secs. 189-200 of Art. 43 of the Annotated Code (1939 Ed.), and to enact Secs. 189-200-6 in lieu thereof to provide a Uniform Food, Drug and Cosmetic Act. Referred to Committee on Hygiene.

H. 737 (Houck) SPORTS—ADVERTISING—To add Secs. 291A to Art. 27a the Annotated Code (1939 Ed.), providing for dissemination, publication and transmission by newspaper, radio, etc., of news pertaining to any sport, sporting event, contest or contingency. Referred to Committee on Judiciary.

MISSOURI:

H. 447 (Limbach) PROPAGANDA—Regulating and dealing with propaganda inciting race nationality, color or religious hatred.

NEVADA:

A. 273 (Jones) MONOPOLIES—Creates an anti-monopoly board to reflectuate the true intent of the Federal Copyright Laws. Referred to Committee on Judiciary.

OHIO:

H. 616 (Ratkoff) TRADE RESTRAINT—MUSICAL COMPOSITIONS—To outlaw combinations fixing prices for public performance rights of vocal or instrumental musical compositions. Referred to Committee on Judiciary.

PENNSYLVANIA:

H. 792 (Taylor) RACIAL HATRED—To add Secs. 418, 419, 420, 471, 422 and 423 of the Penal Code of 1939, P. L. 872, by making unlawful acts directed to incite racial or religious hatred, and imposing penalties. Referred to Committee on Judiciary Special.

VERMONT:

H. 248 (General Committee) ELECTRICAL INTERFERENCE—To amend section 3678 of the Public Laws relating to radio interference.

Wisconsin:

A. 527 (Schreiner) COPYRIGHTED MUSIC—An Act to create 177.01, sections 2A, 2B and 2C and to amend 177.01, section 7 of the statutes relating to copyrighted music. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION

WAKEFIELD CONFIRMED

Ray C. Wakefield was confirmed on Monday by the Senate as a member of the FCC for a term of seven years beginning July 1, 1940. Mr. Wakefield succeeds the late Thad H. Brown as a member of the Commission.

FM RULES AMENDED

The FCC has amended the rules governing high frequency broadcast (FM) stations in order to stimulate development in this new service by relaxing the requirements with respect to the areas to be served. This action was taken upon suggestions by the industry that such relaxations, essentially of a temporary character, are needed to meet existing conditions.

With respect to cities having large basic trade areas, such as Washington, Houston, St. Louis and Kansas City, the new rules permit stations to be authorized on a temporary basis to serve less than the basic trade area but at least the metropolitan district of the city in question. Such authorizations will not be granted in the absence of a special showing that there is a need for relaxing the basic requirement in the particular case. Such grants will be subject to the condition that the Commission may in the future require the licensee to serve the entire basic trade area. In determining to make such a requirement in the future the Commission will take into consideration such matters as the availability or shortage of frequencies in the particular city, the number and qualifications of applicants who are willing to serve the entire basic trade area, the competitive effect of continuing the authorizations for a smaller service area upon stations serving or willing to serve the entire basic trade area, the distribution of receiving sets within the basic trade area, and other pertinent factors.

The Commission made available three of the frequencies presently allocated for cities having a population less than 25,000 for assignment also to stations in cities having a greater population located in and adjacent to metropolitan districts having a population greater than 1,000,000.

In addition, the Commission indicated that, although under Section 3.216(b) of the Rules eleven channels are available for any particular basic trade area, it would reserve, in making present assignments, three such channels for communities outside the principal city of the basic trade area.

NOTICE TO FM STATIONS

Supplementing its announcement of February 26 concerning provisions for experimental high frequency (FM) broadcast stations to expedite commercial operation, the FCC now offers further aid to FM broadcasters in their transition period by prescribing:

A person holding a construction permit for a commercial high frequency broadcast station may be permitted to operate on a temporary basis with equipment delivering a less effective signal
than that required to render service to the entire area specified under the rules applicable to such station, provided, the applicant demonstrates that he has made a bona fide effort to comply with the terms of his construction permit. Such showing must include photostatic copy of acknowledgement of order for transmitter and promised delivery date.

REALLOCATION

The FCC issued the following statement about reallocation:

Information has reached the Federal Communications Commission that in certain instances private representatives of radio stations in the United States have been attempting to deal directly with the owners of radio stations in some of the neighboring countries, notably Canada, Cuba and Mexico, or with government officials in these countries, on matters having to do with the allocation of radio frequencies, and specifically involving proposed changes in the frequencies of certain broadcasting stations either in the United States or in the other countries mentioned.

Such a procedure in many instances might jeopardize any international negotiations which might be in progress, and might bring prejudicial results in the case of certain international treaties to which the United States is a party. Such action could cause serious embarrassment to this government.

Any proposed negotiation between broadcast stations in this country and those in foreign countries should be through the medium of prescribed government jurisdiction. All such cases should be presented first to the Federal Communications Commission which in turn will recommend appropriate action through diplomatic channels if required.

This notice is in no way intended to affect any negotiations concerning the exchange of programs as between the various countries which are being carried on in the normal conduct of program contract arrangements.

FCC has issued the following notice to all standard broadcast stations regarding the March 29 changes:

On January 31, 1941, in connection with its publication of the frequency assignments effective March 29, 1941, the Commission issued a notice to all standard broadcast station licensees authorizing tests on the new frequencies and setting forth the procedure required of licensees employing directional antennas. Detailed steps were outlined to be followed by such stations. It was specified that data on the radiation field together with the frequency and emission tests on the new frequencies and setting forth the procedure will be furnished to the FCC at least 90 days prior to March 29, 1941.

Licensees of stations employing directional antennas are advised that, due to the general delay in submitting the required data, renewals of licenses for the period beginning 3:00 a.m., March 29, 1941, specifying the regularly authorized operating power, can be assured only in cases where the necessary performance data is submitted by March 21, 1941. In the case of any licensee which does not submit the required data by that date, temporary authorization is granted by March 21, 1941, specifying the regularly authorized operating power, can be assured only in cases where the necessary performance data is submitted by March 21, 1941. In the case of any licensee which does not submit the required data by that date, temporary authorization only may be granted and the Commission will specify such power as it deems appropriate in each case to prevent interference to other stations.

FLY DISCUSSES NETWORK REPORT

At a press conference early this week, Chairman James Lawrence Fly of the FCC stated that the Commission last week met twice on the network “monopoly” report and two meetings are scheduled for this week. He refused to hazard a guess as to when the report would be completed by the Commission and released. He reiterated that it would be a brand new report, although it would take into consideration information furnished by the Committee report and the Law Department of the Commission. In answering a specific question, Mr. Fly said he expected a “unanimous” report. He stressed the point that the Commission is writing its own report.

Chairman Fly said he was hopeful that the television hearing, beginning on March 20, would only last for a couple of days. He expressed the opinion that industry representatives would not waste any time. Mr. Fly told the newsmen that he sees progress in the television situation with the attitude of the industry as a whole tending toward an agreement. Of course, he said, there will be those “not wishing to give in on certain fundamental things.”

Mr. Fly said that it is not yet clear how color television would be dealt with. He said that eventually there will be color television, but there is a question of how it will be provided for at the beginning.

The FCC today announced adoption of orders (B-127), dismissing the applications of Chilton Radio Corporation and V.O. Stamps, both applicants for a new station in Dallas, Texas.

The applicants applied for a permit to use frequency 1370 kilocycles, 100 watts, unlimited time. A consolidated hearing was held in the matter. Thereafter, applicant Stamps died, whereupon the Chilton Corp. applied for a dismissal of the Stamps application, and petitioned the Commission to reconsider and grant its application.

On January 1, 1941, the Commission authorized the Chilton Radio Corp. to amend its application to specify another frequency than originally requested. An amendment was filed, and the application of Chilton Radio Corp. has been removed from the hearing docket, and the petition to reconsider and grant is dismissed.

BIBLE SCHOOL APPLICATION

Public interest, convenience, and necessity will not be served by granting the application of God’s Bible School and College, Cincinnati, Ohio, for a construction permit looking to establishment by that institution of a new international broadcast station to serve Latin America, according to a proposed decision of the FCC.

In Proposed Findings of Fact and Conclusions (B-152) based upon a hearing August 13, 14, and 26, 1940, the Commission points out that while the chief frequency requested—21610 kilocycles—is available, its characteristics do not permit rendition of a satisfactory program service to South America except during the daytime at certain seasons of the year. Also, by reason of the differences in direction of the zones of Mexico and Central and South America, it would be necessary to utilize two antennas, instead of the one proposed, in order to render adequate service. Moreover, no comprehensive inquiry was undertaken by the applicant with a view to determining the types of programs which would be acceptable to the potential audiences.

Therefore, the Commission concludes:

1. The applicant does not propose to provide adequate technical facilities to carry forward the proposed service.
2. The applicant has failed to show that the technical operation of the proposed station would be conducted by qualified persons.
3. The proposed programs were not predicated upon a comprehensive survey designed to determine whether such programs would be acceptable to the areas to be served, nor has the applicant shown that it has the necessary program sources available to render an international service in the public interest.
4. Public interest, convenience, and necessity will not be served by the grant of this application.

March 21, 1941 — 267
MUSICAL PITCH BROADCAST

The standard frequency radio service of the National Bureau of Standards, Department of Commerce, which has been conducted on a reduced basis since last November when fire destroyed the Bureau broadcasting station WWV has been extended by the resumption of the standard musical pitch and of seconds intervals. Barring unforeseen developments due to the current use of temporary equipment, it is pointed out, the service will henceforth be on the air continuously day and night. The radio frequency is, as formerly, 5,000 cycles per second.

The standard musical pitch carried by the broadcast is the frequency 440 cycles per second, corresponding to A above middle C. In addition there is a pulse every second, heard as a faint tick, when listening to the 440 cycle. The pulse lasts 0.005 second and provides an accurate time interval for purposes of physical measurements.

The 440-cycle tone is interrupted every five minutes for one minute in order to give the station announcement and to provide an interval for the checking of radio measurements based on the standard radio frequency. The announcement is the station call letters (WWV) in telegraphic code (dots and dashes).

The accuracy of the 5-megacycle frequency, and of the 440-cycle standard pitch as transmitted, is better than a part in 10,000,000.

Transmission effects in the medium (Doppler effect, etc.) may result in slight fluctuations in the 440-cycle frequency as received at a particular place; the average frequency received is however as accurate as that transmitted. The time interval marked by the pulse every second is accurate to 0.000 01 second. The 1-minute, 4-minute, and 5-minute intervals marked by the beginning and ending of the announcement periods are limited to a part in 10,000,000. The beginnings of the announcement periods are so synchronized with the basic time service of the U. S. Naval Observatory that they mark accurately the hour and the successive 5-minute periods; this adjustment does not have the extreme accuracy of the time intervals, but is within a small fraction of a second.

The broadcast is from a 1-kilowatt transmitter. It is most useful for moderate distances in the daytime and long distances at night. For reception in locations reasonably free from interference, it is recommended that the station be heard at all distances up to about 500 miles from Washington in the middle of the day. The distance range increases after about 4 P.M. (EST) until at night the broadcast is receivable throughout the United States (i.e., the 5-Mc carrier frequency; the 440-cycle tone is sometimes not receivable at night beyond about 1300 miles). Sometimes at night it may be difficult to receive either the 5 Mc or the 440 cycles at distances between about 50 and 500 miles, while it is easy to receive them beyond 500 miles.

In the autumn the daytime distance range will increase, rising to about 1000 miles in the winter.

The service from the temporary transmitter will continue for some months. As rapidly as possible the Bureau will establish a new station to provide more fully than in the past, standard frequencies reliably receivable at all times throughout the country. These will be transmitted on more adequate power, and several radio carrier frequencies will be used, in order to provide more certain coverage of all distances and times.

FROM THE FCC MAIL BAG

The Federal Communications Commission is in receipt of a letter from a certain organization complaining of "dissemination over an amateur station in connection with a scheduled trip to Hawaii. It is informed that there is nothing to prevent this, providing the rules and regulations concerning amateur operation are observed, particularly that section which prohibits an amateur from engaging in any direct or indirect commercial transmission. A radio station announcer complains of long hours and low wages. His letter has been transmitted to the Wage and Hour Division of the Department of Labor.

The Commission has had to write numerous letters advising...
that, since it serves largely as a licensing authority, it is not in a position to furnish information concerning opportunities in the broadcast field, recommend radio schools or courses, help in the preparation of radio scripts or programs, or furnish copies of broadcast schedules.

A Californian is informed that the Commission has not allocated special radio frequencies for the exclusive use of any group of amateurs or for any amateur "network." Any licensed amateur radio operator may use any frequency assigned to the amateur service in accordance with the terms of his license and the Commission's rules governing such use.

Frequently, the Commission has to reply to individuals seeking special statistical data that, while every effort is made to furnish data where practicable, the stress of routine work makes it impossible to do specific research for private persons. It points out, however, that reports and other public information filed with the Commission may be examined in the Public Reference Room in its Washington Offices.

A Brooklyn, N. Y., resident asks about requirements for "dental workers" in Commission employ. The Commission refers the application to the United States Civil Service Commission, from whence it draws its personnel.

A licensed radio operator does not know whether to sign the program log with his name in full as it appears on his license or with his favorite shorter version. He is probably relieved to learn that there is no prescribed form other than "the person having actual knowledge of the facts required shall sign the log when starting duty and again when going off duty."

The Commission cannot make public distribution of frequency radio spectrum charts. However, a frequency allocation table is contained in the "General Rules Governing Standard Broadcast Stations" (Part 2 of the Commission's Rules and Regulations), which is sold by the Superintendent of Documents, Government Printing Office, Washington, for 10 cents a copy.

Incidentally, a new printed general information pamphlet, "Radio—A Public Primer," is being supplied individually upon request.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, March 24. They are subject to change.

Monday, March 24

**WARM**—Union Broadcasting Company, Scranton, Pa.—License to cover C. P., 1370 kc., 250 watts, unlimited.

**Thursday, March 27**

**Friday, March 28**

**KGNO**—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Modification of license, 1340 kc., 500 watts night, 1 kW day, unlimited. Present assignment: 1340 kc., 250 watts night, 1 kW day, unlimited.

**NEW**—J. C. Kaynor, Ellensburg, Wash.—C. P., 1310 kc., 250 watts, unlimited.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future dates for broadcast hearings. They are subject to change.

**April 3**

To Be Heard Before Commissioner Paul A. Walker, Place of Hearing to Be Later Designated

**WTMC**—Ocala Broadcasting Company, Inc., Ocala, Fla.—In the Matter of Revocation of License of Station.

**WDLP**—Panama City Broadcasting Company, Panama City, Fla.—In the Matter of Revocation of License of Station. Consolidated Hearing

**NEW**—Western Gateway Broadcasting Corp., Schenectady, N. Y.—C. P., 1210 kc., 250 watts, unlimited.

**NEW**—Van Curler Broadcasting Corp., Schenectady, N. Y.—C. P., 1210 kc., 250 watts, unlimited.

April 14

To Be Heard Before Commissioner Paul A. Walker, in Ocala, Florida

**WTMC**—Ocala Broadcasting Company, Inc., Ocala, Fla.—In the Matter of Revocation of License of Station.

April 17

To Be Heard Before Commissioner Paul A. Walker, in Panama City, Florida

**WDLP**—Panama City Broadcasting Company, Panama City, Fla.—In the Matter of Revocation of License of Station.

April 18

**NEW**—J. Leslie Doss, Bessemer, Ala.—C. P., 1370 kc., 250 watts, unlimited.

April 22

**NEW**—Carmen Broadcasting Co., Camden, N. J.—C. P., 800 kc., 500 watts, daytime.

April 28

**WRDO**—WRDO, Inc., Augusta, Maine.—Renewal of license, 1370 kc., 100 watts, unlimited.

April 29

**NEW**—The Outlet Company, Providence, R. I.—C. P., 41300 kc., 16,370 square miles, unlimited.

June 30

**NEW**—KNOE, Inc., Monroe, La.—C. P., 1120 kc., 250 watts, unlimited.

**FEDERAL COMMUNICATIONS COMMISSION ACTION**

**APPLICATIONS GRANTED**

Gordon Gray, Winston-Salem, N. C.—Granted construction permit for new high frequency broadcast (FM) station to operate on frequency 11100 kc.; 69,400 square miles; population, 434,600 (B3-PH-76).

W71NY—Bamberger Broadcasting Service, Inc., New York City.—Granted modification of (FM) construction permit to specify new transmitter, new antenna, change in population and location of main studio at 1440 Broadway, New York City (B1-MPH-8).

KFOR—Cornbelt Broadcasting Corp., Lincoln, Neb.—Granted construction permit to authorize construction provided for in expired permit (B4-P-2537) as modified, for changes in equipment, in antenna system, increase in power from 100 watts night, 250 watts day to 250 watts day and night on 1210 kc., and change transmitter location to 48th and Vine Streets, Lincoln (B4-P-3087).

Natchez Broadcasting Co., Natchez, Miss.—Granted construction permit for new standard broadcast station to operate on 1490 (NARBA) kc., 250 watts, unlimited time (B3-P-2999).

KRKO—Everett Broadcasting Co., Everett, Wash.—Construction permit for 1370 kc., 100 watts night, 250 watts day, issued
to Lee E. Mudgett, cancelled, and new permit issued to present licensee, The Everett Broadcasting Co. (B5-AP-33).

APPLICATION DENIED

WIXG—General Television Corp., Boston, Mass.—Denied request for extension of special temporary authority to operate visual and aural broadcast station of Bowdane Ave. and Park Drive, for a period of one month from March 20.

DESIGNATED FOR HEARING

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—James F. Hopkins, Inc., Detroit, Mich.—Designated for hearing application for construction permit to change frequency from 1570 to 1290 kc. (NARBA), install directional antenna for night use and move transmitter to Windmere Ave. and Conshohocken Ave, Philadelphia (B2-P-3113). To be heard with pending Trenton applications.

KDRB—Droehl Brothers, Sedalia, Mo.—Designated for hearing application for construction permit to change frequency from 1500 to 800 kc. (under NARBA), increase power from 250 watts to 1 KW, and time of operation from unlimited to daytime only, make changes in antenna, and install new transmitting equipment (B4-P-3035).

James F. Hopkins, Inc., Detroit, Mich.—Denied request for application for new FM broadcast station to operate on 145900 kc., 2130 square mile (B2-PH-1).

Natchez Radio Corp., Natchez, Miss.—Designated for hearing application for construction permit to operate on 1370 kc., 250 watts, unlimited time (B3-P-3064).

MISCELLANEOUS

KEYR—Evergreen Broadcasting Corp., Seattle, Wash.— Granted special temporary authority to operate simultaneously with Station KDKO from 4 pm. to 7 pm., March 19, from 9:45 a.m. to 12 noon, March 20, and from 4 pm. to 7 pm., March 20, from 9:45 a.m. to 12 noon, and from 4 pm. to 6 pm.; new power to 250 watts, unlimited time (B3-PRV-21).

WPGC—The Washington Post, Washington, D.C.—Granted request of application for construction permit to change frequency to 146700 kc., with a coverage of 4600 square miles (B3-P-333).

Columbia Broadcasting Co., Inc., area of Columbus, Ga., Portable-Mobile.—Granted construction permit for new relay broadcast station: frequencies 1632, 2058, 2150, 2720 kc., 50 watts; to be used with applicant's standard broadcast station WRBL. (B3-PRV-217).

KEJM—Perkins Bros. Co. (The Sioux City Journal), Portable-Mobile, area of Sioux City, la.—Granted license to cover construction permit (B4-PRE-375) to make changes in equipment and decrease power in relay station to 1.2 watts (B4-LRE-343).

WEPA—Edwin H. Armstrong, Portable-Mobile, area of New York City.—Granted modification of construction permit (B1-PRE-277), which authorized a new Special Relay Broadcast Station), to specify new Group “P” frequencies of 156530, 155100, 155300, 161100 kc. in accordance with notices required, renewal of commencement date to 60 days after grant and completion date to 180 days thereafter (B1-MPRE-49).

W49BN—Howitt-Wood Radio Co., Inc., Binghamton, N. Y.—Granted modification of construction permit for new high frequency broadcast station for approval of transmitter and antenna (B1-MPH-4).

W0KL—KLZ Broadcasting Co., Denver, Colo.—Granted construction permit to move transmitter from 17th Ave. and Lincoln St., Denver, Colo., to 1501 E. Hampden Ave., near Denver, Colo. (B1-PRB-1).

WBOE—Cleveland City Board of Education, Cleveland, Ohio.—Granted license to cover construction permit to install new equipment, change frequency to 42500 kc., increase power to 1000 watts, and change type of emission for non-commercial educational broadcast station (B2-LED-4).

WBNI—National Broadcasting Co., Inc., Bound Brook, N. J.—Granted modification of construction permit to change equipment, frequencies and increase power, for extension of completion date from April 6, 1941, to May 6, 1941 (B1-MPB-2).

WRC—National Broadcasting Co., Inc., Bound Brook, N. J.— Granted modification of construction permit to change equipment, frequencies and increase power, for extension of completion date from April 6, 1941, to May 6, 1941 (B1-MPB-21).

W0XR—Babahan & Katz Corp., Chicago, III.—Granted extension of special temporary authority to operate two transmitter units to be installed and operated from the State-Lake Bldg., Chicago; Link Transmitter Type No. 50-UTX with 100 watts for visual, Link Transmitter Type No. 25-UBX, 200 watts for voice, straight steel roof, in order to conduct tests from March 20 to not later than April 18, 1941, in accordance with construction permit.

KC.—Enid Radiophone Co., Enid, Okla.—Granted authority to install automatic frequency control equipment on 1390 kc. under NARBA (B3-F-190).

WCAZ—Superior Broadcasting Service, Inc., Carthage, Ill.—Granted authority to install automatic frequency control equipment on 1080 kc. under NARBA (B4-F-181).

WATW—Agricultural and Mechanical College of Texas, College Station, Tex.—Granted modification of construction permit for increase in power and new equipment, for new transmitter (requesting 1156 kc. under NARBA) (B3-MP-1196).

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted modification of construction permit to change in equipment, for extension of completion date from April 22, 1941, to October 2, 1941 (B2-MPB-192).

WVFW—Paramount Broadcasting Corp., Brooklyn, N. Y.—Licensed to use WARD's transmitter at 583 Meserole Street, Brooklyn, N. Y. (B1-L-1348).

WBCB—Brooklyn Broadcasting Corp., Brooklyn, N. Y.—Licensed to use WARD's transmitter at 583 Meserole Street, Brooklyn, N. Y. (B1-L-1349).

WMRS—Florida Broadcasting Co., Jacksonville, Fla.—Granted authority to determine operating power by direct measurement of antenna power on 1400 kc. under NARBA (B3-Z-90).

WWGD—Radio Broadcasters, Inc., Los Angeles, Calif.—Granted authority to determine operating power by direct measurement of antenna power on 1150 kc. under NARBA (B5-Z-708).

KJEM—Redwood Broadcasting Co., Inc., Eureka, Calif.—Granted authority to determine operating power by direct measurement of antenna power on 1150 kc., 1480 kc. under NARBA (B5-Z-695).

WALC—Pape Broadcasting Co., Mobile, Ala.—Granted authority to determine operating power by direct measurement of antenna input on 1110 kc. under NARBA (B3-Z-707).

WKB—Sanderson Bros. Radio Station, Dubuque, Iowa.—Granted authority to determine operating power by direct measurement of antenna input on 1490 kc. under NARBA (B4-Z-704).

270 — March 21, 1941
WBXN—WBXN Broadcasting Co., Inc., New York City.—Granted construction permit to make changes in directional antenna and change frequency from 1350 kc. to 1330 kc. under NARBA (B1-P-3105).

KGNO—KGNO Radio Broadcasting Co., Amarillo, Tex.—Granted modification of construction permit (B3-P-2969 which authorized increase in power to 1 KW night, 5 KW LS, and installation of new transmitter), for change in frequency from 1110 kc. to 1140 kc. under NARBA. No authority to operate hereunder will be granted prior to March 29.

WMZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-669).

Piedmont Publishing Co. (area of Winston-Salem, N. C.). Portable-Mobile.—Granted construction permit for new relay broadcasting station (portable-mobile), frequencies 30820, 33790 kc., 2 watts power, A3 emission, to be used with applicant’s standard broadcast station WSJS (B3-PRE-387). Also granted license to cover above construction permit (B3-LRE-342).

KRLM—Roy Miller (area of Sacramento, Calif.). Portable-Mobile.—Granted construction permit to change frequencies, increase power, and make changes in equipment from 30820, 33770, 33790 kc., 10 watts power, to 1622, 2058, 2150, 3790 kc., 50 watts power, for relay broadcast station KRLM (B1-LVY-232).

WBYK—University of Kentucky, Beattyville, Ky.—Granted license to cover construction permit for new non-commercial educational broadcast station, 12900 kc., 100 watts, A3 emission (B2-LED-5).

W2XW—Allen B. DuMont Labs., Inc., New York City.—Granted modification of construction permit for new television broadcast station, to extend completion date from February 15, 1941, to April 13, 1941 (B1-MPVB-33).

W10XK—Allen B. DuMont Labs., Inc., Portable (area of New York City).—Granted license to cover construction permit for new television broadcast station, 258000-257000 kc., 50 watts; granted on an experimental basis only conditionally (B1-LVY-23).

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Granted authority to install automatic frequency control equipment on 1140 kc. under NARBA (B3-F-188).

KWMV—Big Horn Broadcasting Co., Inc., Sheridan, Wyo.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-674).

KOIL—Central States Broadcast Co., Omaha, Nebr.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-679).

KPPC—Pasadena Presbyterian Church, Pasadena, Calif.—Granted authority to determine operating power by direct measurement of antenna input on 1240 kc. under NARBA (B3-Z-679).

West Publishers, Inc., Houston, Tex.—Granted petition for leave to amend application for new station to specify directional antenna for nighttime that will conform to requirements of Havana Treaty, or in alternative to request another assignment than 610 kc., 1 KW, unlimited time, subject to the limitation that no authority effective prior to March 29, 1941, will be issued to operate on the terms and conditions specified therein (B3-MP-1183).

KMYR—F. W. Meyer, Denver, Colo.—Granted modification of construction permit for new station for frequency 1340 kc. under NARBA, change in antenna, 1220 kc. under NARBA, 250 watts, unlimited time, subject to the limitation that no authority effective prior to March 29, 1941, will be issued to operate on the terms and conditions specified therein (B3-MP-1183).

KMYR—F. W. Meyer, Denver, Colo.—Granted modification of construction permit for new station for frequency 1340 kc. under NARBA, change in antenna, 1220 kc. under NARBA, 250 watts, unlimited time, subject to the limitation that no authority effective prior to March 29, 1941, will be issued to operate on the terms and conditions specified therein (B3-MP-1183).

WAGE—Sentinel Broadcasting Corp., Syracuse, N. Y.—Granted modification of construction permit for new station for installation of new transmitter, extension of commencement date 30 days after grant and completion date 90 days thereafter (B1-MP-1188).

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit for new equipment, for changes in antenna system and move of transmitter from 1/2 miles west by southwest of Newton Square, on Bishops Hollow Road, near Cheltenham and Wynona Roads, Cinnaminson and Moorestown Township, N. J., and extend commencement date to 30 days after grant and completion date 180 days thereafter (B2-MP-1164).

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted modification of construction permit which authorized increase in power, change in antenna, for new station for nighttime, installation of directional antenna for night use and move transmitter (B4-L-1343). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-702).

WMBG—Havens & Martin, Richmond, Va.—Granted motion to dismiss petition for rehearing filed by WMBG directed against action of the Commission November 19, 1940, granting without hearing the application of Pinellas Broadcasting Co., (WSTP), St. Petersburg, Fla., for construction permit to change 9 frequency from 1570 to 1620 kc., increase power from 250 watts unlimited time, to 500 watts night 1 KW day, unlimited time, install new transmitter and make changes in antenna (B3-P-2933).

KMLB—Linier Broadcasting Station, Inc., Monroe, La.—Dismissed without prejudice motion to consolidate hearing on application of KMLB for construction permit to change frequency, etc., with application of KNOE, Inc., for a new station in Monroe, La.

KNOE, Inc., Monroe, La.—Granted motion for continuance to June 30 of hearing now scheduled for March 31, in re application for new station to operate on 1120 kc., 250 watts, unlimited time.

KFRO—Voice of Longview, Longview, Texas.—Dismissed without prejudice petition to intervene in the hearing on application of KGNO, Dodge City, Kans., for modification of license to increase night power to 500 watts on present assignment (B3-P-1140).

J. Leslie Doss, Bessemer, Ala.—Granted motion to take depositions in Bessemer, Ala., in re application for new station to operate on 1370 kc., 250 watts, unlimited time.

J. Leslie Doss, Bessemer, Ala.—Granted motions to take depositions at Tuscaloosa and Decatur, Ala., in re above application.

J. Leslie Doss, Bessemer, Ala.—Granted motion for continuance of hearing now scheduled for April 11 to April 18.

Butler Broadcasting Corp., Hamilton, Ohio.—Granted motion for indefinite continuance of hearing now scheduled for March 19, pending action on petition to reconsider grant and application for new station to operate on 1120 kc., 250 watts, unlimited time.

WNYC—Municipal Broadcasting System of City of New York.—Passed for one week petition for intervention in hearing on application of Camden Broadcasting Co. for a new station in Camden, N. J.

WNAB—Harold Thomas, Bridgeport, Conn.—Granted modification of construction permit (B1-P-2410, which authorized a new station to operate on 1120 kc., 250 watts, unlimited hours), for change in frequency from 1120 to 1150 kc. under NARBA. No authority to operate hereunder will be granted prior to March 29.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted modification of construction permit (B2-P-2251, which authorized a new station on 1500 kc., 100 watts night, 250 watts day, unlimited hours), for change in frequency from 1500 to 1900 kc. under NARBA. No authority to operate hereunder will be granted prior to March 29.

KRIS—Gulf Coast Broadcasting Co., Corpus Christi, Texas.—Granted modification of construction permit (B3-P-2230, which authorized a new transmitter and increase in power...
to 1 KW), for change in frequency from 1330 to 1360 kc. under NARBA. No authority to operate hereunder will be granted prior to March 29, 1941.

WABC—Columbia Broadcasting System, Inc., New York City.—Granted modification of construction permit (B1-F-297S, which authorized a new auxiliary transmitter with 5 KW power for emergency use only, located at Little Pea Island, New Rochelle, N.Y.), for change in frequency from 860 to 880 kc. under NARBA. No authority to operate hereunder will be granted prior to March 29, 1941.

W2XMN—Edwin H. Armstrong, N. of Alpine, N. J.—Granted special temporary authority to operate FM experimental station on 11750 kc. with 40 KW power, using special emission for frequency modulation with a maximum bandwidth not to exceed 200 kc., for a period of 60 days in order to conduct tests, subject to condition that no interference is caused to other stations on same or adjacent channels.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate from 7:15 p.m., PST, to the conclusion of basketball games on March 14, 15, and 17, 1941, in order to broadcast said games on sustaining basis only.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted special temporary authority to operate FM experimental station on 11150 kc. with 40 KW power, using special emission for frequency modulation with a maximum bandwidth not to exceed 200 kc., for a period of 60 days in order to conduct tests, subject to condition that no interference is caused to other stations on same or adjacent channels.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate from 7:15 p.m., PST, to the conclusion of basketball games on March 14, 15, and 17, 1941, in order to broadcast said games on sustaining basis only.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted special temporary authority to operate from 7:30 p.m., PST, to the conclusion of the Modesto Evening Junior College Forum on March 18, to the conclusion of the Modesto Symphony Orchestra program on March 25, and to the conclusion of the Modesto Evening Junior College Forum on April 1, 1941, in order to broadcast said programs.

WKEL—Keline Broadcasting Corp., Spokane, Wash.—Granted special temporary authority to operate from 7:15 p.m., PST, to the conclusion of basketball games on March 14, 15, and 17, 1941, in order to broadcast said games on sustaining basis only.

WWNY—The Brockway Co., Watertown, N. Y.—Granted modification of construction permit for new station to operate on 1270 kc., 500 watts, daytime only, for change in frequency to 1300 kc. in accordance with NARBA; no authority to operate hereunder will be granted prior to March 29, 1941.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate with 100 watts power from 7:30 p.m. to 11 p.m., CST, March 12, 13, 14, 15, 17, and 18, 1941, in order to broadcast basketball games only.

KRLH—Clarence Scharbauer, Midland, Tex.—Granted special temporary authority to operate with 100 watts power from 7:30 p.m. to 11 p.m., CST, March 12, 13, 14, 15, 17, and 18, 1941, in order to broadcast basketball games only.

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted special temporary authority to operate from 2 a.m. to 3 a.m., EST, on March 25, 1941, in order to broadcast said program only.

WSPA—Spartanburg Advertising Co., Spartanburg, S. C.—Granted special temporary authority to operate from 9:15 p.m., EST, to conclusion of President's speech before White House Correspondence Assn. on March 15, 1941, in order to broadcast said speech only.

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Granted special temporary authority to operate from 8:15 p.m. to 9:30 p.m., EST, to conclusion of President's speech before White House Correspondence Assn., on March 15, 1941, in order to broadcast said speech only.

WTF—Army Music Corp., Washington, D. C.—Granted special temporary authority to operate with 100 watts power from 7:30 p.m. to 10:30 p.m., CST, on March 18, 21 and 22, 1941, in order to broadcast National Basketball Championship tournament games only.

WPAY—Vee Bee Corp., Portsmouth, Ohio.—Granted modification of construction permit which authorized equipment changes, antenna changes, increase in power from 100 watts to 250 watts, and move transmitter, for change in frequency from 1210 kc. to 1210 kc., to the conclusion of the Modesto Evening Junior College Forum on April 1, 1941, in order to broadcast said programs.

WMC—Memphis Publishing Co., Memphis, Tenn.—Granted special temporary authority to operate from 9:15 p.m., EST, to the conclusion of basketball games on March 14, 1941, in order to broadcast said games only.

WGY—General Electric Co., Schenectady, N. Y.—Granted authority to install automatic frequency control equipment on 900 kc. under NARBA (B4-F-179).}

WJBC—Arthur Malcolm McGregor and Dorothy Charlotte McGregor, a partnership, Bloomington, Ill.—Voluntary assignment of license to Arthur Malcolm McGregor, Dorothy Charlotte McGregor and Hugh L. Gately, d/b as Radio Station WJBC.

1220 Kilocycles

WGNY—WGNY Broadcasting Co., Inc., Newburgh, N. Y.—Construction permit to install new transmitter, change frequency from 1220 kc. to 1250 kc., change hours of operation from daytime to unlimited, using 250 watts power. Amended to install new transmitter, request 1 KW power, daytime hours of operation, and 1220 kc. under NARBA.

1230 Kilocycles

NEW—Roy St. Lewis, Norfolk, Va.—Construction permit for a new broadcast station to be operated on 1290 kc. (1230 kc. under NARBA), 250 watts, unlimited time. Amended to give studio and transmitter sites.

1260 Kilocycles

WHBE—Rock Island Broadcasting Co., Rock Island, Ill.—Modification of construction permit (B4-P-2568) which authorized installation of new transmitter, increase in power, and directional antenna for day and night use, requesting change in type of transmitter, changes in directional antenna, 1270 kc. under NARBA, and extend date of completion from 5-17-41 to 180 days after date of grant.

1280 Kilocycles

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Modification of construction permit (B3-P-2641) to install directional antenna for night use, move transmitter and increase power, requesting 1310 kc. under NARBA, changes in directional antenna system, and extension of completion date from 6-30-41 to 180 days after grant.

1310 Kilocycles

KAND—Navarro Broadcasting Assn., J. C. West, Pres., Corsicana, Tex.—Construction permit to make equipment changes and increase power from 100 watts to 250 watts on 1310 kc., 1340 kc. under NARBA.

1330 Kilocycles

WKAT—A. Frank Katzenite, Miami Beach, Fla.—Construction permit to use formerly licensed W.E. 310-B, 250-watt transmitter as auxiliary and install new crystal oscillator for 1330 kc. (1360 kc. under NARBA).

1350 Kilocycles

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Construction permit to change frequency from 1350 kc. to 680 kc., increase power from 1 KW night, 5 KW day, to 50 KW, install new equipment and directional antenna for day and night use, and move transmitter. Amended to change requested location of transmitter and make changes in directional antenna for day and night use.

KBWD—Wendell Mayes, Joe N. Weatherby, B. P. Bludworth, and J. S. McBeath, d/b as Brown County Broadcasting Co., Brownwood, Tex.—Modification of construction permit (B3-P-2672) for a new station, requesting approval of antenna, installation of new transmitter, approval of studio site and transmitter site, requesting 1380 kc. under NARBA.

1360 Kilocycles

KCRC—Enid Radiophone Co., Enid, Okla.—Construction permit to move transmitter and studio, make antenna changes, install new transmitter, and increase power from 250 watts to 1 KW, Class III-A station, and install directional antenna for day and night use. Amended to request 1390 kc. under NARBA, make changes in directional antenna, and install new transmitter.

1370 Kilocycles

WTSP—Pinelis Broadcasting Co., St. Petersburg, Fla.—Modification of construction permit (B3-P-2933) which authorized new transmitter, changes in antenna, change in frequency and increase in power, requesting change in type of transmitter, 1380 kc. under NARBA, extension of commencement and completion dates to 30 days after date of grant and 90 days thereafter.

1410 Kilocycles

NEW—A. M. Burton, Nashville, Tenn.—Construction permit for a new broadcast station to be operated on 1380 kc., 1 KW, unlimited hours, directional antenna for day and night use. Amended: Requesting 1410 kc. under NARBA and changes in directional antenna.

1420 Kilocycles

WPBR—Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—Modification of construction permit (B2-P-2700) for new transmitter increase in power, requesting new antenna system, new transmitter, 1150 kc. under NARBA, and move transmitter, extend commencement date to 30 days after grant and completion date to 180 days thereafter.

1440 Kilocycles

KDFN—Donald Lewis Hathaway, Casper, Wyo.—Authority to determine operating power by direct measurement of antenna power on 1470 kc. under NARBA.

1550 Kilocycles

WQXR—Interstate Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-P-PSB-13) as modified for increase in power, move transmitter and new equipment, further requesting changes in equipment, increase power from 5 to 10 KW, frequency from 1550 to 1560 kc. under NARBA, extend commencement and completion dates from 8-5-40 and 2-5-41 to 30 days after grant and 180 days thereafter respectively. Amended: Re directional antenna.

FM APPLICATIONS

NEW—WHEC, Inc., Rochester, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 41700 kc.; population, 551,374; coverage, 2,318 square miles.

NEW—King-Trendle Broadcasting Corp., Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 47300 kc.; population, 2,564,008; coverage, 6,900 square miles.

NEW—The Yankee Network, Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 41700 kc.; population, 11,298,250; coverage, 8,500 square miles. Amended: To change location of studio.

TELEVISION APPLICATION

W2XMT—Metropolitan Television, Inc., New York, N. Y.—Modification of construction permit (B1-PV-40) which authorized a new television broadcast station, requesting extension of commencement and completion dates to 6-1-41 and 1-1-42 respectively.

MISCELLANEOUS APPLICATIONS

KALW—Board of Education of The San Francisco Unified School District, San Francisco, Calif.—Modification of construction permit (B3-PED-14) as modified, for a new non-commercial educational broadcast station, requesting extension of completion date from 4-14-41 to 5-14-41.

NEW—The KANS Broadcasting Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30820, 33710, 35820, 37880 kc., 2 watts power, emission A3.

WMEM—The Metropolis Co., Portable-Mobile.—License to cover construction permit (B3-PRY-219) for a new relay broadcast station.

March 21, 1941 — 273
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Sisco-Hamilton Company—A complaint has been issued charging Sisco-Hamilton Co., 514 South Loomis St., Chicago, with the use of lottery methods in the sale of candy. The respondent, according to the complaint, sells to dealers assortments of candy so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes when the merchandise is sold to the consuming public. Push card devices are used, the complaint alleges.

Charging that the respondent’s practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondent 20 days for filing answer. (4471)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Almklov’s Pharmacy—Four Cooperstown, N. D., individuals, trading as Almklov’s Pharmacy, have entered into a stipulation to cease certain representations in the sale of “X.E.M. Salve” and “Almklov’s Scalp and Hair Tonic.” The individual respondents are Norman A. Hoel, Mrs. Wm. G. Cook, C. W. Almklov, and Sigurd Almklov.

Under their stipulation the respondents agree to cease disseminating advertisements which represent that X.E.M. Salve is a remedy or cure for eczema, barber’s itch, refractory cases of ringworm, athlete’s foot, psoriasis, dandruff, or any itching skin affection or eruption, or that this preparation will remove the cause of these diseases or conditions or has therapeutic value in their treatment in excess of affording symptomatic relief of itching and irritation.

The respondents further agree to desist from advertising that Almklov’s Scalp and Hair Tonic extirpates dandruff, cures itching scalp, keeps the hair from falling out, or penetrates the skin to extirpate the bacilli. (02752)

J. H. Schenck & Son, Inc., Philadelphia, distributor of “Dr. Schenck’s Mandrake Pills,” has entered into a stipulation in which it agrees to cease disseminating advertisements which fail to reveal that the pills should not be used when abdominal pain or other appendicitis symptoms are present, and that frequent or continued use may result in dependence on laxatives. The stipulation provides that such advertisements need contain only a statement that the preparation should be used only as directed on the label, if and when the label either contains a warning on the underlying factors that cause colds.

Under the stipulation the respondents agree to desist from advertising that Schenck’s Mandrake Pills contain a statement that the preparation should be used only as directed on the label, if and when the label contains a warning on the underlying factors that cause colds.

Smith Laboratory, Inc., 619 Lee Building, Kansas City, Mo., stipulated that it will cease advertising pharmaceutical products for feminine hygiene designated “Colagyn Hygienic Vaginal Jelly” and “O. M. 41 Hygienic Vaginal Jelly” as being dependable, reliable, or untainting contraceptives. The respondent also agrees to cease representing that these products constitute a competent remedy for certain diseases of women. (3048)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

American Maize-Products Co., producer of glucose or corn syrup unmixed, one of the principal products used in manufacturing candy, has been ordered to cease and desist from price discriminations in violation of the Robinson-Patman Act. The respondent company has its headquarters at 10 East 42nd St., New York, and a corn refining plant at Roby, Ind.

Commission findings are that the respondent, after increasing the price of its corn syrup, has discriminated by selling it to some purchasers at the former and lower price while concurrently selling syrup of like grade and quality to other purchasers at the new and higher price, the differences between the lower and higher prices varying from five to 55 cents a hundredweight.

According to findings, the respondent also has discriminated by selling and delivering to purchasers syrup of like grade and quality in several types and sizes of containers at prices per hundredweight which increase over the tank car price per hundredweight according to the size and type of container. Such increases over the tank car price, the findings continue, vary from 10 cents per hundredweight in the case of tank wagons, to $1.08 per hundredweight in five-gallon kegs.

Further findings are that the respondent’s discriminations increase the costs of the unfavored purchaser over the costs of the favored purchaser directly as the amount of the discrimination between them and as the syrup content of the candy which they manufacture increases; that the discriminations substantially lessen competition between the favored and unfavored purchasers, and that they tend to create monopoly in such favored purchasers, and to injure, destroy and prevent competition with them.

The Commission order directs that the respondent cease and desist from discriminating in price between different purchasers of glucose or corn syrup unmixed of like grade and quality, either directly or indirectly, in the manner and degree as found by the Commission; from continuing or resuming such discriminations; from otherwise discriminating in price in a manner and degree substantially similar to the discriminations found, and from otherwise selling such product to some purchasers at a different price than to other purchasers, where the effect may be to violate the Robinson-Patman Act. (3805)

Beeman’s Laboratory, Incorporated, 70 Central Ave., S. W., Atlanta, and two of its officers and a director, have been ordered to cease and desist from disseminating certain misleading advertisements concerning their preparation “BQR,” advertised as a cold remedy. The respondent officers are E. A. Rush and Mrs. J. F. Rush, and the respondent director is H. C. Allen.

Commission findings are that the respondent’s product is a laxative with mild analgesic properties and has no curative action on the underlying factors that cause colds.

Under the Commission order, the respondent is directed to cease disseminating advertisements which represent that BQR is a cure or remedy for colds; will prevent colds or cold infection; has any curative value in connection with the underlying factors which cause colds; or has any therapeutic value in the treatment of colds in excess of that furnished by a laxative and a mild analgesic. (4451)

Drug Profits, Inc.—J. H. Camp, trading as J. H. Camp and Drug Profits, Inc., Ravenswood, W. Va., has been ordered to cease and desist from certain misrepresentations in the sale of the medicinal preparations “Phalene” and “Burtone.”

The order directs the respondent to cease disseminating advertisements which represent that Phalene is a liver tonic; has any value in preventing premature aging, or has any value for removing poisons from the system in excess of that afforded by an ordinary laxative. The order also directs the respondent to desist from representing that Phalene has any therapeutic value in treating sick headache, nauseated stomach, loss of appetite, aching muscles and joints, restless sleep, tired rundown condition, indigestion, or acid conditions, in excess of causing a laxative action by the intestines, and thus affording temporary relief when such conditions are due to or symptomatic of constipation.

Under the order, the respondent is further directed to cease
representing that Burtone will correct faulty habits of elimination, produce free organic action of the liver or lower bowel or free the body of toxic poisons, or that this preparation has any therapeutic value in the treatment of bilious attacks, stomach nausea, headaches, indigestion, stomach gas, or sick, tired-out feeling, in excess of affording temporary relief when such conditions are due to constipation. (4446)

Health Ray Manufacturing Co., Inc., Deep River, Conn., has been ordered to cease and desist from disseminating misleading advertisements of its "Twin-Arc Health Ray Sun Lamp." Commission findings are that the respondent advertised, among other things, that "... 4 minutes with the New Twin-Arc Sun Lamp is equivalent to one hour of sunshine."

According to findings, the respondent's lamp does not emit sufficient angstrom units of ultraviolet rays to be classed as a sun lamp but instead is what is known as a therapeutic lamp. Its therapeutic value, according to findings, is limited to the possible destruction of bacteria when present on the surface of the skin. The Commission order directs the respondent to cease disseminating advertisements which represent that its device is a sun lamp but instead is what is known as a therapeutic lamp. A lamp is equivalent to one hour of sunshine."

The respondents: Victoria Chemical Co., and Schwarz Drugists, Inc., 887 Broad St., Newark, N. J.; Schwarz Drug Co., 565 Bloomfield Ave., Bloomfield, N. J.; Schwarz Drug Stores, Inc., 457 Clinton Ave., Newark; Hiram Schwarz, Inc., 158 Main St., White Plains, N. Y.; and Sarah Schwarz, Esther Schwarz, Joel J. Schwarz, Samuel Schwarz, Ira L. Schwarz, Sylvan Schwarz, Hiram Schwarz, Oscar Katz and Jacob Eksen, officers of the respondent companies.

Commission findings are that contrary to representations made or implied by the respondents in their advertisements, their preparation is not a cure, remedy or competent treatment for the liquor habit, and is not safe for use as it contains the drug tartar emetic in sufficient quantity to cause serious injury to health if used under conditions prescribed in the advertisements or under customary or usual conditions.

The Commission order directs the respondents to cease disseminating advertisements which represent that their preparation is a cure, remedy or competent or effective treatment for alcoholism or the liquor habit; that its use will eradicate the desire for alcoholic stimulants, and that the preparation is harmless, or may be safely used, or which advertisements fail to reveal that use of the preparation may result in inflammation of the stomach and intestinal tract and disturbance of the heart and nervous system. (4403)

Federal Trade Commission Case Closed

The Federal Trade Commission closed its case against Union Concession Company, 456 South State St., Chicago, without prejudice to its right to resume proceedings, should the facts so warrant. The respondent had been charged with the use of lottery methods in the sale of candy. According to information received by the Commission, the respondent corporation was dissolved on January 30, 1941.
December 1940 Broadcast Advertising Unit Report

Broadcast Advertising Unit Volume as reported by 220 stations and the three national networks for the month of December totaled 3,741,133 program units and 328,475 announcement units. There is an indicated increase in both announcement and program units from the month of November, although direct comparison does not exist between the December report and that of November, which included 203 stations and the major networks. Direct comparison does exist in the report for national networks. The December program unit total for national networks is 2,565,845. It represents an increase of 3.8% from the November total 2,452,390 program units.

The report is complete for national networks, including the business of the Columbia Broadcasting System, the Mutual Broadcasting System and the National Broadcasting Company. Regional, national, non-national network and local business are not complete for the entire industry; the figures represent the total of such business placed on the 220 stations reporting.

On the last page of this analysis, there appears a complete roster of the 220 stations reporting their December business. There is also included in the list eight additional stations which submitted reports for the month, but from which data were not received in time to inclusion in this tabulation.

One hundred and ninety-eight of the stations reporting December business were included in the November tabulation. Twelve stations reporting in November failed to report in December. Thirty stations reporting in November were not included in the November tabulation, but of the 30, ten had reported for October. It is obvious that there is not a constant sample between the two months and, therefore, absolute comparison is not possible.

There is in evidence a definite upswing in station cooperation and interest in the “Broadcast Advertising Unit Report.” It is hoped now that increasing numbers of stations will cooperate in furnishing the basic data in the early months of 1941, so that a constant sample between months can be had and the task of projecting industry totals can be undertaken.

Indicated Trends

As mentioned above, there exists absolute comparison, November to December, for national network business. All of the national network accounts reported in both November and December were in the “General” advertising classification. The total for the month of December was 3.8% above that reported for November. December business in the Automotive classification was up 64%; in Building Materials up 84%; in Confections increased 10.5%; Financial increased 6%; Groceries rose 5.5%; Housing Equipment and Supplies increased 12%; Industrial up 14%; Insurance increased 13%; Jewelry and Silverware increased 25%; Medical rose 7%; Miscellaneous rose 81% (largely from new business in Chamber of Commerce and Merchants Associations classification); Public Utility increased 26%; Publications was up slightly; Religion increased 27%; Tobacco increased 8%; Toilet Requisites rose 18%; and Transportation rose slightly. Those accounts which decreased from November to December are Political, which dropped from 178,230 units in November to zero for December, and Wearing Apparel, which decreased 18%.

Interpreting the above, it must be borne in mind that the December thirty-one-day month is compared with November, a thirty-day month. Also, allowance must be made for Sunday, Monday and Tuesday occurrence five times in December, as compared with Saturday and Sunday five-day occurrence in November.

Although direct comparison is not possible for station business other than national network, some trends are indicated. There is evidence of an increase in both program and announcement units in Retail advertising and a decline in both program and announcement units in General advertising. In the Retail classification, program units increased for all sources of business, but announcement units declined on regional networks and increased in national non-network (national spot) and local. In General advertising, all business sources declined except program units placed locally.

The most noted increases, November to December, in Retail advertising occurred in Automotive, Bakers, Building Supplies and Contractors, Clothing Stores, Department Stores (up sharply—both program and announcement units), Educational, Furniture and Home Furnishings, Hotels and Restaurants, Jewelers, Merchandise Chains (in both program and announcement units), Musical Instruments, Office Equipment, Radio, Real Estate, Stations, and Beauty Shops (showing a shift from announcement to program units).

Retail classification losses were sustained in Roots and Shoes, Dairies, Drug Stores (down in program units, up in announcement units), Electric and Gas Appliances and Supplies, Grocer and Food Stores, Heating and Plumbing and Sporting Goods.

General advertising gains were found in Alcoholic Beverages; Amusement (program units increase, offset by a substantial loss in announcement units), Education, Financial, Industrial, Insurance, Public Utility, Publication, Religion, Radio, Tobacco, and Transportation.

General advertising losses were sustained in Agriculture, Automotive (off in program units, up slightly in announcement units), Building Materials (off in program units, up in announcement units), Grocers (off in both program and announcement units), Housing Equipment and Supplies, Medical, Miscellaneous, Political, Publications (off in program units, up slightly in announcement units), Sporting Goods, Toilet Requisites, Wearing Apparel (off in program units, off sharply in announcement units) and Watches (off sharply in program units and slightly in announcement units).

How to Use It

Capitalize on the indicated trends. In this report is excellent sales argument for selling time to advertisers in those classifications showing an up trend. Also, the signal is on those classifications which need special attention in sales service to hold your accounts, where the industry trend is off.

The positive check on your own situation is to analyze your own station’s business against all stations of like classification as found in Table III, and also to compare your business with that placed in cities of the approximate size of that in which you operate, as found in Table IV.

The Legend

A program unit equals one minute of program time. An announcement unit is equal to one announcement, unless the time consumed is one and one-half minutes or longer, in which case the units are calculated to the nearest number of minutes.

Advertising business placed in radio is classified under two major headings—“Retail” and “General.” Retail advertising is defined as the advertising placed by businesses which sell direct to consumers. General is that advertising placed by businesses which sell for resale and not direct to consumers.

In Retail advertising the analysis presented here classifies retail businesses according to their principal retail line. No attempt is made to classify according to specific product advertised. This classification is most useful to the broadcasting industry since advertising is placed by the individual retail store and such buying units as have similar business are grouped together.

In General advertising the classification is primarily an analysis of the products advertised by businesses engaged in selling to others for resale. The significance of this to the radio industry is that advertising campaigns are carried for individual products and in this analysis similar products are grouped together. Also included in the general classification are such service businesses as Financial, Insurance, Professional and Service, and Transportation which, because of their nature, could not properly be considered retail.

Future Reports

As stated in the “October 1940 Broadcast Advertising Unit Report,” subsequent releases of the Unit Analysis will be given in summary form only in the NAB Reports. Complete detail will be furnished to those stations cooperating in this undertaking by submitting monthly business data.

March 21, 1941 — 291
The NAB Board of Directors adopted a ringing resolution against any legislative or administrative act impairing the right of broadcasters to have complete control of programs, business management, and operating policies. (p. 293).

BMI announced that its music will be made available without charge for use in National Defense programs. (p. 293).

Advance reservations for the NAB’s St. Louis Convention, May 12-15, are the heaviest in history. (p. 295).

Broadcasters are urged to maintain their “Movin’ Day” promotion well into April. (p. 296).

A federal judge in Minnesota upheld the Wage and Hour Divisions’ method of computing overtime. Editor and Publisher condemned the attack on radio by the printing trade unions. (pp. 296-297).

The FCC held a three-day hearing on the status of television. (p. 298).

The FCC renewed a great majority of the domestic standard broadcast station licenses which automatically expired March 29. The Mexican Government approved with no charge, a list of frequency reallocations to Mexican stations, drafted at the international meeting here last January. Ray C. Wakefield, of California, was sworn in as a member of the FCC. (p. 300).

Neville Miller, president of the National Association of Broadcasters, this week made public the following resolution adopted last week by the association’s board of directors:

“Whereas the philosophy of American broadcasting as expressed in decisions of the Supreme Court of the United States and the applicable statutes, envisages control of programs, of business management and of policy in the broadcaster and not subject to the supervisory control of the government:

“Now therefore BE IT RESOLVED: That in order to preserve the freedom of radio in accordance with the pattern of democracy, the Board of Directors go on record as opposing any legislative or administrative action which directly or indirectly impairs the rights (which it believes to be guaranteed by statute) of broadcasters to have complete control of programs and program material, business management and operating policies, and further goes on record as being in favor of any legislative or administrative action which strengthens such rights.

“And be it further RESOLVED: That the President and Executive Committee be directed to take appropriate action to the end that such rights may be adequately protected.”

BMI MUSIC AVAILABLE FOR NATIONAL DEFENSE

BMI has announced that its music will be made available without charge for use by public or private (Continued on page 294)
authorities sponsoring national defense drives over the air.

Use of the music, either by transcriptions or orchestra, is thus made available to all departments of the Government, to states and municipalities, and to sponsors who are contributing commercial time on the air to the cause of national defense.

Among the many patriotic songs, new and old, which are thus made available are: American Festival March, American Guard March, Bugle Call Rag, and Marines’ Hymn.

The grant of free license also includes new arrangements of Yankee Doodle, Columbia, the Gem of the Ocean, Battle Hymn of the Republic, and many others.

NEW MOVIE TAKES BMI SONG AS FEATURE

Madame Will Drop Her Shawl has been adopted as the feature song in the new film called South of Panama in which Roger Pryor and Virginia Vale have the leads. The picture is the work of J. H. Richmond Productions, Inc., and is scheduled for release on April 15. BMI is putting a new edition of the song out with a title page identifying it with the motion picture. The music of the song was written by Herb Pine, trombonist in the Hellzapoppin’ orchestra, and the words by Sam Brown, announcer for WMCA.

BMI GIVES TAVERNS A THEME SONG

Friendly Tavern Polka, just released by BMI puts every tavern man’s ideal into song. It was written by two members of Horace Heidt’s band, which introduced it and is featuring it with great success. The number has already been recorded by Horace Heidt (Columbia No. 36006). There are other recordings scheduled for future release by Frankie Masters, Teddie Powell, and Sammy Kaye.

“The taverns have certainly been friendly to BMI,” says M. E. Tompkins, BMI Vice-President. “We are returning the compliment by promoting a song that ought to be worth a million dollars in good will to them. We believe it is destined to be one of the top hits of 1941 and we hope the taverns will make it their theme song from coast to coast.”

The words of the song are:

Music is playing; dancers are swaying; laughing away each care.

Down at the FRIENDLY TAVERN, ev’ry one’s happy there.

Lights are all twinkling: glasses clinking; romance is in the air.

Down at the FRIENDLY TAVERN, nothing else can compare.

There’s where we’ll find good cheer; meet the friends we hold so dear.

Round up the old quartet, and sing a song together.

Time to get started, gay and light hearted. No need to ask us where!

Down at the FRIENDLY TAVERN: ev’ry one’s happy there!

Fill up your steins, boys.

We’ll give a toast and then we’ll drink ‘em down.

At the FRIENDLY TAVERN they’ll always buy a round,—

So come on:

Music is playing, dancers are swaying, laughing away each care.

Down at the FRIENDLY TAVERN, ev’ry one’s happy there.

Time to get started, gay and light hearted. No need to ask us where.

Down at the FRIENDLY TAVERN, ev’ry one’s happy there!

Frank De Vol, the composer, and Jerry Bowne, the author, are both members of Horace Heidt’s Musical Knights and the Friendly Tavern Polka is their first song. Mr. De Vol, born in West Virginia and raised in Ohio, is an arranger who has prepared orchestrations for the Lucky Strike programs, Ben Bernie, Standard Transcriptions, King Sisters, Alvino Rey, and for various bands he had played with. He can play nearly every instrument in the orchestra. Once while he was on the stage with Horace Heidt his music fell down and in trying to recover it he knocked instruments over until everything was in such a mess that he clowning the number through. He did this so successfully that he brought down the house and thus accidentally created a comedy number which he had to repeat at every show.

Jerry Bowne is Heidt’s trumpet and vocalist and sings his own song on the Heidt record. He was graduated from the University of California in 1929, has been featured soloist on numerous radio programs and in the movie, Pot O’ Gold, and has toured both this country and Europe with the Heidt band.

Once in a Monte Carlo restaurant he aimed a hard French roll at Horace Heidt and hit the King of Denmark instead. Since His Majesty seems to have taken the bun in the spirit in which it was sent, the episode may help to explain how these songwriters have been so successful in putting the contagious good humor of a “friendly tavern” into music.

BMI MUSIC HOLDS POPULARITY LEAD

The Billboard music popularity chart for the week ending March 21st shows fourteen out of fifteen sheet music best sellers, eight out of eleven coin machine leaders, and eight out of the ten best sellers in records are in the BMI catalogue. Variety shows thirteen out of fifteen sheet music best sellers and six out of ten on the coin machines,

and of the twenty leaders on the radio Billboard shows nine of BMI’s own publications and eleven from affiliated catalogues.

PHONOGRAPH OPERATORS PLUG BMI TUNES

The operators of coin phonographs in Cleveland, Ohio, through their organization, The Phonograph Merchants Association of Cleveland, give special promotion to one song every month. The tune selected is put in the number one spot on their machines and is also featured in display advertising and in the newspapers. Their first choice was I Hear a Rhapsody. As the hit tune for April they have chosen Yours, a Marks publication, which has been recorded by Jimmy Dorsey (Decca No. 3656).

KAY GETS CAPTAIN’S HAT

A visit to Fort Devens inspired the current song hit Where’s the Captain’s Hat?, according to Kay Twomey, whose latest song is fast becoming the singing tune of the Army camps of the country and is being featured by Horace Heidt, Ben Bernie, Art Kassel, and other outstanding band leaders. Lee Wainer and Bob Sour collaborated with Miss Twomey in writing this song.

Miss Twomey is accustomed to prizes and public honors. Before she began writing songs she won a beauty prize as Miss Palm Beach and posed as model for several well known illustrators. On April 3, over NBC, Horace Heidt will honor her during the broadcast. A delegation of the military from Governors Island is expected to be present in the studio when she is presented with a Captain’s hat.

NAB Convention

Promotion Exhibit Question Box No. 2

Question: Will NAB offer awards in the promotion exhibit at the St. Louis Convention, May 12 through 15?

Answer: Yes. A board of judges will make honorary awards for the best entry in each of the seven classifications.

Question: Will the exhibits be returned?

Answer: Yes, under certain restrictions. Please see formal bulletin sent out by NAB February 17.

Question: Will many stations bring motion pictures?

Answer: Yes. At least three stations have indicated that they will bring sixteen millimeter film to St. Louis.

Question: Is it necessary that they bring their own projection equipment?

Answer: No. Arrangements have been made to have a projector and a special room for showing these films. Stations will be charged a pro-rata charge for each showing.

The closing date for entries is May 3. Shipment is to be made to the New Jefferson Hotel, St. Louis, c/o NAB Promotion Exhibit Committee.

EARLY ARRANGEMENTS ADVISED

From the way transportation companies, railroads and airlines have displayed interest and from the advance request for reservations at St. Louis hotels, cleared through the Housing Committee, it is quite evident that attendance at the Nineteenth Annual Convention, Hotel Jefferson, St. Louis, May 12 to 15, is going to be “tops.” Those who are planning to go and who have not yet made their transportation and hotel arrangements should give these matters the earliest attention. There are certain to be some disappointments in any event, but early attention will cut these to a minimum.

The program plans are developing and a really worthwhile business, as well as entertainment, session is promised. No broadcaster can afford to miss the St. Louis convention.
Keep Promoting!

1. Maintain promotion well into April.

Preliminary check indicates that listeners are responding to the explanation that stations are changing wave lengths in order to improve program reception throughout the United States, generally.

2. Don't be unduly alarmed by any complaints you may receive the first week, even the second or third week.

But keep a log of complaints in order to determine whether they are justified. After analyses, such information will reveal any situation that does need correction. FCC Chief Engineer Jett has stated publicly that listeners should give reallocation a fair trial and not write Washington.

Two hundred ninety individual stations provided data for inclusion in "56 Days". This brochure was mailed to agencies and all stations Thursday, March 27.

Stations not listed on the inside of the back cover were omitted for one of two reasons—their data was not mailed or it did not make the deadline. That fact is explained in the copy.

The center spread lists the Governors of 47 states and Puerto Rico, who issued Movin' Day proclamations. The page following lists 124 cities whose Mayors issued proclamations. This list is naturally not complete.

A total of 10,042,500 Movin' Day stuffers, leaflets and post cards were delivered into homes by first class mail through arrangements with electric, gas, telephone and water companies.

Reallocation messages were delivered into 29,300,000 homes by air. Twenty-four thousand seven hundred five spots, 23,036 station breaks, 1,863 local programs, 4,138 news items were broadcast by the reporting 290 stations. These stations played the Movin' Day Theme 1,524 times.

A minimum of 500 additional station programs were added through broadcast of special CBS, MBS and NBC programs.

Reporting stations indicating that 361,326 lines of advertising were scheduled. The event was backed additionally by 1,960,762 logs, 14,136 letters, 2,070 trailer showings, 8,176 car and bus cards and 11,081,950 leaflets and printed pieces of all kinds. A color page in March 29 Saturday Evening Post, sponsored by RCA, told listeners to "Call a Serviceman NOW to reset your radio pushbuttons!"

Prairie Earmer carried 3 color pages, the Farmer Stockman carried copy as did California Rural Press, California Grange publication and California State Employee's magazine. Newsweek of March 31 had a reallocation story on pages 60 and 61.

Radio Guide, appearing on the news stands March 26, had a three-inch strip diagonally across the front cover. Inside was a full page story and a complete log of every station in the United States by call letters. Next week Radio Guide will publish a log of all broadcasting stations by kilocycles.

The President's address over four combined networks and a large number of individual stations Saturday night will prove especially valuable in educating listeners to new dial locations.

Since this is the first day of reallocation everybody will be listening to the President at new dial positions for the first time.

Arriving too late for inclusion in "56 DAYS" was the information that Mayors of the following cities have issued proclamations:

- Albuquerque, N. M.
- Evansville, Ind.
- Houston, Tex.
- Sherman, Tex.
- Walla Walla, Wash.
- Wausau, Wis.
- West Point, Ga.

The past week brought five out of six of the non-proclaimed states in into the proclaimed column. All districts but one closed the campaign season with 1.000% and the exception was almost perfect with a standing of .800. Newly reported Governors, their states and the industry contact are:

- DELAWARE—Gov. Walter W. Bacon
- New Jersey—Gov. Charles Edison
- Pennsylvania—Gov. Arthur H. James
- Rhode Island—Gov. J. Howard McGrath
- Wisconsin—Gov. Julius P. Hild

Arranged by H. H. Born, WHBL, Sheboygan, and James F. Kyler, WCLO, Janesville

Labor

COURT UPHOLDS WAGE AND HOUR DIVISION ON OVERTIME

Judge Matthew A. Joyce in the United States District Court for Minnesota has upheld the Wage and Hour Division in its contention that overtime must be based on the regular rate of pay determined as described in the NAB's pamphlet, "The Wage and Hour Act."

In commenting on the decision, General Philip B. Fleming, Wage and Hour administrator, said:

"This opinion is at direct variance with the opinion of Judge Roy Atwell in the Dallas News case, which the Division is appeal-
Judge Joyce stated:

"It is clear that the purpose of the plan, which was put into effect on September 1, 1938, was to keep within the provisions of the new wage and hour law and at the same time to maintain the employees' regular rate."

(NAB Reports, p. 127.)

The Minnesota decision definitely sustains our position with respect to the payment of overtime compensation, and effectively checks the many fictitious devices designed to defeat the purposes of the Act. If employers are permitted to resort to such methods to escape the payment of overtime compensation, the great benefits intended by Congress when the Fair Labor Standards Act was passed would be denied to the workers of the nation.

In his opinion enjoining the Carleton Screw Products Company, Judge Joyce stated:

"The Minnesota decision definitely sustains our position with respect to the payment of overtime compensation, and effectively checks the many fictitious devices designed to defeat the purposes of the Act. If employers are permitted to resort to such methods to escape the payment of overtime compensation, the great benefits intended by Congress when the Fair Labor Standards Act was passed would be denied to the workers of the nation."

In his opinion enquiring the Carleton Screw Products Company, Judge Joyce stated:

"It is clear that the purpose of the plan, which was put into effect on September 1, 1938, was to keep within the provisions of the new wage and hour law and at the same time to maintain the employees' regular rate."
newspapers and magazines must do a better job of informing the public and as bearers of commercial announcements than the broadcasters do. They must also do a far better job of promotion and selling than they have done for most of the past 10 years. We suggested also that the printers can help by the elimination of union practices which increase publishing costs without adding an iota to either the information or the advertising value of a publication. If these conditions are met, the publishing and printing industries and their workers' organizations will end the era of declining figures that the printers now cite. It will take thought, work, sacrifice, and will probably cause some casualties, but it will not imperil the whole structure of free press as the printers' tax proposal threatens to do.

Additional copies of the NAB Research Department's brochure on the relation of the broadcasting and printing industries are available at the NAB.

Television Hearing

The FCC public hearing to consider suggested rules and regulations for commercial television broadcast stations was held on March 20, 21 and 24.

Chairman Fly presided during the entire hearing with the exception of a short time Friday morning. Commissioner Craven temporarily took the chair during Mr. Fly's absence. Commissioners Wakefield, Thompson, Case, Craven and Payne were in attendance on the first two days and they were joined by Commissioner Walker on Monday. Approximately 100 persons were present to hear the proceedings.

W. R. G. Baker, Chairman of the National Television Systems Committee, was the first witness. He stated that the NTSC recommends that the FCC authorize full commercialization on all television channels. Baker offered in evidence, a document showing changes to be made in the standards recommended by the NTSC (See Appendix 1). Baker discussed these changes, pointing out that it was recommended that the number of lines be changed from 441 to 525. He also pointed out that instead of specifying the synchronization wave form that should be transmitted, the specifications were changed to read that the television transmitter should radiate a synchronized wave form which would adequately generate a receiver of certain specifications. It was pointed out that this would allow different types of transmission to be employed. Baker also pointed out that the NTSC was recommending a full test of color television.

Donald Fink, Managing Editor of Electronics, took the stand to discuss number of lines. He said that we are definitely looking forward to bigger pictures and that in going from 441 to 525 lines the vertical resolution would be increased. He pointed out that FM transmission of the picture would improve the horizontal resolution and that these two improvements would probably bring about a balance between the vertical and horizontal resolution.

Paul Porter, attorney on behalf of the Columbia Broadcasting System, pointed out that limits on man power and material at this time may be serious in regard to the advance of television. He pointed out that once a broadcaster has started transmitting programs, that he is obligated to continue with the service and that if there was only a limited number of receivers reaching the hands of the public, that the broadcaster would be forced to assume a large operating expense with little chance of obtaining revenue to offset it. Mr. Porter continued that Columbia is ready to participate in television as fully as circumstances permit. In recommending that the FCC set standards, he urged that it be made clear to the public that service on a large scale will not be immediately available. Porter gave his opinion that television could make an important contribution to the national economy after the present emergency is over.

Adrian Murphy, CBS Television Director, recommended that standards for both monochrome and color be established by the Commission. According to Murphy, CBS has planned a comprehensive field test of color. They have asked for bids on 25 color receivers and he said that they hope that the industry would provide an additional 75 receivers. To date, Murphy continued, they have received no assurance that receivers can be forthcoming. According to Murphy, defense requirements may interfere with the progress of television. Murphy said that broadcasters can expect no substantial income for some time and he therefore recommended that there be no requirement as to minimum hours that a television station must operate. The cost of a good television program, according to Murphy, is about $2,000 per hour and he pointed out that if the FCC requirement that the minimum hours per day be 5, that it would cost about three and one-half million dollars per year for programs. He said that if the 5 hour requirement was promulgated that it would probably be necessary as an economic factor to cut the expenditure for programs down to $100 per hour. This would cost approximately $185,000 per year for programs. Murphy expressed the opinion that television programs would be poor if only an average of $100 per hour was spent.

Peter Goldmark, Technical Director of Television for CBS, discussed the latest developments in CBS's system of color television. He reported that the sensitivity of the pick-up system had been improved. He also said that the field tests mentioned by Murphy were planned to start about June 1. The first witness for the Allen B. DuMont Laboratories was Allen B. DuMont. Mr. DuMont said that some of the standards had been proved out since last year. It is DuMont's belief that immediate commercialization of television is vitally necessary. He said that companies cannot continue to spend money without the hope of some return in the immediate future. This is an excellent time to start television, according to DuMont, because more people are at work producing a better market. In spite of the fact that factories are busy with defense orders, it was his opinion that they still have enough time and facilities to devote to television production. DuMont was of the same opinion that television could be a factor in taking up unemployment at the end of the present difficulties. DuMont continued that developments since a year ago have reduced the cost of installing a television station. It was his belief that the minimum cost per hour for television programs is below $150 per hour. DuMont advocated allowing the use of the aural channel of a television station without transmitting a picture. He also advocated changing the proposed rules so that flexible standards can be used.

Dr. Goldsmith, Television Engineer for DuMont, said that electronic color television showed great promise. He said that television should be commercialized at this time. Goldsmith advocated the substitution of the DuMont signal in the proposed NTSC standards.

Appearing for Babban and Katz, William C. Eddy, in charge of television, stated that they were ready and willing to go ahead with television according to FCC dictates. Eddy said that they favored vertical polarization because it was their belief vertically polarized receiving antennas were more satisfactory. He continued that they have been working on low-cost pick-up technique.

The Don Lee Broadcasting System was represented by Harry
Lubcke, Director of Television. He advocated the commercialization of television and said that the proposed minimum requirement of 5 hours of program per day was too high. He suggested that the requirement be put on a weekly basis of 10 hours. He said that in view of present budgets, it would be difficult to produce 30 hours of acceptable programs per week and he said it was desirable to have less hours and better programs. Lubcke stated that he concurred in the NTSC recommendations.

E. M. Martin, appearing for the Farnsworth-Television and Radio Corporation, stated that they had had minority opinions during the deliberation of the NTSC. However, Farnsworth has the greatest of respect for the majority of opinions and therefore, Farnsworth wholeheartedly adopts and recommends the NTSC standards. He continued that there is no question but that television is technically ready for full commercialization and that television can be a factor in recovery after the present emergency is over.

Appearing for the Hughes Tool Company, was Alfred Murray. He advocated that the daily minimum program time be set at 3 hours per day. He said that it would be better if the requirement was stated at 15 hours per week. Murray advocated the use of the sound transmitter alone without a picture being transmitted. He said that Hughes wished to go on record as approving the NTSC report. In regard to flexible standards, Murray thought that it would make it more difficult for the viewer and that a fixed set of standards should be adopted.

The first witness for the National Broadcasting Company was A. M. Morton, Vice President in charge of television. He stated that 30 hours per week would impose a great burden upon television operators. He said that the average program cost per hour is approximately $1,000. Morton said that the factors to be considered in connection with the required number of program hours were: test pattern time, preparation time for programs, program availability, limited trained personnel and economics.

Talent is limited in most cities according to Morton and therefore relays from talent centers are necessary and it will take time to develop these. He said that it takes from 40 to 80 hours of rehearsal time for a one-hour dramatic show and he said that the last two or three days of the rehearsal should be in the studio where the transmission is to take place. He said that it cost about $120,000 to properly equip a studio for this purpose.

In recommending that the starting minimum program time be set at 10 hours per week, Morton pointed out that it would be more desirable to have quality of programs rather than quantity.

C. B. Joliffe, chief engineer of the RCA Laboratories, was the next witness for NBC. He said that without standards the industry cannot prepare itself to go forward and that he recommended that the Commission adopt the proposed NTSC standards. He continued that RCA is ready to go ahead when the FCC gives the word. Joliffe suggested that the Commission carefully investigate whether or not all parties are ready to go ahead before setting the date for commercialization. He pointed out that conditions are different now than they were a year ago. At that time several manufacturers were in a position to produce receivers and transmitters immediately, however, it was his opinion that these facilities do not exist today and it would be necessary to start new. It was Joliffe's opinion that both ends of the television system, namely transmitting and receiving, should go ahead simultaneously, in order that broadcasters would not have to spend too much money before the public has obtained receivers. Joliffe stated that NBC wholeheartedly adopts the recommendations of the NTSC.

The next company to make an appearance was Scophony Limited, represented by S. H. Dodington, head of the electrical department. He said that they were in favor of immediate commercialization of television and adoption of the NTSC standards with one exception. He said that the Scophony system is mechanical and therefore, requires more stringent requirements for the synchronizing signal and they therefore recommended that the requirement be narrowed. Dodington said that in England two simultaneous systems had been introduced and the results were so unsatisfactory that they soon dropped one of them.

On behalf of Zenith Radio Corporation, John Howland, Secretary, advocated the immediate authorization of commercial television and advocated the adoption of the NTSC standards. It was his opinion that good television programs would cost about $1,000 per hour and that therefore the minimum required hours should be set at not over 10 hours per week and preferably 5. He also pointed out that there is a scarcity of trained television technicians.

Mr. Sanabria, of American Television Laboratories, advocated immediate commercialization. He suggested that the standards be adhered to for eight years with the provision that at the end of four years, new standards could be considered and if they were adopted, the stations could then transmit on both standards. As was done by other witnesses Sanabria gave his opinion that television may be a factor in taking up unemployment after the rearmament program is finished.

APPENDIX I

REPORT
of the
NATIONAL TELEVISION SYSTEM COMMITTEE
to the
FEDERAL COMMUNICATIONS COMMISSION

The National Television System Committee herewith submits transmission standards for commercial television broadcasting. The NTSC recognizes the coordinate importance of standardization and the commercial application of technical developments now in the research laboratories. These standards will make possible the creation, in the public interest, of a nationally coordinated television service and at the same time will insure continued development of the art.

The NTSC recommends that monochromatic transmission systems other than those embodied in these standards be permitted to operate commercially, when a substantial improvement would result, provided that the transmission system has been adequately field tested and that the system is adequately receivable on receivers responsive to the then existing standards.

The NTSC has broadened its standards on synchronization to permit field tests of several interchangeable systems. It is anticipated that some one of these systems will be found to be superior to the others and it is, therefore, recommended that at that time the Commission's standards be narrowed to require the commercial use of that particular and superior system. (See Note A)

The NTSC believes that, although color television is not at this time ready for commercial standardization, the potential importance of color to the television art requires that—

a) A full test of color be permitted and encouraged, and that
b) After successful field test, the early admission of color transmissions on a commercial basis coexistent with monochromatic television be permitted employing the same standards as are herewith submitted except as to lines and frame and field frequencies. The presently favored values for lines, and for frame and field frequencies for such a color system are, respectively, 375, 60, and 120.

The proposed standards are as follows:

I. THE TELEVISION CHANNEL

1. The width of the standard television broadcast channel shall be six megacycles per second.
2. It shall be standard to locate the picture carrier 4.5 megacycles per second lower in frequency than the unmodulated sound carrier.
3. It shall be standard to locate the unmodulated sound carrier 0.25 megacycles per second lower than the upper frequency limit of the channel.

March 28, 1941 — 299
II. Scanning Specifications

5. The standard number of scanning lines per frame period in monochrome shall be 525, interlaced two to one.
6. The standard frame frequency shall be 30 per second and the standard field frequency shall be 60 per second in monochrome.
7. The standard aspect ratio of the transmitted television picture shall be 4 units horizontally to 3 units vertically.
8. It shall be standard, during the active scanning intervals, to scan the scene from left to right horizontally and from top to bottom vertically, at uniform velocities.

III. Picture Signal Modulation

9. It shall be standard in television transmission to modulate a carrier within a single television channel for both picture and synchronizing signals, the two signals comprising different modulation ranges in frequency or amplitude or both. (See Note A, I.)
10. It shall be standard that a decrease in initial light intensity cause an increase in radiated power.
11. It shall be standard that the black level be represented by a definite carrier level, independent of light and shade in the picture.
12. It shall be standard to transmit the black level at 75 per cent (with a tolerance of plus or minus 2.5 per cent) of the peak carrier amplitude.

IV. Sound Signal Modulation

13. It shall be standard to use frequency modulation for the television sound transmission.
14. It shall be standard to pre-emphasize the sound transmission in accordance with the impedance-frequency characteristic of a series inductance-resistance network having a time constant of 100 microseconds.

V. Synchronizing Signals

15. It shall be standard in television transmission to radiate a synchronizing waveform which will adequately operate a receiver which is responsive to the synchronizing waveform shown in appended Drawing II.
16. It shall be standard that the time interval between the leading edges of successive horizontal pulses shall vary less than one half of one per cent of the average interval.
17. It shall be standard in television studio transmission that the rate of change of the frequency of recurrence of the leading edges of the horizontal synchronizing signals be not greater than 0.15 per cent per second, the frequency to be determined by an averaging process carried out over a period of not less than 20 nor more than 100, lines, such lines not to include any portion of the vertical blanking signal. (See Note B.)

VI. Transmitter Ratings

18. It shall be standard to rate the picture transmitter in terms of its peak power when transmitting a standard television signal.
19. It shall be standard in the modulation of the picture transmitter that the radio frequency signal amplitude be 15 per cent or less of the peak amplitude, for maximum white. (See Note C.)
20. It shall be standard to employ an unmodulated radiated carrier power of the sound transmission not less than 50% nor more than 100% of the peak radiated power of the picture transmission.
21. It shall be standard in the modulation of the sound transmitter that the maximum deviation shall be plus or minus 75 kilocycles per second.

VII. Polarization

22. It shall be standard in television broadcasting to radiate horizontally polarized waves.

Note A: 1. Practical Receivers of the "RA" type (those which attenuate the carrier 50% before detection) designed for the synchronizing signals shown in Drawing II of this report will also receive interchangeably any of the following:
   a. Amplitude Modulated synchronizing and picture signals at the 500 kc vertical synchronizing pulse type—Drawing IV (fig. 1), Doc. 321R.

2. It is proposed that during the commercialization period there be carried out systematic, comparative tests, of all of the above mentioned signals including transmissions from a single location to a number of representative receiving locations and over a reasonable test period. It is further proposed that these tests be directed and coordinated by an accredited committee of the R. M. A. or some other committee suitable to the F. C. C. and that on the completion of these tests there be submitted to the F. C. C. any modifications or additions to the N.T.S.C. standards which may be found desirable.

Note B: It is recommended that as progress in the art makes it desirable, the maximum rate of change of frequency of the transmitted horizontal synchronizing signals for studio programs be reduced and that limits be set for transmissions originating elsewhere than in the studio.

Note C: It is the opinion of the N. T. S. C. that a picture transmitter not capable of a drop in radio frequency signal amplitude to 15 per cent or less of the peak amplitude would not be completely satisfactory since it would not utilize the available radio frequency power to the best advantage. At the same time the N. T. S. C. is aware of the practical fact that it may not be possible for all of the first picture transmitters to satisfy this requirement. It should be possible to satisfy this requirement in picture transmitters for the lower frequency channels of Group A, although, at first, this may not be possible in picture transmitters for the higher frequency channels. After the first operation on the higher frequency channels and as designs progress it should be possible to satisfy it. It is requested that the Federal Communications Commission take cognizance of this situation.

Respectfully submitted,

W. R. G. Baker, Chairman.

DISTRICT 5 MEETING

In the NAB Reports, p. 245 it was stated that the District 5 meeting would be held on April 11 at Ponte Vedre Beach, Florida. NAB Director W. Walter Tison advises that the meeting has been changed to the George Washington Hotel in Jacksonville, on the same date, Friday, April 11. All Fifth District broadcasters are cordially invited and urged to attend.

COST-PER-INQUIRY

On the cost-per-inquiry front, more and more concerns are trying to get stations to accept contingent deals and guarantee a fixed return. This week we have only one to report:

Duensing & Company, Chicago, Illinois, on behalf of the Waterbury Pen Company (Fountain Pens).

This offer, in the opinion of the Bureau of Radio Advertising, is opposed to the best interests of radio stations, and the Bureau has written them accordingly. At the same time, it has invited the above-named company to give serious consideration to a paid radio campaign, if they wish to obtain maximum results and maintain the continued goodwill and cooperation of the broadcasting industry.
ARMSTRONG GIVES WAR DEPARTMENT USE OF FM PATENTS

Major Edwin H. Armstrong of New York, noted inventor in the radio field, has offered to the War Department free use, during the emergency, of his seventeen patents on the frequency-modulation system of radio communication which bears his name.

In announcing the offer, Henry L. Stimson, Secretary of War, made acknowledgment with these words: "On behalf of the War Department, as well as for myself, I wish to thank you for this very generous action; and I am sure that the patriotic example afforded by such a distinguished inventor as yourself will be warmly appreciated by the country."

The War Department will take full advantage of the offer, which is particularly timely. The Army is now procuring a large number of frequency-modulated sets similar to the commercial police radio type for the Armored Force, and other units. Furthermore, the Army is now developing three new radio sets for use of the Armored Force in which it is proposed to incorporate frequency-modulation.

STATE LEGISLATION

CALIFORNIA:
S. R. 58 (FLETCHER) RADIO PROGRAMS—CRIME—Memorial to Congress to regulate radio programs dealing with crime. Referred to Committee on Rules.

COLORADO:
S. 576 (HART) SMALL LOANS—An act regulating the business of making loans of $500.00 or less. Referred to Committee on Insurance.

IOWA:
H. 519 (PUBLIC HEALTH COMM.) DRUGS AND COSMETICS—Prohibiting the adulteration and false advertising of drugs and cosmetics. Referred to Sifting Committee.

MINNESOTA:
H. 191 (MEMMER) (Same as S. 78) SMALL LOAN ADVERTISING—Restricts small loan companies from advertising anything but name and address, rate of interest and the total amount that can be lent to any individual. Referred to Committee on Commerce, Banking and Commerce.

H. 1271 (E. PETERSON) (Same as S. 262) AGENCIES—THEATRICAL—Regulations for licensing, bonding and code for theatrical or booking agencies. Referred to Committee on Commerce, Banking and Commerce.

H. 78 (NEUMIE ET AL.) (Same as H. 191) SMALL LOAN ADVERTISING—Restricts small loan companies from advertising anything but name and address, rate of interest and the total amount that can be lent to any individual. Referred to Committee on Commerce, Banking and Commerce.

MISSOURI:
S. 140 (DONNELLY) FOODS, DRUGS AND COSMETICS—Repealing Article I and II of Chapter 58, Revised Statutes, 1939; enacting a new article in lieu thereof relating to the duties of the State Board of Health in the regulating and inspection of foods, drugs and cosmetics as to misbranding and false advertising.

NEW YORK:
S. 1554 (WILLIAMSON) PERSONAL LOANS—ADVERTISING—Prohibits advertising by printing, broadcasting, publishing or otherwise, by bank or trust company in connection with personal loan dept. of statements relative to rates, terms or conditions for loaning money unless stated in terms of simple interest on unpaid principal balance. Referred to Committee on Banks.

SOUTH CAROLINA:
H. 401 (Medical Affairs) PURE FOOD AND DRUG ACT—To regulate the labeling, branding, advertising, manufacturing, sale, etc., of foods, drugs, and cosmetics in the State of South Carolina, and to provide a penalty for the violation thereof.

FEDERAL COMMUNICATIONS COMMISSION
NEW LICENSES

In conjunction with the North American Regional Broadcasting Agreement, which is to become effective at 3 a.m. on March 29, the FCC has renewed the great majority of the domestic standard broadcast station licenses which automatically expire at that time, thereby enabling these stations to begin regular operation on the new frequencies Saturday.

In the cases of some 50 other standard broadcast stations, which failed to submit required performance data, the Commission is granting temporary authority for them to operate on the new frequencies, but with reduced power, pending submission of the necessary data.

All standard broadcast stations above 730 kilocycles, which change frequencies on March 29 and which employ directive antennas, were notified previously to furnish certain performance data in order to be permitted to use the new frequencies on a regular basis. The half a hundred stations in question failed to do so. Therefore, to guard the new allocation system against any possibility of serious interference, it will be necessary for these stations to operate with reduced power, specified by the Commission's Engineering Department, until they have likewise complied.

The stations for which licenses have been renewed on the new frequency basis furnished information necessary to meet Commission requirements. As is Commission practice, license renewals are continued on the staggered system. Thus, licenses of stations regularly operating under the North American Regional Broadcasting Agreement will expire in the following order:

For stations operating on the frequencies 640, 650, 660, 670, 680, 690, 700, 710, 720, 730, 740, 750, 760, 770, 780, 800, 810, 820, 830, 840, 850, 860, 870, 880, 890, 900, 940, 950, 990, 1000, 1010, 1020, 1030, 1040, 1050, 1060, 1070, 1080, 1090, 1100, 1110, 1120, 1130, 1140, 1160, 1170, 1180, 1190, 1200, 1210, 1220, 1250, 1250, 1300, 1320, 1340, 1360, 1380, and 1400 kilocycles, January 4, 1942.

For stations operating on the frequencies 1230, 1240, and 1340 kilocycles, December 1, 1941.

For stations operating on the frequencies 960, 970, 980, 1150, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, and 1320 kilocycles, June 1, 1942.

For stations operating on the frequencies 1330, 1350, 1360, 1370, 1380, 1390, 1400, 1420, 1430, 1440, 1460, 1470, 1480, 1500, 1590, and 1600 kilocycles, August 1, 1941.

For stations operating on the frequencies 1230, 1240, and 1340 kilocycles, October 1, 1941.

For stations operating on the frequencies 1400, 1450, and 1490 kilocycles, December 1, 1941.

At the same time, the Commission has granted temporary extensions or authorized temporary operation for more than 50 standard broadcast stations involved in renewal or revocation proceedings, or which have been

March 28, 1941 — 301
designated for hearing, or stations subject to further consideration of their renewal applications; and has extended special experimental or program test authorizations in the cases of about a dozen other stations. All these stations are identified on lists made public today.

MEXICO APPROVES AGREEMENT

Through the agency of the Inter-American Radio Office (O.I.R.) at Habana, the Department of State has been informed of the approval by the Government of Mexico with no change of the list of frequency allocations to Mexican broadcasting stations which was drafted at the North American Regional Radio Engineering Meeting held in Washington from January 14 to 30, 1941. Thus the lists of broadcasting stations resulting from that meeting for Canada, Cuba, Mexico, and the United States have received the official approval of the respective governments.

The "deepest gratification" is felt by the FCC at this further evidence of the complete understanding and cooperation which has prevailed in the North American region in matters pertaining to broadcasting and at this added assurance of the success of the North American Regional Broadcasting Agreement, Habana, 1937, which is to come into force in all of the countries concerned on March 29, 1941.

FCC NOTICE TO LICENSEES

The FCC has announced that it will be unnecessary for applicants for standard broadcast facilities to amend such pending applications where the sole purpose of the amendment is to request a different frequency from that specified in the application in order to conform to the shift of frequencies made necessary by the North American Regional Broadcasting Agreement. To eliminate unnecessary paper work, the Commission will accordingly treat all pending applications as requesting the appropriate frequency under that Agreement instead of the frequency specified in the application unless the applicant, by appropriate notice to the Commission, indicates a desire that his application be considered as requesting the particular frequency named therein.

Amendment of applications is necessary, however, where any change of directive antenna design on the new frequency is required.

Ray C. Wakefield of California last Saturday was sworn in as a member of the FCC, thereby completing the complement of that body. The oath was administered by Associate Justice Justin Miller of the United States Court of Appeals for the District of Columbia, a lifelong friend. On March 5 Mr. Wakefield was nominated by the President for a seven-year term, succeeding the late Thad H. Brown. He was confirmed by the Senate on March 17.

Commissioner Wakefield comes to the Federal Communications Commission from the California Railroad Commission, on which he had served since January, 1937, and of which he was president from August, 1938, to January, 1940. During this period he maintained offices in San Francisco and home at Palo Alto. His permanent residence is Fresno.

At the present time Commissioner Wakefield is vice president and chairman of the executive committee of the National Association of Railroad and Utilities Commissioners. In 1937-1938 he sat with the Interstate Commerce Commission in the general freight rate increase case and, more recently, with Federal Communications Commissioner Paul A. Walker in inquiry into the Pacific Telephone and Telegraph Company "interstate Pacific" telephone rates. In his career in the public utility field Commissioner Wakefield has won a reputation for achieving success in regulation by negotiation rather than by litigation where such results are compatible with the public interest.

Born at Fresno on August 12, 1895, Commissioner Wakefield received his Bachelor of Arts and Doctor of Jurisprudence degrees from Stanford University in 1916 and 1918 respectively. Admitted to the California bar in 1918, he engaged in general practice as a member of the firm of Wakefield & Hansen (1928-1932), and Wakefield & Stanford (1935-1937).

From 1920 to 1923 Commissioner Wakefield served as Deputy District Attorney for Fresno County. He was State inheritance tax appraiser for that county from 1923 to 1937, and also served as president of that State group.

A Republican, Commissioner Wakefield was secretary (1920-1921), then chairman (1922-1923), of the Republican Central Committee of his home county. For a number of years he was a member of the State Republican Central Committee, and was a delegate to the Republican National Convention at Chicago in 1932.

Commissioner Wakefield is a member of the California State Bar Association, the Order of Coif (honorary legal society), Delta Chi, and the Masonic and Kiwanis organizations. He is also a member of the American Society for Public Administration and was recently elected vice-chairman of its San Francisco Bay area chapter.

Commissioner Wakefield has been active in civic affairs and is a member of the Christian Church. He is also a member of the Commonwealth Club of San Francisco.

Commissioner Wakefield is married, and has two children—a son and a daughter.

FCC "PRIMER"

The FCC has issued "A Public Primer" on radio. It is intended to explain to the layman what radio is and how it works.

PROPOSED JACKSONVILLE DECISION

As the result of a hearing and other consideration of two applications for identical radio facilities in Jacksonville, Ill., the FCC proposed grant of a construction permit to one—Stephenson, Edge and Korsmeyer—on the ground that this applicant "will better serve public interest, convenience and necessity in that there will be added to the Jacksonville area a medium for the dissemination of news and information to the public which will be independent of and afford a degree of competition to other such media in that area" (Proposed Findings of Fact and Conclusions, No. B-130).

There is at present no broadcast station in Jacksonville, Ill., and no outside station delivers to that city a satisfactory signal for primary service. The Commission had to choose between two applicants—Hobart Stephenson, Milton Edge and Edgar J. Korsmeyer, a partnership doing business as Stephenson, Edge and Korsmeyer, or Helen L. Walton and Walter Bellati, another partnership. Both wanted to operate on the 1150 kilocycle frequency, with power of 250 watts, daytime only. Each is legally, technically and financially qualified to operate a station as proposed. However, a grant to one precludes granting the other. Consequently, the two applications were set for hearing, which took place September 4th last.

It is on the basis of this testimony and other considerations that the Commission concludes Stephenson, Edge and Korsmeyer will do a better technical job in serving the Jacksonville area.

PROPOSED WHDH DECISION

The FCC has adopted its Proposed Findings of Fact and Conclusions (B-121), made public December 9, 1940, to grant the
application of Matheson Radio Co., Inc., to increase the power of its station WHDH, at Boston, from 1 to 5 kilowatts, with unlimited time operation on the 830 kilocycle frequency, using directional antenna at night.

Amending the rules to thus permit more efficient use of this frequency, according to the Commission reaffirmation, will be in the public interest, convenience and necessity. The proposed operation of WHDH, further concludes the Commission, "will not cause interference to the primary service of any station, and any interference which such operation may reasonably be expected to cause to Station KOA, Denver, will be limited to interference with intermittent reception upon receivers located in the eastern part of the United States, remote from the station."

Commissioners Case and Craven dissented, with Chairman Fly and Commissioner Wakefield not participating.

APRIL FCC WORK

The FCC has announced that the work, business and functions of the Commission for the month of April have been assigned as follows:

Commissioner Thompson: Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Payne: Designated to hear and determine, order, certify, report or otherwise act upon; (2) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearings, including all motions for further hearing, excepting motions or petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following hearings and oral arguments are scheduled to be heard before the Commission in broadcast cases during the week beginning Monday, March 31. They are subject to change.

Monday, March 31
KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—C. P., 1410 kc., 1 KW, unlimited, DA night.

Wednesday, April 2
NEW—Symons Broadcasting Co., Ellensburg, Wash.—C. P., 1110 kc., 1 KW, unlimited.

Thursday, April 3

Oral Argument Before the Commission

Report No. B-131:
WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—Renewal of license, 1500 kc., 100 watts, 100 watts LS, specified hours.
WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—C. P., 1500 kc., 100 watts, 100 watts LS, specified hours.
NEW—Lillian E. Kieler, Brooklyn, N. Y.—C. P., 1390 kc., 100 watts, 100 watts LS, specified hours (requests facilities of WMBQ).
NEW—Paul J. Golliher, Brooklyn, N. Y.—C. P., 1500 kc., 100 watts, 100 watts LS, specified hours (hours of WMBQ).
WCNW—Arthur Faske, Brooklyn, N. Y.—Renewal of license, 1500 kc., 100 watts, 250 watts LS, specified hours (WWRL).
WCNW—Arthur Faske, Brooklyn, N. Y.—Modification of license, 1500 kc., 100 watts, 250 watts LS, unlimited time. Present assignment: 1500 kc., 100 watts, 250 watts LS, specified hours (WWRL).
WCNW—Arthur Faske, Brooklyn, N. Y.—C. P., 1500 kc., 100 watts, 250 watts LS, specified hours (requests facilities of WCNW).
WWRL—Long Island Broadcasting Corp., Woodside (L. I.), N. Y.—Renewal of license, 1500 kc., 100 watts, 250 watts LS, specified hours.
WWRL—Long Island Broadcasting Corp., Woodside (L. I.), N. Y.—Modification of license, 1500 kc., 100 watts, 250 watts LS, specified hours (requests facilities of WCNW).

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

April 11
KGNO—The Dodge City Broadcasting Company, Inc., Dodge City, Kans.—Modification of license, 1340 kc., 500 watts night, 1 KW day, unlimited. Present assignment: 1340 kc., 250 watts night, 1 KW day, unlimited.

APPLICATIONS GRANTED

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Granted modification of construction permit (B-1-MP-1100) to make...
changes in directional antenna for night use; station operates on 1370 kc. (10 kw, under NARBA); 1 kw night, 5 kw day, unlimited time, directional antenna night (B4-MP-1186).

WISE—Radio Station WISE, Inc., Asheville, N. C.—Granted modification of license to change frequency to 1230 kc. (under NARBA); station now operates on 1370 kc. 250 watts, unlimited time (B3-P-1025).

WHBQ—Broadcasting Station WHBQ, Inc., Memphis, Tenn.—Granted construction permit to install new transmitter and increase day and night power from 100 watts to 250 watts; station operates on 1530 kc. (1100 kc. under NARBA), unlimited time (B3-P-1051).

WNVE—Board of Education, City of New York, Brooklyn, N. Y.—Granted construction permit to change frequency from 41100 kc. to 42100 kc. increase power from 500 watts to 1000 watts, and change type of emission from A5 to special emission for frequency modulation with a maximum frequency swing of 25 kc. for non-commercial educational station WNVE (B1-PED-18).

EXPERIMENTAL TELEVISION STATIONS

WNYE—Board of Education, Brooklyn, N. Y.—Granted construction permit to change frequency from 154100 kc. to 154200 kc. for experimental television broadcast station to be used for relay purposes in connection with applicant's Television Broadcast Station W29BN; frequencies, 45.1 me., 4900 watts power, special emission for frequency modulation, with a maximum frequency swing of 25 kc. for non-commercial educational station WNVE (B1-PED-18).

WISN—Hearst Radio, Inc., Milwaukee, Wis.—Granted modification of license to change frequency from 1170 kc. to 1175 kc. to 1190 kc. to 1200 kc. to 1210 kc., increase power from 100 kw to 500 kw, and change type of emission from A5 to special emission for frequency modulation with a maximum frequency swing of 25 kc. for non-commercial educational station WNVE (B1-PED-18).

GRANTED

Balaban & Katz Corp., Chicago, Ill.—Granted permission for new experimental television station to operate on 351000-396000 kc., 10 watts night and day, A5 emission, time of operation in accordance with Section 4.4(a). (B4-PV-79).

Balaban & Katz Corp., Portable-Mobile (area of Chicago, Ill.).—Granted permission for new experimental relay television broadcast station to be used for relay purposes in connection with applicant's Television Broadcast Station W29BN; frequencies, 45.1 me., 4900 watts power, special emission for frequency modulation, with a maximum frequency swing of 25 kc. for non-commercial educational station WNVE (B1-PED-18).

DESIGNATED FOR HEARING

WGRC—Northside Broadcasting Corp., New Albany, Ind.—Application for construction permit to change frequency from 1370 kc. to 1010 kc. (1080 kc. under NARBA), increase power to 5 kw, move station to Louisville, Ky., move transmitter from McCullough Pike, near Silver Creek, New Albany, Ind., to 10 miles northwest of Louisville in Floyd County, install directional antenna using different patterns day and night; hearing to be conducted over the wires of American Telephone and Telegraph Company for a subsidiary to Toronto, there to be broadcast by Station CKCL, from 9 p.m., to PST, to the conclusion of game.

The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to originate the broadcast of a Stanley Cup Hockey play-off on March 20, 1941, in Boston, to be carried over the wires of American Telephone and Telegraph Company or a subsidiary to Toronto, and to be fed to stations of CBC over the wires of A.T. & T. Co., or a subsidiary, to be carried over the wires of A. T. & T. Co., or a subsidiary, to Toronto, and to be fed to stations of CBC from 9 p.m., EST, to the conclusion of game.

WIS—Hammond-Cabernet Broadcasting Corp., Hammond, Ind.—Granted authority to install automatic frequency control equipment on 1320 kc. under NARBA (B4-F-193).

MISCELLANEOUS

WNBZ—Upstate Broadcasting Corp., Saranac Lake, N. Y.—Granted authority to install automatic frequency control equipment on 1220 kc. under NARBA (B1-F-189).

WGL—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Granted authority to install automatic frequency control equipment on 1400 kc. under NARBA (B4-F-180).

WAL—Herald Publishing Co., Albany, Ga.—Granted modification of construction permit (B3-P-2777), as modified, which authorized a new broadcast station, for 1590 kc. under NARBA; 1 kw, unlimited time. No authority to operate hereunder will be granted prior to March 29 (B1-MP-1201).

WJW—Heard Radio, Inc., Milwaukee, Wis.—Granted modification of construction permit (B4-P-2608, authorizing new transmitter, installation of directional antenna, increase in power to 5 kw, and move of transmitter), for authority to install new transmitter and extend commencement date to 360 days after grant and completion date to 160 days thereafter, 1120 kc. (B4-MP-1191).

WBR—J. W. Birdwell, Knoxville, Tenn.—Granted modification of construction permit (B3-P-2840, authorizing new station), for authority to make changes in transmitting equipment and change frequency to 1370 kc. under NARBA. No authority to operate hereunder will be granted prior to March 29 (B3-MP-1185).

WIS—Capitol Broadcasting Corp., Indianapolis, Ind.—Granted modification of license to change frequency to 1310 kc. (under NARBA), station now operates on 1370 kc. 1000 watts, unlimited time (B3-MP-1127).

WISE—Radio Station WISE, Inc., Asheville, N. C.—Granted special temporary authority to operate simultaneously with radio station KXER between 6 p.m., and 11 p.m., on March 21, 1941, in order to broadcast test blackout only.

WRCA—WRCA Broadcasting Co., Inc., New York City.—Granted special temporary authority to operate in accordance with modification of licenses (B1-MLIB-44 and B1-MLIB-45) except authority is granted to operate WNB on 17750 kc., for period ending not later than April 15, 1941.

The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to originate the broadcast of a Stanley Cup Hockey play-off for Station CKCL, from 9 p.m., to PST, to the conclusion of game.

The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to originate the broadcast of a Stanley Cup Hockey play-off for Station CKCL, from 9 p.m., to PST, to the conclusion of game.

WHIP—Hammond-Cabernet Broadcasting Corp., Hammond, Ind.—Granted authority to install automatic frequency control equipment on 1520 kc. under NARBA (B4-F-193).

WMC—Memphis Publishing Co., Inc., Memphis, Tenn.—Granted authority to install automatic frequency control equipment on 1290 kc. under NARBA (B3-F-191).

KTOK—OKlahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Granted authority to install automatic frequency control equipment on 1390 kc. under NARBA (B4-F-192).

KFH—Radio Station KFH Co., Wichita, Kans.—Granted modification of construction permit (B4-P-2462), which authorized installation of new transmitter and directional antenna for night use, increase in power, and move of transmitter), for frequency of 1350 kc. under NARBA and extension of commencement and completion dates to 60 and 180 days after grant, respectively. No authority to operate hereunder will be granted prior to March 29 (B4-MP-1193).

KPOW—Albert Joseph Meyer, Powell, Wyo.—Granted modification of construction permit (B3-P-2901) to installation...
new transmitter, directional antenna for night use; increase power to 1 KW, 5 KW LS, hours of operation from daytime to midnight; and move of transmitter; for 950 kc. under NARBA, changes in directional antenna system, and extension of completion date to 180 days after grant. No authority to operate hereunder will be granted prior to March 29 (B3-MP-1214).

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Granted license to cover construction permit (B3-P-3000, which authorized change in equipment), 1365 kc., 1 KW, daytime (B5-MP-1114).

W71NY—Bamberger Broadcasting Service, Inc., New York, N. Y.—Granted special temporary authority to operate frequency modulation station commercially on 7100 kc., with 1000 watts power, special emission for frequency modulation, with transmitter located at 444 Madison Ave., New York City, for a period not to exceed 60 days, pending completion of construction permit B1-PH-46.

WATN—Watertown Broadcasting Corp., Watertown, N. Y.—Licensed to cover construction permit as modified for new television station, for period beginning March 29, 1941; 1210 kc. (NARBA), 250 watts, unlimited (B1-L-1333). Also granted authority to determine operating power by direct measurement of antenna input on 1210 kc. under NARBA (B1-Z-679).

WENK—Wendell Corp., New York, N. Y.—Granted modification of construction permit (B1-P-2687; for installation of directional antenna for day and night use, increase in power from 1 KW night, 5 KW LS to 5 KW day and night); for change in frequency to 1280 kc. under NARBA, and changes in directional antenna system and extension of completion date from June 1, 1941, to 180 days after grant; no authority to operate hereunder will be granted prior to March 29, 1941 (B1-MP-1203).

WHO—Central Broadcasting Co., Des Moines, Iowa—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-676).

WMFR—Radio Station WMFR, Inc., High Point, N. C.—Granted authority to determine operating power by direct measurement of antenna input on 1230 kc. under NARBA (B3-Z-715).

KFSO—Kodo Park Evangelistic Asso., Los Angeles, Cal.—Granted authority to determine operating power by direct measurement of antenna input on 1150 kc. under NARBA (B5-Z-717).

KFF—Radio Station KFF Co., Wichita, Kans.—Granted authority to determine operating power by direct measurement of antenna input on 1350 kc. under NARBA (B4-Z-694).

KERN—Kern Pitchly Broadcasting Co., Calif.—Granted authority to determine operating power by direct measurement of antenna input on 1110 kc. under NARBA (B5-Z-718).

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Granted authority to determine operating power by direct measurement of antenna input on 950 kc. under NARBA (B3-Z-698).

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Same, for auxiliary transmitter, on 950 kc. under NARBA (B5-Z-710); same for main transmitter, on 950 kc. under NARBA (B5-Z-711).

KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Same, for auxiliary transmitter, on 1000 kc. under NARBA (B5-Z-712); same for main transmitter, on 1000 kc. under NARBA (B5-Z-713).

WCOM—Mass. Broadcasting Corp., Boston, Mass.—Granted special temporary authority to operate from 6:30 to 7 p.m., EST, on March 23, in order to broadcast program commemorating the founding of the Knights of Columbus only (B1-S-561).

WABC—Columbia Broadcasting System, New York, N. Y.—Granted modification of construction permit which authorized installation of new transmitter and new vertical antenna and move of transmitter, for change of frequency from 860 to 880 kc. in accordance with NARBA; no authority to operate hereunder will be granted prior to March 29, 1941 (B5-MP-1214).

KRIZ—J. D. Falvey, Ottumwa, Iowa.—Granted modification of construction permit which authorized a new standard broadcast station to be operated on 1210 kc., 100 watts power, unlimited time, for change in frequency to 1240 kc. in accordance with NARBA; no authority to operate hereunder will be granted prior to March 29, 1941.

WXYX—King-Trendle Broadcasting Corp., Detroit, Mich.—Granted license to cover construction permit (B2-P-2559, which authorized increase in power to 5 KW, and installation of directional antenna) for nighttime use; 1340 kc., unlimited time (B2-L-1344). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-705).

WITH—The Maryland Broadcasting Co., Baltimore, Md.—Granted license to cover construction permit (B1-P-2792, which authorized a new station, change location of transmitters for new station, for period beginning 3 a. m. EST, March 29, 1230 kc. (NARBA), 250 watts, unlimited time (B1-L-1350). Also granted authority to determine operating power by direct measurement of antenna power on 1230 kc. under NARBA (B1-Z-716).

KIDTH—Telegraph Herald, Dubuque, Iowa.—Granted modification of construction permit which authorized construction of new station, for changes in directional antenna, extension of commencement and completion dates from March 7, 1941, and September 7, 1941, to one day after grant and 180 days thereafter respectively, and for change in frequency to 1370 kc. under NARBA; no authority to operate hereunder will be granted prior to March 29, 1941 (B4-MP-1204).

WCED—The Tri-Coutry Broadcasting Co., Du Bois, Pa.—Granted license to cover construction permit for a new station for period beginning March 29, 1941; 1250 kc., 250 watts, unlimited time (B2-L-1336). Also granted authority to determine operating power by direct measurement of antenna power on 1230 kc. under NARBA (B2-Z-692).

WIP—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Granted license to cover construction permit (B1-P-2997, for authority to use old RCA 1-D transmitter as auxiliary transmitter, for emergency use only (B2-L-1347). Also granted authority to operate hereunder will be granted prior to March 29, 1941 (B4-MP-1204).

WFMT—Walker & Downey Radio Corp., Pittsburgh, Pa.—Granted modification of construction permit B2-PH-14, which authorized new high frequency broadcast station, for changes in antenna (B2-MPH-11).

KAOQW—Central States Broadcasting Co., area of Omaha, Neb.—Granted license to cover construction permit for new relay broadcast station; 1606 kc., conditionally 2974, 2102, 2758 kc., power 10 watts (B4-LRY-221).

KAOQX—Central States Broadcasting Co., area of Omaha, Neb., Portable-Mobile.—Granted license to cover construction permit for new radio broadcast station; 1606 kc., conditionally 2974, 2102, 2758 kc., power 100 watts (B4-LRY-222).

W6XHH—Hughes Production Division of Hughes Tool Co., Los Angeles, Cal.—Granted modification of construction permit (B5-PVB-62) for new television broadcast station in part, for extension of commencement date to April 15 and completion date to September 24, 1941 (B5-MPVB-19).

W6XIT—Hughes Production Division of Hughes Tool Co., San Francisco—Granted modification of construction permit (B5-PVB-63) for new television broadcast station in part, for extension of commencement date to April 15 and completion date to October 15, 1941 (B5-MPVB-35).

W9XG—Purdue University, West Lafayette, Ind.—Granted modification of construction permit (B4-PVB-32, which authorized changes in equipment, frequency, power and emission of television station) for extension of completion date to Sept. 24, 1941 (B4-MPVB-36).

WMBQ—Metropolitan Broadcasting Corp., Brooklyn, N. Y.—Granted modification of construction permit (B5-PVB-62) for new television broadcast station in part, for extension of commencement date to April 15 and completion date to September 24, 1941 (B4-MPVB-36).
APPLICATIONS FILED AT FCC

500 Kilocycles

WQAM—Miami Broadcasting Co., Miami, Fla.—Construction permit to install new transmitter and increase power from 1 KW to 5 KW day and night. Amended to request 5 KW daytime, 1 KW nighttime.

570 Kilocycles

WSYR—Central New York Broadcasting Corp., Syracuse, N. Y.—Construction permit to install new transmitter, make changes in directional antenna (use day and night) and increase power from 1 to 5 KW. Amended to make changes in directional antenna.

1210 Kilocycles
KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Authority to determine operating power by direct measurement of antenna power on 1230 kc. under NARBA.

1220 Kilocycles
WDAE—Tampa Times Co., Tampa, Fla.—License for 1250 kc. under NARBA and changes in directional antenna.

1230 Kilocycles

1250 Kilocycles
NEW—Central New York Broadcasting Corp., Elmira, N. Y.—Construction permit for a new standard broadcast station to be operated on 1250 kc. 250 watts, unlimited time; contingent on WENY going to new frequency of 590 kc.

1260 Kilocycles
KHSI—Golden Empire Broadcasting Co., Chico, Calif.—Authority to determine operating power by direct measurement of antenna power on 1290 kc. under NARBA.
antenna for night use and increase power, for change in frequency to 1320 kc, under NARBA; changes in directional antenna, extension of completion date from 9-14-41 to 180 days after grant.

WATR—The WATR Co., Inc., Waterbury, Conn.—Authority to determine operating power by direct measurement of antenna power on 1320 kc, under NARBA.

1300 Kilocycles

KALE—KALE, Inc., Portland, Ore.—Authority to determine operating power by direct measurement of antenna power.

KALE—KALE, Inc., Portland, Ore.—Authority to install automatic frequency control equipment on 1330 kc, under NARBA.

KALE—KALE, Inc., Portland, Ore.—License to cover construction permit (B5-P-2729) to install directional antenna for night use and increase in power.

1310 Kilocycles

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Penna.—Construction permit to make changes in equipment, requesting 1310 kc, under NARBA and increase in power from 100 watts to 250 watts.

WHAT—Independence Broadcasting Co., Inc., Philadelphia, Pa.—Construction permit to install new transmitter, directional antenna for day and night use, change in frequency from 1310 to 1350 kc, increase in power from 100 watts to 5 kw, change in hours of operation from sharing time with WTEL to unlimited time, and move transmitter.

KGEZ—Donald C. Treloar, Kalispell, Mont.—Modification of construction permit (B3-P-2573) for new transmitter, increase in power and change in frequency, requesting authority to install directional antenna for night use. Amended: To request 1460 kc, under NARBA, and changes in directional antenna.

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Modification of construction permit (B3-P-2525) for new transmitter, installation of directional antenna for night use, increase in power, change in frequency, requesting 1390 kc, under NARBA, changes in directional antenna and extension of completion date from 6-22-41 to 180 days after grant.

WFDF—Flint Broadcasting Co., Flint, Mich.—Modification of construction permit (B2-P-2451) as modified for installation of new transmitter and directional antenna for day and night use, increase in power, change in frequency, requesting 1340 kc, under NARBA, changes in directional antenna and extension of completion date from 4-14-41 to 6-14-41.

KWOC—A. L. McCarthy, 0. A. Tedrick and J. H. Wolpers, d/b as Radio Station KWOA, Popular Bluff, Mo.—Construction permit to change frequency from 1310 to 1290 kc. (1320 kc, under NARBA), increase power from 250 watts to 1 kw and make changes in equipment and antenna. Facilities of KLCN.

1320 Kilocycles

WADC—Allen T. Simmons, Village of Tallmadge, Ohio.—License for 1350 kc, under NARBA and changes in directional antenna.

WADC—Allen T. Simmons, Village of Tallmadge, Ohio.—Authority to determine operating power by direct measurement of antenna power on 1350 kc, under NARBA.

1330 Kilocycles

KMO—Carl E. Haymond, Tacoma, Wash.—Authority to install automatic frequency control on 1350 kc, under NARBA.

KSCJ—Perkins Brothers Co. (The Sioux City Journal), Sioux City, Iowa.—Modification of construction permit (B4-P-2290) as modified for increase in power and installation of directional antenna for night use requesting changes in directional antenna, 1360 kc, under NARBA and extension of completion date.

1350 Kilocycles

KTSM—Tri State Broadcasting Co., Inc., El Paso, Texas.—Modification of license to increase power from 300 watts to 500 watts night, 1 kw daytime. Amended: To request 1380 kc, under NARBA.

1360 Kilocycles

WCSC—South Carolina Broadcasting Co., Inc., Charleston, S. C.—Authority to determine operating power by direct measurement of antenna power on 1390 kc, under NARBA.

WFBL—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—License for 1390 kc, under NARBA and change in directional antenna.

WFBL—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Authority to determine operating power by direct measurement of antenna power on 1390 kc, under NARBA.

1370 Kilocycles

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Penna.—Construction permit to install new transmitter, directional antenna for day and night use, change frequency from 1370 to 1360 kc., under NARBA, increase power from 250 watts to 1 kw night, 5 kw daytime and move transmitter. Amended: To omit request for directional antenna during daytime.

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Modification of construction permit (B2-P-2685) which authorized changes in antenna system, changes in transmitter, increase in power, and move of transmitter requesting extension of completion date.

NEW—Lexington Broadcasting Co., Lexington, N. Car.—Construction permit for new standard broadcast station to be operated on 1370 kc., 250 watts, unlimited time. Class IV.

KENO—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nevada.—Voluntary assignment of license to Nevada Broadcasting Company.

KENO—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nevada.—Authority to determine operating power by direct measurement of antenna power on 1400 kc, under NARBA.

NEW—Dorman Schaefer, Klamath Falls, Ore.—Construction permit for a new standard broadcast station to be operated on 1370 kc, 250 watts, unlimited hours, Class IV station. Amended to specify studio site.

WKKW—Community Broadcasting, Inc., Wheeling, W. Va.—Modification of construction permit (B2-P-2967) for a new station, requesting approval of antenna system, approval of studio and transmitter sites, and requesting 1400 kc, under NARBA.

KYAN—J. Cecil Bott, Mathilda Lannen, and Nellie Bott, d/b as The Western Broadcasting Co. of Wyoming, Cheyenne, Wyo.—Authority to determine operating power by direct measurement of antenna power on 1400 kc, under NARBA.

WSVS—Board of Education, City of Buffalo, Buffalo, N. Y.—Authority to install automatic frequency control equipment on 1400 kc, under NARBA.

1380 Kilocycles

WNRC—State Broadcast Co., New Britain, Conn.—Modification of construction permit (B1-P-2713) as modified which authorized new transmitter and increase in daytime power, requesting changes in directional antenna, 1110 kc, under NARBA, and extension of commencement and completion dates.

WKBH—WKBH, Inc., LaCrosse, Wis.—Authority to determine operating power by direct measurement of antenna power on 1410 kc, under NARBA.

1390 Kilocycles

KABR—Aberdeen Broadcast Co., Aberdeen, S. Dak.—License to cover construction permit (B4-P-2625) as modified for new equipment, increase in power and changes in directional antenna.

KABR—Aberdeen Broadcast Co., Aberdeen, S. Dak.—Authority to determine operating power by direct measurement of antenna power.

WFCI—Pawtucket Broadcasting Co., Pawtucket, R. I.—Modification of construction permit (B1-P-3377) as modified which authorized construction of new broadcast station, requesting 1129 kc, under NARBA and changes in directional antenna system.
1420 Kilocycles
WWDG—Capital Broadcasting Co., Washington, D. C.—Modification of construction permit (B1-P-2679) for a new broadcasting station, requesting changes in synchronous amplifier equipment and antenna and extend commencement and completion dates from 12-29-40 and 6-29-41 to 30 days after grant and 180 days thereafter, respectively. Amended to request 1450 kc. under NARBA.

1430 Kilocycles
WHP—WHP, Inc., Harrisburg, Pa.—Authority to determine operating power by direct measurement of antenna power on 1450 kc. under NARBA.

1440 Kilocycles
WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Modification of construction permit (B3-MP-833) for increase in power, installation of directional antenna for night use, requesting 1170 kc. under NARBA and changes in directional antenna.

1470 Kilocycles
WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Authority to determine operating power by direct measurement of antenna power on 1520 kc. under NARBA.

1490 Kilocycles
WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Authority to determine operating power by direct measurement of antenna power on 1520 kc. under NARBA.

1500 Kilocycles
WKRO—Oscar C. Hirsch, Cairo, Ill.—Modification of construction permit (B4-P-3022) which authorized construction of new broadcast station, requesting approval of transmitter and studio sites at On U. S. Highway 41, 1.5 miles north of Cairo, Ill., vertical antenna, and 1490 kc. under NARBA.

WWSW—Walker and Downing Radio Corp., Pittsburgh, Pa.—Construction permit to install new transmitter, directional antenna for day and night use, change frequency from 1500 kc. to 940 kc., increase power from 250 watts to 1 KW night, 5 KW day, move transmitter from Pittsburgh to Stowe Twp., Pa. Amended to request 970 kc. under NARBA and changes in directional antenna.

KEYS—Earl C. Dunn and Chas. W. Rossi, d/b as Nueces Broadcasting Co., Corpus Christi, Tex.—License to cover construction permit (B6-PH-2931) as modified for a new standard broadcast station.

KEYS—Earl C. Dunn and Chas. W. Rossi, d/b as Nueces Broadcasting Co., Corpus Christi, Tex.—Authority to determine operating power by direct measurement of antenna power.

KGEI—General Electric Co., Schenectady, New York.—Modification of license to change frequencies from 43100, 43700, 44300 to 43500, 49100 kc.

NEW—The Tribune Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2058, 2150, 2790 kc., power 40 watts, emission A3.

NEW—The Tribune Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2058, 2150, 2790 kc., power 40 watts, emission A3.

KGEI—General Electric Co., San Francisco, Calif.—Modification of construction permit (B5-PIB-24) requesting extension of completion date from 4-6-41 to 7-1-41.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Control Products Company—An amended complaint has been issued charging Callie E. Morris, trading as Control Products Co., 927 Putnam Ave., Brooklyn, with disseminating false advertisements in violation of the Federal Trade Commission Act in the sale of the “Control Flow and Adjuster,” a therapeutic device.

According to the amended complaint, the respondent represents in advertising matter distributed in various States that his device, designed for direct attachment to water faucets, may be safely used in colonic and vaginal irrigations. However, the complaint alleges that such use would be dangerous and further charges the respondent with disseminating false advertisements through failure to reveal therein the consequences which may result from use of the device under conditions prescribed in the advertisements or under customary or usual conditions.

The amended complaint charges the respondent with failure to reveal in such advertisements that use of the device may result in serious and irreparable injury to health because of inability to control the amount of intake of water and by reason of the high pressure produced by using the device directly connected to a water faucet.

The amended complaint further charges the respondent with advertising his device as being capable of removing waste and poisons from the body and blood stream, reversing dormant glands.
and weak vitality, and beneficially affecting the blood circulation, as constituting a cure or remedy for all intestinal and mental diseases, for constipation, disorders, enlarged prostate gland, kidney and bladder trouble, cancer, consumption, appendicitis, rheumatism and other diseases.

The amended complaint alleges that use of the respondent's device will not accomplish the results claimed. It further alleges that the product's therapeutic value is limited to the temporary relief of constipation to the extent afforded by an ordinary enema, but that the device would not provide a proper treatment for constipation because, if used as directed by the respondent, it would tend to cause enema habit, and because of the danger in employing water direct from a faucet. (3340)

Meadors Manufacturing Company—A complaint has been issued charging P. D. Meadors and M. M. Meadors, trading as Meadors Manufacturing Co., Greenville, S. C., with the use of lottery methods in the sale of candy and nut products. The respondents, according to the complaint, sell to dealers assortments of candy and nuts so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes when the merchandise is sold to the consuming public. Charging that the respondents' practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondents 20 days for filing answer. (4473)

STIPULATIONS

Following stipulations have been entered into during the past week by the Commission.

Imperial Furniture Company—In a stipulation entered into, Imperial Furniture Co., Grand Rapids, Mich., agrees to cease using the term “All Mahogany” in advertisements, labels, invoices or other media as descriptive of any furniture product not composed of “All Mahogany.” The stipulation provides that if the exterior surfaces of such furniture are composed of “All Mahogany” or mahogany veneer, the words “All Mahogany,” if used to describe such exterior surfaces, shall be immediately accompanied by other words in equally conspicuous type so as to indicate clearly that the product is not made wholly of mahogany and that the words “All Mahogany” refer only to its exterior surfaces. (3051)

Nation Wide Optical Company—Trading under the name Nation Wide Optical Co., Hershel H. Buehrt, 512 Travis St., Houston, Tex., who conducts a mail order optical business, entered into a stipulation in which he agrees to cease employing in advertising matter the phrase “Distributors for Petersburg Lens Co.,” alone or in connection with the name “Petersburg, Va.” or other words as descriptive of the nature of his business. According to the stipulation, the respondent is neither associated as a distributor with any Petersburg, Va., firm, nor are the optical goods he sells manufactured there. Petersburg, the stipulation continues, is known as a center for optical goods. (3050)

Wembly, Inc., New Orleans, manufacturer of men's neckwear, stipulated that it will cease certain representations in the sale of its products. The respondent corporation agrees to discontinue using the words “Silk and Bemberg" as descriptive of those of its products which are not composed of silk, and of Bemberg rayon (rayon made by the cuprammonium process). The respondent corporation further agrees to discontinue employing the word “Silk” as descriptive of the fiber content of a product and the word “Bemberg” to designate other fibers of which the product is composed in part, when in fact the fiber contents are not, respectively, made wholly from unweighted silk, and from rayon made by the cuprammonium process.

The stipulation provides that if such a product is composed in substantial part of silk which has been weighted to the word “Silk,” if used as descriptive of the weighted silk content, shall be immediately accompanied by the word “weighted” in equally conspicuous type with a clear indication of the maximum percentage of weighting.

If the product also contains rayon, this fact, according to the stipulation, shall be clearly disclosed in the invoices, labeling and all printed matter, such disclosure of the fiber contents to be made by properly naming each constituent in the order of its predominance by weight, beginning with the largest single constituent. (3049)

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

American Drug and Chemical Co., 420 South 6th St., Minneapolis, has been ordered to discontinue disseminating advertisements which misrepresent medicinal preparations known as “Ardanol,” “Chloro-Zol” and “Germ-I-Tabs.” The order directs the respondent to cease and desist from disseminating advertisements which represent that Ardanol is a cure or remedy for sterility in either sex, or will restore or beneficially affect fertility, or possess any value as a preventive of abortion; that the Chloro-Zol and Germ-I-Tabs have any value in connection with feminine hygiene other than as a douche, or that Chloro-Zol is a competent treatment for bromidrosis, tetter, Cuban itch and other skin diseases or conditions. (4200)

Certane Company—Rosemarie Lewis, trading as Certane Co., 1212 West Washington Blvd., Los Angeles, has been ordered to discontinue misleading representations in the sale of feminine hygiene preparations consisting of an ointment, a jelly, an antiseptic powder, a douche powder and cones, all sold under the name “Certane,” and appliances known as “Douche Shields,” “Applicators,” “Dia-Caps” and “Dia-Domes.” Commission findings are that the respondent, in newspaper, periodical and circular advertisements distributed in various States, represented that her products, if used as directed, constitute safe and effective preventives against conception and pregnancy, and that they prevent disease and consist in whole or in part of ingredients which are effective in insuring health and youth to wives and mothers.

According to Commission findings, the respondent's products will not accomplish the results claimed and it is possible for serious injury to result from the use under certain conditions of the product known as “Douche Shields.” The Commission order directs the respondent to cease and desist from the representations made.

The Commission ordered the proceeding closed as to Certane Co., Inc., a defunct corporation named in the complaint. (3486)

Chicagco Thermo-Magnetic Cushion Co., and A. Mercers Parker, its president, 36 West Randolph St., Chicago, have been ordered to cease and desist from misrepresentations in the sale of “Thermo-Magnetic Cushion,” an electric device intended for treatment of disease.

The Commission order directs the respondents to cease representing that use of their device constitutes a cure or remedy for constipation, colds, rheumatism, lambago, sciatica, menstrual disorders, neurotic conditions and other ailments, or that it has any therapeutic value in treating such conditions in excess of affording temporary relief from menstrual pain or pain associated with rheumatism, lambago, sciatica and neurotic conditions, when localized in an area affected by heat from such device. The respondents also are ordered to desist from representing that the use of their device will revitalize the human system. (3523)

Julian S. Cohn, 15 West 37th St., New York, handkerchief distributor, has been ordered to cease and desist from representing
that he is the manufacturer of the products sold by him, unless he actually owns and operates a plant wherein he makes such products himself.

Commission findings are that prior to July 1, 1940, the respondent represented that he manufactured the handkerchiefs he sold, when such was not a fact.

According to findings the respondent, through a contract which became effective July 1, 1940, after the issuance of complaint in the Commission proceeding, exchanged some minority stock which he held in the United Handkerchief Co., Passaic, N. J. for certain handkerchief-making machines operated by that corporation in its factory. Under terms of the contract, the findings continue, the respondent is to pay salaries to a supervisor and to United Handkerchief Co. employees for operating the machines in making handkerchiefs for the respondent, also a rental for space occupied by the machines, and other items. The United Handkerchief Co., according to findings, has continued to control and operate the factory in which the machines are located. (4106)

Crook-Wallace Company—Orders directing the cessation of lottery methods in the sale of merchandise were issued against Harry F. Crook and Gretchen Crook, trading as Crook-Wallace Co., 415 North 2nd St., Vincennes, Ind., and Candymasters, Inc., 3-5 North 15th St., Minneapolis, distributors of candy, and against Louis Greenberg, trading as Reliance Jacket Co., 306 South 2nd St., Minneapolis, dealer in sports jackets and other merchandise.

The Commission orders direct the respondents to cease and desist from supplying to others any merchandise. Together with punch boards, push or pull cards, or other lottery devices, or from supplying such devices, either with assortments of merchandise or separately, which devices may be used in selling or distributing such merchandise to the public, and from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme. (4176, 4243 and 4349)

Diamond Cap Company—Louis Goldenberg, Morris Zipper, and Harry Faerman, trading as Diamond Cap Co., Fourth and Somerset Sts., Philadelphia, have been ordered to cease and desist from misrepresentations in the sale and distribution of caps.

The order directs the respondents to cease representing in any manner that caps made in whole or in part from old, used or second-hand materials are new or are composed of new materials.

The order further prohibits the respondents from representing that caps composed in whole or in part of used or second-hand materials are new or are composed of new materials, by failure to stamp on the sweat bands in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweat bands, a statement that the products are composed of second-hand or used materials. The order provides further that if sweat bands are not affixed to the caps then the stamping must appear on the bodies of the caps in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bodies. (3230)

Eucosone Laboratories, Inc., formerly operating in Detroit, and its successor, Universal Eucosone of America, Inc., Detroit, have been ordered to cease and desist from misrepresentations in the sale of “Eucosone,” a medicinal preparation sold in the form of a liquid, an ointment and nose drops.

Commission findings are that Eucosone Laboratories, Inc., in newspaper and periodical advertisements published throughout the country, made various misleading representations concerning its preparation prior to discontinuing business. Following its subsequent dissolution the successor company offered to be bound by the Commission proceedings and by any order the Commission might enter.

The Commission order directs the respondents to cease representing that their preparation is a germicide or has any therapeutic properties in excess of those of a mild antiseptic; that the preparation has therapeutic value in treating colds, catarrh, sinus infection, rose fever, hay fever, or in treating localized irritation or discomforts associated with such conditions in excess of that afforded by a mild antiseptic and counter-irritant.

The respondents are also directed to cease representing that their preparation is a cure or remedy for athlete’s foot or has therapeutic value in treating such condition as in excess of that afforded by a mild antiseptic; that the preparation has therapeutic value in treating itch, carbuncles, skin irritations or piles, and that the product is non-poisonous, non-toxic or non-irritating, or that it is suitable or safe for internal use.

The Commission order also prohibits the respondents from representing that Eucosone is an azide of eucalyptol or is capable of releasing active oxygen in the presence of moisture or under any other conditions, or that it possesses any therapeutic properties or elements other than possessed by ordinary oil of eucalyptus or eucalyptol. (3478)

S. Friedman & Sons—Abraham Friedman and Samuel Friedman, trading as S. Friedman & Sons and as Sunray Yarn House, 349 Grand St., New York, has been ordered to cease and desist from misrepresentations in the sale and distribution of knitting yarns.

Commission findings are that the respondents, in employing the legends “Sunray Cashmere Sport Yarn,” “Sunray Cashmere Sport,” and “Sunray Cashmere DeLaine” in advertising matter and on labels, represented that certain of their yarns were made entirely from fiber produced from the hair of the cashmere goat when in fact the advertised sport yarns were made entirely of other wool and contained no cashmere fiber and the Sunray Cashmere DeLaine was a blend of cashmere and Australian wools.

The order directs the respondents to cease using the word “Cashmere” to refer to any product not composed entirely of fiber derived from the hair of the cashmere goat; provided, however, that such word may be used as descriptive of the cashmere fiber content of products composed in part of the cashmere fiber and in part of other fibers if there are used in immediate connection with such word in letters of equal conspicuousness, words truthfully designating each constituent fiber or material of such products.

The order further directs that none of its provisions shall be construed as authorizing the labeling of any wool product in any manner other than provided by the Wool Products Labeling Act of 1939, after its effective date, July 14, 1941. (4274)

Marlborough Sales Co., Inc., Madison Sales Corporation and Windsor Manufacturing Co., Inc., all of 29 West 15th St., New York, and William Zeffer, directing manager of the corporations, have been ordered to cease and desist from making misleading representations in the sale of cosmetics and toilet articles.

Commission findings are that the respondents marketed their “Palmolive Shave Cream” and the competitive product “Palmolive Shave Cream;” that they engaged in “slack filling” of large cartons with ordinary-sized tubes of shaving cream and tooth pastes so that such ordinary-sized units appeared to be “giant size;” that they represented as the regular retail prices of certain shaving creams, fictitious prices which were in excess of the regular prices, and that they used the words “Doctors, Dentists, Surgeons” and the letters “D.D.S.” in describing dentifrices which had not been made under the direction or formulas of dentists or medical doctors.

The Commission order directs the respondents to cease and desist from these practices.

According to Commission findings, the three respondent corporations, while still in existence as corporations, have not engaged actively in business since late in 1938. In that year, the findings continue, the six individuals were sold to the National Gibson Co. The complaint in this proceeding was dismissed as to Marlborough Laboratories, Inc., as to Atlantic Manufacturing Co., Newark, N. J., to Henry F. Hirth, and to Harry Silverstein, David Kameran and Frances Chorba, former officers of certain of the corporations. Commission findings are that the evidence showed no such corporation as Marlborough Laboratories, Inc. existed or had any connection with the proceeding, and that the allegations against the Atlantic Manufacturing Co. and the six individuals had not been sustained. (3732)

Schrade Cutlery Co., Walden, N. Y., has been ordered to cease and desist from using the words “Super Scout” or “Scout” or

March 28, 1941 — 311
similar words to designate certain knives which it sells, or from otherwise representing that such articles are endorsed by The Boy Scouts of America. The order further directs the respondent to discontinue representing that such knives are a part of the equipment of that organization's members. (4118)

FTC CASES DISMISSED

The Federal Trade Commission closed its case against Casenburg Crowe, who was alleged to have been in business under the names Southern Manufacturing Co. and Factory-To-You Co., at 1806 Broad St., Rome, Ga. The Commission closed its case without prejudice to its right to resume proceedings, should future facts so warrant. The respondent had been charged with violation of the Federal Trade Commission Act in the sale of men's wearing apparel. According to information received by the Commission, Casenburg Crowe was not an independent operator, but was an employee of Harper Manufacturing Co. and Rome Manufacturing Co., who are not correspondents in the Commission proceeding.

The Commission has also closed its case against Movie Cosmetics Corporation and W. K. Max Hassenstein, its president, of Hollywood, Calif., who had been charged in a Commission complaint with violation of the Federal Trade Commission Act in the sale and distribution of hair waving preparations and devices. The case was closed without prejudice to the Commission's right to resume proceedings, should future facts so warrant.

Also the Commission has dismissed a complaint charging Hershel California Fruit Products Company, Inc., San Jose, Calif., with violation of the Federal Trade Commission Act in the sale of a tomato paste. Dismissal was ordered without prejudice to the Commission's right to reopen the proceeding in accordance with its regular procedure.
THE WEEK IN WASHINGTON

Ninety-seven per cent of all BMI stations have renewed their licenses for 1941-42. On its first birthday, BMI is the leading producer of hit tunes. (p. 313.)

The George Foster Peabody Radio awards for "outstanding meritorious public service" during 1940 were awarded last week at a dinner in New York. CBS, WLW, WGAR, KFRU and Elmer Davis were the winners. (p. 315.)

Exhibits of broadcast material and equipment for the first time will be an official part of the NAB convention this year. (p. 317.)

Cost-per-inquiry advertising again comes to the NAB's attention. (p. 317.)

Stations should continue their Moving Day promotion until all push-button sets are adjusted. (p. 318.)

Three amendments to the NAB By-Laws will be submitted to the NAB convention this year. (p. 318.)

The Association of American Railroads joined the NAB in seeking legislation for national daylight saving. (p. 320.)

The FCC vacated its revocation orders in the "Texas Cases." Andrew D. Ring resigned as assistant chief engineer at the FCC. (p. 320.)

BMI

LICENSE RENEWALS GO OVER THE TOP

Renewal license contracts from 97 per cent of all BMI stations had been received on April 2nd, according to Carl Haverlin, BMI's Director of Station Relations. Mr. Haverlin indicated that the few remaining stations failed to send in the contracts because of the absence or illness of station executives whose signatures are required and he expects to hear from them within the next few days. The letters submitting the signed contracts have expressed enthusiasm over the achievements of BMI during its first year and have given assurance of strong and active support for the future. New contracts cover the period from April 1, 1941 to March 31, 1942.

BMI CELEBRATES FIRST ANNIVERSARY

Born one year ago, Broadcast Music, Inc., has become the largest publisher of music in the country and the most prolific producer of hit tunes. It has broken all records for publishing best sellers written by composers who were unknown before—young Americans who, until 1940, had not had an opportunity to present their songs to the listening public. Such hits of BMI's first year include I Hear a Rhapsody, There I Go, You Walk By, I Give You My Word, So You're the One, High On a Windy Hill, Practice Makes Perfect, The Same Old Story, It All Comes Back To Me Now, Let's Dream This One Out, and The Wise Old Owl.

BMI licensed its first music on April 1, 1940. The song bearing contract number one, We Could Make Such Beautiful Music, which has been known as the BMI theme, is still heard frequently on the air and enjoys a continuous sheet music sale. Since that time BMI has acquired the rights to more than 250,000 songs of every variety. At the present time it occupies more than 25,000 square feet of office space, has a pay roll of 300 employees, and has moved Tin Pan Alley from 46th Street and Broadway to 47th Street and Fifth Ave-

(Continued on page 314)
(Continued from page 313)

BMI

More than 100,000 printed units of music are shipped out of BMI production offices every week to broadcasting stations, taverns, hotels, retail music stores, and to other users or vendors of music.

The phase of BMI activity which has won the heart of the public is its willingness to examine the work of new composers regardless of the time and effort involved. Out of more than 100,000 songs thus submitted, BMI has gleaned a catalogue of some 600 popular numbers—“more fresh and interesting material,” in the words of a conductor, “than would ordinarily be submitted by a music publisher in six or seven years.”

BMI BARDS GET BOOTY

Checks to BMI songwriters in payment for performance of their music over the air are going out as we go to press. They chalk up another “first” to the credit of BMI. It is the first time that writers have been paid for the use of their music in this country without regard to any consideration except the number of performances. The checks are being transmitted in a letter from M. E. Tompkins, BMI Vice-President, who says:

“BMI’s program logging service has been operating since January 1st, and your payment of performance royalties for the first quarter of 1941 will be accurately computed in accordance with actual performances for the first time in the history of musical copyright in the United States. Meanwhile the results already obtained by us from our logging service have enabled us to estimate your performances for the last quarter of 1940 with some accuracy, and we take pleasure in enclosing herewith our check representing voluntary payment for performance royalties for October, November, and December of 1940 as estimated from a test check of programs.

“In sending you this payment, we wish to express again our deep appreciation for your cooperation, and to assure you that the opportunity of authors to be compensated for performances, upon a fair and determinable basis, is now definitely established and will be perpetuated.”

Norman Weiser, Associate Editor of Radio Daily, who is himself one of BMI’s successful lyric writers, noted in his column, “Plenty of smiles along Tin Pan Alley these days as the performance pay-offs from BMI are beginning to arrive in the mail.”

NEW NUMBERS AMONG THE LEADERS

The Billboard and Variety lists of sheet music best sellers and coin machine leaders as usual show surprising amount of difference, but two statements are true of both—the proportion of BMI numbers remains approximately what it has been for the past several weeks, and there are some new numbers among the tops. Amapola, a Marks number, holds the number one spot on three lists and is well up on the others. It All Comes Back to Me Now, one of BMI’s own numbers, appears for the first week on Billboard’s list of the six biggest money makers in the coin machines and for the second week among Variety’s top ten. The Wise Old Owl is climbing among the sheet music best sellers. Peer’s Maria Elena is another newcomer.

BMI TUNES IN PICTURES

Broadcast Music, Inc. has arranged for the publication of several songs to be introduced in forthcoming picture productions. Contracts have been signed with the Walt Disney studios to publish the title song of the next Disney full-length feature picture The Reluctant Dragon, to be released about May 1st.

The song, I Am the Reluctant Dragon, is an outstanding novelty number and BMI officials are convinced that they can turn it into a hit. Present plans don’t call for the publication of any other numbers in the picture so that the full attention of BMI’s Professional Department will be concentrated on the Dragon. The contract is the result of three months’ negotiation between the Disney studios and BMI.

The Reluctant Dragon is taken from Kenneth Gra-
hame’s *Dream Days*. It has been rewritten from the original story and characteristic Disney touches added.

BMI will have the song *Madame Will Drop Her Shawl* in the forthcoming *South of Panama*, co-starring Virginia Vale and Roger Pryor and released through Producers Releasing Corporation. Announcement is anticipated soon of the BMI songs to be included in the next Judy Canova picture, *Puddin’ Head*.

The new Dr. Christian picture *Interlude*, the shooting of which will start April 15th, will be 100% BMI. There will be four songs—*When Love is New*, *Make Believe Land of Dreams*, *Get Alive*, and *The Rhythm is Red, White and Blue*. The BMI Professional Department will concentrate on *When Love is New*, which was written by Claude Sweeton and Jack Owens. The songs in *Puddin’ Head* were written by Jack Owens, who is regarded by BMI officials as one of the most promising of their discoveries.

**MORE MEXICAN HITS FROM PEER**

*Maria Elena*, a waltz, written by the Mexican songwriter Lorenzo Barcelata, and published by Peer International, affiliated with Broadcast Music, Inc., is rapidly gaining a place among best song sellers. Last week more than 5,000 copies of sheet music and orchestrations were shipped out, mainly to the middle-west where the song is exceptionally popular. Written in 1933 and enjoying a big sale in Latin-American countries, new English lyrics by S. K. Russell have brought the song to the forefront. During the past few weeks Wayne King, Lawrence Welk, Bobby Byrne, Jimmy Dorsey, Tony Pastor, and Gene Krupa have recorded the number and coin machines in all sections of the country are featuring their recordings.

*Un Momento*, the latest composition by Alberto Dominguez, who wrote *Frenesi* and *Perfidia*, was published last week by Peer. English title for the song is *Rendezvous in Rio* and the English lyric is by Marjorie Merton.

Dominguez, who recently was a guest star on an international hook-up over NBC, is planning to leave New York shortly on a visit to Hollywood before returning to Mexico City, where he is musical conductor at Station XEW.

**BMI CONTINUES TO PIONEER**

Another revolutionary step in the advancement of radio-music has been achieved by Broadcast Music, Inc. through the development of two color orchestrations. Although colored arrangements have been used before in piano music, this is the first time that complete orchestrations have been printed in two colors. Since BMI began operation, all orchestrations made by the broadcasters’ organization have been cross-cued—a system of arranging that enables orchestrations to be used by groups of four or five pieces or full symphony orchestras. In the newly developed BMI method of arranging, the cross-cued parts that are played by small groups are printed in a reddish-orange color that makes them stand out in striking contrast to the remainder of the score.

The new two-color printing, it was explained by BMI arrangers, is expected to “revolutionize music,” as it is the most important step ever taken to simplify the playing of complicated arrangements. By using the colored arrangements, which are easier on the eyes than the usual all-black orchestrations, musicians in orchestras of less than symphonic size no longer have to be concerned with reading the entire score for the cross-cued sections they play, but can easily and quickly locate their parts from the notes printed in color. To get the most effective color, the BMI Arranging Department experimented with a number of shades, finally selecting the reddish-orange color as offering the greatest contrast. Beginning this week, all BMI arrangements of favorite standard, classical, and salon music will incorporate the new two-color printing.

**Peabody Radio Award Winners**

The George Foster Peabody Radio Awards for “outstanding meritorious public service” in the broadcasting industry during 1940 were announced March 29 by S. V. Sanford, Chancellor of the University System of Georgia, at a dinner in New York.

The awards, comparable to the Pulitzer awards in the field of journalism, went to the Columbia Broadcasting System, among the networks; Station WLW, Cincinnati, among the large stations; Station WGAR, Cleveland, among the medium sized stations; Station KFRU, Columbia, Missouri, among the small stations, and Elmer Davis, CBS reporter.

In addition, the following stations were cited:

**LARGE STATIONS**

WSB, Atlanta, Georgia. Cited for its distinguished public service contributions to a localized area in the South.

KNX, Los Angeles, California. Cited for meritorious service to a localized area in the Far West.

WLS, Chicago, Illinois. Cited for meritorious service to agriculture.

WBAP, Fort Worth, Texas. Cited for its distinctive series of prison broadcasts.

WOR, New York City. Cited for its contribution in broadcasting the “American Forum of the Air.”

WJZ, New York City. Cited for its contribution to broadcasting the “Town Meeting of the Air.”

WGEO, (short wave) Schenectady, N. Y. Cited for its service to the Byrd expedition at the South Pole.

April 4, 1941 — 315
MEDIUM-SIZED STATIONS

WJJJD, Chicago, Illinois. Cited for its service to education in broadcasts to schools.

WQXR, New York City. Cited for the high standards of its musical programs.

WOW, Omaha, Nebraska. Cited for its enterprise in originating “The President’s Birthday Ball of 1940”.

KSTP, St. Paul, Minnesota. Cited for its distinguished broadcast, “America Calling.”

WBNX, New York City. Cited for its public service to foreign language groups in greater New York.

WRC-WMAL, Washington, D. C. Cited for its enterprise in originating the “Mile O’ Dimes” public service feature.

SMALL STATIONS

KVOS, Bellingham, Washington. Cited for promoting a better understanding between Canada and the United States through its Armistice Day program.

The awards, authorized by the Regents of the University System of Georgia last May, were approved by an advisory board which included:

Bruce Barton, president; Batten, Barton, Durstine, and Osborne, Advertising, New York City

John H. Benson, President, American Association of Advertising Agencies, New York City

Virginius Dabney, Editor, Richmond (Va.) Times-Dispatch

Norman H. Davis, Chairman, American Red Cross

Jonathan Daniels, Editor, Raleigh (N. C.) News and Observer

Mark Ethridge, Vice President and General Manager, Louisville (Ky.) Courier-Journal and Times

Waldemar Kaempfert, Science Editor, New York Times

Alfred Knopf, Publisher, New York City

Grace Moore, Metropolitan Opera Company, New York City

Dr. John W. Studebaker, United States Commissioner of Education

Mrs. Marjorie Peabody Waite, daughter of George Foster Peabody whose name the awards bear

Edward Weeks, Editor, Atlantic Monthly, Boston, Massachusetts

The Columbia Broadcasting System, Dr. Sanford said, was selected among the networks, “among other reasons, for offering a schedule of broadcasts which combined commercial and sustaining programs in such a way as to constitute a structure definitely in the public interest; for giving its listeners more than 10,000 non-commercial broadcasts in 3,500 hours of unsponsored, public service programs; for regarding its schedule as a curriculum for adults and children in which lighter entertainment served as an ingredient to make the more vital programs palatable; for covering adequately the significant news of the year; for promoting Pan-American unity and understanding through its ‘School of the Air’; for aiding education with special schoolroom services and such programs as ‘Invitation to Learning’, ‘The Human Adventure’, ‘Reporting to the Nation’, ‘The People’s Platform’, and ‘Columbia’s Country Journal’; for giving religion a major place in its public service activities; and for its manifold and continuous interest in serious music and other cultural subjects.”

Station WLW, Cincinnati, received its award among large stations “for being a pacemaker in the conception and execution of distinctive public service programs; for recognition of the principle that clear-channel stations should be sectional rather than local in their service, but at the same time should not duplicate the work of the networks; for offering broadcasts of a type slightly above the level of the mass radio audience; for spending three times as much on public service programs as the average for 50,000 watt stations; and for serving the interests of all groups, including rural as well as urban listeners.”

Station WGAR, Cleveland, was selected “for its success, despite the restricted facilities of a regional station, in serving the diverse interests and widely different cultural backgrounds of greater Cleveland; for promoting a better understanding among these various groups; for assuming a responsibility to those 65 per cent of Cleveland’s foreign-born or first generation listeners who do not easily understand English by broadcasting programs in languages which represent the principal foreign populations of this metropolitan area—Hungarian, Italian, Slovene, Czech, Slovak, Polish and Russian; for its program, ‘Wings over Jordan’, begun five years ago to bring about a better understanding between the white and colored peoples of Cleveland; for its cooperation with governmental agencies in the interest of national unity, civic consciousness, community health and welfare; and for its unique news service featuring items of special interest to some twenty small communities.”

Station KFRU, Columbia, Missouri, received its award “for making the most of its opportunities to serve its local audience; for giving its listeners educational features of local origin, including programs of classical music with interpretative comments and helpful broadcasts in the interests of better farming; for doing a superior job of public service despite limited equipment, circumscribed finances, and a small personnel.”

Elmer Davis was selected for “his terse, incisive and impartial reporting of the news, day by day.”

Dr. Sanford’s address was broadcast by the coast-to-coast network of the Columbia Broadcasting System.

The idea for the Peabody awards, which are to be made each year, originated with Lambdin, Kay, Director of Public Service at station WSB, Atlanta. He discussed the need for “something comparable to the Pulitzer prize” for radio with Dean John E. Drewry, of the Henry W. Grady School of Journalism of the University of Georgia, who, in the fall of 1939, laid the matter before Dr. Sanford. Dean Drewry also discussed the matter with the broadcasting industry at the 1940 convention of the National Association of Broadcasters in San Francisco where his proposal to have the awards made by the University of Georgia received unanimous endorsement. Together, the Henry W. Grady School of Journalism and the NAB set up the mechanics for making the awards.

Broadcasting stations from 24 states and the District of Columbia, as well as the three major networks, submitted entries. A faculty committee of the University of Georgia carefully examined the material submitted by the stations and recommendations of this committee formed a basis of selections approved by the advisory board.

Addressing himself to the broadcasting industry, Dr. Sanford said tonight that he hoped “these Peabody awards will serve increasingly as an incentive to higher standards of public service.”

“We of the University of Georgia and the School of Journalism in particular, feel that radio is very much a part of our educational program,” he added. “The creation of these George Foster Peabody Radio Awards is but the latest step in our efforts to be of educational assistance to an important agency of communication. With the cooperation of the National Association of Broadcasters, our Advisory Board, and the executives of the radio industry itself, these Awards from year to year serve not only as a measurement of the achievements by broadcasters, but as a continuous reminder of the social obligations of radio. Mr. W. B. Lewis, vice president in charge of broadcasts of the Columbia Broadcasting System, has stated the point well thus:

“The award is a very healthy plan to compel those of us who are engaged in the daily work of putting radio programs on the
air, to stand aside and once again evaluate our activities over an entire year in terms of objectives and achievements. ** The compilation of our exhibit provided a real stimulus to the individual members of the departments involved. And this experience was, we are sure, duplicated by that of every competing station and network.

“We of the University of Georgia hope and believe that this thought is shared throughout the broadcasting industry.”

William S. Paley accepted the award on behalf of CBS; James D. House for WLW; Eugene Carr for WGBR; C. L. Thomas for KRFU, and Elmer Davis for himself. C. E. Arney, Jr., spoke in behalf of the NAB.

NAB Convention

Promotion Exhibit Question Box No. 3

Question: Will the exhibits at the Convention be put in the halls and in the lobbies, or will there be a special exhibit hall?

Answer: There will be a special exhibit hall. The Crystal Room of the New Jefferson Hotel in St. Louis has been designated as such. This room is 75 feet long, and 35 feet wide, and will provide plenty of space for every exhibitor.

Question: Will individual stations have to mount their exhibits themselves?

Answer: No. If the entries are shipped to the Convention according to the regulations the Committee in charge will see that the panels are properly hung, at no expense or bother to the individual stations.

Question: If a station sends material which does not conform to the rules of the Committee what is the result?

Answer: Such exhibits which do not conform to the rules will not be displayed in the Crystal Room, and will not be entitled to any awards.

The closing date for entries is May 3. Shipment is to be made to the New Jefferson Hotel, St. Louis, c/o NAB Promotion Exhibit Committee.

EXHIBITS

For the first time, the exhibits of broadcast equipment and materials will be made an official part of the convention this year. The Board of Directors in formulating the Associate Membership Plan adopted a provision to the effect that only those who are associate members will be eligible to hold exhibits in connection with the convention. While this will cut down the number of exhibits, it will give assurance that those who do exhibit are sufficiently interested in the industry’s problems to support its trade association. In an early issue of the Reports, a complete list of the exhibitors will be given. This week a questionnaire went out to all associate members seeking information regarding their exhibit plans.

The promotion exhibit should not be confused with these associate member exhibits. While associate members are eligible to display promotional material along with the display of similar material made by member stations, the promotional exhibit will be made in the Crystal Room, one of the large public rooms in the hotel. The associate member exhibits will be in private rooms throughout the hotel. Every indication points to an exceptional promotion exhibit and the committee, headed by Howard Peterson, WOW, is working diligently.

BANNER ATTENDANCE PROBABLE

Ray Dady, KWK, and his Housing Committee have done a really commendable job in handling the requests for hotel reservation at St. Louis hotels. The advance reservations, incidentally, far exceed those at any previous NAB convention. For many weeks all of the suites available at the Jefferson Hotel have been taken. A very limited number of twin bedded rooms are yet available but there are plenty of double bedded rooms and singles. There are, of course, suites at other hotels than the Jefferson, many of them nearby. Don’t let the fear of lack of proper accommodations deter you from planning your trip to the convention.

Incidentally a check-up shows a very limited number of reservations from the far west. This is surprising in view of the fact that the mid-western broadcasters were so numerous at the San Francisco convention last year. Many of the mid-western broadcasters have expressed the hope that the western broadcasters will reciprocate by being present at St. Louis. It is going to be a grand convention and Merle Jones, chairman of the General Committee, has the local plans well in hand.

Sales

COST-PER-INQUIRY

Contingent and cost-per-inquiry deals, some new and some old, continue to be reported by member stations to the NAB Department of Broadcast Advertising. This week’s mail brought information on the following:

The Bible Press, Richmond, Va.
Murray Hill Topmark & Co., 505 Fifth Ave., New York City, on behalf of an insecticide powder.
Frasek Company, Martlex Bldg., White Plains, N. Y., with a postage stamp offer.
Duensing & Co., 35 East Wacker Drive, Chicago, on behalf of Waterbury fountain pens.
Continued cooperation in calling these free offer and per-inquiry deals to the attention of the Department will be appreciated. Each of these companies has been advised that it is the opinion of the Department of Broadcast Advertising that their proposals are
opposed to the best interests of radio stations, and each has been invited to give serious consideration to a paid radio campaign, if they wish to obtain maximum results and maintain the continued goodwill and cooperation of the broadcasting industry.

**PELLEGRIN REPORTS**

Frank E. Pellegrin, newly appointed Director of the Department of Broadcast Advertising, assumed his duties at headquarters April 1. Pellegrin comes from Omaha, where for the past three years he has been sales manager of the Central States Broadcasting Company—KOIL, Omaha, and KFAB, Lincoln.

**Promotion**

**RADIO'S MOVIN' DAY**

Many station executives have indicated that they are continuing the broadcast of announcements urging listeners to have their push buttons reset. This is sound technique. The telephone rush to get push buttons changed, noted on March 29, is over. Now comes the orderly change over of buttons which will take some weeks. Unless stations continually drive home the change over message their listeners may neglect to have the job done as speedily as possible.

The Mayors of five more cities who proclaimed Radio Movin' Day, previously unreported, represent:

- Charleston, S. C.; Muncie, Ind.; Tacoma, Wash.; San Bernardino, Cal.; Toledo, Ohio

When H. H. Born, business manager, WHBL, Sheboygan, Wis., received Governor Heil's proclamation it was set up in the composing room of the Sheboygan Press. Mats were pulled and mailed to the twenty-two Wisconsin communities having broadcast stations.

WBIG, CBS affiliate in Greensboro, N. C., and WSJS, owned by the Winston-Salem Journal and Sentinel, on NBC Red, exhibited some real Tar Heel cooperation during Movin' Day promotion.

The former station bought space in the Winston-Salem Journal and WSJS bought spot announcements over WBIG.

James C. Wallace, KAST, Astoria, Ore., ran a six hundred line ad in the Astoria-Budget on March 17, which also illustrated the well-known radio cooperation. After explaining the facts of change over Mr. Wallace listed "Important Changes on Stations Heard in the Astoria Area" and urged readers to save the listings. Stations noted were located in Portland, Seattle, Tacoma, Los Angeles, San Francisco, Sacramento and San Jose.

WDGY, Minneapolis, arranged an excellent cooperative promotion for itself as well as other Twin City stations, and stations in Fergus Falls, Winona, Superior-Duluth, Hibbing, Moorhead, Willmar, Virginia, Albert Lea and St. Cloud.

A deal was made with one of the station’s clients, Central Coop. Livestock Association, which distributed 100,000 notices of new dial settings of Minnesota stations.

WDGY’s wave length is 1130 which suggested to Program Manager Stone a program called the "1130 Matinee." Quarter hour started March 1 at 11:30 a.m. and is still running. A special Saturday afternoon program known as the "1130 Club" has been running four weeks, 1:10 to 3:30 p.m. Both shows continue to urge listeners to have their push buttons changed.

**Amendments to By-Laws**

Three proposals to amend the By-Laws of the NAB have been authorized by the Board of Directors for submission to the membership.

Article XIII of the By-Laws requires that proposed changes shall be "submitted by mail to the last recorded address of each member at least 30 days before the time of the meeting which is to consider the change." The meeting to consider the change is the Nineteenth Annual Meeting, to be held at St. Louis, May 12 to 15 inclusive. This is, therefore, your notice of the following proposed amendments.

1.

To provide for nomination of Directors-at-Large and selection of succeeding convention city by the members, the following amendment is proposed, without recommendation by the board as to nomination of Directors-at-Large and with recommendation as to succeeding convention city:

(1) Amend Article V by striking out Section 1 thereof and inserting in place thereof the following new Section 1:

**SECTION I. ANNUAL**

A. A stated or annual meeting of the members shall be held in each year at such place as is determined by the members at their previous annual meeting and at such time as is determined by the Board of Directors. At such meeting Directors-at-Large shall be nominated and Directors-at-Large and Network Directors shall be elected by the members by vote in an open session thereof to succeed such directors whose terms then expire. At such meeting there shall likewise be transacted any other business that may be then properly and legally presented.

B. No city shall be eligible for balloting as the place for the ensuing annual meeting unless certified by the Secretary-Treasurer to have complied with the following requirements:

1. At least ninety days prior to the annual meeting any city desiring to invite the next annual meeting shall so notify the Secretary-Treasurer in writing.

2. At least thirty days prior to the annual meeting such city shall inform the Secretary-Treasurer in writing, in such detail as he may require, as to its facilities to accommodate the annual meeting, wherein its said facilities shall appear to be adequate, the Secretary-Treasurer shall certify the city as qualified.

318 — April 4, 1941
3. The invitation of any qualified city shall be presented to the membership by a member from the district in which such city is located.

C. The names of cities extending official invitations in accordance with paragraph (B) above shall be posted in the order of presentation and the membership shall select three such cities in the order of their preference for the next annual meeting.

D. The Secretary-Treasurer shall immediately negotiate with one or more hotels and community agencies in the city first preferred, the standard form of contract utilized by hotels and communities to which the annual meeting is awarded. If he is unable to negotiate satisfactorily as to such city, he shall similarly negotiate as to the city second preferred, and if he is unable to negotiate satisfactorily as to such city, he shall similarly negotiate as to the city third preferred. In the event he is unable to negotiate as to any of the three cities preferred by the membership, the Board of Directors shall fix the place of the annual meeting.

(2) Amend Article VII by striking out Section 4 thereof and inserting in place thereof the following new Section 4:

SECTION 4. NOMINATION OF DIRECTORS-AT-LARGE AND NETWORK DIRECTORS. Nominations for each of the six Directors-at-Large, as defined in Section 2, above, shall be made from the floor at a business session of the annual meeting. Nominations may be made from a member of the Board of Directors. The President shall appoint the Chairman of the Elections Committee and a voice or standing board of directors shall proceed to count the ballots and announce the results; provided, however, that the results of the final ballot shall be closed when nominees of that classification total thirty. All names post designated by the President.

Elections Committee shall proceed to count the ballots and announce the results; provided, however, that the results of the final ballot shall be closed when nominees of that classification total thirty. All names post designated by the President.

(3) Amend Article VII by striking out Section 5 thereof and inserting in place thereof the following new Section 5:

SECTION 5. ELECTION OF DIRECTORS-AT-LARGE AND NETWORK DIRECTORS. Election of Directors-at-Large and Network Directors shall proceed as follows:

A. The President shall appoint an Elections Committee of three persons. The President shall appoint the Chairman.

B. The Elections Committee shall compile a list of Active Members eligible to vote in the elections.

C. The Elections Committee shall distribute coupon ballots.

D. The Elections Committee shall on the second day of the annual meeting announce a time and place for balloting and shall supervise such balloting. No ballots shall be received after the balloting session adjourns.

E. The Election Committee shall prepare ballots in blank and in coupon booklet form with not less than four ballots in each coupon book. Ballot number one shall be used to determine the election of the Network Directors. Ballot number two shall be used to determine the election of the Directors-at-Large. Ballot number three may be used by writing the names of the first, second and third preference of cities for the next annual meeting; provided, however, that the use of Ballot number three may be waived at the discretion of the Chairman of the Elections Committee and a voice or standing service less time and advertising agency discounts, if any, and including net billings to the networks. No member shall be required to state its actual volume but to name annually to the Secretary-Treasurer on his call the class into which its volume falls. It is understood that each Active Member is in honor bound not to name a smaller classification than that into which its actual volume falls. The annual dues, payable monthly in advance, shall be as follows:

<table>
<thead>
<tr>
<th>Class Range of Income</th>
<th>Monthly Dues</th>
</tr>
</thead>
<tbody>
<tr>
<td>A $0 - $1,000</td>
<td>$3.00</td>
</tr>
<tr>
<td>B $1,001 - $2,000</td>
<td>$5.00</td>
</tr>
<tr>
<td>C $2,001 - $5,000</td>
<td>$8.00</td>
</tr>
<tr>
<td>D $5,001 - $10,000</td>
<td>$10.00</td>
</tr>
<tr>
<td>E $10,001 - $25,000</td>
<td>$12.00</td>
</tr>
<tr>
<td>F $25,001 - $50,000</td>
<td>$15.00</td>
</tr>
<tr>
<td>G $50,001 - $100,000</td>
<td>$20.00</td>
</tr>
<tr>
<td>H $100,001 - $250,000</td>

</tr>
<tr>
<td>I $250,001 - $500,000</td>
<td>$30.00</td>
</tr>
<tr>
<td>J $500,001 - $1,000,000</td>
<td>$40.00</td>
</tr>
<tr>
<td>K Over $1,000,000</td>
<td>$50.00</td>
</tr>
</tbody>
</table>

III To provide for reallocation of territory affecting Districts 2, 3, 8, 9, 11 and 14, the following amendment is proposed, with recommendation of the board:

Amend Article III, Section 4, District 2, by striking out the period and adding the following: “and New Jersey.”

Amend Article III, Section 4, District 3, by striking out the comma and the word “New Jersey.”

Amend Article III, Section 4, District 8, by striking out the period and adding the following: “and New Jersey.”

Amend Article III, Section 4, District 9, by striking out all “Illinois” and adding the following: “Wisconsin, excluding the counties of La Crosse, Monroe, Juneau, Adams, Marquette, Waushara, Portage, Wood, Jackson, Trempealeau, Buffalo, Pepin, Pierce, St. Croix, Dunn, Chippewa, Eau Claire, Clark, Marathon, Lincoln, Taylor, Rusk, Barron, Polk, Burnett, Washburn, Sawyer, Price, Oneida, Vilas, Iron, Ashland, Bayfield and Douglas.”

Amend Article III, Section 4, District 11, by striking out all after “North Dakota” and adding the following: “South Dakota, excluding the counties of All River, Shannon, Bennett, Todd, Mellette, Waushall, Wisconsin, Custer, Pennington, Jackson, Jones, Stanley, Haakon, Meade, Lawrence, Butte, Harding, Perkins, Ziebach, Armstrong, Dewey and Corson.”

April 4, 1941 — 319
Legislation

DAYLIGHT SAVING

Last Friday the Board of Directors of the Association of American Railroads passed a resolution that the officers of the Association should support H. R. 3789, the McLean Bill providing for daylight saving time on a nation-wide basis. The desirability of this legislation was called to their attention by the NAB which is, under resolution of the Board of Directors, actively supporting the Bill.

FEDERAL LEGISLATION

HOUSE

H. R. 4228 (Hobbs, D-Ala.) JUDICIAL CODE—To amend the Judicial Code by adding thereto a new section authorizing, for the purpose of detecting or preventing certain crimes, the Federal Bureau of Investigation of the Department of Justice, when specifically authorized by the Attorney General of the United States, to intercept, listen in on, or record telephone, telegraph, or radio messages or communications; and making such authorizations and communications, and testimony concerning same, admissible evidence; and for other purposes. Referred to Committee on Judiciary.

SENATE

S. 1253 (Wheeler, D-Mont.) COMMUNICATIONS ACT—To amend section 605 of the Communications Act of 1934. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

SOUTH CAROLINA:

H. 487 (Moore, et al) ALCOHOLIC LIQUORS—PUBLIC ADVERTISEMENT—to render unlawful the public advertisement of alcoholic liquors and beverages, and to provide a penalty for violation thereof. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION

REVOCATION ORDERS VACATED

Need for continued broadcast service and other public interest considerations led the FCC to vacate its orders of revocation in the so-called "Texas cases," it announced.

Though hidden management revelations provided "ample foundation" for revocation, the Commission deems that the program service of the six stations involved is in the public interest, being for the most part in communities not otherwise provided with broadcast facilities. Therefore, in view of subsequent acts by the licensees to remedy unlawful aspects of past operation, the Commission agreed to license five of the stations on a temporary basis. Therefore, in view of subsequent acts by the licensees to remedy unlawful aspects of past operation, the Commission will permit the licensee to continue operation of the station, but warns that this is not to be construed as in any way approving Dr. Ulmer’s past activities in connection with the station. "To the contrary," comments the Commission, "we unequivocally condemn these activities and the complete disregard of the duties of radiobroadcast licensees shown by the other principal participants in this proceeding."

The Commission was faced with the circumstance that in none of the areas in which these stations are located, except Austin, is there any station to serve as a medium for community expression other than the particular stations involved. No question had been raised that the program service was not in the public interest. Commissioner Payne dissented in all six cases and Commissioner Case in the case of KGKB.

WBAX LICENSE RENEWAL DENIED

Application by John H. Stenger, Jr., for renewal of license of broadcast station WBAX, at Wilkes-Barre, Pa., was denied by the FCC, following oral argument before the Commission on its Proposed Findings of Fact and Conclusions (B-115) to that effect, dated September 18th last. The station is accordingly given until 3 a.m., July 1 next to get off the air.

In adopting its proposed findings, the Commission reaffirmed its previous conclusions as amended:

"Upon the foregoing findings of fact the Commission concludes:

1. The applicant is not financially qualified to continue the operation of the station.

2. In view of the facts recited above with respect to false representations made to the Commission by the applicant in applications and other documents, it is apparent that his character is not such as to qualify him to hold the license of a radiobroadcast station.

3. In practical effect, the station licenses herefore to the applicant for the operation of Station WBAX, and the rights therein granted have been transferred to Glenn D. Gillett, Marcy Eager, and Stenger Broadcasting Corporation without obtaining the consent of the Commission thereto in writing, in violation of the provisions of Section 310(b) of the Communications Act of 1934, as amended.

4. The radio transmitting apparatus described in licenses herefore issued to the applicant for the operation of Station WBAX has been used and operated by Glenn D. Gillett and Marcy Eager, directly and through agents, and by Stenger Broadcasting Corporation, through its officers and directors, particularly with respect to the control of physical operation and programs broadcast, in violation of the provisions of Section 301 of the Communications Act of 1934, as amended.

5. The applicant has relinquished control of this station and his right to exercise same; and has failed to discharge properly the obligations made incumbent upon him in licenses which he has received from the Commission.

6. The granting of the application for renewal of license of Station WBAX will not serve public interest, convenience, or necessity."
The Commission made the supplemental observation that the "control actually exercised by Gillett and his associates went beyond the terms of the contract, and beyond the activities reasonably to be contemplated therefrom."

Commissioner Craven, concurring, stated: "I concur with the ultimate result, but believe that the denial should be without prejudice to the filing of an application for transfer of license to a person satisfactory to the Commission as to qualifications under the law."

WBAX, using power of 100 watts, has been operating on a temporary basis since March 29 on 1240 kilocycles, and on 1210 kilocycles previously.

RING RESIGNS

After nearly 12 years of active Government service in radio broadcast engineering, Andrew D. Ring has resigned as Assistant Chief Engineer of the FCC to engage in private engineering practice. He will be associated in Washington with Ralph L. Clark, who has also resigned from the Commission engineering staff for this purpose.

Mr. Ring is following out an intention of long standing to enter private practice as soon as certain engineering problems had been followed through by the Commission to successful conclusions. Last of these was the North American Regional Broadcasting Agreement, effective March 29, with which Mr. Ring had been associated in a technical capacity since he was a technical adviser to the Havana conference in 1937.

A native of Tennessee and graduated from the University of Tennessee, Mr. Ring joined the Federal Radio Commission July 1, 1929, as senior engineer. He has been Assistant Chief Engineer for the Federal Communications Commission since the latter was established in 1934.

Technical progress in which Mr. Ring played an active part has included establishment in 1930 of empirical standards of allocation as a basis for determining broadcast service and interference; adoption of automatic frequency controls in 1932; directive antenna to prevent interference and otherwise improve service, adopted that same year; Standards of Good Engineering Practice and Rules and Regulations Governing Standard Broadcast Stations, resulting from an engineering conference in 1939; the recent debut of commercial FM, with new principles of allocation on the basis of area served; substantial developments in television, and international broadcast aided by use of directive antenna and maximum power requirement.

Mr. Ring has been with the Commission during a period which has been decisive of many important engineering problems in the broadcasting field. He has brought to his work here both a long experience and a rare degree of competence. It will be difficult to fill his place at the Commission.

COOPER RESIGNS

The FCC has accepted the resignation of Robert M. Cooper, Assistant to the General Counsel. Mr. Cooper has been with the Commission for about two years. During that time he has been active in connection with litigation, the chain broadcasting inquiry, the proposed telegraph merger, and other important matters.

Chairman James Lawrence Fly said that Mr. Cooper's services had been of great value to the Commission. "Mr. Cooper is an excellent lawyer with long experience in the regulatory field," commented the Chairman. General Counsel Telford Taylor stated that Mr. Cooper had contributed effectively to the Commission's activities in numerous important branches of its work, and paid high tribute to his ability.

Mr. Cooper has had several offers of other employment but did not announce his plans for the future. He will continue to handle several matters which have been specifically assigned to him by the Department of Justice.

IMPROVED RECEPTION UNDER FREQUENCY SHIFT NOTED

Advice received by the FCC indicates that the change of frequencies effected by standard broadcast stations on March 29th, as required under the North American Regional Broadcasting Agreement, was accomplished with a minimum of inconvenience to listeners as well as to broadcasters.

The shift was made according to schedule, without untoward incident. Broadcasters report that their listeners evinced no particular confusion, thanks to the advance explanations made by both radio and the press in a public effort, which was assisted by Governors' proclamations and cooperation of civic, technical and other groups.

Early reports to the FCC are to the effect that improved reception has been noted in general. Some isolated reports of interference have been traced to specific cases in which final adjustments were not completed at the exact time the reallocation became effective.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, April 7. They are subject to change.

Thursday, April 10
NEW—Granite District Radio Broadcasting Co., Murray, Utah.—C.P., 1500 kc. (1190 kc. when Havana Treaty is effective), 250 watts, unlimited.

Friday, April 11
KGNO—The Dodge City Broadcasting Company, Inc., Dodge City, Kans.—Modification of license, 11140 kc., 500 watts night, 1 KW day, unlimited. Present assignment: 1340 kc., 250 watts night, 1 KW day, unlimited.

FUTURE HEARINGS

During the past week the Commission has announced the following dates for broadcast hearings. They are subject to change.

April 21
Consolidated Hearing
WPAY—Chester A. Thompson (Transferor), and The Brush-Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio.—Transfer of control of Corp., 1370 kc., 100 watts, unlimited.
WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Renewal of license, 1370 kc., 100 watts, unlimited.

Joint Hearing
April 30
KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—C. P., 1410 kc., 1 kw, unlimited, DA night.

May 14
WHB—WHB Broadcasting Company, Kansas City, Mo.—C. P., 710 kc., 5 kw, DA night and day, unlimited time.

WTCN—Minnesota Broadcasting Corp., Minneapolis, Minn.—C. P., 710 kc., 10 kw, unlimited, DA night.

May 21
Consolidated Hearing

NEW—Trent Broadcast Corp., Trenton, N. J.—C. P., 1330 kc., unlimited, DA day and night.

KOL—Seattle Broadcasting Co., Seattle, Wash.—Granted construction permit to increase power from 100 kw to 5 kw and install directional antenna for day and night.

NEW—Ralph L. Lewis, Greensboro, N. C.—C. P., 1370 kc., 100 watts, unlimited time.

June 2
NEW—Symons Broadcasting Co., Ellensburg, Wash.—C. P., 1110 kc., 1 kw, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WSTV—The Valley Broadcasting Co., Steubenville, Ohio.—Granted modification of license to change hours of operation from specified to unlimited time; 1340 kc. (NARBA), power 250 watts day and night (B2-ML-10051).

WBRK—Harold Thomas—assignor), Monroe B. England (assignee), Monroe, La.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAM.

WCAM—City of Camden, Camden, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAM.

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Application for construction permit; granted construction permit which authorized a new television station to be operated with power of 250 kw, 500 watts daytime, for change in frequency to 850 kc. in accordance with NARBA; no authority to operate hereunder will be granted prior to March 29, 1941.

W2XBS—National Broadcasting Co., Inc., New York City—Granted extension of special temporary authority to operate television broadcast station W2XBS with special emission authorization; granted special temporary authority to operate from 7:30 p.m., CST on March 29, 1941, in order to relay broadcast program in connection with opening of the International Flower Show at Dallas to radio station WRR.

WPK—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from 7:30 p.m., EST, to the conclusion of State Semi-final basketball game on March 25, 1941, in order to broadcast said game only.

KBTM—Jay P. Beard, tr/a Regional Broadcast Co., Jonesboro, Ark.—Denied special temporary authority to operate with power of 250 watts nighttime on March 28, 1941.

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Denied authority to determine operating power by direct measurement of antenna input on 600 kc. under NARBA, for period beginning 3 a.m., EST, March 29 (B2-Z-720).

KSEF—Radio Service Corp., Pocatello, Idaho.—Granted authority to determine operating power by direct measurement of antenna input on 700 kc. under NARBA (B2-F-8030).
authorized a new television station, authorizing extension of completion date to May 5, 1941 (B1-MP-1207).

WEXL—Royal Oak Broadcasting Co., Royal Oak, Mich.—Granted modification of construction permit (B2-P-2459, which authorized increase in power, installation of antenna for night use), for extension of completion date to May 5, 1941 (B1-MP-1147).

WAPF—City of Flint, Flint, Mich.—Granted motion to dismiss special temporary authority to remain silent for the period of March 31 to April 21, on applications of Yankee Network, Inc., and Worcester Telegram Publishing Co., Inc., referred to above.

The Commission on its own motion consolidated the hearing on application of Camden Broadcasting Company for a new station in Camden to operate on 880 kc., 500 watts, unlimited time.

WNYC—Municipal Broadcasting System of the City of New York.—Dismissed without prejudice petition for intervention in the hearing on application of Camden Broadcasting Company for a new station in Camden to operate on 800 kc., 500 watts, unlimited time.

Butler Radio, Inc., Tyler, Texas.—Dismissed motion for leave to amend application for construction permit to specify frequency 1400 kc. under NARB.

Ralph L. Lewis, Greensboro, N. C.—Dismissed motion for leave to amend application to specify frequency 1400 kc. under NARB.

Symons Broadcasting Co., Ellensburg, Wash.—Granted motion to continue hearing now set for April 1 for a period of 60 days in re application for construction permit to operate on 1110 kc., unlimited power, for period beginning March 31, in re application for renewal of license.

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted extension of time to April 30 within which to file amendment to application for construction permit to change frequency, etc.

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted motion to continue hearing now scheduled for March 31 for period of 30 days, on application for construction permit to change frequency, etc.

WDEL—WDEL Broadcasting Station, Inc., Wilmington, Del.—The Commission on its own motion continued hearing now scheduled for April 4 to April 21, on applications of Yankee Network, Inc., for new FM station in Wilmington, Del., to operate on 1130 kc., 100 watts, daytime only.

Columbia Broadcasting System, Inc., Boston, Mass.—Passed petition to intervene in the hearing on application of The Outlet Co., for a new station in Providence, R. I., to operate on 1130 kc., 100 watts, daytime only.

Columbia Broadcasting System, Inc., Boston, Mass.—The Commission on its own motion consolidated the hearing and continued same to May 26, on applications of renewal of license for WCAM, WCAP and WTNJ, and for construction permits for Trent Broadcast Corp., WTNJ and WDAS. Motion of WDAS to continue hearing dismissed.

Mollin Investment Co., Riverside, Calif.—Denied as in case of default the application for a new television station. Applicant failed to appear and offer evidence in support of the application to use 1390 kc., 30 watts, daytime only.

Columbia Broadcasting System, Inc., Boston, Mass.—Passed petition to intervene in the hearing on application of The Outlet Co., for a new station in Providence, R. I., to operate on 1390 kc., 16,370 square miles.

WJAR—The Outlet Co., Providence, R. I.—Passed petition for leave to intervene and enlarge issues in re applications of Yankee Network, Inc., for new station in Providence, R. I., to operate on 930 kc., 500 watts, unlimited time.
which authorized a new station to operate on 1120 kc.,
100 watts night, 250 watts day, unlimited hours, for change
in frequency to 1150 kc. under NARBA. No authority
extension to operate will be granted prior to March 29.

The Yankee Network, Inc., Boston, Mass.—Granted special
temporary authority to originate the broadcast of a Stanley
Cup Hockey play-off on March 29, in Boston, to be carried
over the wires of AT&T or a subsidiary to Toronto, there
to be broadcast by stations of Canadian Broadcasting Corp.

The Yankee Network, Inc., Boston, Mass.—Granted special
temporary authority to originate the broadcast of a Stanley
Cup Hockey play-off on April 3, in Boston, to be carried
over wires of AT&T or a subsidiary to Toronto, there to be
broadcast by station CKCL from 9 p.m. EST, to conclusion
of game.

WYNE—Board of Education, City of New York.—Granted ex-
clusive permission to originate the broadcast of a Stanley
Cup Hockey play-off on March 14, in New York, to be carried
over the wires of WNYC, for the period April 1 to April 30,
for change in frequency modulation and until construction is
completed in accordance with terms of application.

W2XOY—General Electric Co., New Scotland, N. Y.—Granted
special temporary authority to operate a high frequency
experimental broadcast station on frequency 32800 kc.,
2500 watts, special emission for FM, with transmitter
located at New Scotland, N. Y., for the period April 1
to April 30, 1941.

KEMA—May Seed & Nursery Co. (assignor), May Broadcasting
Co. (assignee), Shenandoah, Iowa.—Entered order dismissing
application for voluntary assignment of license of relay
station KEMA (B4-ALRY-11).

WSVS—Board of Education, City of Buffalo, N. Y.—Granted
authority to install automatic frequency control equipment
on 1100 kc. under NARBA (B1-P-202).

KSCI—Perkins Brothers Co. (The Sioux City Journal), Sioux
City, Iowa.—Granted modification of construction permit
(B4-P-2290, which authorized installation of directional
antenna for night use, and increase in power) for changes
in directional antenna on 1300 kc. under NARBA, and
extension of completion date to 180 days after grant (B4-
MP-1236).

National Broadcasting Co., Inc., New York, N. Y.—Granted special
temporary authority to rebroadcast program over WEAF
and the Red Network entitled “Defense of America,” on
7 p.m. to 7:30 p.m. EST, March 29, 1941, to be received
from U. S. airplane in flight over Cleveland, Ohio; reception
to be effected by special temporary receiving station
by NBC in Cleveland.

APPLICATIONS FILED AT FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Corvallis, Oregon.—
Modification of construction permit (B5-P-2322) for new
transmitter installation of directional antenna increase in
power and move of transmitter, for extension of completion
date from 4-14-41 to 7-14-41.

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—License
to cover construction permit (B5-P-3078) for new trans-
mitter.

570 Kilocycles

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Modi-
fication of license to change hours from specified to un-
limited. Facilities of WOSU (agreement attached).

WOSU—The Ohio State University, Columbus, Ohio.—Construction
permit to install new transmitter, change frequency, power
and hours from 570 kc., 1 kw, to specified hours to
880 kc. (820 kc. under NARBA), 5 kw, broadcast to local
sunset at Dallas, Texas.

KUTA—Jack Powers, Frank C. Carman, David G. Smith and
Grant R. Wrathall, d/b as Utah Broadcasting Co., Salt Lake
City, Utah.—Modification of construction permit (B5-P-
2342) for new transmitter, directional antenna for day and
night use, change frequency, increase power and move of
transmitter, requesting changes in equipment, change direc-
tional antenna (day and night) increase power to 1 kw
night, 5 kw day; change proposed transmitter site, extend
commencement date to 180 days after grant and completion
date to 180 days thereafter.

WSYR—Central New York Broadcasting Corp., Syracuse, N. Y.—
Construction permit to install new transmitter, changes in
directional antenna (day and night use) and increase power
from 1 kw to 5 kw. Amended: re antenna.

WRCA—National Broadcasting Co., Inc., Bound Brook, N. J.—License to cover construction permit (B1-PB-29) as modified for increase in power, change in frequencies and equipment, International Station.

WNBI—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of construction permit (B1-PB-28) as modified requesting additional frequencies 13090 and 13150 kc, and extend commencement and completion dates to immediately and 30 days thereafter, also make changes in equipment.

KALW—Board of Education of The San Francisco Unified School District, San Francisco, Calif.—License to cover construction permit (B3-PED-14 as modified) for new non-commercial educational broadcast station.

NEW—San Diego Unified School District, San Diego, Calif.—Construction permit for a new non-commercial educational broadcast station to be operated on 42300 kc, 1000 watts, unlimited time, special emission for frequency modulation.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bard-Parker Co., Inc., and its subsidiary and selling agent, Parker, White & Heyl, Inc., both of Danbury, Conn., are charged, in a complaint, with misleading representation in the sale “Bard-Parker Formaldehyde Germicide.” According to the complaint the respondents, in periodical and circular advertisements disseminated in various States, represent that “Bard-Parker Formaldehyde Germicide” is an efficient, practical and certain sterilization medium for surgical and dental instruments, and that it is a safe substitution for heat sterilization. The complaint alleges that while the respondents’ preparation has germicidal properties it will not, when used in accordance with the technique ordinarily associated with sterilization, destroy all forms of bacteria, and is neither an efficient and certain sterilization medium nor a safe substitute for heat sterilization. (4478)

Bengor Products Company—A complaint has been issued charging Benjamin Gordon and Louis Gordon, trading as Bengor Products Co. and Magnet Merchandise Co., 878 Broadway, New York, with the use of lottery methods in the sale of merchandise. The respondents sell drug sundries, notions, household specialties, and other novelty merchandise.

The respondents, according to the complaint, sell to dealers assortments of merchandise so packed and assembled as to involve the use of a lottery scheme or game of chance when the merchandise is sold to the consuming public. Punch card devices are used, the complaint alleges.

Charging that the respondents’ practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondents 20 days for filing answer. (4474)

Boyer Brothers—Trading as Boyer Brothers, William E. Boyer and Robert J. Boyer, Altoona, Pa., have been served with a complaint charging the use of lottery methods in the sale of candy.

The respondents, according to the complaint, sell to wholesale dealers and jobbers assortments of candy, and cause push cards which are designed to be used with the assortments to be transported by means of the respondents’ salesmen and otherwise to such dealers and jobbers, who, in turn, assemble the push cards and candy into single assortments for sale to the retail trade. The complaint alleges that retail dealers sell the candy to the public in accordance with the respondents’ sales plan. The respondents, according to the complaint, thus supply to others the means of conducting lotteries in the sale of their candy.

Charging that the respondents’ practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondents 20 days for filing answer. (4475)

Charles B. Joyce Company—A complaint has been issued charging Morris L. Myers, trading as Charles B. Joyce Co., 2425 North Halsted St., Chicago, with the use of lottery methods in the sale of merchandise. The respondent sells radios, clocks, flashlights, clothing, and novelty merchandise.

The respondent, according to the complaint, sells to dealers and other purchasers assortments of merchandise so packed and assembled as to involve the use of a lottery scheme when the merchandise is sold to the consuming public. Punch board devices are used, the complaint alleges.

Charging that the respondents’ practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondents 20 days for filing answer. (4476)

Ragsdale, Inc.—A complaint has been issued charging an East Orange, N. J., group with misleading representations in the sale of instruction courses, outfits and supplies represented as offering an opportunity for a person to establish a candy business in his home. The respondents are W. Hillyer Ragsdale and Annie M., Marshall D., and Ida J. Ragsdale, trading under the names W. Hillyer Ragsdale, W. Hillyer Ragsdale, Inc., and Ragsdale Candies, 307 North Walnut St., East Orange, N. J.

The complaint alleges that through advertisements in periodicals circulated in various States the respondents represent that their outfits and instruction afford an opportunity for all men and women, regardless of prior training, experience, or capital, to enter the home-made candy making business; that such persons, upon purchase of the outfits and instructions, because of the respondents’ help, will be enabled to set themselves up in a profitable business which can be operated from or in the home, and that by use of the methods outlined in the respondents’ course and the equipment, tools, and supplies furnished, and because of the assistance given, all such men and women are assured of success and a steady income thereby start either on a part-time or full-time basis.

Alleging that there is no basis in fact for the various assurances given by the respondents to prospective purchasers of their instruction and equipment, the complaint charges violation of the Federal Trade Commission Act and grants the respondents 20 days for answering the charges. (4472)
Consolidated Book Publishers, Inc., 537 Dearborn St., Chicago, has been ordered to cease and desist from making misleading representations concerning its "Standard American Encyclopedia" and "Universal Dictionary of the English Language," which, according to findings, have been sold to newspapers and motion picture theaters for use as premiums to stimulate circulation or attendance, and to news agencies, the trade, and to retailers for sale to the public.

Commission findings are that the respondent represented in advertisements circulated in various States that the Standard American Encyclopedia is available to the public at a low price only because of its sponsorship by the American Home Library Foundation, represented as being a beneficent and educational institution. However, the findings relate that the American Home Library Foundation did not represent an organization of the type claimed, but was an affiliated corporation cooperating with the respondent in the sale of the encyclopedia for a profit, and that its activities did not lower the price of the materials.

The Commission order prohibits the respondent from making such representations and further directs it to cease advertising that the encyclopedia is a "Giant" home reference library; that the editorial cost of its production was a million dollars; that the supply is limited and that the "de luxe" edition's binding is made of anything other than imitation leather.

The order further directs the respondent to discontinue representing that the Universal Dictionary of the English Language is new throughout or is anything other than an American publication of a dictionary first published in England in 1932 under the same name by another publisher except for specified changes which, in fact, were made.

Under the order the respondent also is prohibited from representing that the definitions of the words or phrases of the 1932 edition of the dictionary have been newly written or rewritten; that 12 years or any longer period than was actually required was needed to prepare the dictionary for publication and in publishing the first edition, and that Oxford University or any such educational institution sponsored or contributed in any way to its publication. (4440)

Electrical Laboratories, Inc., 49 East 21st St., New York, manufacturer of aerial eliminators, antennae and other devices for use in connection with radio receiving sets, has been ordered to cease and desist from misrepresentations in the sale of its "Wesco Aerial Eliminator" or "Dynamic Antenna."

The Commission order directs the respondent to cease advertising that its device improves selectivity and tone, gives volume and distance equal to outdoor aerials and with better selectivity, and ends all dangers of lightning, storms, and short circuits, except insofar as these dangers may be due to the maintenance of an outside aerial.

Under the order, the respondent corporation also is prohibited from representing that its device eliminates clicks and noises resulting from wind and rain, except insofar as these may be due to the physical movement of an outside aerial resulting from such causes.

Commission findings are that the selectivity of receiving sets is dependent upon design, quality, workmanship, and other factors, and is not improved by the use of the respondent's device in place of an outdoor aerial. (3707)

Erie Laboratories, Inc.—A Cleveland group has been ordered to cease disseminating false advertisements in the sale of a medicinal preparation known as "Mrs. Bee Femo Caps" and as "Femo Caps," and "Bee Caps."

The respondents are Erie Laboratories, Inc., also trading as Mack Pharmaceutical Co., Allied Pharmaceutical Co., also trading as Erie Laboratories, Inc., and Melvin Rose, David F. Berland, and Rosen Kotenburg, officers and directors of Allied Pharmaceutical Co., all of 2108 Payne Ave., Cleveland.

The Commission order directs the respondents to cease and desist from disseminating advertisements which represent that their preparation is an effective treatment for delayed menstruation and will not permanently remove superfluous hair. The respondent's preparation, according to findings, is not safe or non-irritating because under the conditions of use it will irritate the skin and is likely to cause severe dermatitis and chemical burns. (3663)

Trudeau Candies, Inc., 287 East 6th Street, St. Paul, Minn., has been ordered to cease and desist from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise, or lottery scheme.

April 4, 1941 — 327
The Commission order further directs the respondent to cease and desist from supplying to others candy or any other merchandise, together with punch cards, push or pull cards or other lottery devices, or from supplying such devices, either with assortments of candy or other merchandise or separately, which devices may be used in selling or distributing such merchandise to the public.

(4376)

STIPULATIONS

The Commission has entered into the following stipulations:

Boutross Brothers—George Boutross, trading as Boutross Brothers, 320 Fifth Ave., New York, importer, has entered into a stipulation in which he agrees to cease employing the word “Tuscan” or the letters “Tusc.” in any modification of the word Tuscan as descriptive of articles not actually made in the Italian district or province of Tuscany of linen thread. The stipulation points out that true Tuscany lace is a hand-made fillet lace of grape design produced from linen thread in the Tuscany district of province of Italy. The respondent also stipulates that he will cease using the word “manufacturers” or any word of similar implication on his stationery or printed matter so as to imply that he manufactures the articles he sells, or owns and controls the plant in which they are produced. (3053)

John H. Breck, Inc., Springfield, Mass., entered into a stipulation in which it agrees to cease making certain representations in the sale of medicinal preparations or cosmetics known as “Breck’s Hair Tonic”, designated by the number 1A, 1B, or 3, “Breck’s Lather-Oil pH8 Shampoo”, “Breck’s Special Scalp Cream”, “Breck’s No. 1 Hair Cream”, “Breck’s No. 2 Hair Cream”, and “Breck’s Ointment.”

The respondent corporation agrees to desist from advertising, directly or by implication, or by pictorial illustration or otherwise, that any of its medicinal preparations or cosmetics, whether used alone or in combination with any other product, is a departure from other systems of treatment for the alleviation of hair and scalp troubles, or is a competent treatment or effective remedy for eczema of the scalp, psoriasis, alopecia areata, or for headache, troubles monthly periods, or sick stomach.

Under its stipulation, the respondent further agrees to cease representing, among other things, that any of its products is an effective remedy for adhesions or that it will bring about a normal condition of the scalp connective muscles; will cause hair to grow, save the old hair, stop or prevent falling hair or atrophy of the hair or the excessive loss of hair; that any such product will start or encourage new growth, quicken the growth of hair or delay the graying of hair; or will prevent the loss of hair following erysipelas, scarlet fever, and other diseases, or conditions, or restore or aid in restoring hair where the loss is due to such causes. (02757)

Ferd. T. Hopkins & Son—Ferd. T. Hopkins, trading as Ferd. T. Hopkins & Son, 430 Lafayette St., New York, has entered into a stipulation in which he agrees to cease advertising that “Mother-sill’s Seasick Remedy” will prevent or stop travel sickness or that it will assure travel comfort. The respondent’s stipulation relates that while this preparation may help to overcome some symptoms of travel sickness, it cannot be relied upon to stop or prevent them, nor to assure travel comfort. (02755)

J. L. Hopkins & Co., Inc., 220 Broadway, New York, has entered into a stipulation in which it agrees to cease representing that its product “Red-Rat-Squid” will kill rodents other than rats and mice and is the surest and most satisfactory way to destroy rats and mice; that it will check obnoxious odors; that tests of the product guarantee uniformity of toxic strength, and that baits mixed with the preparation and exposed to the air will not, over a protracted period of time, become rancid. According to the stipulation, the use of the respondent’s products will not accomplish the results claimed. (02758)

Marfadden Book Co., Inc., 205 East 42nd St., New York, entered into a stipulation in which it agrees to cease representing that the book “Hair Culture”, which it sells, contains methods, advice, or instructions which, when observed and applied, will prevent, correct the cause of, or cure, baldness, diandria, brittleness, split hair or greying hair; will prevent or stop falling hair where such condition is not caused by improper scalp hygiene, or will increase the strength of the hair. (02756)

Modern Company—Mariano Pollina, formerly in the business of distributing health food products at 16 West 22nd St., New York, under the trade names Vimm Wheat Germ Products Co. and Moderno Co., entered into a stipulation that he would not make certain representations concerning the products should he ever resume advertising or selling them.

The respondent Pollina asserted in his stipulation that he had sold his interest in the trade names and the food products to a corporation which is now operating.

Under his stipulation, the respondent Pollina agrees that he should ever resume the advertisement and sale of the products, he will not represent, directly or by implication, among other things, that the product “Vimm’s Wheat Germ Oil Capsules” will assure good health, and will normalize, strengthen, revive or prolong reproductive functions; that “Fortified Palm-Co” will prevent tooth decay, premature aging, nervousness or acidity, and is essential for growing children and pregnant women; that “Plain Palm-Co” assures digestive vigor, is a perfect natural food containing the greatest possible concentration of vital, health-forming elements in digestible form; and that “Vimm’s Whole Wheat Germ” is the world’s richest natural source of Vitamins B, E, and G, a good source of Vitamins A and C, and is concentrated with iron, copper, potassium, magnesium and manazanese or any of these elements. (02754)

Pioneer Manufacturing Co., 3053 East 87th St., Cleveland, stipulated that it will cease representing its product “KO” (Kills Odor) as meeting all the requirements for a perfect or ideal disinfectant. The respondent corporation also agrees to desist from the representation that its preparation will kill all forms of germs in 30 minutes or that it is effective for killing germs suspended in the air. (0352)

William Ganson Rose, Inc., 522 Terminal Tower, Cleveland, an advertising agency, stipulated that it will cease certain representations in the advertisement of “Rahnous Capsules” and “Rahnous Nasal Drops” on behalf of the distributor of those preparations, E. W. Kahn, Cleveland.

Under its stipulation, the respondent agency agrees to cease disseminating advertisements of Rahnous Capsules, Rahnous Nasal Drops No. 1, and Rahnous Nasal Drops No. 2, which represent that these products, alone or in combination, are an effective remedy, cure or preventive of colds or catarrh or that they are a competent treatment in excess of affording temporary relief from the symptoms and discomforts associated with such condition.

The respondent agency also agrees to cease advertising that by use of the preparations, alone or in combination, one will never be bothered with colds or will be enabled to forget colds, and that Rahnous Capsules are of aid in building body resistance or that they regulate the body. (02753)

W. F. Young, Inc., Springfield, Mass., has entered into a stipulation in which it agrees to cease making certain representations in the sale of the medicinal preparation “Absorbine, Jr.”

The respondent corporation agrees to cease advertising that Absorbine, Jr. kills the fungi of athlete’s foot so as to represent that it kills such fungi as are buried beneath the corneous layer of the skin. The respondent also stipulates that it will desist from the representation that the product has any effect upon tissues deeper than those supplied by the peripheral vascular system or that accepted laboratory tests have proved that it achieves such results.

According to the stipulation, while it is contended that the respondent’s preparation kills the fungi of athlete’s foot on contact, such fungi, during certain stages of development, are buried beneath the corneous layer of the unbroken skin and are then inaccessible to the product. The product has no effect on the tissues other than upon the peripheral vascular tissue structure, according to the stipulation. (02759)

328 — April 4, 1941
FTC DISMISSES COMPLAINTS

The Federal Trade Commission dismissed a complaint issued last November against W. Hillyer Ragsdale, Inc., 307 North Walnut St., East Orange, N. J., charging misrepresentation in the sale of a course of instruction intended to teach students the business of manufacturing candy in the home, and in the sale of certain supplies required in candy manufacture. Dismissal was ordered because the respondent's State charter of incorporation in New Jersey had been forfeited for non-payment of taxes and the respondent corporation was not extant when the complaint was filed and served.

The Commission has also dismissed a complaint charging Moskin Stores, Inc., 370 Seventh Ave., New York, operator of a chain of retail stores, with violation of the Federal Trade Commission Act in the sale of wearing apparel.

The Commission order states that it appears that the charges in the complaint are not sustained by the evidence.

THE WEEK IN WASHINGTON

*My Sister and I*, new BMI tune, is headed toward becoming an outstanding hit of 1941. Twelve of the most-played tunes on the networks are BMI's own. (p. 332)

Isaac Levy, WCAU, and J. H. Ryan, WSPD, were elected to the NAB Board of Directors for 1941-43 at recent district meetings. (p. 333)

The NAB advises members to comply with Secretary Knox' request about broadcasting information as to the arrival and departure of British warships. (p. 334)

District 4 sales managers met in Raleigh, N. C., where special merchandising demands from advertisers was the chief topic of discussion. (p. 334)

Advertisers were impressed by the industry's promotion in connection with frequency allocation. (p. 335)

A conference to study interference has been slated for May 10 at the University of Illinois. (p. 336)

The FCC issued a number of orders in connection with FM construction and operation. Gerald C. Gross was appointed assistant chief engineer at the FCC to succeed Andrew D. Ring. The FCC ordered a hearing on communications problems in the Gulf Coast area. (p. 337)

PROMOTIONAL DISPLAY AND EXHIBITS

The display of promotional material by the various stations is attracting widespread attention. A most complete showing of material from stations of all sizes is assured. The Crystal Room immediately adjoining the Ivory Room of the Jefferson Hotel in which the business sessions will be held, has been assigned for this exhibit. Many stations have indicated a desire to display motion pictures, for which a special room and facilities have been provided.

The associate members are now planning their exhibits which will be held in private rooms throughout the hotel. Most of the transcription companies, as well as many equipment manufacturers, now an integral part of NAB through associate membership, will be on hand.

GOLF TOURNAMENT

The golf tournament which is to be held on Monday afternoon, May 12, is assured of a splendid entry list. Robert Richardson, Jr., KWK and J. Roy Stockton, KSD, who constitute the St. Louis committee on arrangements have perfected their plans and everything indicates a rousing and interesting tournament. In addition to the trophy provided by Broadcasting magazine, additional prizes will be awarded the successful contestants. The tournament has been so set as to time so as not to interfere with any of the business or committee sessions.

LADIES INVITED

The St. Louis broadcasters, cooperating with the Convention and Publicity Bureau of St. Louis, are making plans for the proper entertainment of all ladies who attend the convention. The exact nature of these plans is (Continued on page 332)
NAB CONVENTION
(Continued from page 331)

not yet ready for disclosure but suffice it to say that they will be most interestingly entertained throughout the convention.

NON-MEMBER STATIONS

NAB member stations are urged to extend a cordial invitation to the officials of non-member NAB stations to be present at the convention in St. Louis. While this is an NAB convention, it is the meeting at which the industry discusses important policies and the more broadcasters present, the better. Then too, attendance at the convention may encourage membership. Be sure to invite all broadcasters.

BMI

NEW BMI SONG MAKES HIT

“My Sister and I,” the song based on the best-selling book by the same title, is rapidly fulfilling the predictions that it would become one of the outstanding hits of 1941. It is being featured by Jimmy Dorsey and his orchestra in the stage show at the Strand Theatre in New York beginning April 11, with Ray Eberle singing the words which were inspired by the diary of the twelve-year-old Dutch refugee. During the same week Don Baker, organist at New York’s Paramount Theatre, will make a special feature of the number with Sydney Lane singing. Joan Whitney, one of the writers of the song, will sing it in Wheeling, West Virginia, at a British War Relief concert to which she is giving her services along with Madeleine Carroll, Boake Carter, and other famous figures of the radio and entertainment world. Two days later, on April 27, Miss Whitney will sing the song on the Wheeling Steel program over the network of the Mutual Broadcasting System.

Phonograph records of the song by Bob Chester, Benny Goodman, Dick Jurgens, and Bea Wain have already been released. One by Leo Reisman is to be released within the week and four more are scheduled for the near future.

The song is the work of Miss Whitney, Alex Kramer, and Hy Zaret, writers of “So You’re the One,” “It All Comes Back to Me Now,” and numerous other BMI hits. Miss Whitney and Mr. Kramer also wrote “High on a Windy Hill” and Mr. Zaret did the lyrics for “There I Go.”

DEMAND FOR BMI MUSIC

In its issue for December 4, 1940 Variety dropped the box in which for years it had listed the tunes most played on the air, with an announcement that the box would be omitted “until the music situation is settled one way or the other, as between ASCAP and BMI . . . Variety will resume publication of ‘Most Played’ recaps as soon as something like comparative focus is possible.”

With its issue of April 9th Variety resumes its box with the following comment: “Dropped for some months, persistent trade demand prompted resumption of the plug’s breakdown even though ASCAP tunes obviously can’t be logged.” On the list for this week there are twenty-seven numbers headed by “You Walk By,” with “Georgia on My Mind” and “It All Comes Back to Me Now” pressing close in second and third places respectively. Of the total list, twelve numbers are BMI’s own publications; six are Marks; four are Southern; and Campbell, Warren, Embassy, Stevens, and Porgie have one each.

Billboard also discontinued its plug list for a short time but quickly resumed it in response to demands. The Billboard list, compiled from a somewhat more restricted number of hours and calculated for the week ending Thursday instead of the week ending Sunday, lists twenty numbers, also headed by “You Walk By,” and showing nine BMI publications, four Marks, three Southern, and one each for Embassy, Melody Lane, Campbell, and Stevens.
On the Billboard list of biggest money makers in the coin machines, the top six are all published or licensed by BMI.

Among the fifteen sheet music best sellers Variety shows ten, Billboard thirteen, from BMI and its affiliated publishers.

**BMI MUSIC BOOMS “POT O’ GOLD”**

BMI is cooperating with the distributors and local theatres in the promotion of the James Roosevelt motion picture, *Pot O’ Gold*, starring James Stewart and Paulette Goddard and featuring the Horace Heidt band and Charles Winninger. The BMI tunes—*Hi, Cy, What’s a Cookin’, Pete the Piper, and Broadway Caballero*—as announced in the distributors’ advance publicity release to the theatres, “are all the bases of the biggest production numbers in *Pot O’ Gold*.” When the picture was being shown at the Roxy Theatre in New York City the BMI office put displays advertising both music and picture shown at the Roxy Theatre in New York City the BAII

numbers in *Pot O’ Gold.*

The Horace Heidt record of *Broadway Caballero* (backed by Friendly Tavern Polka) has already been released—Columbia record No. 36006. The Heidt record of *Pete the Piper,* Columbia record No. 36053, will be released within a few days, and a Heidt recording of *Hi, Cy, What’s a Cookin’* is scheduled for the near future.

**LULLABY LANE IS ROAD TO SUCCESS**

This is no Horatio Alger story. Neither is the theme “from rags to riches” nor “how to make a million dollars writing songs.” It concerns two young men, Bob Warren of Brookline, Mass., and Bob Carleton of New York City, the writers of *No. 10 Lullaby Lane,* now among the ten best-selling songs in the country. You may be hearing it on the Hit Parade any week now.

To date more than 50,000 copies have been sold by Bob Warren, working alone from his bachelor apartment on East 49th Street, New York, far from the melodies of Tin Pan Alley. Warren does all his own typing, answers all mail and telephone calls, and hands out professional copies and orchestrations of his songs.

Warren, the scion of a wealthy family residing in swanky Brookline, a Boston suburb, came to New York last spring and in collaboration with Bob Carleton, who holds a responsible position in a New York bank, wrote *No. 10 Lullaby Lane.* The song was offered to several ASCAP publishers, who for one reason or another passed it up, the main excuse being that they had too many songs to exploit from their regular staff writers to give a newcomer a chance. Fortunately Warren and Carleton had enough money to finance publication of their own tune. When an author or songwriter spends his own money for publication, the results generally are not at all satisfactory. But this case was different. Warren and Carleton give full credit to Broadcast Music, Inc., through whose facilities the song was made available to 670 stations. Almost immediately after the break between ASCAP and BMI the song, originally written in an ASCAP publisher’s office, attained widespread popularity.

*No. 10 Lullaby Lane* has already been recorded by such top-notch orchestras as Eddy Duchin, Joe Reichman, Tony Pastor, Guy Lombardo, Tommy Tucker, and the sensational young vocalist Dinah Shore, now featured on Eddie Cantor’s network program.

The moral of this story, if any, might well be that even a rich boy with an idea may be a successful composer if he keeps everlastingly at it.

**District Meetings**

**DISTRICT 3**

Third District broadcasters, embracing stations in Pennsylvania, New Jersey and Delaware, met at Philadelphia on Monday, April 7. District Director Clifford M. Chafey, WEEU, Reading, presided.

Following a discussion of the music problem and a presentation of the BMI situation by Carl Haverlin, station relations manager, the following resolution was unanimously adopted:

Be It Resolved——That members of the National Association of Broadcasters of the Third District, in meeting assembled at Philadelphia, Pennsylvania today, hereby affirm our allegiance to Broadcast Music, Incorporated—that we congratulate this corporation on making possible such a large and complete catalogue of music which has been so universally accepted by the radio public, as indicated in surveys. We restate our contention that—to maintain a high standard of program service it is imperative that a free and competitive music market be maintained and that the open-door policy to opportunity for creative talent of the men and women of America be continued and inaugurated by Broadcast Music, Incorporated—that we will never become a party to any arrangement which does not definitely assure the continued development and perpetuation of Broadcast Music, Incorporated.

Joseph L. Miller, NAB Labor Relations Director, discussed the labor and Wages and Hours situation. He was followed by Frank E. Pellegrin, newly appointed Director of the Department of Broadcast Advertising. C. E. Arney, Jr., covered other phases of NAB’s activities.

Following the noon luncheon, the election of District Director for the ensuing two-year term was held and

April 11, 1941 — 333
Isaac Levy, WCAU, Philadelphia, was unanimously chosen.

The following were present:

James P. Begley, KYW; Leonard Kapner, WCAE; Leon Levy, WCAU; A. W. Dannenbaum Jr., WDAS; Clifford M. Chahey, Robert G. Magee, WEEU; Roy F. Thompson, WFBG; Roger Clipp, WFIL; Clair R. McCollough, C. G. Moss, J. Robert Gulick, WGAL; George D. Coleman, R. E. McDowell, WGBI; Milton Laughlin, WHAT; A. K. Redmond, WHP; Edward D. Cleri, WBNG; Benedict Gimbel, Jr., WIP; J. Gorman Walsh, WLIM; J. C. Tully, WJAC; Melvin Lahr, WKOK; J. C. Burwell, WMBS; Joseph M. Nassau, WMRF; Arthur Simon, WPEN; George E. Roy, T. W. Metzger, W. V. Person, WRAK; Raymond A. Gaul, WRAW; B. Bryan Musselman, WSAN; Howard S. Frazier, WSNJ; John Mayo, Associated Music Publishers, Inc.; Carl Haverlin, BMI; G. I. Jones, Graybar Electric Co.; R. C. Wentworth, Pierre Weihs, Lang-Worth Feature Programs, Inc.; Willie R. Parson, NBC Radio Recording Division; Leonard D. Callahan, SESAC, Inc.; Alex Sherwood, Standard Radio; A. B. Sambrook, World Broadcasting System; C. E. Arney, Jr., Joseph L. Miller, and Frank E. Pelligrein, NAB.

DISTRICT 7

J. H. Ryan, WSPD, Toledo, Ohio, was reelected director at a District 7 meeting April 4 in Cincinnati.

Neville Miller and Carl Haverlin, BMI station relations director, discussed the music situation at length, and Senator Burton K. Wheeler, in Cincinnati for another meeting, told the broadcasters about his opposition to federal operation of stations.

THE “MALAYA” MATTER

Several weeks ago, Secretary Knox of the Navy Department, sent out a memorandum to press associations, newspapers and radio stations, pointing out that British warships from time to time would be coming to the United States for repair. He asked that no mention be made of their arrival or departure.

On Sunday, April 6, H. M. S. Malaya steamed into New York harbor, a hole in her side, for repairs at the Brooklyn Navy Yard. Thousands of persons witnessed her arrival. That night, hundreds of British sailors, their uniforms designating their ship, were seen on New York streets.

Some newspapers printed the story. Some did not. A great deal of discussion of the matter followed in press and radio quarters.

The next day, Secretary Knox publicly commended those who did not use the story. At his Tuesday press conference, President Roosevelt did the same, and added that he thought no “censorship” would be needed. On Wednesday, Stephen Early, White House secretary, reiterated that the Government had no intention of establishing a domestic press censorship, but emphasized the fact that James L. Fly, chairman of the Federal Communications Commission, was chairman of a committee studying means of controlling international cable and radio messages so that defense secrets would not be transmitted abroad.

The matter came up when a reporter asked what value there was in a voluntary suppression by newspapers of news of the movement of foreign and domestic war vessels if news about them could be sent abroad by foreign agents legitimately in this country. Outright censorship of cablegrams, radiograms and mail going abroad is widely expected in case this country becomes involved in war.

Mr. Early remarked that there was one point he wished that President Roosevelt had mentioned yesterday. Some newspapers, Mr. Early said, called the present voluntary system an imposed censorship, whereas “it is an attempt to avoid a censorship.”

“Doesn't that imply that if the voluntary system is not followed a formal censorship will be imposed?” a reporter asked.

“This will work out on voluntary grounds,” Mr. Early answered. “It has got to work out on voluntary grounds. We don't want censorship; the newspapers don't want censorship; the President doesn't want it. I don't want it and Lowell Mellett (director of the Office of Government Reports) doesn't want it.”

Mr. Early said that the situation which grew out of the publication by some newspapers of the recent arrival in New York of a British battleship had a certain “educational” value. Newspapers would suppress such news voluntarily, he felt sure.

“Ships are not going inland,” he remarked. “All you have to do is educate the newspapers along the coast and the press associations. If you do that, and I think it can be done on a voluntary basis, you have no problem.”

The NAB is of the opinion that broadcasting stations should respect Secretary Knox' request.

FOURTH DISTRICT SALES MANAGERS

Increasing demands by advertisers for special merchandising services, and the possibility of establishing standards of merchandising practice for NAB stations highlighted the meeting of the Sales Managers' Division of the Fourth District, held March 28 at Raleigh, N. C.

By unanimous vote, delegates agreed to file with Chairman J. H. Field, Jr., a list of merchandising services made available to advertisers by each station, as a first approach to the problem. In this study it was urged that each station differentiate between “merchandising” and “station promotion”, the latter to include those activities designed to publicize the station itself.

A later resolution, failing of unanimity by one vote, provided “that the Fourth District request that the NAB take the position that merchandising policies should occupy the same ethical position as other services offered
on the rate card, and that this policy should be made available in printed form by each individual station and adhered to."

The case for smaller stations was presented by John Thayer of WWNC, who pointed out that competition with larger stations sometimes necessitated extra merchandising efforts. Several delegates took issue with the practicability of establishing rigid standards, but it was generally agreed that serious steps must be taken to curb the increasing demands on the part of agencies buying national spots.

Principal luncheon speaker was E. N. Pope, advertising manager of the Carolina Power and Light Company, who discussed power for industry and national defense.

Other topics discussed included an inter-station program and idea exchange and various commercial program ideas. Manager Richard Mason of WPTF and Chairman Field were hosts to the group at luncheon.

Others attending were Barron Howard, WRVA, Richmond; Henry Nigrelli, Graham Poyner, Richard Mason and Ollie Carpenter, WPTF, Raleigh; John E. Thayer, WWNC, Asheville; W. C. Irwin, WSOC, Charlotte; Harold Essex, WSJS, Winston-Salem; E. S. Whitlock, WRNL, Richmond; John Moorhead and Knox Massey, Harvey-Massengale Co.; Frank Jarman and Lewis Brown, WDNC, Durham; Royal Penny, WBT, Charlotte; E. E. Reed, Carolina Sales Co.; Dudley Saumenig, WIS, Columbus; Leslie H. Peard, Jr., WBAL, Baltimore; Frank M. Stearns, WRAL, Raleigh; Pat Taylor, WMFR, High Point; E. N. Pope, Carolina Power & Light Co.; Bert Hanauer and Robert S. Maslin, WFBR, Baltimore; John New and Travis Barnes, WTAR, Norfolk, and John H. Dodge, WRC-WMAL, Washington.

**ADVERTISER THREATENS SUIT**

An object lesson in why NAB member stations should refuse to enter into per-inquiry or contingent deals with advertisers is shown by a recent exchange of correspondence between one member station and an advertiser, the Mendenhall Manufacturing Co., whose request for per-inquiry deals had received previous publicity in NAB Reports.

The station believed it had a straight card-rate contract and carried the announcements. The advertiser paid for the first four "test" announcements, but because returns did not meet the inquiry cost he set, refused further payment and wrote the station as follows:

"I will demand that you make correct and recall your letter to the National Association of Broadcasters, and I contend that I do not owe you anything. The agreement was that you were to pull 4 returns for every dollar or cancel the announcements promptly.

"You can either do the above or the matter will go to my attorney, and I will enter suit against you for damages. . . ."

Unless all stations cooperate in presenting a united front to advertisers such as the above, they encourage such practices in the future on the part of others. This again emphasizes the need for a uniform policy on the part of stations with respect to this type of business.

**PER-INQUIRY OFFER**

Made by Rogers & Smith Advertising Agency, Chicago, on behalf of an unnamed nursery account.

That agencies and advertisers are becoming increasingly aware of the attitude of NAB member stations towards deals of this kind may be indicated by a statement in the Rogers & Smith letter: "All matters pertaining to any agreement that we may reach will be held in strictest confidence." It is the opinion of the NAB Department of Broadcast Advertising that legitimate advertising proposals can afford to stand the light of day.

We have written this advertiser assuring him that radio, when properly used, is an effective advertising medium and can be profitably purchased at regular card rates, and we have invited him to use it on that basis.

**COOPERATIVE ADVERTISING APPROVED**

Dealer-cooperative advertising has been approved in the rayon yarn field by the American Bemberg Corporation, under a plan whereby the company will contribute one cent per pound for the promotion of Bemberg rayon provided weavers or dealers contribute an equal amount for 50-50 promotion.

Cooperative advertising in the rayon field was discontinued several years ago because of abuses of advertising allowances. This action by the Bemberg company is expected to restore this type of revenue to radio and other media, and it is likely that the plan will be later expanded to include other fabrics.

**Promotion**

"56 DAYS" SUCCESSFUL

The twelve-page brochure, "56 Days," mailed all stations and agencies, has apparently done the job for which it was intended. Its purpose was to reassure agencies and their clients by pointing out the vast amount of promotion and education which stations sponsored in order to move listeners to new dial positions.

The net result of station activity was as prophesied—listeners were successfully moved and listening increased.

It will be some time before all the push-button sets
are changed over and stations are urged to keep telling listeners to have this job done by their servicemen.

PUBLIC RELATIONS JOB

Otherwise listeners will frequently or infrequently forget their manual tuning, push a button and get a wrong station. This in turn will cause a momentary outburst of indignation, unfortunately not against the forgetful listener, but against the station.

Getting all push buttons changed is a public relations job of the first magnitude.

Things which make "56 Days" a mighty under-statement of industry effort are typified by letters and enclosures from stations.

WJTN, for example, sent full page tear sheets from the Jamestown (N. Y.) Post and the Jamestown Evening Journal. WSB, Atlanta, sent a package of tear sheet advertising copy from the Atlanta Journal.

Craig Rogers, publicity director, KYDL, on behalf of all the stations in Utah, wrote that committees from all stations held conferences and mapped out the campaign that was to inform the radio public of the change-over. It was so complete, he said, that a telephone survey throughout the State indicates that all listeners are happily moved.

W. H. Summerville, general manager, WWL, New Orleans, distributed, on April 7, a brochure which illustrated promotion undertaken by that station throughout its entire service area.

THE MORAL

"The moral of it is," said Edney Ridge, director, WBIG, Greensboro, N. C., "that if a blind hog keeps on rooting he is obliged to get an acorn occasionally!" The Major's observation is the result of his being notified by Billboard that WBIG had been awarded third place in the magazine's fourth annual exploitation survey.

WEATHER STATIONS

Modern developments in the field of radio transmission have made it possible to devise an automatic weather station capable of unattended operation for periods up to one month—and possibly three months in the future—at isolated locations, such as mountains and islands, according to the Department of Commerce.

The Aerological Division of the Bureau of Aeronautics, Navy Department, pioneered in this field. To meet the requirements of the Navy aerologists, the National Bureau of Standards, Department of Commerce, developed an ingenious but simple transmitting apparatus for use in such stations.

The automatic radio weather station is an outgrowth of the radio-sonde used for making weather measurements at stratospheric altitudes and now in general and successful daily operation. The radio-sonde also was developed by the Bureau of Standards, in cooperation with the Navy and the Weather Bureau.

For years weather measurements have been made and transmitted automatically by the use of wire lines and will address the members of the conference on the subject "The Commission's Place In The Interference Problem." The balance of the program is as follows:

The Generation of Combination Frequencies In A Non-Linear Element, Professor H. J. Reich, University of Illinois; Multiple Response In Receivers In Strong Radio Frequency Fields, R. M. Plank, Radio Manufacturing Engineers; Panel Discussion on Amateur-Broadcast Interference, Larry Bargarrye, W9Q1, a radio amateur, and Ted Giles, WMBD, a broadcast engineer; A Message From the National Association of Broadcasters, Lynne C. Smeby, Director of Engineering, NAB; Detection and Analysis of Damped Wave Radio Interference, Leon Podolsky, Sprague Products Company; Case Histories in Interference Trouble Shooting and Public Relations in Interference Work, Professor M. A. Faucett, University of Illinois and Representatives of Public Service Companies; Interference Reducing Antenna Systems, Alfred Crossley and Nickolas Hogenbirk, Belden Manufacturing Company; The Design and Adjustment of Transmitters to Eliminate Spurious Radiations, Dana Pratt, RCA Manufacturing Company.

The date of the conference falls on the Saturday before the opening of the NAB Annual Convention in St. Louis and therefore, a stop-over in Urbana on the way to the convention, will allow attendance at this important conference.

A registration fee will not be charged for the conference and it has been announced that the price of the banquet tickets will be nominal. For further details and registration, communicate with A. James Ebel, Radio Station WILL, University of Illinois, Urbana, Illinois.
received and interpreted at central and field stations. The new mechanism worked out for the Navy represents a modification of methods already devised for wire lines to accommodate their use to radio and make them more adaptable to radio technique.

An automatic weather station may be equipped to make and transmit measurements of barometric pressure, ambient temperature and relative humidity, wind velocity and direction, rainfall, and probably other factors.

Each of the measurements noted may be indicated at a remote point by radio through the simple process of converting the deflection of the measuring instrument into a corresponding variation of electrical resistance and translating the resistance variation into the variation of a modulation frequency on the emitted carrier wave.

Such a station permits the use of standard radio transmitting and receiving equipment and of standard weather instruments with but slight modification. The modulation and control equipment, however, is special.

**FEDERAL LEGISLATION**

**HOUSE**

H. R. 4206 (Keogh, D. N. Y.) **DAYLIGHT SAVING TIME**—To provide daylight saving between the last Sunday in April and the last Sunday in October in each year. Referred to Committee on Interstate and Foreign Commerce.

**STATE LEGISLATION**

**NEBRASKA**:

Bill No. 504 (Reynolds) **STATE EMPLOYMENT AGENCY**—To amend Sec. 48-604 C. S. Supp., 1939, relating to labor and the establishment of rules for the commissioner of labor in referring employees to certain organizations for employment.

**PENNSYLVANIA**:

H. 1127 (Corrigan) **EMPLOYMENT AGENCIES**—Providing for the registration and licensing of employment agencies; providing for suspension and revocation of licenses and reinstatement after appeal; providing penalties and repealing existing laws. Referred to Committee on State Government.

**RHODE ISLAND**:

H. 852 (Horban) **OPTOMETRISTS AND OPTICIANS**—Amending sections 1, 2, 3, 5, 9, 11, 12 and 13 of chapter 277 of the general laws of 1938, entitled "Licensing and regulation of optometrists and opticians," as amended. Referred to Committee on Finance.

**FEDERAL COMMUNICATIONS COMMISSION**

The FCC has announced that various applications by newspaper interests for FM (Frequency Modulation) authorizations have, pursuant to Order No. 79 and related announcements, been acted upon as follows:

Gordon Gray, Winston-Salem, N. C.—Ordered issuance of construction permit under the last proviso of Order No. 79, upon finding that public interest, convenience and necessity will be served by construction at this time.

South Bend Tribune, South Bend, Ind.—Ordered issuance of construction permit with condition that no construction facilities shall be undertaken or completed until the Commission has acted on the general newspaper-ownership question.

Evening News Assn., Detroit, Mich.—Like action.

Milwaukee Journal, Milwaukee, Wis.—Like action.

Walker & Downing Radio Corp., Pittsburgh, Pa.—Like action.

Baton Rouge Broadcasting Co., Baton Rouge, La.—Like action.

WBNS, Inc., Columbus, Ohio.—Like action.

WGN, Inc., Chicago, Ill.—Placed in pending file. Application for modification of construction permit previously granted.

Rockford Broadcasters, Inc., Rockford, Ill.—Like action.

The foregoing action was without prejudice to the provision in Order 79 that newspaper interests whose applications for FM stations had already been acted upon could come in and make a special showing that they should be allowed to go ahead immediately.

A. S. Abell Co., Baltimore, Md.—Placed in pending file. Application for construction permit to cover 6,040 square miles on 46,500 kilocycles.

The Commission also granted special temporary authorization to the Milwaukee Journal to operate commercially for a period of 60 days its FM experimental station. The grant was made subject to any rules and regulations which might later be adopted by the Commission in the newspaper investigation.

**FM APPLICATIONS**

Pending the determination of what policy or rules, if any, should be promulgated with respect to newspaper operation of broadcast stations, the FCC has adopted a procedure of holding in its pending files all applications by newspaper interests for FM (frequency modulation) authorizations not acted upon before March 19, when Order No. 79 was issued looking to the inquiry which will consider the policy to be followed in all such cases.

This procedure will enable these applications to be considered as a group on the basis of Commission findings as the result of contemplated public hearings on the general question.

As provided in Order No. 79, newspaper interests announced as eligible for FM construction permits prior to the March 19th inquiry action are being issued such permits subject to the condition that no construction shall be undertaken until the Commission has taken action on the newspaper-ownership matter. Meanwhile, if any such newspaper interest can show to the satisfaction of the Commission that it should be allowed to go ahead immediately, it will be permitted to do so.

**GROSS HEADS ENGINEERING DIVISION**

Appointment of Gerald C. Gross as Assistant Chief Engineer and Chief of the Broadcast Division of the FCC Engineering Department was announced today. Mr. Gross will succeed Andrew D. Ring, resigned. George P. Adair was named Assistant Chief of the Engineering Department's Broadcast Division and received

April 11, 1941 — 337
a promotion in grade. Philip F. Siling was appointed Chief of the International Division, Engineering Department, succeeding Mr. Gross.

Mr. Gross participated in the formation of the Engineering Division of the Federal Radio Commission in 1928, and for some time past has served as Chief of the International Division of the present Commission’s Engineering Department. He has represented the Government at 21 international conferences on communications, and has served since 1933 as Secretary of the Interdepartment Radio Advisory Committee.

Born in New York City on December 27, 1903, Mr. Gross obtained his elementary schooling in France, and was graduated from Haverford College, Haverford, Pa., in 1926 with a B.S. degree. At Haverford he was instrumental in setting up one of the first college broadcasting stations in the United States. He later served as radio and communications officer on a number of ships in the American Merchant Marine. Since 1932 he has held a commission in the Naval Reserve.

Formerly on the staff of the Bureau of Standards, Mr. Gross specialized in communications engineering. He contributed to the development of the present aviation interlocking aural beacon, and was also in charge of the standard frequency transmissions.

A native of Texas, being born at Rancho on December 8, 1903, Mr. Adair obtained his B.S. in electrical engineering from Texas A. & M. College. After varied experience in the field of electrical engineering he entered Federal service through the Federal Radio Commission in 1931.

Mr. Siling was born in East Orange, N. J., August 14, 1897, and was graduated from Yale University in 1917 with a Ph.B degree in electrical engineering. He was associated with the American Telephone and Telegraph Company in various capacities from 1917 to 1929 and with the International Telephone and Telegraph Corporation as Outside Plant Engineer and Acting Plant Operations Engineer from 1929 to 1933. He was Assistant Deputy Administrator with the National Recovery Administration from 1933 to 1935. In 1935 he joined the Federal Communications Commission as a Telephone Engineer and in 1937 was appointed Assistant Chief of the International Division of the Engineering Department, a position he has held to date.

The following additional appointments were made in the Broadcast Division, Engineering Department:

John A. Wiloughby, Chief, Standard Broadcast Applications Section.
Robert M. Silliman, Assistant Chief, Standard Broadcast Application Section.
William C. Boesc, Chief, Non-Standard Broadcast Application Section.
Clyrl M. Braum, Assistant Chief, Non-Standard Broadcast Application Section.
Clare H. Owen, Chief, Hearing Section.
H. Underwood Graham, Chief, Allocation Section.

James E. Barr, Assistant Chief, Allocation Section.
A. L. Kreis, Chief, Monitoring Equipment Section.
Maxine Colonna, Chief Clerk, Records Section.

**FCC ORDERS HEARING**

The FCC announced an informal public hearing for the purpose of obtaining information relative to certain communication problems that have arisen in the Mississippi delta and the Gulf Coast area of southeastern Texas. The hearing will take place in the Texas State Hotel, Houston, beginning 10 a.m. on May 1, 1941, before Commissioner Paul A. Walker.

Complaints have been received of interference on maritime frequencies due to the excessive use of these frequencies in connection with operations of the oil industry in the coastal waters and marshes of Louisiana and Texas. These operations, which are a development of recent years, present a unique problem because of the difficult conditions under which they are conducted.

A large portion of the area is of such a swampy nature as to make construction and maintenance of wire lines impossible, or impractical. Some oil operations are conducted in shallow open water under conditions that require the removal of crews upon the approach of a storm from the Gulf. Consequently, the oil industry has resorted to, and depends upon, radio to a considerable degree for communication purposes.

The Commission will also seek information with respect to the communication needs of vessels navigating the canals and inland waters in the area between New Orleans and Houston.

**“MONOPOLY” REPORT**

At a press conference early this week, FCC Chairman James Lawrence Fly answering a question regarding the status of the monopoly report of the Commission said that the Commission had two meetings last week on the report and expects to have two meetings this week. While Mr. Fly did not make any statement regarding it, there has been a story around the Commission for sometime that it is pointing toward April 15 as the date to complete its work on the report.

Chairman Fly was asked at the conference if any Fifth Columnists were being unearthed by the Commission’s new listening post set up. Mr. Fly explained that this new division is not primarily intended to deal with Fifth Columnists’ activities but in the main is to analyze propaganda as distinguished from subversive conduct of individuals. Mr. Fly told the conference that there has been much difficulty in getting the top men for this new work, explaining that men so qualified by training and experience are few. He said he hoped to have an announcement on this subject in the near future.
FROM THE FCC MAIL BAG

"Radio news reporters all say 'quote' but only one reporter always says 'unquote' ... How are we to know what the quotation is if the reporters do not say 'unquote'? Issue an order and enforce it."

Thus a Californian writes the Federal Communications Commission.

A New Hampshire listener wants the Commission to require that newscasts be "free of advertising."

An Illinois fan seeks a ban on advertising on the radio on Sundays.

A Houston resident objects to new broadcasts from Berlin as propaganda; a Los Angeles resident objects to broadcasts from London on the same ground.

To such suggestions the Commission reiterates that it has no power of censorship over radio artists or programs, and that responsibility for the selection of both rests with the individual station licensees, who are required to operate in the public interest. Under such circumstances, complaints about particular programs should more properly be addressed to the station or network involved.

A letter from Berkeley, Calif., expresses apprehension that certain radio programs incite rebellion of children against parental supervision, while a communication from Newark, N. J., urges "a tightening of the controls on the part of a duly constituted Federal agency with respect to radio programs designed for children." Pointing out, again, that the Communications Act does not give the Commission authority to pass upon individual programs, the Commission suggests that both inquirers may be interested in the results of a nation-wide survey of children's programs now being conducted by the Radio Council on Children's Programs in cooperation with the National Association of Broadcasters.

A Los Angeles woman deplores the advertising of wines over the radio. Neither the Communications Act nor the Commission's rules and regulations preclude liquor advertising on the air. However, the code of ethics of the National Association of Broadcasters frowns on advertising of "hard or spirituous liquors," and it is the policy of certain networks to decline programs sponsored by liquor interests.

Radio interference is bothersome to a District of Columbia woman. The Commission advises:

"Ordinarily, a frequency separation of 50 kilocycles or more, such as is employed in Washington, is sufficient to prevent objectionable cross-talk interference even when the receiver is operated at a location in the immediate vicinity of the transmitter. Unfortunately, receivers of certain designs, when operated near the transmitter of one station, are not capable of separating the signals of that station from those of another station even when the latter is 50 kilocycles removed. The performance of such sets so located may be improved materially by employing a "wave trap", a simple and inexpensive device which is easily installed and operated."

An Austin, Texas, firm is informed that the Communications Act requires an announcement in the case of any sponsored program sufficient to disclose the identity of the sponsor and that the program is sponsored. The identity of the actual sponsor rather than the advertising agency making arrangements for time, must be disclosed. However, no particular form of making such announcement is prescribed.

To a Mississippi request for Commission views as to whether the owner and operator of a broadcast station could be properly classed in a national defense industry for the purpose of the Selective Service Act, the Commission writes:

"Inasmuch as the Selective Service Act prohibits occupational deferments as such, and leaves the decision in individual cases to the sound discretion of the local draft boards, it is not the Commission's policy to issue statements such as that requested in your letter. Matters of general policy in making determinations are for consideration by Selective Service Headquarters, and your letter is being referred to the Director of the Selective Service for his consideration. You will understand that the Commission's policy is not based upon any failure on its part to appreciate the national importance of the contributions of the personnel of the broadcasting industry but rather upon basic considerations of an orderly administration."

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

Following hearings are scheduled to be heard before the Commission in broadcast and television cases during the week beginning Monday, April 14. They are subject to change.

Monday, April 14

To be Heard Before Commissioner Paul A. Walker, in Ocala, Fla.
WTMC—Ocala Broadcasting Company, Inc., Ocala, Fla.—In the Matter of Revocation of License of Station.

In Washington, D. C.

NEW—Western Massachusetts Broadcasting Co., Pittsfield, Mass. —C. P., 1500 kc. (1890 kc. under NARA); 100 watts; unlimited.

Tuesday, April 15

Television

W1XG—General Television Corporation, Boston, Mass.—Modification of license (considered as construction permit); 56000-56300 kc., 500 watts visual emission A-5, Sec. 4.4(a).

Present assignment: 42000-56000, 60000-86000 kc., 500 watts visual emission A-5, Sec. 4.4(a).

W1XG—General Television Corporation, Boston, Mass.—C. P., 142000-36000, 60000-86000 kc., 500 watts aural and visual emission A-5 and A-3, Sec. 4.4(a).

Present assignment: 36000-56000, 60000-86000 kc., 500 watts visual only, emission A-5, Sec. 4.4(a).

Wednesday, April 16

WNAX—South Dakota Broadcasting Corp., (Transferee) and Iowa Broadcasting Co., (Transferee). Yankton, S. D.—Transfer of control of Station WNAX, 570 kc.; 1 KW night, 5 KW day; unlimited.

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 890 kc.; 500 watts night; 1 KW day; SH-KUSD.

Thursday, April 17

To Be Heard Before Commissioner Paul A. Walker, in the Court Room of the County Court House, at Panama City, Florida.

WDLP—Panama City Broadcasting Company, Panama City, Fla. In the matter of revocation of license of station.

Friday, April 18

NEW—J. Leslie Doss, Bessemer, Ala.—C. P., 1370 kc.; 250 watts; unlimited.

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

WCXW—Arthur Fiske, Brooklyn, N. Y.—Granted modification of temporary authorization to increase night power from

April 11, 1941 — 339
100 to 250 watts; operating on 1600 kc. (NARBA); specified hours (B1-ML-681).

WLAC—WLAC Broadcasting Service, Nashville, Tenn.—Granted amended construction permit to increase power from 5 to 50 KW, move transmitter from 5 miles from city limits to 7 miles north of center of Nashville on Dickerson Pike, install new transmitter and directional array for night use; 1510 kc. (NARBA), unlimited time (B3-P-1250). WOEN—Evensons Broadcasting Co., Inc. (Transferees), L. W. Hager, W. B. Hager, and George M. Fuqua. (Transferees).—Granted consent to the transfer of ownership of WOEN Broadcasting Co., Inc., licensee of station WOEN, from the Evensons Broadcasting Co. to L. W. Hager, W. B. Hager, and George M. Fuqua, representing 191 of the 200 shares issued and outstanding capital stock, for a consideration of $9,100. Station operates on 1190 kc. (NARBA), 250 watts, unlimited time (B2-TC-246).

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted amended construction permit to increase power from 500 watts to 5 KW, install new transmitting equipment and directional antenna for both day and night time use; 1140 kc. (NARBA), shares-WCBS (B2-P-2637). KCRC—Emid Radiophone Co., Enid, Okla.—Granted construction permit to install directional antenna for day and night use and install new transmitter and increase power from 250 watts to 1 KW, 1390 kc. (NARBA), frequency, unlimited time (B3-P-2810).

WGAI—J. K. Patrick, Earl B. Braswell, Tate Wright, C. A. Rowland, and A. Lynne Brannen (d/b as J. K. Patrick and Company, Assignees), Athens, Ga.—Granted voluntary assignment of license of station WGAI from J. K. Patrick, Earl B. Braswell, Tate Wright, C. A. Rowland, and A. Lynne Brannen (d/b as J. K. Patrick and Company (Assignor), J. K. Patrick, Earl B. Braswell, Tate Wright and C. A. Rowland, d/b as J. K. Patrick & Co.; 1310 kc. (NARBA); 250 watts, unlimited time (B3-AL-284).

KWJJ—KWJJ Broadcast Co., Inc., Portland, Ore.—Granted modification of construction permit to use directional antenna for day and night use and approval of present site (Oak Park, Portland, Ore.); 1080 kc.; 1 KW night and day; unlimited time (B5-MP-1190).

WCAO—The Monumental Radio Co., Baltimore, Md.—Granted construction permit to increase day and night power from 500 watts, 1 KW day, unlimited time on frequency 1490 kc. to 1 KW unlimited time on same frequency, and dismissed said petition for rehearing (B4-ML-651).

KCRO—Emid Radiophone Co., Enid, Okla.—Granted request to dismiss its petition for rehearing directed against the action of the Commission, October 22, 1940, granting the application of KLPM, Minot, N. D., for modification of license to increase power from 500 watts night, 1 KW day, unlimited time on frequency 1490 kc. to 1 KW unlimited time on same frequency, and dismissed said petition for rehearing (B4-ML-651).

WAGU—J. K. Patrick, Earl B. Braswell, Tate Wright, C. A. Rowland, and A. Lynne Brannen. (d/b as J. K. Patrick and Company (Assignor), J. K. Patrick, Earl B. Braswell, Tate Wright, C. A. Rowland, and A. Lynne Brannen (d/b as J. K. Patrick and Company (Assignee), Athens, Ga.—Granted voluntary assignment of license of station WAGU from J. K. Patrick, Earl B. Braswell, Tate Wright, C. A. Rowland, and A. Lynne Brannen, d/b as J. K. Patrick & Co., to J. K. Patrick, Earl B. Braswell, Tate Wright and C. A. Rowland, d/b as J. K. Patrick & Co.; 1310 kc. (NARBA); 250 watts, unlimited time (B3-AL-284).

WCAO—Lewis M. Milbourne and Clarence VV. Miles (as voting trustees of a new voting trust agreement) (Transferees), The Monumental Radio Co., Baltimore, Md.—Application for consent to transfer control of The Monumental Radio Co., licensee of Radio Station WCAO, from Lewis M. Milbourne and Clarence W. Miles (as voting trustees of a new voting trust agreement) to J. K. Patrick and L. Waters Milbourne (as voting trustees of a new voting trust agreement); 600 kc.; 500 watts night; 1 KW day; unlimited time (B1-TC-263).

MISCELLANEOUS

KCRO—Emid Radiophone Co., Enid, Okla.—Granted request to dismiss its petition for rehearing directed against the action of the Commission, October 22, 1940, granting the application of KLPM, Minot, N. D., for modification of license to increase power from 500 watts night, 1 KW day, unlimited time on frequency 1490 kc. to 1 KW unlimited time on same frequency, and dismissed said petition for rehearing (B4-ML-651).

WCAO—Lewis M. Milbourne and Clarence W. Miles (as voting trustees under a voting trust agreement of April 15, 1931) (Transferees), The Monumental Radio Co., Baltimore, Md.—Application for consent to transfer control of The Monumental Radio Co., licensee of Radio Station WCAO, from Lewis M. Milbourne and Clarence W. Miles (as voting trustees of a new voting trust agreement) to J. K. Patrick and L. Waters Milbourne (as voting trustees of a new voting trust agreement); 600 kc.; 500 watts night; 1 KW day; unlimited time (B1-TC-263).

West Virginia Broadcasting Co., Inc., E. St. Louis, Ill.—Application for construction permit to change frequency from 1390 to 1540 (under NARBA), increase night power from 250 to 500 watts, day power from 250 watts to 1 KW; move transmitter locally to 1 mile southeast of city limits at Golden Gardens, St. Clair Co., Ill.; install new equipment and vertical antenna, conditional to no interference to Cuba (B4-P-2832).

WREN—WREN Broadcasting Co., Inc., Lawrence, Kans.—Adopted order designating for hearing the amended application filed by WREN (B4-P-2272) requesting authority to increase nighttime power from 1 to 5 KW, install a directional antenna for day and night use, and move transmitter from Tonganoxie, Kans., to a site within the metropolitan area of Kansas City, Kans., and to move main studio from Lawrence, Kans., to a site to be determined in Kansas City, the studio at Lawrence to be continued for auxiliary purposes. The order to determine whether a fair, efficient and equitable distribution of radio service among the several states and communities can be better achieved by continued operation of WREN with its main studio at Lawrence, Kans., and its transmitter at Tonganoxie, Kans., or by its operation with both its main studio and transmitter at Kansas City, Kans., as proposed in its application. The Commission's Order of February 26, 1941, granting the application in part, is vacated.

KPAC—Port Arthur College, Port Arthur, Tex.—Application for modification of license to increase night power from 500 watts to 1 KW and make changes in directional antenna; 500 watts day; unlimited time, directional antenna nighttime; 1230 kc. (B3-ML-956).

The Constitution Broadcasting Co., Atlanta, Ga.—Application for construction permit for new station to operate on 550 kc., 1 KW night, 5 KW day, unlimited time; directional antenna at night; studio site to be determined at Atlanta, Ga. (B3-P-2905).

WCAO—Lewis M. Milbourne and Clarence W. Miles (as voting trustees under a voting trust agreement of April 15, 1931) (Transferees), The Monumental Radio Co., Baltimore, Md.—Application for consent to transfer control of The Constitution Broadcasting Co., Atlanta, Ga.—Application for consent to transfer control of The Monumental Radio Co., licensee of Radio Station WCAO, from Lewis M. Milbourne and Clarence W. Miles (as voting trustees under a voting trust agreement) to J. K. Patrick and L. Waters Milbourne (as voting trustees of a new voting trust agreement); 600 kc.; 500 watts night; 1 KW day; unlimited time (B1-TC-263).

WORKF—Lewiston Broadcasting Co., Lewistown, Pa.—Granted...
modification of construction permit which authorized new standard broadcast station to be operated on 1500 kc., 250 watts, unlimited, for authority to change frequency to 1470 kc. in accordance with NARBA.

KPOW—Albert Joseph Meyer, Powell, Wyo.—Granted modification of construction permit which authorized new standard broadcast station to operate on 1200 kc., 250 watts, unlimited, for change of frequency to 1230 kc. in accordance with NARBA.

KLS—S. W. Warner & E. N. Warner, d/b/a Warner Bros., Oakland, Calif.—Granted modification of construction permit which authorized increase in power from 250 watts to 1 kW, new transmitter and changes in antenna, for change in frequency from 1290 to 1310 kc. in accordance with NARBA.

KFMB—Worcester Broadcasting Corp., San Diego, Calif.—Granted modification of construction permit which authorized new standard broadcast station to operate on 1120 kc., 250 watts, unlimited, for change of frequency to 1150 kc. in accordance with NARBA.

WSOC—Radio Station WSOC, Inc., Charlotte, N. C.—Granted modification of construction permit which authorized installation of new antenna, move studio and transmitter, install new transmitter and increase power from 100 watts night, 250 watts LS, to 250 watts, for change in frequency from 1210 to 1240 kc. in accordance with NARBA.

W9XBK—Balaban & Katz Corp., Chicago, Ill.—Granted extension of special temporary authority to operate two transmitter units to be installed and operated from the State-Lake Blvd., Chicago; Link Transmitter Type No. 25-UBX, 25 watts aural; temporary steel tower to be used on roof of said building, in order to conduct tests for period April 19 to not later than May 18, 1941, in accordance with construction permit.

WLWO—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to operate the equipment of International Broadcast Station WLWO with a power input to the final stage of 100 kw for the period April 1, 1941, to not later than April 30, 1941, in order to obtain data which may be useful in connection with application for a construction permit.

W19B—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to rebroadcast programs of High Frequency Station WIXOJ for the period ending in no event later than May 17, 1941.

WARM—Union Broadcasting Co., Scranton, Pa.—Dismissed as unnecessary the motion for leave to amend application for license to cover construction permit for 1570 kc., 250 watts, unlimited time.

KWGB—W. B. Greenwald (Transferor) and O. L. Taylor, William Wyse, and Wesley E. Brown (Transferees), Hutchinson, Kan.—Granted petition for leave to amend application for transfer of control of KWGB to substitute Stanley Marsh for O. L. Taylor as one of transferees, and removed application from hearing docket.

King-Treadle Broadcasting Corp., Pontiac, Mich.—Granted motion to dismiss application for construction permit to operate on 1140 kc., 250 watts, unlimited time.

KUSD—University of So. Dak., Vermillion, S. Dak.—Granted motion to withdraw without prejudice application for construction permit to change frequency from 890 kc. to 630 kc., and change hours of operation from 5 to 700 in full day on 250 watts.

WSNJ—Eastern States Broadcasting Corp., Camden, N. J.—Granted motion to dismiss without prejudice application for construction permit for Class IV station to be synchronized with WSNJ, located at Camden, N. J. (B1-P-2914).

KOWH—World Publishing Co., Omaha, Neb.—Granted petition for dismissal without prejudice application for construction permit to change frequency from 660 kc. to 890 kc., increase power and change hours of operation from 500 watts daytime to 5 kW unlimited, directional antenna night light (B3-P-2724).

WRBL—The Columbus Broadcasting Co., Inc., Columbus, Ga.—Granted special temporary authority to rebroadcast transmissions received from transmitter in Army scout car, 2220 kc., 75 watts, and transmitter in Army bomber plane, 7460 kc., 75 watts on April 7, 1941, in connection with Army Day program.

WMBG—Havens and Martin, Inc., Richmond, Va.—Granted special temporary authority to rebroadcast a program to be received from U. S. Navy Plane 1322, Naval Air Station, Anacostia, on April 6, 1941, in the interest of Navy recruiting.

National Broadcasting Co., Inc., New York, N. Y.—Granted special temporary authority to rebroadcast an Army Day program over Radio Station WEAF and WJZ and the combined Red and Blue networks program material supplied over U. S. Army radio facilities from airplanes flying in the vicinity of New York City and San Francisco on April 5, 1941; the signals from the Army planes will be picked up at these locations by NBC.

Columbia Broadcasting System, Inc., Boston, Mass.—Granted motion to grant amendments to change frequency from 41100 to 45300 kc., and change transmitter site in re application for new television station.

Columbia Broadcasting System, Inc., Boston, Mass.—Denied petition for intervention in the hearing on application of The Outlet Co., Providence, R. I., for a new television station.

WJAR—The Outlet Co., Providence, R. I.—Denied motion for leave to intervene in the hearing on application of The Yankee Network, Inc., Boston, and Worcester Telegram Publishing Co., Inc., Worcester, Mass., for new television station and granted petition as to enlargement of issues, and on own motion the Commission in re application on the application of WJAR and The Yankee Network, Inc. under NARBA, and extension of commencement and completion date to April 26, 1941.

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Granted motion for leave to amend application so as to request 5 kw, day and night, and to specify directional antenna, in re application for construction permit to change frequency, and increase power. Application removed from hearing docket.

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Dismissed motion to withhold further action on application for modification of construction permit to increase power and change hours of operation, pending filing of amendments.

WAPI—Alabama Power Co., Birmingham, Ala.—Granted temporary extension of license of Station WAPI on the frequency 1170 kc., 1 kw night, 5 kw LS, simultaneously daytime and sharing time at night with Station KVOO, pending consideration of application to change frequency to 1070 kc.

W4XA—National Life & Accident Insurance Co., Nashville, Tenn.—Granted extension of license of High Frequency Experimental Broadcast Station W4XA for a period of 30 days, on a temporary basis.

WWDC—Capital Broadcasting Co., Washington, D. C.—Granted modification of construction permit (B1-P-2879, which authorized a new station) for 1150 kc, under NARBA, make changes in synchronous amplifier equipment and antenna, and extend commencement date to 30 days after grant and completion date to 180 days thereafter (B1-MP-1163).

KHJ—Don Lee Broadcasting System, Los Angeles, Cal.—Granted modification of construction permit (B3-P-2451, which authorized a new station) for changes in directional antenna for day and night use, make changes in equipment and move transmitter) for changes in directional antenna on 930 kc., under NARBA, and extension of commencement date to October 25, 1941, and completion date to October 28, 1941 respectively (B5-MP-1258).

WHDF—Flint Broadcasting Co., Flint, Mich.—Granted modification of construction permit (B2-P-2451, which authorized installation of new transmitter and DA (or day and night use, increase in power, change in frequency, and move of transmitter), for extension of completion date to June 14 (B2-MP-1228).

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Granted modification of construction permit (B3-MP-833, for increase in power, installation of DA for night use), for 1170 kc, under NARBA and changes in DA (or day and night use) (B5-MP-1255).

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted modification of construction permit (B5-P-2422, for new transmitter, installation of DA for day and night use, move of transmitter and increase in power) for extension of completion date to October 25, 1941.

WJAR—The Outlet Company, Providence, R. I.—Granted modification of construction permit (B1-P-2192, for changes in
directional antenna. Increase in power, move of transmitter) for 920 kc, under NARB.A, changes in directional antenna and installation of new transmitter, and extension of completion date to Oct. 25/41 (B1-MP-1220).

WABC—Columbia Broadcasting System, Inc., New York City.—Granted modification of construction permit (B4-P-2975) for new auxiliary transmitter with 5 KW power to be used for emergency only, located at Little Pea Island, New Rochelle, N. Y., for extension of completion date to Oct. 25/41 (B1-MP-1221).

WTXJ—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Granted modification of construction permit (B4-P-2696, for installation of directional antenna for night use, increase power from 1 KW night, 5 day to 5 KW day and night) for extension of completion date to May 6 (B4-MP-1219).

WPA—Vice Bee Corp., Portsmouth, Ohio.—Granted modification of construction permit (B2-P-2685, for changes in transmitting equipment, antenna changes, increase in power to 250 watts and move of transmitter), for extension of completion date to Oct. 15/41 (B2-MP-1218). The grant of this application is on a temporary basis, conditionally.

KFBK—McClatchy Broadcasting Co., Sacramento, Cal.—Granted authority to determine operating power by direct measurement of antenna power on 1530 kc, under NARB.A (B5-Z-727).

KDFN—Donald Lewis Hathaway, Casper, Wyo.—Granted authority to determine operating power by direct measurement of antenna power on 1790 kc, under NARB.A.

KIT—Carl E. Haymond, Yakima, Wash.—Granted authority to install automatic frequency control equipment on 1290 kc, under NARB.A (B5-F-204).

KALE—KALE, Inc., Portland, Ore.—Granted authority to install automatic frequency control equipment on 1320 kc, under NARB.A (B5-F-206).

KONI—KONI, Inc., Portland, Ore.—Granted authority to install automatic frequency control equipment on 970 kc, under NARB.A (B5-E-1096).

WPIC—Sharon Herald Broadcasting Co., Sharon, Pa.—Granted authority to determine operating power by direct measurement of antenna power on 720 kc, under NARB.A (B2-Z-723).

WINX—Lawrence J. Heller, Washington, D. C.—Granted license to cover construction permit (B1-P-2546 which authorized a new station; 1310 kc, under NARB.A, 250 watts, unlimited time) (B1-L-1301). Also granted license to cover construction permit for new 50-watt amplifier station (B1-L-1302); also granted authority to determine operating power by direct measurement of antenna input, main transmitter and amplifier (B1-Z-621 and B1-Z-622).

WORC—Alfred Frank Kleindienst, Worcester, Mass.—Granted license to cover construction permit (B1-P-2563, which authorized changes in equipment and increase in power to 1 KW); 1310 kc, under NARB.A (B1-L-1307); also granted authority to determine operating power by direct measurement of antenna input on 1310 kc, under NARB.A (B1-Z-628).

KABR—Aberdeen Broadcasting Co., Aberdeen, S. Dak.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-726).

WKWR—Community Broadcasting, Inc., Wheeling, W. Va.—Granted modification of construction permit (B2-P-2967, for a new broadcast station) for approval of antenna, and approval of studio and transmitter site at corner Market & E. 16th Sts., Wheeling; 1100 kc, under NARB.A (B2-MP-1229).

WXG—General Television Corp., Boston, Mass.—Granted petition for 30 day extension of temporary authorization to operate experimentally visual and aural television transmitters (Dockets 5985-5986).

WKZO—WKZO, Inc., Kalamazoo, Mich.—Adopted order vacating Commission action of March 4, 1941, granting in part the application of WKZO to increase daytime power to 5 KW, etc., and designated the application for construction permit (B2-P-2968) for hearing.

KORN—Nebraska Broadcasting Co., Fremont, Nebr.—Designated for hearing application of KORN for renewal of license; application for transfer of control (B4-TC-244) of corporation from Clark Standiford to A. C. Sidner, C. J. Malmsten, S. S. Sidner and Arthur Baldwin; and application for transfer of control of corporation from C. J. Malmsten, C. J. Sidner, S. S. Sidner, Arthur Baldwin, and E. J. Lee to John F. Palmquist and Paul Boyer.

WARM—Union Broadcasting Co., Scranton, Pa.—Granted modification of construction permit which authorized a new standard broadcast station to be operated on 1370 kc, 250 watts, unlimited hours, for authority to change frequency to 1100 kc, in accordance with NARB.A.
WBOS—Westinghouse Radio Stations, Inc., Hull, Mass.—Granted special temporary authority to operate International Broadcast Station WBOS with a power of 30 KW using two WL-895R tubes in lieu of tubes specified in construction permit application File No. B1-P1-23, pending the filing and action on application for license to cover construction permit for period April 12, 1941 to not later than May 11, 1941.

WSAZ, Inc., Huntington, W. Va.—Granted special temporary authority to operate equipment licensed to the Charleston Broadcasting Co. at Relay Station WADA, 1622, 2058, 2150, 2250 kc., power 40 watts, in order to relay broadcast special event programs as described in letter dated April 1, 1941, on April 4, 11, 18, and 25, 1941, to Radio Station WSAZ.

KRJF—Star Printing Co., Miles City, Okla.—Granted modification of construction permit which authorized new broadcast Station to operate on 1310 kc., 250 watts, unlimited hours, for change in frequency to 1310 kc. in accordance with NARBA.

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Granted special temporary authority to rebroadcast U. S. Army Day program from 106th Observation Plane Transmitter on 1378, 3332, 5160 kc. at 10 a. m., April 5, 1941.

KECA—Earl C. Anthony, Inc., Los Angeles, Cal.—Granted authority to install new automatic frequency control equipment on 790 kc. under NARBA for auxiliary transmitter (B5-F-197).

WIBA—Badger Broadcasting Co., Inc., Madison, Wis.—Granted authority to install automatic frequency control equipment on 1310 kc. under NARBA (B4-F-201).

WCAM—City of Camden, Camden, N. J.—Granted authority to install automatic frequency control equipment on 1310 kc. under NARBA, on temporary basis, conditionally (B1-F-199).

KMO—Carl E. Haymond, Tacoma, Wash.—Granted authority to install automatic frequency control on 1550 kc. under NARBA (B3-F-200).

WHNY—Irving Loew Booking Agency, New York City.—Granted authority to install automatic frequency control. On 1920 kc. under NARBA (B1-F-198).

KHSI—Golden Empire Broadcasting Co., Chico, Calif.—Granted authority to determine operating power by direct measurement of antenna power on 1290 kc. under NARBA (B5-Z-731).

KVCV—Golden Empire Broadcasting Co., So. of Redding, Calif.—Granted authority to determine operating power by direct measurement of antenna power on 1250 kc. under NARBA (R5-Z-731).

KFRO—Voice of Longview, Longview, Tex.—Adopted order amending notice of hearing in re application for modification of construction permit to increase power to 5 KW, to specify the following additional issue: “To determine the extent and effect of any interference which the proposed operation of Station KFRO on the frequency 1570 kc. would cause to the operation of stations XEMR, MXE, EMR, Monterey, N. L., XEAF, Nogales, Son., and XEEL, Guadalajara, Jal., operating on the same frequency, with particular reference to the provisions of the NARBA (Appendix II, Table I).”

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted special temporary authority to rebroadcast transmission from Army Bomber in connection with Army Day celebration April 7 (B5-S-133).

KABR—Aberdeen Broadcasting Co., Aberdeen, S. Dak.—Granted license to cover construction permit for increase in power from 500 watts night, 1 KW LS, to 5 KW day and night; make equipment changes and changes in DA; 1120 kc.; 5 KW DA-N (B4-L-1352).

WWRL—Long Island Broadcasting Corp., Woodside, L. I.—Granted special temporary authority to operate from mid-night to 2 a. m., EST, on April 26, in order to broadcast Greek War Relief Fund program only (B1-S-271).

KOIL—Central States Broadcasting Co., Omaha, Neb.—Granted special temporary authority to rebroadcast program from plane over Ft. Crook on Army Day, April 7, from 4 to 4:15 a. m., CST (B4-S-516).

KROD—Dorrance D. Roderick, El Paso, Tex.—Granted special temporary authority to rebroadcast Army Day Program from Army Plane from 9:15 to 9:45 p. m., MST, April 7, 1941 (B3-S-1065).

WNBY—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 8:30 to 10 a. m., EST, April 10, 11, 12, 13, 14, 17, 18, 19, 20, 1941, in order to broadcast sustaining musical programs as described in letter, (provided WSVS remains silent) (B1-S-879).

WSVS—Board of Education, City of Buffalo, N. Y.—Granted special temporary authority to remain silent for the period April 10 to April 20, 1941 in order to observe Easter Vacation; May 30 to observe Memorial Day, and from June 16 to Sept. 8, to observe Summer vacation (B1-S-225).

KIDW—Lamar Broadcasting Co., Lamar, Colo.—Granted special temporary authority to broadcast special Easter program from 8 to 9:30 p. m., MST, April 6 and 7, provided KGJW remains silent (B5-S-809).

APPLICATIONS FILED AT FCC

690 Kilocycles

WSJS—Piedmont Publishing Co., Winston-Salem, N. Car.—Modification of construction permit (B3-P-2814) requesting increase in power from 1 KW to 5 KW, install new transmitter, changes in directional antenna for day and night use, move transmitter and extension of commencement and completion dates.

April 11, 1941 — 343
KYW—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Authority to install automatic frequency control equipment.

WINS—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3026) for approval of directional antenna system and approval of present licensed transmitter site.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—Authority to determine operating power by direct measurement of antenna power.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Modification of construction permit (B1-P-2200) for approval of directional antenna system and approval of present licensed transmitter site.

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Authority to determine operating power by direct measurement of antenna power.

KWW—Westinghouse Radio Stations, Inc., Philadelphia, Pa.—Construction permit to make changes in directional antenna system on 1060 kc. under NARBA.

KSHL—KSHL, Inc., Salina, Kansas.—License to cover construction permit (B4-P-2765) for increase in night power and changes in directional antenna.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Construction permit to install new transmitter, make changes in antenna, change frequency from 1150 kc. to 1250 kc., increase power from 100 watts to 250 watts and hours of operation from daytime to unlimited.

KXW—Westinghouse Radio Stations, Inc., Rock Hill, S. Car.—Authority to determine operating power by direct measurement of antenna power.

WAM—Stromberg-Carlson Telephone Manufacturing Co., Rochester, N. Y.—Authority to determine operating power by direct measurement of antenna power.

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Construction permit to make changes in equipment, install directional antenna for day and night use, increase power from 10 to 50 KW and hours of operation to unlimited. Amended to specify 1150 kc. under NARBA and changes in directional antenna.

WJL—WJL, Inc., Chicago, Ill.—Construction permit to make changes in transmitting equipment and increase power from 100 watts to 250 watts.

KHSB—Nebraska Broadcasting Co., Hastings, Neb.—Authority to determine operating power by direct measurement of antenna power.

WLOF—Hazelwood, Inc., Orlando, Fla.—Authority to determine operating power by direct measurement of antenna power.

KPHO—KPHO, Inc., Phoenix, Ariz.—License to cover (B5-P-3092) for installation of new transmitter.

KPHO—M. C. Reese, Phoenix, Ariz.—Authority to determine operating power by direct measurement of antenna power.

KWIL—Central Willamette Broadcasting Co., Albany, Oregon.—Authority to determine operating power by direct measurement of antenna power.

KWLC—Luther College, Decorah, Iowa.—Modification of construction permit (B4-P-3003) requesting 1230 kc. under NARBA and extension of commencement and completion dates.

WPAX—H. Wimpy, Thomasville, Ga.—Authority to determine operating power by direct measurement of antenna power.

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. Car.—Modification of construction permit (B3-P-2985) for changes in directional antenna system, 1250 kc. under NARBA, and extension of commencement and completion dates.

KTMS—News-Press Publishing Co., Santa Barbara, Calif.—Authority to determine operating power by direct measurement of antenna power.

KFB—Buttry Broadcast, Inc., Great Falls, Mont.—Modification of construction permit (B4-P-2821) for changes in directional antenna for night use and 1310 kc. under NARBA.

WEBC—Head of the Lakes Broadcasting Co., Duluth, Minn.—Modification of construction permit (B4-P-2821) for changes in directional antenna system for night use and request 1320 kc. under NARBA.

WHBL—Press Publishing Co., Sheboygan, Wis.—Construction permit to increase power from 250 watts night, 1 KW daytime to 1 KW day and night and install directional antenna for night use. Amended: To request 1350 kc. under NARBA and changes in directional antenna.

KHHO—The Courier-Post Publishing Co., Hannibal, Mo.—Modification of construction permit (B4-P-1011) requesting approval of transmitter and studio sites and antenna.

WIZE—Radio Voice of Springfield, Inc., Springfield, Ohio.—Authority to determine operating power by direct measurement of antenna power.

WCAS—WCLS, Inc., Joliet, Ill.—License to cover construction permit (B4-MP-824) for changes in equipment and increase in power on 1340 kc.

NEW—Rock Hill Broadcasting Corp., Rock Hill, S. Car.—Construction permit for new standard broadcast station to be operated on 1350 kc., 250 watts, daytime hours of operation.

KGB—Don Lee Broadcasting System, Inc., Los Angeles, Calif.—Authority to determine operating power by direct measurement of antenna power.

KMO—Carl E. Haymond, Tacoma, Wash.—Modification of construction permit (B5-P-2707) to install new transmitter, make changes in antenna, specify 1350 kc. under NARBA and extend commencement and completion dates.

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Modification of construction permit (B1-P-2730) for changes in directional antenna and 1370 kc. under NARBA.

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Authority to determine operating power by direct measurement of antenna power.

WDWS—The Champaign News-Gazette, Inc., Champaign, Ill.—Authority to determine operating power by direct measurement of antenna power.

KFRU—KFRU, Inc., Columbia, Mo.—Authority to determine operating power by direct measurement of antenna power.
KMAC—W. W. McAllister and Howard W. Davis d/b as Walmac Co., San Antonio, Texas.—Authority to determine operating power by direct measurement of antenna power.

KICA—Western Broadcasters, Inc., Clovis, N. Mx.—Construction permit to change frequency from 1370 kc. to 1210 kc., increase power from 100 watts to 250 watts and install new equipment. Amended: To request that application be condition of grant of KYIO's application (B5-P-2455).

KENO—Nevada Broadcasting Co., Las Vegas, Nevada.—Construction permit to move transmitter and studio to El Rancho Vegas, Las Vegas, Nevada.

WHYN—The Hampden-Hampshire Corp., Holyoke, Mass.—Authority to determine operating power by direct measurement of antenna power.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Authority to determine operating power by direct measurement of antenna power.

KONS—Nebraska Broadcasting Corp, Fremont, Nebr.—Modification of license to move main studio locally.

WNAS—WAS Broadcasting Station, Inc., Philadelphia, Penna.—Authority to determine operating power by direct measurement of antenna power.

KICA—Western Broadcasters, Inc., Clovis, N. Mx.—Modification of license to move main studio locally.

KOMA—KOMA, Inc., Oklahoma City, Okla.—Authority to determine operating power by direct measurement of antenna power.

NEW—Nashville Radio Corp., Nashville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

KONO—Eugene J. Roth, tr. as Mission Broadcasting Co., San Antonio, Texas.—Authority to determine operating power by direct measurement of antenna power.

KICA—Western Broadcasters, Inc., Clovis, N. Mx.—Modification of license to move main studio locally.

1410 Kilocycles

WKHB—WKHB, Inc., LaCrosse, Wisc.—Modification of construction permit (B4-P-2733) to install new transmitter, make changes in directional antenna system from 1410 kc. under NARBA and extend commencement and completion dates.

NEW—Nashville Radio Corp., Nashville, Tenn.—Construction permit for new standard broadcast station to be operated on 1380 kc., 1 kw., unlimited time, directional antenna. Amended to request 1140 kc. under NARBA and changes in directional antenna.

1450 Kilocycles

WCBS—WCBs, Inc., Springfield, Ill.—Construction permit to change frequency from 1550 kc. to 1170 kc., increase power from 250 watts to 1 kw. night, 5 kw. daytime, install new transmitter, directional antenna for day and night use and move transmitter to near Springfield, Ill.

KWAL—Chester Howarth and Clarence Berger, Wallace, Idaho.—Voluntary assignment of license to Silver Broadcasting Co.

WNOE—WNOE, Inc., New Orleans, La.—Authority to determine operating power by direct measurement of antenna power.

KRLH—Clarence Scharbauer, Midland, Tex.—Modification of construction permit (B3-P-2981) to change frequency from 1150 kc. to 1230 kc. and extend commencement and completion dates.

WKIP—Poughkeepsie Broadcasting Corp., Poughkeepsie, N. Y.—Authority to determine operating power by direct measurement of antenna power.

WFPG—Neptune Broadcasting Corp., Atlantic City, N. J.—Authority to determine operating power by direct measurement of antenna power.

KFIZ— Reporter Printing Co., Fond du Lac, Wisc.—Construction permit to install new transmitter and increase power from 100 watts to 250 watts. Amended re changes in antenna.

1490 Kilocycles

KDB—Santa Barbara Broadcasters, Inc., Santa Barbara, Calif.—Authority to determine operating power by direct measurement of antenna power.

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Authority to determine operating power by direct measurement of antenna power.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Authority to install automatic frequency control equipment in auxiliary transmitter.

1520 Kilocycles

KOMA—KOMA, Inc., Oklahoma City, Okla.—Authority to determine operating power by direct measurement of antenna power.

Koma—KOMA, Inc., Oklahoma City, Okla.—Authority to install automatic frequency control equipment.

1590 Kilocycles

NEW—Hugh McClung, Fresno, Calif.—Construction permit for new standard broadcast station to be operated on 1590 kc., 5 kw., unlimited time.

1600 Kilocycles

WCNW—Arthur Faske, Brooklyn, N. Y.—Authority to install automatic frequency control equipment.

FM APPLICATION

NEW—Boston Edison Co., Boston, Mass.—Construction permit for a new high frequency broadcast station to be operated on 41700 kc., coverage 6,930 square miles, population 3,075,927.

MISCELLANEOUS APPLICATIONS

NEW—Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Construction permit for a new STL broadcast station to be operated on 331000 kc., 50 watts, special emission for frequency modulation. To be used with W47A.

KGEI—General Electric Co., San Francisco, Calif.—Modification of construction permit (B5-P-212-24) requesting change in transmitter site to near Belmont, Calif., and extension of commencement and completion dates.

KRBC—Columbia Broadcasting System, Inc., Portable-Mobile, in area of Los Angeles, Calif.—License to cover construction permit (B5-PRE-377) for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bengor Products Company—Charging misrepresentation in the sale of medicinal preparations, a complaint has been issued against Ben Gordon and Louis Gordon, trading as Bengor Products Co., and as Golf Products Co., 878 Broadway, New York. The respondents sell two preparations, one known as “Dupree Pills” and as “Dr. Gordon’s Single Strength Pills”, and the other as “Dupree Pills Double Strength” and “Dr. Gordon’s Double Strength Pills”. According to the complaint, the respondents, in catalogs and advertising matter circulated in various States, represented their preparations as constituting competent treatments for amenorrhea and dysmenorrhea, when such are not the facts.

The complaint further alleges that the respondents disseminated false advertisements in that they failed to reveal therein that use of their preparations under customary conditions or under conditions prescribed in the advertisements, may result in serious injury to health. According to the complaint, the respondents’ preparations contain certain drugs in such quantity that use of the preparations under the customary or prescribed conditions may result in gastrointestinal disturbances and other conditions leading to serious injury. (4479)

Perce P. Green and Howard Rand, trading as Green Supply Co., April 11, 1941 — 345

The complaint against the Minneapolis respondents Green and Rand charges them with furnishing devices and plans involving lottery methods for use in connection with the sale and distribution of their products. According to the complaint, the respondents sell fishing tackle, silverware, rifles, garments, blankets, radios and other merchandise.

The Little Rock Tent & Awning Co., according to the complaint, is a manufacturer of work garments which it allegedly has sold to dealers by means of a method which involves the use of a lottery scheme when the garments are sold and distributed to consumers.

CEASE AND DESIST ORDERS

The Commission has issued the following cease and desist orders:

Fink & Co., Inc., 151 West Fortieth St., New York, has been ordered to cease and desist from misrepresentations in the sale of vitamin preparations designated "Mi-Vit-Ine" and "Vi-Min-Ex", and "Muriel Joan Beautifier", a cosmetic preparation. The Commission order directs the respondent to cease disseminating advertisements which represent that Mi-Vit-Ine is a cure, remedy, or competent treatment for lowered vigor and vitality, constipation, colitis, stomach disorders, neuritis, or nerve disorders; that it is a dietary dietary, or composed of a different kind of wheat germ, or that the preparation has any therapeutic value in the treatment of alcoholism in excess of stimulating the appetite, which may have been affected by reason of overindulgence.

The respondent is further ordered to cease representing that Vi-Min-Ex is a cure, remedy or competent treatment for colds, constipation, spastic colitis, digestive disorders, neuritis, nerve disorders, anemia, loss of appetite and weight, lowered vigor and vitality, or tooth decay, or that this preparation, under conditions of use, will supply all the essential vitamins and minerals required by the body, or that it constitutes the best source for the supply of such minerals and vitamins.

The order also directs that the respondent discontinue representing that Muriel Joan Beautifier will beautify or transform the face, cause skin blemishes, pimples or blackheads to disappear, or bring about a beautiful complexion, or that this preparation has any properties which would cause blemishes or other skin conditions to disappear, or have any other permanent effect upon any skin condition.

Hubinger Co., Keokuk, Iowa, has been ordered to cease and desist from price discriminations in violation of the Robinson-Patman Act in the sale of glucose or corn syrup unmixed, one of the principal raw materials used in making candy, and in the sale of gluten feed, a corn syrup by-product.

Between July 25, 1937, and the present time, according to Commission findings, the respondent sold corn syrup in certain cities other than Chicago at higher delivered prices per hundredweight than it sold such syrup in containers of like size and type to Chicago purchasers. The findings indicate that the respondent increased its price to the trade generally, discriminated by selling syrup to some purchasers, mostly large-scale buyers in Chicago, at the former and lower price while concurrently selling syrup of like grade and quality to others at the new and higher price.

According to findings, the respondent discriminated by selling and delivering corn syrup to purchasers in several types and sizes of containers at prices per hundredweight which increase over the tank car price per hundredweight according to the size and type of container. Such increases over the tank car price, the findings continue, vary from 10 cents per hundredweight in the case of tank wazons, to $1.08 per hundredweight in five-gallon kegs.

Gluten feed, according to findings, has been sold by the respondent since January 1, 1939, to nine purchasers at 50 cents a ton less than the concurrent price which it charged all others for feed of like grade and quality.

The Commission order directs the respondent to cease and desist from the discriminations as found, or from similar discriminations.

Zeen Chemical Company—David H. Goldman, trading as Zeen Chemical Co., 1311 West 11th St., Cleveland, has been ordered to cease and desist from making misleading representations in the sale of "Zeen Dry Cleaner".

Commission findings are that prior to issuance of complaint in the proceeding, the respondent advertised that Zeen Dry Cleaner "will moth-proof or de-moth woolen materials in upholstery or rugs with one operation", when in fact the product does not reach deep-seated infestations of moths, unless used according to complete and specific directions, which were not provided.

Further findings are that the product will not moth-proof fabrics, and that while it possesses moth-repellent properties, such properties, due to evaporation, are gradually diminished and then lost unless repeated applications are made.

The Commission order directs the respondent to cease representing that its preparation will reach deep-seated infestations of moths, unless directions accompany such representation which will enable the user to bring the preparation in contact with the moths; that the product will moth-proof fabrics or materials; and that it will de-moth materials in upholstery or rugs, unless such representation is accompanied by the explanation that such result is of temporary duration only and must be repeated at proper intervals.

The order also directs the respondent to cease and desist from representations that Zeen Dry Cleaner cleans and removes all types of spots, stains and all foreign matter; that it is non-explosive, except that the respondent is not prohibited from representing that its preparation is non-explosive if kept away from fire or flame, and that the product is used exclusively for sales to furniture and department stores everywhere.

Vitaphore Appliances, Inc., South Bend, Ind., has been ordered to cease and desist from misrepresentation in the sale of "Vibra-therm", a heat and massage device.

The Commission order directs the respondent to cease disseminating advertisements which represent that the use of Vibra-therm constitutes a cure or remedy for prostatitis, or that the device has therapeutic value in treating prostatitis in excess of furnishing temporary relief from the symptoms of pain where the local application of heat is indicated.

The respondent is further ordered to desist from representing that use of the device constitutes a remedy or effective treatment for bladder weakness, backache, headache, arm, leg or foot pains, or nervousness; has therapeutic value in the treatment of hemorrhoids, constipation, sexual decline, or provides a cure or remedy for certain women's disorders or has therapeutic value in their treatment.

STIPULATIONS

Following stipulations have been entered into during the past week by the Commission:

American Ozone Company—Chris F. DeJonge, trading as American Ozone Co., Zeeland, Mich., has entered into a stipulation to cease and desist from certain representations in the sale of社会化 apparatuses.

According to the stipulation, the respondent assembles parts obtained from the manufacturers into the completed machines of
three different models, two of which are designed for use in hatchery or poultry houses.

The respondent stipulates that he will cease employing any representation the effect of which tends to convey the impression that use of any one of the machines in poultry houses would contribute to the development and health of the birds therein or that the machine would generate sufficient ozone to have any germicidal effect. (3055)

Baldwin Music Company—C. J. Richardson, trading as Baldwin Music Co., Shreveport, La., has entered into a stipulation in which he agrees to cease making certain representations in the sale of pianos. The respondent agrees to desist from representing that new or used pianos, which are not in fact repossessed, are instruments which, having been previously sold under deferred payment or other plan, have been repossessed because of inability of the purchasers to meet the payments thereon or for any other reason, or that such instruments are being sacrificed for balances due or at reduced prices. (3058)

Fairystone Manufacturing Co.—Ray G. Maloney, trading as Fairystone Manufacturing Co., and Willard J. Dungan and Arthur E. Maloney, trading as Fairystone Distributing Co., 626 United Artists Building, Detroit, have entered into stipulations in which they agree to cease representing that their emollient cream “Fairystone” is an “absolute sunburn protection” and that it filters out the burning or ultra-violet rays of the sun and permits other sun rays to gain access to the skin. The respondents also agree to cease representing, unqualifiedly, that their preparation will effectively cover or conceal scars, birthmarks or other skin blemishes, and to discontinue representing that by its application users will look years younger. The respondents further stipulate that they will cease making statements tending to create the impression that their preparation is an effective treatment or competent remedy for pimpled or blotched skin. (3057)

Grace McLendon’s Hair Products—Trading as Grace McLendon’s Hair Products, Grace McLendon, 904 Wesley Ave., Pleasantville, N. J., entered into a stipulation in which she agrees to cease advertising that “Mme. Grace McLendon’s Hair Grower” will stop falling hair, remove dandruff, prevent hair from turning gray, restore gray hair to its natural color, or cause hair to grow. The respondent also stipulates that she will desist from representing by use of the words “Hair Grower” in the designation of her preparation, that it will grow hair. (02761)

Handcraft Bedding Corporation, 887-889 Niagara St., Buffalo, mattress manufacturer, stipulated that it will cease using or supplying to others for their use labels which bear any fictitious or misleading price representation purporting to be the retail sales price of a product but which, in fact, is in excess of the customary retail price. According to the stipulation, the respondent labeled certain mattresses sold to retailers with the price of $22.50 which was much in excess of the usual retail price. (3054)

Reliable Mattress Co., 2028 Walnut St., St. Louis, has entered into a stipulation in which it agrees to cease making certain representations in the sale of mattresses.

The respondent corporation agrees to cease representing by use of the words “New Materials” or other words of similar meaning, that a mattress or mattress filling made in whole or in part from old, used or second-hand materials is new or is made entirely from new materials. The stipulation provides that if the mattress or filling is composed in substantial part of new materials the word “new”, if used as descriptive of such new materials, shall be accompanied by other words in conspicuous type to indicate clearly that the mattress or filling is not made entirely from new materials.

The respondent further stipulates that it will discontinue employing the term “100% Cotton Linters” as descriptive of a mattress the filling of which is not made wholly from cotton linters. The respondent agrees to cease stating, when a mattress is made in whole or in part from old, used or second-hand material, that fact is not properly disclosed, that such mattress complies with any State law requiring such disclosure. (3059)

L. Soneborn Sons, Inc., 88 Lexington Ave., New York, entered into a stipulation in which it agrees to cease making certain representations concerning its product “Lignophol”, designed to be used as a wood finish and preservative. The respondent agrees to cease making representations, pictorial or otherwise, the effect of which tends to convey the impression that the product’s penetrative quality, when applied to a wood surface, is in excess of what is actually the fact. According to the stipulation, the respondent’s preparation, when applied over the surface of wood flooring, would not penetrate practically therethrough, as indicated in the respondent’s advertising illustration. (3056)

St. Clair Company—V. H. Bean and M. C. Bean, trading as St. Clair Co., Findlay, Ohio, have entered into a stipulation in which they agree to cease representing that “Shur-Deth”, a rat-killing preparation, will drive rats and mice outside to die; is the most effective raticide known; is the original preparation of rat foods in combination with red squill, and is recommended by the United States Department of Agriculture. The stipulation recites that the respondents’ representations are not in accord with the facts. (02760)
THE WEEK IN WASHINGTON

Neville Miller clarifies the ASCAP situation as of this week. (p. 349).

The program for the NAB’s St. Louis convention, May 12-15, is beginning to take form, and promises to be most interesting. (p. 350).

Frank King, WMBR, was elected director at a District 5 meeting in Jacksonville, Fla. (p. 351).

Ohio State University’s annual institute for education by radio will be held May 4-7 in Columbus. The Third National Conference on Consumer Education discussed broadcasting at length at its Columbia, Mo., meeting April 7-9. (pp. 351-352).

Advertising agencies will be asked to return audition transcriptions to stations on account of the threatened aluminum shortage. (p. 352).

The NAB Labor Committee expresses an opinion on employment. (p. 352).

Sales managers should attend their district meetings before the NAB convention. Aviation schools are good business prospects. (p. 352).

Hit songs by newcomers are BMI specialties. (p. 355).

The FCC authorized consolidation of four Brooklyn stations. (p. 356).

The ASCAP Situation

Neville Miller today made the following statement:

The number of inquiries we have been receiving with respect to negotiations with ASCAP suggests that a clarification of the situation may be helpful.

Last November, I wrote to Fred Waring to the effect that if ASCAP would present definite proposals based upon the per-program plan, I would immediately present same to the Board of the NAB. No such proposals were ever received from ASCAP.

ASCAP signed its Consent Decree on February 26 of this year. Immediately thereafter I wrote Mr. Buck reminding him that ASCAP was now in a position to withdraw the contract submitted to broadcasters last March and which was now illegal under the terms of the Consent Decree, and to submit instead a new proposal in conformity with the terms of the Consent Decree. I urged Mr. Buck to submit such a proposal to the industry, and I volunteered to call a meeting of the Board of Directors of the NAB to consider it.

On March 4th, Mr. Buck wrote me a letter which indicated that he had the mistaken notion that the entire broadcasting industry had delegated the National Association of Broadcasters as its negotiator and that the NAB was authorized to sign contracts on behalf of the industry.

I wrote Mr. Buck on March 6th that he was mistaken in thinking that the NAB had taken over the rights of individual broadcasters, but that if it would be helpful to him and his associates I would be delighted to ask the Board of Directors of the Association to appoint a committee to sit with ASCAP to assist it in formulating the proposals which it wished to submit to individual broadcasters.

Mr. Buck answered on March 7th, requesting that such a committee be appointed. Accordingly, I called a meeting of the Board of Directors of the NAB to be held in New York on March 17-18. I wrote Mr. Buck on March 10th, telling him I was doing this, and again pointed out that I thought it would be unfortunate to bring from every part of the United States the twenty-six members

(Continued on page 350)
of the Board without being able to lay before them for consideration an outline of the alternative bases of licensing which ASCAP's Consent Decree required it to offer.

No such proposals were received from ASCAP to present to the meeting of the NAB Board. The Board, as requested by ASCAP, appointed a committee and a meeting with the ASCAP committee was immediately arranged for March 20th. At that meeting, ASCAP again failed to present any proposals, but at the close of the meeting, ASCAP agreed to prepare proposals in accordance with the requirements of the Consent Decree and to submit same to the NAB Committee for consideration. It was indicated that the proposals would be ready within a week or ten days.

Twelve days later, April 1st, John Paine came to my office in New York and stated that the ASCAP Committee not only did not have any proposals to present for consideration by the NAB Committee, but had decided that instead of having a further meeting with the NAB Committee, ASCAP desired to discuss the question individually with the networks. I pointed out to Mr. Paine that the NAB Committee had been appointed at ASCAP's request, that I would be glad to call a meeting of the Committee to consider any proposals, and that I thought it would be in the best interests of all concerned for ASCAP to comply with the Consent Decree by formulating complete proposals. I further pointed out to Mr. Paine that any proposal which was made to the networks in contemplation of clearance at the source would naturally be dependent upon contribution by affiliates and that probably no affiliate would be willing to commit itself regarding network programs until it knew what would be the ASCAP proposal as to its local business. That, therefore, I thought ASCAP would eventually have to make a complete proposal and that his present plan would result only in delay.

I further stated that I was sure that the networks would meet with ASCAP if requested. It is the opinion of all lawyers that such individual meetings should be held if requested by ASCAP.

Mr. Paine stated that ASCAP had already held a meeting with Mutual and would seek a meeting with NBC and a meeting with CBS within the next few days.

ASCAP held a meeting with representatives of CBS and CBS affiliates on Thursday, April 10th, and a meeting with representatives of NBC and NBC affiliates was held on Tuesday, April 15th. Meetings have also been held with representatives of Mutual.

I regret that ASCAP has not as yet formulated any proposals in accordance with the terms of the Consent Decree, in spite of the many requests which have been made for such proposals.

The industry will be kept advised of developments.

**Convention Program Shapes Up**

The program for the Nineteenth Annual NAB Convention, Hotel Jefferson, St. Louis, May 12-15, is beginning to take form. While no definite announcement as yet can be made with reference to speakers, outstanding figures are assured as participants upon the program. National defense, the music situation, Government and public relations of the industry, labor matters, and problems of the commercial phases of broadcasting will all come in for treatment.

Monday, May 12, is registration day, with the Golf Tournament — competition for the BROADCASTING Magazine trophy — in the afternoon at the Sunset Hill Country Club.

At the Tuesday morning business session, President Miller will submit his annual report, along with those of the various Directors of the Departments of the Association. By-Law amendments will be submitted and voted upon. Then follows the discussion on national defense in which, among others, Major General Robert C. Richardson, Jr., Public Relations Director of the Army is definitely scheduled to participate. The speaker for the noon luncheon has not yet definitely been decided.

The afternoon of Tuesday will be entirely devoted to the discussion of music matters, with President Miller, Sydney Kaye, Vice President and Counsel, Merritt Tompkins, General Manager and Carl Haverlin, Director of Station Relations, all of BMI participating. In the late afternoon a session of the F.M. broadcasters will be held.

On Thursday, the morning program will consist of a discussion of the aims and policies of the recently re-organized Department of Broadcast Advertising, the commercial sections of the Code, the unit plan of volume measurement and other commercial problems. Colonel Willard Chevalier, publisher of BUSINESS WEEK, a
McGraw-Hill publication, and a recognized authority on the subject of advertising, will feature the session with a half-hour talk on some subject having to do with the place of advertising in the national emergency.

At the noon session a speaker from the industry will summarize the industry's problems and in the afternoon, labor will be the topic of discussion. Then will follow the election of Directors-at-Large and the expressions of choice on the part of the membership as to the site of the 1942 convention. These latter two are contingent upon the passing at the Tuesday meeting of amendments covering those subjects.

In the evening the annual banquet will be held in the Gold Room of the Jefferson Hotel. The entertainment for this banquet is being jointly arranged by CBS, MBS and NBC with the cooperation of the St. Louis broadcasters, under the direction of Merle Jones, General Chairman. A lively, varied show is assured with radio personalities participating.

**ST. LOUIS BROADCASTERS LAY PLANS**

Merle Jones, KMOX, General Chairman of the St. Louis Broadcasters' Committee, coordinating local activity in connection with the Nineteenth Annual NAB Convention to be held in St. Louis, May 12 to 15, reports a most enthusiastic meeting of all his committee men at the Jefferson Hotel on Monday, April 14.

All of the St. Louis broadcasters have displayed a remarkable spirit of cooperation and in so far as it is possible, the every wish of those who will be in attendance, both men and women, has been anticipated.

The hotel reservation situation was thoroughly discussed and it was revealed that the advance reservations will be crowded to the roof and other St. Louis hotels will undoubtedly far exceed those of any previous NAB convention. The headquarters hotel, the New Jefferson, will undoubtedly be crowded to the roof and other St. Louis hotels will enjoy a splendid business.

The hotel reservation situation was thoroughly discussed and it was revealed that the advance reservations will be crowded to the roof and other St. Louis hotels will enjoy a splendid business.

The St. Louis Convention and Publicity Bureau, under the able direction of F. H. Rein, general manager has rendered every possible assistance. All in all, this Nineteenth Annual Convention promises to be a most successful one.

Following is a complete list of the St. Louis broadcasters' committees:

**GENERAL CHAIRMAN**

Merle S. Jones, KMOX.

**GENERAL COMMITTEE**

Chairman, Merle S. Jones, KMOX; L. A. Benson, WIL; George M. Burbach, KSD; Rev. W. A. Burk, WEW; Robert T. Convey, KWK; John C. Roberts, Jr., KXOK; William H. West, WTMV.

**ENTERTAINMENT AND RECEPTION COMMITTEE**

Chairman, William H. West, WTMV; Robert T. Convey, KWK; Nicholas PagoBara, WEW; Chester G. Kenier, KMOX; Bart Satterly, WIL.

**EXHIBITS COMMITTEE**

Chairman, Clarence G. Cosby, KXOK; L. A. Benson, WIL; Edward W. Hamlin, KSD.

**GOLF COMMITTEE**

Robert Richardson, Jr., KWK, and J. Roy Stockton, KSD.

**HOUSING COMMITTEE**

Chairman, Ray E. Dady, KWK; Rev. W. A. Burk, WEW; Arthur Casey, KMOX; Frank Eschen, KSD; Elzy Roberts, KXOK.

**PUBLICITY AND PUBLIC RELATIONS COMMITTEE**

Chairman, George M. Burbach, KSD; Luther L. Hill, KSO; John C. Roberts, Jr., KXOK; Vernon H. Smith, KOWH.

**DISTRICT 5 MEETING**

With the holding of the District 5 meeting at Jacksonville on Friday, April 11, the series of District meetings required by the By-Laws was completed.

All three of the states in the Fifth District, Florida, Georgia and Alabama, were well represented. Unfortunately none were present from Puerto Rico which also is within that District.

A most interesting discussion of industry problems, including music was held. Carl Haverlin of BMI led the discussion on the music problem and C. E. Arney, Jr., represented the NAB staff.

Frank King, WMBR, Jacksonville, was chosen for the two-years Director's term succeeding Walter Tison of WFLA, Tampa. The meeting heartily endorsed the work of BMI and urged continued support of it by the broadcasters.

Following the election, the Sales Managers of the Fifth District held an interesting meeting presided over by Norman MacKay, WQAM, Miami, Chairman of the Fifth District Sales Managers Committee.

The following attended the meeting:

Don Joset, Maurice C. Coleman, WAGA; Ed Lord, WALB; Thad Holt, Ed Norton, WAPE; J. M. Comer, Jr., WATL; Jack Williams, John J. Tobola, WAXY; J. C. Bell, WREC; H. G. Wells, Jr., WCOA; Bill Covington, R. B. Raney, WCOV; Ralph Nicholson, L. S. Mitchell, WDAE; L. J. Duncan, WDAX; Harold P. Danforth, WDBO; Walter Tison, WFLA; Glenn Marshall, Jr., WFOV; J. W. Woodruff, Jr., WGPC; Harry E. Cummings, WIOD; John Hopkins, Evelyn Rothe, WJAX; H. G. Wells, Jr., WJHP; George A. Hazlewood, WLOF; "Red" Cross, WMAZ; Frank King, WMBR; W. Wright Esch, WJMJ; John F. Pidcock, WMGA; H. Wimp, WPAX; Fred Mizer, Norman MacKay, WQAM; J. W. Woodruff, Jr., A. Davenport, WRBL; W. R. Rincon, WRED; Happy Quailes, WRGA; Francis Kearney, WRUF; John M. Outler, Jr., WSF; Howard E. Pill, John B. DeMotte, WSFA; Henry Johnston, WSGN; Jerry A. Wiley, WSUN; Marjorie Willis, Weldon Heiner, WTOC.

C. O. Langlois, John Langlois, Lang-Worth Feature Programs, Inc.; D. A. Reesor, RCA; Herbert Denny, Standard Radio; Carl Haverlin, BMI; H. R. Mason, Associated Press; Leonard D. Callahan, SESAC; Andrew W. Bennett, Attorney.

**OHIO STATE EDUCATION CONFERENCE MAY 4-7**

Ohio State University's Twelfth Institute for Education by Radio will be held at the Deshler-Wallick Hotel,
Columbus, May 4-7, with "radio in the current crisis" the theme of the meeting.

A record number of broadcasters attended last year's institute, and were enthusiastic about it. The NAB hopes that an even larger number can attend this year.

George V. Denny, Jr., moderator of Town Hall of the Air; Dorothy Lewis, vice chairman of the Radio Council on Children's Programs; Paul White, director of news broadcasts for CBS; Leonard Power of the FREC; Walter G. Preston, Jr., manager of NBC's Public Service Program Division; Ed Kirby, War Department, and Neville Miller are a few of the many prominent radio authorities scheduled to speak or conduct meetings.

A complete program may be had on request at the NAB.

CONSUMER MEETING

The Third National Conference on Consumer Education held at Stephens College in Columbia, Missouri, April 7-9.

Since the conference was purely educational, most of the discussions were confined to ways and means of disseminating Consumer material and the use of "National Defense," as the means to an end. Advertising methods were discussed very little, but when they were brought up, they were attacked not from the "over" Advertised angle, but the "under" Advertised angle; E. I. a breakfast food advertises protein content, but a human would have to eat one-tenth of his weight of this breakfast food to get enough proteins for a normal day.

It was the consensus in the radio discussions that a Consumers' program must be sustaining, that any attempt to commercialize a Consumer's program would completely destroy its value.

Exclusive of the above, the conference attempted to set up machinery to spread Consumer information. "Since radio stations devote approximately 50% of their time to programs of a public service nature, the Institute for Consumer Education should use a great percentage of that." Daily and weekly market reports should be broadcast both on networks and local stations informing the public of the unwarranted rise in prices, reports on the National Defense Program, and the broadcasts of unethical business practices and principles in the line of National Defense. New techniques should be found to reach the listeners in the lower income bracket, possibly thru the "Soap Opera" medium. Material from the Institute of Consumer Education should be organized nationally and sent to local groups interested in such material. These local groups, Federated Women's Clubs, Better Business Bureaus, etc., would, in turn, request time on local stations for broadcasts in the Institute interest.

Charles Berry's National Defense talk on the National Farm and Home Hour was commended, and it was suggested in the Keith Tyler discussion that the National Broadcasting Company should be approached and requested to use more Consumer Material, and incorporate market reports on commercial products during the National Farm and Home Hour.

In the consumer group, radio is recognized as the best medium for Consumer Education, and on the strength of the programs now on the air of the General Federated Women's Clubs, the further use of independent radio stations for consumer education programs is urged.

ALUMINUM DISCS

In the NAB Reports (p. 265), reference was made to the possible effect of defense priorities upon available aluminum for the making of radio transcriptions. Some stations express apprehension lest this problem may become acute if proper steps are not taken.

One forward looking operator writes:

"Would it not be appropriate to appeal to advertising agencies to go through their piles of transcriptions that stations have sent them as samples of different programs, air checks, and so on, and ask their return to the respective stations as determined by the labels thereon. The stations can get an equal number of new recording blanks for the old ones they send in to the disc manufacturers. In this way the supply to the stations is assured, without interfering with defense needs for aluminum. This, of course, would only apply to the acetate type of blank which has an aluminum base. If stations can get their used blanks back we can probably keep going indefinitely, but with a constant outgo and no new stock available, we are all going to suffer from this shortage."

This is a good suggestion and we commend it to the attention of all station managers.

LABOR

JOB CHANGES

The NAB Labor Committee believes that stations employing members of other stations' staffs should require them to give due notice to their old employers before leaving.

The committee emphasizes that it believes broadcasting employees should have absolute and unrestricted opportunity for self-advancement. Nevertheless, it appears to be only fair that due notice be given by employees before leaving their jobs—and that this notice be required by the new employers.

The Labor Committee expresses this opinion in the light of information that some stations have been hard hit when their employees left for better jobs without adequate notice, to fill jobs made vacant in other stations by the departure of men for selective service or reserve officer duty.

SALES MANAGERS' MEETINGS

In all districts where they have not already been held, meetings of the Sales Managers' Division have been scheduled for some date before the NAB convention.

Station managers are urged to be represented, either in person if they direct sales, or by their sales manager.
Under the general chairmanship of E. Y. Flanigan of WSPD, Chairman of the Sales Managers’ Executive Committee, an agenda has been supplied to each division chairman listing a number of topics of the greatest concern to executives in charge of sales. Your presence is required not only for the contributions you can make to the discussions of these serious problems, but also for the good you can derive from them.

**AVIATION SCHOOLS GOOD PROSPECTS**

If you are not now getting your share of business from trade and mechanical schools that can prepare young men for jobs as aviation mechanics, we suggest that you lay the groundwork for some of this business as soon as possible.

Through the cooperation of many radio stations, thousands of recruits were secured for the flying corps of the army and navy. Congress has appropriated money for the construction of thousands of planes. Now the chief need is for mechanics and ground crews. At present the navy is soliciting aviation machinists for their 10,000 ships already appropriated for, and requires that such recruits be “graduates of an aviation vocational or aviation trade school.”

The need for machinists will soon be even greater, both by the army and navy, as well as by aviation manufacturing companies. One such company is already using radio to solicit workers, undoubtedly an outgrowth of the success radio stations have had in providing national defense agencies with 300,000 skilled workers through Civil Service up to March 1, 1941.

Numerous aviation trade schools already exist, and most of them already use radio to secure students. However, many other types of trade and mechanical schools, such as diesel engine, air-conditioning, radio and television, etc., could be converted into aviation training schools and swell their enrollments thereby. Radio stations can suggest and cooperate in this effort, and thereby increase commercial revenue.

**SEARS-ROEBUCK BUYS BASEBALL**

A departure from usual advertising practice by a Sears-Roebuck store is the sponsorship of baseball re-creations over KROY, Sacramento, Calif., for road games of the Sacramento team, and scores by innings of home games.

**RADIO CHECKING SERVICE**

Many stations may already be familiar with the newly organized “National Radio Checking Service, Inc.,” soliciting business from radio advertisers and offering to check the performance of stations to show the advertiser whether he is getting the service he is buying or not.

In a promotion piece soliciting shut-ins and others to do this checking, the company wrote:

“We work for the advertisers and that is what we need you for—to see that the advertiser gets the service he has paid for. Advertisers are interested only in the commercial part of their programs. They want and insist that this must be right and just as ordered. Our job is to see that there are no mistakes made by the station or the announcer.”

It is not within the province of NAB or its member stations, of course, to deny this company the right to solicit business from advertisers. But why should there be any need for such an outside agency, charging a separate fee to the advertiser, is what concerns broadcasters.

This service is available to advertisers without extra charge from the broadcasters themselves, who keep official logs and furnish affidavits of performance, as required by the FCC.

If there have been any abuses in commercial broadcasting such as to require advertisers to engage an outside checking service, the stations should act immediately to correct them. If errors are reported immediately by the station, and not charged for or make-goods scheduled, their interests will best be served in the long run. Other abuses, such as doubling-up or “backing” of spot announcements unless sold on that basis, should also be corrected.

Money that the advertiser spends for checking up on radio’s performance of its contract obviously cannot be spent for more time, and the very need for such a service (which we deny exists) would constitute a black eye for the broadcasting industry. Remember that checking copies of printed media are furnished and need no check-up at additional expense.

**SUCCESS STORIES NEEDED**

An important aim of the NAB Department of Broadcast Advertising is to serve as a national clearing house for success stories in all types of business, as well as for all other effective sales helps. The cooperation of every broadcaster is required, and this service in turn will be made freely available to any NAB member whenever requested.

Therefore please send all available success stories now, and place this Department on your mailing list to receive all future success stories and other promotion mailings.

**PER-INQUIRY and FREE OFFERS**

The moral in the following exchange of correspondence is, we think, obvious. The matter concerns the Mendenhall Mfg. Co., makers of women’s hosiery, previously reported in these columns. Every station manager, sales manager and credit manager should read it.

April 18, 1941 — 353
The following letter was received this week by the NAB Department of Broadcast Advertising:

Dear Mr. Pellegrin:

In the NAB REPORTS of April 11, 1941, page 335, there appears an article headed "Advertiser Threatens Suit."

I think that our experience with this same advertiser, the Mendenhall Mfg. Company, might prove of interest to NAB and to all NAB member stations. We would ask, however, that all references to this station be omitted if you see fit to publicize our experience.

About January 16th or 17th, we were approached by the Mendenhall Mfg. Company for rates and available spot time. There was no least hint that this company desired P. I. rates and our experience. To all NAB member stations. We would ask, however, that all references to this station be omitted if you see fit to publicize our experience.

Dear Mr. Pellegrin:

Replying to your favor of January 17th, please enter our order for 300 announcements of the enclosed continuity at $6.60 each, to begin at your earliest convenience and to run daily on your 7:40 a.m. spot and Sunday on the 12:59 p.m. spot. Thanking you, I am,

Very truly yours,

(Signed) Sperugeon Pickering,
Mendenhall Mfg. Company.

We were not content with this blanket order for the spots and under date of January 29th, we sent our regular contract with the times and number of spots clearly stated together with the unit price. One paragraph of this letter was as follows:

"We are enclosing our contract form made out in duplicate in accordance with provisions in your letter. Will you please sign and return both copies; the duplicate will be accepted by this station and returned to you for your files. Although your letter is considered our authority to run the announcements, it is a station policy in all cases to have our contract forms duly signed in order that we have a permanent record of our mutual understanding in our files." We have had a large number of complaints about the non-delivery of hosiery to those who sent in letters with the requisite price and which were forwarded to the Mendenhall Company. Again and again we urged them to be more prompt in delivery, at the same time sending our regular weekly bills for their indebtedness to us. After six weeks, we ceased broadcasting the spots as we had not been paid. Finally, about two weeks ago, our manager succeeded in getting Mr. Spurgeon Pickering on the telephone and told him that unless we had a check within the next three days we would short-rate him and institute suit. Mr. Pickering promised faithfully that we would have the check. But no check has been forthcoming. Finally, on April 9th, we wired him as follows: "Holding legal summons forty-eight hours. Stop. Must have check in full for account. Advise Western Union." Back came the following answer: "What in the H— do you mean legal summons. Your city is not place for a summons. I am not any novice in business. In the first place you had no right to run my announcements without pulling four returns for each dollar."

It scarcely seems worthwhile to institute suit as the case would have to be tried in Mississippi and the court costs, attorney's fees, etc., would amount to more than Mendenhall's indebtedness to this station, namely $277.20. I suppose, therefore, that we shall have to take the beating.

It seems to me that these and similar cases of bad faith and crookedness on the part of advertisers should be handled by some appropriate department of NAB. If some sort of insurance plan under which stations would pay NAB a definite premium were set up for the conduct of such cases and the prosecution of wrong-doers, it would be for the benefit of the whole industry and, at the same time, stop such practices on the part of unscrupulous individuals. Had this station management ever suspected that Mendenhall was a P. I. account, it would not, of course, have even considered taking the Mendenhall spots.

We would be very much interested in knowing what may be the ultimate outcome of the case you published in the April 11th NAB REPORTS, page 335. Likewise, we would like your advice as to procedures other than prosecution by which we might obtain a part, at least, of what this firm owes us.

Respectfully yours,

(Signed).

NAB replied as follows:

Dear —:

Your letter of April 14 regarding the Mendenhall Co. poses some interesting problems which have had the serious study of our staff members here. Russell Place, NAB Counsel, advises that legal action would have to be instituted by your attorneys in Mississippi; that the likelihood of your recovering would be slight, and that the expenses of legal action would entail further loss. Nevertheless, you would like to obtain at least part of the money Pickering owes you, and the only practical suggestion we can offer at this time is for you to take your record of response on this account, and submit a bill to Pickering based on four returns per dollar, since he has already admitted his indebtedness to you on that basis. Although this would not cover the full amount of your bill, and although you definitely did not understand this to be a P-I account, that is one practical way for you to recover at least part of your costs without further expense.

We cannot emphasize too strongly the necessity for stations to secure credit ratings on unknown accounts of this type, to avoid sad experiences such as this. One station to my knowledge handled the Pickering proposal as follows:

On receipt of his original offer, the station replied that announcements could be bought only at card rates, and quoted its price for a month's service. Pickering accepted and authorized the station to proceed. Unable to learn his credit rating, however, the station requested payment for the month's service in advance. This was never received—and the announcements never went on the air. The station did not lose any money; its listeners were not disgruntled by slow delivery of merchandise ordered, and Pickering did not get the benefit of "free" radio advertising. Procedure similar to that should, we think, be followed in all such cases.

A slight amount of "business" may be lost by rigorous adherence to such procedure, but in the long run collections will be higher, expenses less, listeners better served, legitimate advertisers protected, per-inquiry dealers and outright chiselers effectively discouraged, and the ultimate best interests of the radio industry and advertising in general better served.

Sincerely yours,

Frank E. Pellegrin,
Director,
Dept. of Broadcast Advertising.

A request for free time has been reported by several members from the "Society of Inter-American Relations, Sociedad Panamericana, Quito, Equador." This organi-
zation, capitalizing on a “good neighbor” approach, seeks free announcements to promote the sale of Equadorian seeds at 10¢ per package “to cover handling and mailing costs.” The announcement says that “with the seeds will come a list of Equadorian trade and merchandise offerings designed to increase business between the Americas.”

We believe that since broadcasters get regular rates to promote the sale of seeds and nursery products of regular advertisers, it would hardly be fair nor good business practice to give time free to this applicant, and the follow-up mentioned seems to us to be an effort to secure mail-order business, another type of business for which broadcasters are entitled to regular rates.

The Hicks Advertising Agency of Dallas, Tex., is seeking contingent deals on behalf of the Breedlove Nurseries. Stations are advised to adhere to regular rates if approached by this advertiser.

It is confidentially reported by an NAB member that the President of the Eastern Wire Corporation made the statement that he had never bought anything at card rates and that he was not going to start now.

Commented our member: “I simply send this along to show how stations that do not observe their rate cards do have an effect upon and hurt the whole industry.”

---

**BMI**

**“BMI HAS THINGS IN CONTROL”**

That is the conclusion of a reporter for the Charlotte News (Charlotte, North Carolina) after making inquiries. The article reads in part as follows:

*Reporter on Assignment*

The Assignment:

Whatever happened to the ASCAP-BMI row? Is Jeannie still wearing her hair light brown?

* * * * * *

**And The Report**

By Pete McKnight, Reporter

Apparently the lady hasn’t changed the tint of her locks. It’s just that we don’t hear so much about it now. And that’s the whole story behind the present status of the BMI-ASCAP deadlock. BMI has things in control.

**BMI is new, you know. Its first song was published early in 1940. . . . At first, the available songs were limited and your radio and mine played Jeannie until the poor gal was worn out. But it wasn’t long before the nation’s previously-suppressed young songwriters started things humming. ASCAP hadn’t given them a look-in. BMI was a God-send. Thus, such tunes as You Walk By, So You’re The One, I Hear A Rhapsody, High On A Windy Hill, and dozens of other acceptable ones went out over the air, started selling sheet music and phonograph records.**

* * * * * *

The fight seems to be over, and ASCAP will have to meet BMI’s terms (sic) which originally were simple—charge us for using your music on the radio on the basis of the frequency each tune is played.

**NEW HIT MAKERS TO THE FORE**

Hit songs by newcomers are a specialty with BMI. The two numbers from the BMI catalogue which lead in the best selling sheet music list this week, Wise Old Owl and Walkin’ by the River, are the works of writers whose names have not appeared among the hit makers.

The story of Una Mae Carlisle, who wrote Walkin’ by the River, is so striking that it was the feature of this week’s We, the People program. The gifted young colored girl told the audience that she took her first piano lessons from her mother, a school teacher, and was later graduated from the music department of Wilberforce University. She had two great ambitions, one to write music and the other to go to Europe. A trip to England started her on the road to success in music. The way she electrified friends in England with her American music led to opportunities for appearances in public and before the war began she had made a sensation in Paris which could probably be compared to nothing except the place which Josephine Baker made for herself in the entertainment world in Paris. At the moment when war broke, Miss Carlisle was appearing at Shepard’s in Cairo, Egypt, one of the most famous resorts of international society.

She returned to New York with the manuscript of a song which had been inspired by memories of peaceful evenings along the Thames in England, and Walkin’ by the River has now landed among the lists of hit song writers the name which she had already put into bright lights as a singer and orchestra leader.

Both words and music of Wise Old Owl were written by Joe Ricardel, a New York boy, who first set out to become a concert violinist. He was the pupil of one of New York’s greatest violin teachers, Ferdinand Carri, and his career was radically changed by Carri’s death. Arrangements had been made for Mr. Ricardel’s debut at Town Hall in New York when Carri died and plans for the debut were thrown into confusion and ultimately abandoned.

Joe Ricardel, crushed by the loss of the master to whom he had been so deeply devoted, could find no inspiration in the various efforts he made to carry on his studies under other teachers. He gave up his plans for the concert field and went into work with dance orchestras. The violin was no longer in much demand among the dance bands so he bought himself a saxophone and learned to play that as well as the clarinet and trumpet. Before long he had organized his own dance band and for several years has been building his reputation as band leader up and down the Atlantic Coast from Maine to Florida. His

band has also been heard throughout the country in broadcasts originating from WOR in New York. Meanwhile, he was studying singing at the Mackie School of Music and also with Mlle. Liazza, formerly of the Metropolitan Opera. He does the vocal work with his own band. Last summer his band was at the Claremont Inn, which overlooks the Hudson River from the heights of upper Manhattan, and he is scheduled to return there for the summer of 1941.

The idea for his current hit, Wise Old Owl, grew out of an episode at the Claremont last summer. "About 1 o'clock one morning," he says, "I was on the open terrace when a young boy and girl strolled by. In the course of the conversation the young man asked the girl whether she loved him. The girl answered Yes rather hesitantly. Just at this point a tug went by on the river and hooted just like an owl. Immediately I began to wonder what it was that did say Hoo. When I finally remembered it was an owl, I had a song title."

BMI's second year begins auspiciously with this evidence that the company continues its policy of holding the door wide open to new talent.

13. TALKING TO THE WIND
14. BREAKFAST FOR TWO
15. WITH A TWIST OF THE WRIST
16. WHERE'S THE CAPTAIN'S HAT

**SEVEN MONTHS' CHANGE**

Variety for April 16th announces in headlines, "ASCAP NUMBER 7TH ON LIST," meaning thereby that an ASCAP publication reaches 7th place on Variety's list of the fifteen best sheet music sellers for the past week. The fact that Variety regards this as an item of news becomes particularly significant after a glance back through the files. On August 21st Variety announced in two-column headlines, "BMI LANDS 2 AMONG 'MOST PLAYED' LEADERS, BUT NONE IN 25 'BEST-SELLERS.' " On August 28th Variety carried a two-column box with the headline, "BMI'S 'PRACTICE' MOVES UP." The item reported that Practice Makes Perfect was tied for first place in network performances and had made the Lucky Strike Hit Parade the week before in 9th place. "Also for the first time since the song was introduced the sheet sales on Practice started Monday (26th), according to jobbers, to show they were going some place." It was not, however, until the issue of the following week, September 4th, that the BMI initial appeared for the first time on the Variety list of best-sellers. Now, just over seven months later, Variety finds it worth a headline when the other team scores.

The general proportion of numbers from BMI and affiliated publishers on the best-seller lists remains about what it has been for some weeks. The current sensation is the behavior of the Marks tune, Amapola, which heads the lists of best-selling records and sheet music as well as the Variety list of network plugs. Sheet sales on the number are reported to approach the 300,000 mark and the Jimmy Dorsey record heads the lists throughout the country.

Amapola was written in 1924 by Joseph McCall, who was for twenty-five years music director and critic for the Columbia Phonograph Company. It was originally published by Master Music. Several years later G. Schirmer bought it and successfully featured it as a semi-classical selection. In 1933 the copyright was acquired by Marks who published it as a concert number and also as a tango. Late in 1940, Marks brought it out as a foxtrot with new lyrics by Albert Gansle, and the song soon began to find favor with band leaders. To date, some twenty Amapola recordings have been made, including those by Sammy Kaye, Les Brown, Chick Bullock, Xavier Cugat, Henry Horlick, Nano Rodrigo, Connie Boswell, Deanna Durbin, and Jimmy Dorsey. The Dorsey recording, featuring two vocals in different tempo by Bob Eberly and Helen O'Connell, is the one now heading the best-seller lists.

In addition to Amapola, McCall also wrote a number of military marches and tangos. A native of Spain, he studied at the Paris Conservatory before coming to America where he spent most of his life. In 1924, McCall returned to Spain and so inspired by the beauty of his native land, it is reported, that he composed Amapola.
into a single station for more effective operation is made possible by action of the FCC in approving assignment of the license of Station WARD from the United States Broadcasting Corporation to the Unified Broadcasting Corporation of Brooklyn and, at the same time, modifying the license of the latter to permit unlimited time operation and move studios to 554 Atlantic Avenue, that city.

Under this authorization, the new operating company will absorb the facilities of WLTH, licensed to WLTH-New York, Inc.; WVFW, Paramount Broadcasting Corporation, and WBBC, Brooklyn Broadcasting Corporation, and operate with equipment of WARD, with 250 watts power as heretofore.

The move was pursuant to suggestion made by the Commission in its decision in the so-called “Brooklyn cases” October 22 last. At that time, in renewing licenses of WLTH and WARD and denying the application of WBBC for the facilities of WLTPI and WARD, the Commission stated that it would “entertain any feasible proposal for the consolidation of the four present licensee corporations into a new organization to operate one station under a single management and control for the purpose of supplanting the four existing stations. In this connection, however, such new corporation or other organization must be prepared to demonstrate to the satisfaction of the Commission that the management selected will consist of persons who are highly responsible and fully qualified to operate the new station.”

CAIRO TREATY

The United States Government Printing Office, Washington, D. C., now has available for immediate distribution 5,000 copies of Treaty Series No. 948, which contain the General Radio Regulations adopted at Cairo in 1938.

A copy of this publication may be obtained from the Public Printer at a price of fifty cents. All orders should be accompanied by a remittance as the rules of the United States Government Printing Office require payment before delivery.

Attention is invited to Item 7, Part A, Appendix 10 of the General Radio Regulations, Cairo Revision 1938 Annexed to the International Telecommunication Convention in Force (Madrid 1932), which requires that “Ship Stations” on board ships compulsorily equipped with radiotelegraph installation must provide themselves with these Regulations.

Also other stations whose operations involve international aspects should provide themselves with these regulations.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, April 21. They are subject to change.

Monday, April 21
Consolidated Hearing
NEW—The Outlet Company, Providence, R. I.—C. P., 41300 kc., 16,370 square miles, unlimited time.

Tuesday, April 22

Wednesday, April 23

Friday, April 25

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast and television cases. They are subject to change.

April 29
Television
W1XG—General Television Corporation, Boston, Mass.—Modification of license (considered as C. P.), 50000-56000 kc., 500 watts visual, emission A-S, Sec. 4.4(a). Present assignment: 12000-56000, 60000-86000 kc., 500 watts visual, emission A-5, Sec. 4.4(a).

May 1
To Be Held in U. S. Court of Appeals Court Room, Old Post Office Building, in Atlanta, Georgia.

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 890 kc., 1 KW night, 5 KW LS, unlimited time.

May 5
Hearing To Be Held in Pensacola, Florida, Beginning May 5 and Continued Thereafter in Panama City, Florida, and Ocala, Florida, as follows:

Pensacola, Florida, in Court Room, County Court Building.
Panama City, Florida, in Court Room, County Court House.
Ocala, Florida, in U. S. Court Room, 2nd Floor, U. S. Post Office Building.

WTMC—Ocala Broadcasting Company, Inc., Ocala, Florida.—In the Matter of Revocation of License of Station.
WDLP—Panama City Broadcasting Company, Panama City, Fla.—In the Matter of Revocation of License of Station.
May 16
KMA—May Broadcasting Company, Shenandoah, Iowa.—Renewal of license, 930 kc., 1 KW night, 5 KW day, unlimited time.

May 28
KRBC—Reporter Broadcasting Company, Abilene, Texas.—C. P., 940 kc., 1 KW, unlimited, DA night and day. Present assignment: 1420 kc., 250 watts, unlimited time.

May 29
WRDW—Augusta Broadcasting Company, Augusta, Georgia.—C. P., 1150 kc., 500 watts night, 1 KW day, unlimited time. Present assignment: 1500 kc., 250 watts, unlimited time.

June 2
NEW—Symons Broadcasting Company, Ellensburg, Wash.—C. P., 1110 kc., 1 KW, unlimited time.

Consolidated Hearing
WPAY—Chester A. Thompson (Transferee) and The Brush-Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio.—Transfer of control of corp., 1370 kc., 100 watts, unlimited time.
WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Renewal of license, 1350 kc., 100 watts, unlimited time.

June 4

June 12
WQBC—Delta Broadcasting Company, Inc., Vicksburg, Miss.—Modification of C. P., 1360 kc., 500 watts night, 1 KW day, unlimited time. Present assignment: 1360 kc., 1 KW day-time.

June 16
Television Broadcast
W2XD—General Electric Company, Schenectady, N. Y.—For license to cover C. P., 162000-165000 kc., 40 watts, emission A-5, Sec. 4.4(a).

June 18
WBRE—Louis G. Baltimore, Wilkes-Barre, Pa.—C. P. to erect a synchronous station, 1310 kc., 100 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

NEW STATIONS GRANTED
Inter-City Advertising Co., Charlotte, N. C.—Granted construction permit for new standard broadcast station to operate on 610 kc., 1 KW unlimited, subject to approval of directional antenna design (B3-P-3278).
Ruben E. Aronheim, Fitchburg, Mass.—Granted construction permit for new standard broadcast station to operate on 1310 kc., 250 watts night and day, unlimited time; exact site and antenna system to be determined with Commission’s approval (B1-P-3061).

NEW FM STATIONS
St. Louis University, St. Louis, Mo.—Granted construction permit for new high frequency (FM) broadcast station to operate on 451000 kc.; coverage of 13,000 sq. mi.; with more than 1,500,000 population (B4-PH-37).

APPLICATIONS GRANTED
KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted construction permit to change frequency from 1290 kc. (1230 kc. under NARBA) to 710 kc., increase power from 1 KW night and day to 5 KW, move transmitter to new site, install new transmitter, and directional antenna for day and night use, subject to engineering approval (B3-P-3011).
KXYZ—Harris County Broadcast Co., Houston, Tex.—Granted construction permit to move transmitter to Deepwater, Tex., use KTRH transmitter, increase power from 1 KW day and night to 5 KW day and night, change frequency from 1470 kc. (NARBA) to 1320 kc. (NARRBA), install directional antenna for night use; antenna system to comply with Commission’s requirements (B3-P-3016).
KAND—Navarro Broadcasting Assn., Corsicana, Tex.—Granted construction permit to increase power from 100 watts unlimited to 250 watts night and day, and make changes in equipment; station operates on 1310 kc. (B3-P-3121).
K9XZY—The Pulitzer Publishing Co., St. Louis, Mo.—Granted renewal of license of facsimile broadcast station W9XZY for the period March 1, 1941 to March 1, 1942; granted upon an experimental basis only and upon the express condition that it is subject to change or cancellation by the Commission at any time, without advance notice or hearing (B4-FR-5).
WARD—United States Broadcasting Corp. (assignor), United Broadcasting Corp. of Brooklyn (assignee), Brooklyn, N. Y.—Granted permission to assign license of Station WARD from United States Broadcasting Corp. to Unified Broadcasting Corp. of Brooklyn, to effect a consolidation of four Brooklyn stations (WARD, WLTH, WVFV, and WBBG), now sharing time, into operation of a single station (WARD) (B1-AL-302).
WARD—Unified Broadcasting Corp. of Brooklyn, Brooklyn, N. Y.—Granted modification of license to increase hours of operation from sharing with W1TH, WVFV, WBBG, to unlimited, and change studio location to 551 Atlantic Ave., Brooklyn, N. Y. (requests facilities of WBBG, WVFV and WLTH) (B1-ML-1054).

DESIGNATED FOR HEARING
WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Application for construction permit to change frequency from 1100 kc. to 1060 kc., increase power from 250 watts to 10 KW night and day, install new transmitter, install directional antenna for day and night use and move transmitter (B3-P-3066).
WDAE—Tampa Times Co., Tampa, Fla.—Application for construction permit to change frequency from 1250 kc. to 710 kc., increase power from 5 KW unlimited (using directional antenna) to 10 KW; move transmitter site from Tampa, Fla. to Thonotosassa, Fla.; install new transmitting equipment and install directional antenna for night use (B3-P-2841).
KVOA—Arizona Broadcasting Co., Inc., Tucson, Ariz.—Application for construction permit to change frequency from 1290 kc. to 290 kc., and install directional antenna for day and night use (B5-P-2906).
KVFD—Northwest Broadcasting Co., Fort Dodge, Iowa.—Application for license to initiate new high frequency (FM) station to operate on 1510 kc., coverage of 13,000 sq. mi.; with more than 1,500,000 population (B4-PH-37).

MISCELLANEOUS
WTMC—Ocala Broadcasting Co., Inc., Ocala, Fla., and WDLP—Panama City Broadcasting Co., Inc., Panama City, Fla.—Granted motions filed by Harry W. Kerle, Jacksonville, Fla., to permit his appearance on behalf of Ocala Broadcasting Co., Inc., Ocala, Fla., and Panama City Broadcasting Co., Inc., Panama City, Fla., in re hearing on revocation of licenses of Stations WTM C and WDLP; granted motions of John H. Perry, Palma Beach, Fla., to intervene in above causes; granted motions filed by Ocala Broadcasting Co., Inc., Panama City Broadcasting Co., Inc., and John H. Perry, for postponement of hearings on revocation of licenses
of Station WTMG now scheduled for April 14 and of Station WDLP now scheduled for April 17 to May 5, 1941, said hearing to be held at Pensacola, Fla., on such date and thereafter be transferred to Panama City and Ocala, Fla., as may be directed.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted special temporary authority to operate from 7:30 p.m. to the conclusion of Fifth Annual Convention of the California Young Farmers Association program on August 8, 1941, in order to broadcast said program only, and from 7:45 p.m. to approximately 9:30 p.m. M.T., April 11, 1941, in order to broadcast presentation of Stain's "Crosley Show," only.

WSUI—State University of Iowa, Iowa City, Iowa—Granted special temporary authority to operate a minimum of nine hours daily for the period April 9, 1941, to not later than April 14, 1941, in order to observe the Easter vacation period at the University of Iowa. Sears Roebuck & Co., Philadelphia, Pa.—Granted petition to intervene in the hearing on New Jersey Bell Tel. Co.'s application for authority to acquire capital stock of Imperial Securities Co.

WPAY—Chester A. Thompson (Transferor) and The Brush-Moore Newspapers, Inc. (Transeree), Portsmouth, Ohio.—Granted petition for continuance of hearing until June 2, on application for consent to transfer control of Vee Bee Corp., licensee of station WPAY, and application for renewal of license of WPAY.

WPAE—Vee Bee Corp., Portsmouth, Ohio.—Granted petition for continuance of hearing until June 2, on application for consent to transfer control of Vee Bee Corp., licensee of station WPAY, and application for renewal of license of WPAY.

WIXG—General Television Corp., Boston, Mass.—Granted petition to continue hearing now scheduled for April 15 to April 29, on applications for construction permits to change frequencies.

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas.—Granted authority to install automatic frequency control equipment on 1490 kc. under NARBA (B3-F-205).

WAPA—W. M. Patton, Chattanooga, Tenn.—Granted authority to install automatic frequency control equipment on 1150 kc. under NARBA (B3-F-207).

KYW—Westinghouse Radio Stations, Inc., Philadelphia, Pa.—Granted authority to install automatic frequency control equipment on 1050 kc. under NARBA (B3-F-205).

KOL—Seattle Broadcasting Co., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna input on 1300 kc. (NARBA) (B5-Z-794).

WHN—Marcus Loew Booking Agency, New York, N. Y.—Granted authority to determine operating power by direct measurement of antenna input on 1030 kc. (NARBA) (B1-Z-743).

WFGB—The Gable Broadcasting Co., Altoona, Pa.—Granted authority to determine operating power by direct measurement of antenna input on 1310 kc. (NARBA) (B2-Z-757).

KTSW—Emporia Broadcasting Co., Inc., Emporia, Kans.—Granted authority to determine operating power by direct measurement of antenna input on 1140 kc. (NARBA) (B4-Z-747).

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted authority to determine operating power by direct measurement of antenna input on 1100 kc. (NARBA) (B4-Z-747).

WGAG—J. K. Patrick & Co., Athens, Ga.—Granted authority to determine operating power by direct measurement of antenna input on 1270 kc. (NARBA) (B5-Z-745).

WATT—Brentwood Broadcasting Corp., Jersey City, N. J.—Granted modification of construction permit for installation of new transmitter and directional antenna for night use, change in hours of operation and increase in power, move of transmitter for 970 kc. under NARBA and changes in directional antenna (B1-MP-1237).

W8XCT—The Crosley Corp., Cincinnati, Ohio.—Granted modification of construction permit which authorized new television broadcast station, for extension of completion date from April 28, 1940, to October 28, 1941 (B2-MPVB-39).

WRCN—National Broadcasting Co., Inc., Broad Brook, Conn.—Granted license to cover construction permit as modified to install new equipment, change frequencies and increase power: 9670, 17780 kc.; 50,000 watts; shares time on 11750 kc., with Station WBOS; unlimited time on 9670 kc. (B1-LIB-14).

WCWH—Congress Square Hotel Co., Portland, Maine.—Granted modification of construction permit which authorized installation of directional antenna for day and night use and increase in power, for changes in directional antenna on 1240 kc., under NARBA (B1-MP-1313).

WFCl—Patrick Broadcasting Co., Pawtucket, R. I.—Granted modification of construction permit for new station, for extension of completion date from April 17, 1941 to May 17, 1941 (B1-MP-1246).

KEYS—Earl C. Dungan and Chas. W. Rossi, d/b/a Nuuces Broadcasting Co., Corpus Christi, Tex.—Granted license to cover construction permit as modified for new station, specifying 1370 kc. under NARBA (B3-L-1354). Also granted authority to determine operating power by direct measurement of antenna input on 1370 kc. (NARBA) (B3-Z-740).

WPCR—Forrest Broadcasting Co., Inc., Harlingen, Texas.—Granted license to cover construction permit which authorized increase in power and equipment changes: 1100 kc. (NARBA), 250 watts, unlimited time (B3-L-1368).

KUJ—KUJ, Inc., Walla Walla, Wash.—Granted license to cover construction permit as modified for changes in equipment, antenna changes, increase in power, change in frequency and move transmitter: 1120 kc. under NARBA, 1 kw, unlimited time (B3-L-1366). Also granted authority to determine operating power by direct measurement of antenna input on 1120 kc. (NARBA) (B5-Z-762).

KFEU—Eugene P. O'Fallon, Inc., Denver, Colo.—Granted license to cover construction permit as modified for increase in power, installation of new transmitter and directional antenna, and move transmitter: 950 kc. (NARBA), 5 kw, unlimited time, directional antenna (B5-L-1370). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-742).

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Granted license to cover construction permit which authorized installation of new transmitter: 550 kc., 1 kw, unlimited time (B5-L-1369).

Essex Broadcasters, Inc., Detroit, Mich.—Granted special temporary authority to transmit to radio station CKLW for broadcast by that station program in connection with The Lutheran Charities in Detroit from 4:30 p. m. to 5 p. m. EST, May 4, 1941.

Western Mass. Broadcasting Co., Pittsfield, Mass.—Granted motion for indefinite postponement of hearing on application for construction permit to operate on 1300 kc.—1190 under NARBA—100 watts; unlimited time.

WNAX—So. Dakota Broadcasting Corp. (Transferor), and Iowa Broadcasting Co., Inc., Rushmore, So. Dak.—Granted petition for leave to withdraw without prejudice application for transfer of control of station WNAX, scheduled for hearing April 16.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to operate from 4:30 to 5:30 a.m. EST, of station WEAU, to determine if it is necessary to broadcast the Pope's Message, only (B4-S-924).

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Granted special temporary authority to operate on 1390 kc., with power of 300 watts, during hours vacated by WGES (6 to 7 a.m., 12 to 3 p.m. and 8 to 12 midnight, CST) for period not to exceed 30 days to broadcast non-sponsored programs only, pending completion of construction for unlimited time operation (B4-S-557).

KUO—Evangelical Lutheran Synod, etc., Clayton, Mo.—Granted special temporary authority to operate from 2 to 4 a.m. EST, on April 2, in order to broadcast an Easter program only, during station's program time (B5-L-1368).

KGIW—E. L. Allen, Alamosa, Colo.—Granted special temporary authority to remain silent until April 10, 1941, pending installation of new equipment.

KTHS—Hot Springs Chamber of Commerce, Hot Springs National Park, Ark.—Granted special temporary authority to operate simultaneously with Station WTMG on 1470 kc., CST, to local sunrise (April 5:45 a.m. CST), April 13, 1941, in order to broadcast Sunrise Services only.

District Radio Broadcasting Co., Murray, Utah.—Granted motion for leave to amend petitioner's application for construction permit to extend station's program time (B5-L-1369) (B4-S-924).

KFNF—KFNF, Inc., Shamrock, Iowa.—Continued hearing for renewal of license now scheduled for April 16 to May 4, 1941.
APPLICATIONS FILED AT FCC

590 Kilocycles

WMBS—Fayette Broadcasting Corp., Uniontown, Penna.—Authority to determine operating power by direct measurement of antenna power.

WMBS—Fayette Broadcasting Corp., Uniontown, Penna.—License to use old RCA 250-D transmitter for auxiliary purposes.

WMBS—Fayette Broadcasting Corp., Uniontown, Penna.—License to cover construction permit (B2-P-2771) as modified for installation of new transmitter, change in frequency, increase in power and directional antenna for night use.

690 Kilocycles

KGGF—Hugh J. Powell, Coffeyville, Kansas.—Authority to determine operating power by direct measurement of antenna power.

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Construction permit to change frequency from 1010 kc. to 710 kc., increase power from 5 KW to 50 KW, install new transmitter and make changes in directional antenna for day and night use. Amended: re changes in directional antenna.

930 Kilocycles

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Construction permit to install directional antenna for night use.

Amended: re changes in directional antenna and move transmitter.

960 Kilocycles

KMA—May Broadcasting Co., Shenandoah, Iowa.—Authority to determine operating power by direct measurement of antenna power.

1160 Kilocycles

WJJJD—WJJJD, Inc., Chicago, Ill.—Authority to install automatic frequency control equipment.

1190 Kilocycles

KEX—Oregonian Publishing Co., Portland, Oregon.—Construction permit to install new transmitter, directional antenna for day and night use, change frequency from 1180 kc. to 1160 kc., increase power from 5 KW to 50 KW, change hours of operation to unlimited and move transmitter. Amended: re changes in directional antenna, specify 1190 kc. under NARBA and change transmitter location.

1210 Kilocycles

NEW—Capital City Broadcasting Co., Inc., Topeka, Kans.—Construction permit for a new broadcast station to be operated on 1170 kc., 5 KW, daytime (Class II station). Amended: To change transmitter location and request 1210 kc. under NARBA.

1230 Kilocycles

NEW—WFAM, Inc., Lafayette, Ind.—Construction permit for new standard broadcast station to be operated on 1230 kc., 100 watts power, unlimited time. Facilities of WFAM.

NEW—Southwest Broadcasters, Inc., Las Vegas, N. Mex.—Construction permit for a new standard broadcast station to be operated on 1230 kc., 250 watts, unlimited time.

1240 Kilocycles

KFOR—Cornbelt Broadcasting Corp., Lincoln, Nebr.—Authority to determine operating power by direct measurement of antenna power.

KFOR—Cornbelt Broadcasting Corp., Lincoln, Nebr.—License to cover construction permit (B4-P-3067) for changes in equipment, antenna changes, increase in power and move of transmitter.

NEW—Birney Imes, Tupelo, Miss.—Construction permit for a new standard broadcast station to be operated on 1240 kc., 250 watts, unlimited time.

KVUM—Yuma Broadcasting Co., Yuma, Ariz.—Authority to determine operating power by direct measurement of antenna power.

1250 Kilocycles

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Modification of construction permit (B3-P-2985) to install new transmitter, directional antenna for night use, increase in power, requesting 1250 kc., under NARBA and changes in directional antenna system, extension of commencement and completion dates 30 and 60 days respectively.

1290 Kilocycles

KVOA—Arizona Broadcasting Co., Tucson, Ariz.—Authority to determine operating power by direct measurement of antenna power.

1300 Kilocycles

KOL—Seattle Broadcasting Co., Seattle, Wash.—Authority to install automatic frequency control equipment.

1310 Kilocycles

WCAM—City of Camden, N. J.—Authority to determine operating power by direct measurement of antenna power.

1320 Kilocycles

WATR—The WATR Co., Inc., Waterbury, Conn.—Construction permit to increase power from 250 watts to 1 KW, install new transmitter and make changes in directional antenna. Amended: To specify 1320 kc. under NARBA.
1330 Kilocycles
WFBC—Greenville News-Piedmont Co., Greenville, S. Car.—Modification of construction permit (B3-P-1849) requesting changes in directional antenna and extension of commencement and completion dates. Amended: To make further changes in directional antenna and 1330 kc. under NARBA.

1340 Kilocycles
WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Authority to determine operating power by direct measurement of antenna power.

1350 Kilocycles
KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Authority to determine operating power by direct measurement of antenna power.

1390 Kilocycles
WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Modification of construction permit (B4-P-3063) requesting change in type of transmitter, changes in directional antenna system for day and night use on 1390 kc., under NARBA, and extension of commencement and completion dates.

1410 Kilocycles
WNBC—State Broadcasting Corp., New Britain, Conn.—Modification of construction permit (B1-P-2723) as modified, requesting changes in directional antenna. 1410 kc. under NARBA, increase in power from 1 KW night, 5 KW day to 5 KW day and night, using directional antenna day and night and extension commencement and completion dates to 30 days after grant and 180 days thereafter respectively.

1450 Kilocycles
KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Authority to determine operating power by direct measurement of antenna power.

1470 Kilocycles
WMBD—Peoria Broadcasting Co., Peoria, Ill.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles
KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Construction permit to install new transmitter, make changes in antenna, change frequency from 1490 to 560 kc., increase power from 250 watts to 500 watts night, 1 KW day.

KYCA—Southwest Broadcasting Co., Prescott, Ariz.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATIONS
NEW—Columbia Broadcasting System, Inc., Boston, Mass.—Construction permit for a new high frequency broadcast station to be operated on 14100 kc.; coverage, 16,230 square miles; population, 5,972,246. Amended: To request 12500 kc.; coverage, 20,200 square miles; population, 5,884,179; change type of antenna and location of transmitter to Summit of Mt. Asnebumskit, Paxton, Mass.

NEW—Hughes Productions, Division of Hughes Tool Co., Los Angeles, Calif.—Construction permit for a new high frequency broadcast station to be operated on 14500 kc.; coverage, 7,315 square miles; population, 2,575,558.

NEW—Hughes Productions, Division of Hughes Tool Co., San Mateo County, Calif.—Construction permit for a new high frequency broadcast station to be operated on 14500 kc.; coverage, 10,790 square miles; population, 1,893,802.

NEW—Columbia Broadcasting System, Inc., St. Louis, Mo.—Construction permit for a new high frequency broadcast station to be operated on 14700 kc.; coverage, 10,950 square miles; population, 1,708,332.

NEW—McNary and Chambers, Washington, D. C.—Construction permit for a new high frequency broadcast station to be operated on 14700 kc.; coverage, 2,610 square miles; population, 762,485.

W6SIV—Central New York Broadcasting Corp., Syracuse, N. Y.—Modification of construction permit (B1-PH-50) for new high frequency broadcast station requesting changes in antenna, change in transmitter site from Sentinel Heights Road, Onondaga, New York, to Pompey, New York, population, 827,879.

NEW—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Construction permit for a new high frequency broadcast station to be operated on 13300 kc.; coverage, 13,640 square miles; population, 1,017,471.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Alvi Company—Charging dissemination of false advertisements in the sale of a hair dye cosmetic a complaint has been issued against Casimiro Muojo, trading as Alvi Co., and as Alvi, Inc., 138 Grand St., New York. According to the complaint, the respondent sells his preparation as “Vitale Instantaneous Hair Dye” and under other designations containing the word “Vitale”.

The complaint charges that in newspaper and other advertisements the respondent represents that his preparation is scientific, safe, and free from harmful, dangerous and injurious chemicals; will end premature gray hair; will produce a permanent, natural, uniform shade; will give the hair the warmth, color, luster and glint of youth, and will have no ill effects upon the body. However, the complaint further alleges that the respondent’s product is a chemical dye incapable of affecting the hair in any way other than as a dye, and will not accomplish the results claimed.

Mummi Company—Charging dissemination of false advertisements containing paraphenylene-diamine, a toxic coal tar derivative, in sufficient quantity to cause in some cases skin irritation and other harmful effects, if used under the conditions prescribed in the advertisements, or under customary and usual conditions. The complaint charges that the advertisements disseminated by the respondent contain neither warnings against the use of the preparation on the eyelashes or eyebrows, nor adequate warnings as to the necessity of a proper skin patch test before each application so as to determine the user’s toxic reaction. Consequently, the complaint alleges, the respondent’s advertisements constitute false advertisements in that they fail to reveal that use of the preparation under customary conditions or under conditions prescribed in the advertisements may result in injury to health (4484).

April 18, 1941 — 361
check sneezing and discharging from the nose, when such are not the facts.

According to the complaint, the respondents also represented that "Sterline's Combination Home Treatment" is a cure, remedy or competent treatment for asthma and that it will restore one to health and prevent the return of asthma. The respondents, according to the complaint, further represented that this treatment is a cure or remedy for bronchitis when that disease is associated with asthma.

The complaint alleges that the respondent's combination asthma treatment and the individual preparations which constitute it ("W. K. Sterline's Compound", sometimes referred to as "Sterline's Asthma Compound"; "W. K. Sterline's Elixir", sometimes referred to as "Sterline's Bronchial Elixir"; and "Korona" or "Asthma Powder"), used separately or in any combination, have no generally recognized therapeutic value in the treatment of asthma or bronchitis in excess of affording temporary relief from the paroxysm usually associated with asthma.

The complaint further charges that W. K. Sterline's Compound contains the drugs potassium iodide and fluid extract of lobelia and that its use as thus constituted may be harmful to those suffering from active or latent tuberculosis; that this product also contains sodium bromide and that use of the preparation as thus constituted over a long period is likely to cause mental derangement; that the advertisements disseminated by the respondents contain no warnings concerning the safe and proper use of this preparation under the circumstances; and that consequently such advertisements constitute false advertising in that they fail to reveal that use of this preparation under customary conditions or under conditions prescribed in the advertisements may result in serious injury to health.

According to the complaint, the respondent has represented on advertising letters and cards bearing the signatures of certain purported women's clubs, namely, "American Good Housekeepers Club" and "The Good Northern Women's Club," and by other means, that his mattresses are approved or recommended by various women's clubs; that they are designed, sponsored or recommended by a physician and made of new and unused materials; that the prospective purchaser's name has been specially selected and that by reason thereof he is given an opportunity to obtain a mattress at a special or reduced price which represents the actual cost of manufacture. The complaint further alleges that the respondent also advertised that his offer was open for a limited time only, and was made in connection with a special advertising campaign.

However, the complaint charges that the respondent's mattresses have not been recommended as advertised, either by physicians or by women's clubs; that the names of women's clubs advertised are wholly fictitious; that names of prospective purchasers are not chosen on a particular basis but merely from a part of general mailing lists used by the respondent and his advertising agency, and that the prices advertised are not special or reduced prices. The complaint further alleges that in many instances the respondent's products are not made entirely of new materials but of used or second-hand materials.

The complaint also charges the respondent with the use of fictitious names and with use of the name "Simmons" to designate certain of his mattresses, misleadingly giving the impression that such products are made by the Simmons Co. (4483).

According to the complaint, the respondents disseminate false advertisements in which they represent that their preparations "Pheno-Isolin" and "Pheno-Isolin Ointment" constitute competent and effective antiseptics and germicides, and possess substantial therapeutic value in treating skin infections generally, and about 20 specific ailments or conditions including ulcers, carbuncles, abscesses, athlete's foot, eczema, gangrenous conditions, diphtheria and influenza. The complaint alleges that the respondents' claims exceed actual accomplishments.

The complaint further charges the respondents with representing that their preparation "Dialin" constitutes a remedy and effective treatment for diabetes; effects a chemical change in the blood so as to reduce the quantity of sugar in the blood; assists the pancreas to produce insulin in the natural way; eliminates the unnatural thirst of diabetes victims, and corrects other abnormal conditions caused by diabetes, when such are not the facts.

According to the complaint, the respondents circulated leaflets captioned "What the Profession is Doing with Pheno-Isolin" and "What the Profession is Saying About Dialin", such literature containing purported testimonials of physicians recommending the respondents' preparations. The complaint alleges that the respondents' preparations are not used or recommended by the medical profession generally (4482).

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Hyrail Distributing Co., and Wallace G. Clark and Norma A. Dodge, of Fort Worth, Texas, have been ordered to cease and desist from misrepresentations in the sale of "Hyrail", a dental preparation.

Commission findings are that prior to 1957, when Hyrail Distributing Co., a corporation, obtained a license to do business in Texas, the respondents Clark and Dodge conducted a business as a co-partnership under the trade name of Hyrail Distributing Co.; that some of the representations involved in the Commission proceedings were made by the respondent co-partnership during its existence, and that others were made subsequently by the respondents as a successor corporation.

The Commission order directs the respondent corporation and the respondents Clark and Dodge as individuals to cease and desist from representing that the preparation "Hyrail" is a new discovery, has germicidal properties, is a cure or remedy for bleeding gums or other mouth disorders, or constitutes an effective treatment for such conditions in excess of that afforded by a mild antiseptic.
These respondents also are ordered to cease representing that their preparation is a cure or remedy for trench mouth or an effective treatment therefor in excess of temporarily inhibiting the growth of the bacteria causing trench mouth.

The order further prohibits the representation that Hyral has therapeutic value in the treatment of pyorrhea or is a remedy for pyorrhea; that it will make the gums firm, hard or healthy; that it will prevent loss of teeth; that the preparation will remove tobacco stains or tartar formations, or that it will have any effect on unpleasant breath odors in excess of temporarily masking them.

The Commission order further directs the respondent corporation and the respondents Clark and Dodge, both individually and as its officers and directors, to cease disseminating advertisements which represent that their preparation is a new or different dentifrice or has any special properties which would be effective in making or keeping the gums firm. (3726)

Kongo Chemical Company, Inc.—A cease and desist order has been amended which, as announced January 5, was issued against Kongo Chemical Co., Inc., 66 East 131st St., New York, manufacturer and distributor of “Kongolene,” a cosmetic preparation for the hair.

The original order had directed the respondent to cease and desist from disseminating advertisements of its product which represented, among other things, that its use was safe and harmless, and which advertisements failed to reveal that use of the preparation may result in severe caustic action upon the skin and scalp, with resulting burns.

The modified order is the same as the original order in prohibiting such dissemination, but adds the proviso that the advertisement need contain only a statement that the preparation should be used only as directed on the label when such label contains a warning that use of the product may result in severe caustic action upon the skin and scalp with resulting burns, and certain directions for the safe and proper use of the preparation which are detailed in the Commission order. (4195)

STIPULATIONS

The Commission has entered into the following stipulations:

Adlerika Co., 99 South Wabasha Street, St. Paul, Minn., entered into a stipulation in which it agrees to cease representing that “Adla Tablets” will bring about neutralization of hyperacidity, bring relief from “acid stomach”, protect irritated parts or membranes of the stomach in any manner, or form a protective coating over the stomach parts or membrane. (02767)

Buel Company—S. D. Cates, operating as Buel Co., 800 North Clark St., Chicago, has entered into a stipulation in which he agrees to cease representing that his preparation “Buellen” is effective in the treatment of falling hair or dandruff, unless the representation is limited to assistance in the removal of accumulated dandruff scales; that his “Hot Oil Treatments” make the hair healthy or stop brittle, breaking hair, or that any of his products will increase the growth of hair or is a hair grower. (02770)

Arnold Constable & Co., Inc., Fifth Ave. at Fortylieth St., New York, operating a department store, has entered into a stipulation in which it agrees to cease certain representations in the advertisement and sale of ladies’ shoes. The respondent corporation agrees to discontinue employing the word “Alligator” or other similar word to describe shoes not made from alligator hide, unless the “word “Alligator” may be used to describe the finish of shoes which are made from materials other than alligator leather and are finished or embossed to resemble it, when this word is immediately accompanied by other words clearly indicating that the designation refers only to the pattern embossed on such materials. (3060)

Diastei Laboratories—Alfred Moller, trading as Diastei Laboratories, 1133 Broadway, New York, has entered into a stipulation in which he agrees to cease advertising that a device known as “Diastei Tester” is the only tester for determining the sugar content of urine which does not use or require flame, and that it is the most accurate tester available for determining such sugar content. (02768)

Burtom G. Feldman and Associates Incorporated, 540 North Michigan Ave., Chicago, an advertising agency, stipulated that it will cease disseminating advertisements on behalf of Cellman Manufacturing Co., Rock Island, Ill., which represent that that company’s vapor-electric bath cabinets known as “Beauty Builder and Beauty Fount” have a direct value in the permanent reduction of excess weight; that such cabinets, by means of vapor-heat, infra-red, or ultra-violet rays, help eliminate excess fat, or that the use of the cabinets will “cure”, “banish” or “erase” fatigue. (02765)

Frohlich Laboratories—A Seattle, Wash., group has entered into a stipulation to cease certain representations in the sale of “Dr. Frohlich’s Z’Out Hair Destroyer”. The respondents are Louis B. Frohlich, trading as Frohlich Laboratories; Frohlich Laboratories, Inc., and David F. Grif§, trading as Frohlich Distributing Co., with offices in the Peoples Bank Building, Seattle. They agree to cease representing that their preparation will permanently destroy hair or prevent the regrowth of hair, or that it is used in treating or in the removal of hair. They also agree to cease employing statements which have the capacity to cause the impression that their preparation possesses any marvelous qualities or that its development is the result of seven years work or of any amount of work, effort, experimentation or research greater than that actually used or performed in its development. (3061)

Helix Co., Inc., 79 Fifth Ave., New York, and four other textile merchandise corporations having executive offices at that address, have entered into a stipulation to cease certain representations in the sale of their products which include men’s and women’s wearing apparel and sheets and pillowcases.

The Helix Co., Inc., according to the stipulation, purchases the merchandise used by each of the four other companies which are a New Jersey, a Massachusetts, a Michigan and an Illinois corporation each operating under the name Royal Crown Housey Co., Inc.

The respondents agree to cease using the words “Silk,” “Satin” or other words connoting silk in advertisements or trade literature to describe fabrics or merchandise not composed of silk, and to properly qualify the descriptions when the products consist in part of silk and in part of other fiber material. They also stipulate that they will discontinue employing the term “Lisle” as descriptive of goods not made of lisle.

The respondents further agree to cease employing the word “Silk” or other name or word, alone or with other words, as descriptive of the rayon content of garments, fabric or material, unless such name or word is immediately accompanied by the word “Rayon” in letters or type of equal conspicuousness, as “Bemberg Rayon.” They also agree to cease advertising, branding, labeling, invoicing or selling any product composed in whole or in part of rayon without complete disclosure of the fiber content by naming each constituent fiber in the order of its predominance by weight.

In the case of goods which are not shrinkageproof or nonshrinkable, or which have not been fully shrunk or “pre-shrunk,” to the extent that no residual shrinkage remains in them, the respondents agree to cease employing the term “Pre-Shrunk” or similar descriptive words. If, according to the stipulation, the term “Pre-Shrunk” or other similar terms are properly used to indicate that goods have undergone a shrinking process, but there still remains in them a certain amount of residual shrinkage, such terms shall be accompanied by a statement of percentages clearly indicating the amount of remaining residual shrinkage.

The respondents also agree to desist from using statements which will cause the impression that sheets, pillowcases or other textile products to which starch has been added contain no starch. (3062)

Inspire, Incorporated—552 Mission St., San Francisco, and Edgar D. Sloat, its president, has entered into a stipulation in which they agree to cease advertising that their device designated

April 18, 1941 — 363
"Deep-Skin Electro-Mask," will re-establish natural functions of the underskin, glands, circulation or nervous system; will normalize the skin or revitalize the tissues; is an effective remedy for wrinkles, crow's feet, lines, enlarged pores, pimples, blackheads, dry skin or oily skin, and that the device accomplishes all the benefits of the most extravagant salon facial and is a sure means of attaining beauty. The respondents also agree to cease using the words "Deep Skin" as part of the brand name for their product; to cease representing in any manner that the effect of the device extends deeply into the skin; that it has any effect directly upon the dermis, or that it acts from the inside outward. (02763).

Kauicky's Pharmacy—Agreeing to discontinue certain representations in the sale of a medicinal preparation designated "Kauicky's Formula Herb Tea", Emanuel Kauicky, trading as Kauicky's Pharmacy, 6348 West 26th St., Berwyn, Ill., entered into a stipulation. The respondent agrees to cease advertising that the use of his product will cause one to have a clean body or a clear mind; will cause the system to return to normal; will relieve rheumatism, and will have any therapeutic value in the treatment of headaches in excess of affording relief from headaches due to constipation. The respondent also stipulates that he will cease representing that his preparation has any therapeutic value in the treatment of constipation or stomach, intestinal, bladder or kidney ailments in excess of that afforded by a laxative and diuretic. (02764)

Knox-All Company—Trading as The Knox-All Co., W. C. Stewart, of 18 West Exchange St., Freeport, Ill., stipulated that in connection with the sale of poultry and animal preparations he will desist from advertising that "K-A Poultry Spray" prevents or eliminates cold, roup or other poultry diseases; keeps the flock or the poultry house free from mites or bluebugs; penetrates to all parts of the poultry house; aids in killing germs before they attack the birds, and is endorsed by leading hatcheries. The respondent also stipulates that he will cease representing that "K-A Fur Farm Fluid" destroys vermin which infests animals; is effective against fleas, lice or ticks on fur-bearing animals, and effectively combats earmites; that "K-A Neptol Tablets" is effective against symptoms of diarrhea, sour crop, poor appetite or temporary constipation, and that "K-A Alroc Tablets" is effective in the control of cholera, or typhoid, in chickens, turkeys, geese or ducks. (02769)

Paxton and Gallagher Co., Omaha, Nebr., entered into a stipulation in which it agrees to cease advertising that a pound of its "Butter-Nut Coffee" makes more cups of coffee than a pound of any other coffee; that it has discovered a new or extraordinary process of maturing coffee and that its maturing method eliminates all trace of harshness or coffee acids. (02762)

Potts-Turnbull Co., 912 Baltimore Ave., Kansas City, Mo., an advertising agency stipulated that it will cease advertising, on behalf of Gooch Feed Mill Co., Lincoln, Nebr., that favorable results in egg production or chick raising depend solely on using Gooch's chicken feeds; that a low feeding cost or a balanced egg making ration is insured by using "Gooch's Best Laying Mash"; that mash will enable hens to lay more eggs, have better body weight or condition, or be more vigorous or resistant to disease than any other product, and that the use of "Gooch's Best Starting Feed" insures healthy chicks or a certain weight within a specified time. (02766)

FTC CASE DISMISSED

The Federal Trade Commission dismissed without prejudice a complaint which had charged Consolidated Book Publishers, Inc., 537 South Dearborn St., Chicago, with violating the Federal Trade Commission Act in the sale of books. This case involved certain representations concerning the quality of the bindings of books sold by the respondent corporation.
THE WEEK IN WASHINGTON

Convention plans progressing. (p. 365).

Alternative plans of copyright and libel insurance outlined. NAB Insurance Committee makes preliminary report on insurance rates. (pp. 367-368).

Code Committee makes important recommendation. Broadcast Advertising Department suggests careful survey of advertising accounts. Radio to participate in AFA convention. (p. 370).

NAB Convention

With the convention opening date but slightly more than two weeks distant, the plans which have been in the making for a number of months are fast coming to a head. Under the able direction of Merle Jones, KMOX, General Chairman, St. Louis broadcasters have perfected arrangements which assure the careful handling of all details essential to the comfort and proper entertainment of all who attend.

The Housing Committee, of which Ray Dady, KWK, is Chairman, has nearly completed its task. More than 500 advance reservations have been made. There are still plenty of available rooms in St. Louis hotels and even the headquarters hotel, the Jefferson, is capable of accommodating some additional guests.

The response to the Promotional Exhibits Committee’s activities, has been most encouraging and the big Crystal Room of the Jefferson is certain to be crowded with a most interesting and enlightening display of all types of promotion material which has proven effective to stations large and small.

Twelve equipment manufacturers and transcription companies, all associate members of NAB, will conduct exhibits during the convention. All of these headquarters have been definitely established and prior announcement of their locations in the hotel will be made.

Splendid entertainment in connection with the banquet is assured. The production heads of CBS, MBS and NBC are cooperating, and William Bacher, WGN, Chicago, has been named as manager of production of the show which will be put on in connection with the banquet. Every facility of writing and production in the three network departments has been placed at the disposal of Mr. Bacher.

The program for the business sessions promises to introduce subjects which are of transcendent importance to broadcasters at this time; questions which deeply and vitally effect every person engaged in the radio broadcasting industry. It may well be predicted that this St. Louis meeting will go down as one of the most important the broadcasting industry has ever had.

Present indications are that it will be one of the largest from standpoint of attendance. In next week’s Reports we hope to publish a full outline of the tentative program. Those who have not made their reservations at St. Louis should do so at once.

You Can’t Afford to Miss the NAB Convention

May 12, 13, 14, 15

New Jefferson Hotel St. Louis

April 25, 1941 — 365
A crew of cameramen from the William H. Wells Productions headed by Henry M. Lester, authority on photography and co-author of "Leica Manual," systematically interrupted work in the various BMI departments last week to photograph members of the staff steaming under the hot Klieg lights. The picture is for exhibition at the NAB Convention in St. Louis. Head director is Julian Roffman who made a name for himself as the producer of And So They Live, a documentary film of conditions in the Kentucky hills made for the Sloan Foundation of New York University. Mr. Roffman is also the producer of Getting Your Money’s Worth, a series of theatrical shorts which received wide spread attention. The crew is working from a prepared script which narrates what happens between the time a composer submits a manuscript to BMI and the music is shipped out to BMI member stations. The script details the process by which BMI’s Music Production Department, the largest in the world, prepares arrangements for all musical instruments and tests the arrangements in actual performance. The picture offers the next best thing to actually visiting BMI and observing minutely the significant work of the Department. The purpose in making it is to give each owner of BMI an opportunity to see for himself what has been accomplished in the creation and operation of the new music company.

BMI ACQUIRES NEW HIT TUNES

BMI has acquired the performing rights, effective at once, of all music published by Embassy Music, Corp. Through the transaction, BMI licensees receive a catalogue of some seventy-five dance and rhythm numbers, including perhaps the best prize winning song from the “Fame and Fortune” contest sponsored by Tommy Dorsey. Among the most popular of the Embassy selections are, Oh, Look At Me Now, Everything Happens To Me, Let’s Get Away From It All, and the rhythm number Quiet, Please.

In addition to the Dorsey catalogue, M. E. Tompkins, BMI’s Vice President and General Manager, is calling attention to the fact that the following numbers in the recently acquired catalogue of Cooper Music, Inc., are exceptionally good:

- Down Where the Delta Begins
- The Clock Song
- I'm In The Army Now
- I'm In The Army Now
- The Night Was Given To You

All the lists reveal that many new publishers have come into being since the first of the year. During 1940, applications filed with the Secretary of State of New York for chargers to conduct a music publishing business averaged two a month. Since January 1, 1941, they have averaged ten a month.

MOTHER’S DAY SONG

Dana Merriman, alias Danial Sibley, has met the challenge again for a timely song, offering Mother of Men as a BMI special for Mother’s Day on Sunday, May 12th. Copies for distribution to member stations will be available on or about May 1st. Both words and music were written by Mr. Merriman who from long years of experience has learned not to wait on inspiration but to seek it.

Lyrics follow:

When as a child—whose watchful care
Followed and guided me everywhere
Who always heard my “Goodnight” prayer?
When, as a youth, I often strayed
Whose trust and faith held fast, unafraid.
E'en tho' that trust and faith were oft betrayed?
Who always hoped—tho' beset with fears—
Who always smiled through blinding tears—
Who always loved through all the years?
Who always forgave—again and again
Tho' meek—who had the strength of ten?
Her name, you ask? She's the MOTHER OF MEN!

Copyrighted, BMI, 1941.

MUSIC FOR THE ARMY

A BMI campaign of cooperation is making available to army camps professional copies of BMI songs which lend themselves to group singing in the barracks. The most recent of these is I'm In The Army Now by Frank Luther. The music is much appreciated judging by the letters BMI is receiving and the requests for dance and choral arrangements.

In WRVA’s broadcast, Okay, America, which is presented each week from Camp Lee situated between Petersburg and Hopewell, Virginia, the band warms up each morning by playing BMI’s Military Maestro by Richard D. Becker.

Not forgetting the need of keeping spirit’s high in London, BMI is making arrangements to distribute bundles of its professional music to Britain’s bands. This last came as the result of a suggestion from Dorothy Kilgallen, newspaper and radio columnist.

366 — April 25, 1941
BMI FEATURE TUNES
April 28-May 5
1. MY SISTER AND I
2. WALKIN' BY THE RIVER
3. WISE OLD OWL
4. FRIENDLY TAVERN POLKA
5. G'BYE NOW
6. WHAT D'YA HEAR FROM YOUR HEART
7. HERE'S MY HEART
8. TALKIN' TO THE WIND
9. WITH A TWIST OF THE WRIST

Billboard's music popularity chart gives BMI a 100% rating in top money making records for automatic phonographs. The four tunes listed under “Going Strong” are: High On A Windy Hill, There'll Be Some Changes Made, It All Comes Back To Me Now and Amapola. Prominent among those “coming up” are: Wise Old Owl, Friendly Tavern Polka, and G'Bye Now. Amapola continues to lead all lists of national and regional best selling retail records and best sheet music sellers. In its column On the Records, Billboard points to G'Bye Now as a song “pointing for a hit” and gives high praise to the growing popularity of The Friendly Tavern Polka. In Variety's fifteen best sheet music sellers, BMI's Walkin' By the River, is second only to Amapola, while My Sister and I, Wise Old Owl and G'Bye Now rank high in the list. In addition to those songs mentioned above, network plugs feature, With A Twist Of the Wrist, You Walk By, I Hear A Rhapsody, Because Of You, Keep An Eye On Your Heart, So You're the One, and Let's Dream This One Out.

NEW LYRICS FOR FAMILIAR MUSIC
Fulfilling a long-felt need in the music world, BMI's Public Domain Lyric Department has won much praise in the few short months of its existence. This department, headed by Irving Weill, was created to make available to BMI licensees new lyric settings for familiar melodies of the past.

The lyrics of many public domain selections previously used have been unsatisfactory to vocalists in several aspects. Among the shortcomings cited are: imperfect “wedding” of lyric and melody, with incorrect accentuation, improper placing (in high and low registers) of words and vowels that are difficult to sing, and “un-poetic” translations. New lyrics now being written at BMI meet these objections as they are done by writers having musical as well as lyric training, who avoid the pitfalls. Among those who have been commissioned by BMI to do lyric settings are Margaret Munzen, Gertrude Forster and James Ballister, all of whom are highly regarded for their work in this field.

In numbers for new lyrics, BMI has chosen not only those that are familiar as songs, but also many compositions which have hitherto been known only as instrumental selections. Included among these instrumental numbers which now have BMI lyric settings are The Scarf Dance (Chaminade), Ralf's Cavatina and Rubenstein's Melody in F. To date, some 160 ever-popular selections have been sent to BMI stations, with hundreds more scheduled for release in the future.

BMI TUNES SUNG BY MOVIE AUDIENCES
BMI numbers are being performed rather generally in motion picture theaters. Most of the recently popular songs are BMI so that in theaters where songs are sung by the audience, exhibitors have found it necessary to play BMI tunes in order to hold the interest of the audience and to attain the full enthusiasm for group singing.

Among the larger New York theaters featuring BMI hits are the Strand Theatre where Jimmy Dorsey is playing I Hear A Rhapsody and others, and the Paramount where Siggy Lane, vocalist, is featuring My Sister and I. BMI officials see closer cooperation between radio and the film industry as a result of the effective promotion done by BMI stations of the film Pot O' Gold starring Jimmy Stewart and Paulette Goddard and featuring Horace Heidt. Three of the numbers from the score are published by BMI and the exploitation campaign put on by member stations is credited with greatly boosting audience attendance of the film.

COPYRIGHT INFRINGEMENT AND LIBEL INSURANCE
Two proposals to insure broadcasters against liability for copyright infringement and radio defamation have recently been brought to the attention of the NAB. One, on which it is our understanding stations have been circularized by John C. Paige & Company of Boston, Massachusetts, is written by The Employers' Liability Assurance Corporation, Limited; the other, still in the formative stage, is expected to crystallize into a definite proposition within the week.

Both propositions will be submitted to the NAB Insurance Committee for their analysis and possible recommendation to the members. Believing that station managers will be interested in a brief outline of the two propositions, we print below our understanding of the respective coverages.

Under the policy offered by John C. Paige & Company for all suits on claims covered by the policy in both Federal and State courts. Such suits for damages claimed by reason of the
infringement of copyright through dramatic as well as non-dramatic performances of musical and dramatico-musical compositions, as well as musical arrangements, are covered. The insurance applies to copyrights protected at common law as well as by statute.

The insurance against liability for defamatory broadcasts is based upon the principle that the station need only exercise due care in programming, which means that the insurance company undertakes to free the broadcaster from the doctrine of absolute liability without fault which prevails generally in libel cases.

The company assumes the payment of 85% of all judgments against broadcasters in both copyright and defamation actions within the aggregate limit of the policy. The judgments for damages covered by the policy include such amounts as may be awarded for attorney’s fees and costs to victorious plaintiffs. In the case of copyright infringement the company’s liability is limited to single claims of $5,000.00 each, whereas in the case of defamatory broadcasts the company’s liability is restricted to single claims of $10,000.00.

There is no deductible amount in this policy for which the station may be solely liable without contribution by the company, as is the case in excess insurance contracts. The policy submitted obligates the insurance company to pay 85% of every dollar within the policy limits. For example, if the judgment is $5,000.00, the company is obligated to pay $4,250.00 and the broadcaster only $750, whereas if a claim is settled for $250.00, the company is obligated to pay $212.50 and the broadcaster only $37.50.

In its coverage against liability for copyright infringement the company protects the station for infringements committed through live talent as well as recordings, including electrical transcriptions. Infringing material in transcriptions is covered provided it has been determined by an experienced musician to be free for broadcast. This would include bridge music, theme songs and similar works. The policy extends protection to the broadcast of all musical programs of copyrighted works and, in addition, insures the station against any errors in making reasonable determinations as to the public domain status of music. In practice, the company insures the station’s use of the catalogues of licensing organizations in exchange for subrogation of the company to the station’s claims against such licensing organizations. In connection with material not included within the licensed catalogues, the station is required to make a reasonable investigation of the copyright status of such works and to obtain a license to broadcast same. Where the station through the assistance of experienced musicians, and after reasonable inquiry as to the ownership of each musical composition and as to the membership of the authors and composers in the various performing rights organizations, determines that a given work requires no performing license, such determination by the station is insured by the policy.

The broadcaster is required to conform to existing practices of refraining from deliberate infringement and malicious defamation, cessation of broadcasting after notice, and obtaining indemnity obligations from advertisers or agencies for material supplied by the latter. The policy requires the broadcaster to obtain an indemnity from licensing organizations, which is offered by BMI and SESAC. In the defamation coverage the station is required to examine program scripts to delete defamatory matter. Where no scripts are available, as in the case of extemporaneous programs, the station is merely required to establish rules and regulations for speakers and others to avoid defamation.

Under the other plan of coverage which is in prospect, broadcasters would be protected against all claims for infringement of copyright, common law intellectual property rights, invasion of rights of privacy and radio defamation, without any condition that they exercise any degree of care or make any investigations. They would be covered up to $25,000 for any one claim, with an over-all coverage for all who go into the plan of $1,000,000. The company would pay 80% of all claims and would defend any and all suits at its own expense.

Essentially the plan is self-insurance with 20% of the liability retained by each broadcaster and the purchase of excess insurance with a responsible company.

At the present stage of negotiations and based upon 200 stations coming in, the figures are as follows:

Each station would pay a gross premium of $350 and is it the expectation that $175 would be returnable or applied as a credit against the next year’s premium. If 300 stations came in the gross premium would remain at $350 but the net premium, it is anticipated, would be reduced to $100.

The Report of the Insurance Committee on this form of coverage and these two proposals will be released as soon as available.

INSURANCE RATES

The NAB Insurance Committee met on March 24 in New York. Roger Clipp, chairman, has indicated that the work of the committee is progressing satisfactorily and as a result of the meeting the committee has the following to report.

Preparation of a manual is well under way. This manual will contain definitions of every type of insurance coverage available to broadcasters which are itemized in the questionnaire which was previously submitted by the Committee to the membership with the purpose of gathering information on the amount of insurance carried by individual stations.

Negotiations are proceeding through insurance carriers, cooperating with the Central Traction and Lighting
Bureau, with the establishment of a uniform fire insurance policy for the broadcasting industry which will contain a more comprehensive lightning and electrical damage clause. The form of fire policy now available to Broadcasting Stations does not adequately protect broadcasting stations against damage to equipment by lightning or by electrical break-down in equipment.

Through the National Bureau of Casualty and Surety Underwriters, the Committee has secured complete information for individual States, on compensation insurance as applicable to broadcasting stations. The Committee suggests that all stations check the rate of their compensation insurance and recommends that if any broadcaster is securing a less favorable rate under their compensation insurance policy that they consult their insurance broker or their compensation board and request an adjustment.

Following are the compensation rates for the respective states under the respective code numbers which are hereby defined:

**Radio Broadcasting or Commercial Wireless Stations**

| Transmitter or Field Employees—including Drivers, Chauffeurs and their Helpers | Code #7609 |
| Salesmen | Code #8742 |
| All other employees—including control operations confined to studio exclusively, announcers, players, entertainers, musicians or clerical office employees | Code #7610 |

**Following are Compensation Boards to Which Rate Questions Should Be Referred:**

The National Council on Workmen's Compensation Insurance, Mr. George F. Robie, General Manager, 45 East 17th Street, New York City calculates the base rates in the States of Alabama, Arizona, Arkansas, Colorado, District of Columbia, Florida, Georgia, Idaho, Indiana, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Missouri, Montana, New Hampshire, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Utah and Vermont.

The California Inspection Rating Bureau, 500 Sansome Street, San Francisco, California; R. A. Whittaker and J. A. Froberg, Managers, calculates the base rates for the State of California.

The Massachusetts Rating and Inspection Bureau, 89 Broad Street, Boston, Massachusetts; Mr. McGoone, Manager, calculates the base rates for the State of Massachusetts.

The New Jersey Compensation Rating and Inspection Bureau, 60 Park Place, Newark, New Jersey; Mr. A. R. Lawrence, Chairman and General Manager and Deputy Insurance Commissioner, calculates the rates for the State of New Jersey.

The Minnesota Compensation Rating Bureau, 525 Marquette Avenue, Minneapolis, Minnesota; Mr. J. F. Reynolds, General Manager, calculates the base rates for the State of Minnesota.

The Compensation Insurance Rating Board, 125 Park Avenue, New York City, Henry D. Saver, General Manager, calculates the base rates for the State of New York.

The Pennsylvania Rating and Inspection Bureau, 938 Public Ledger Building, Philadelphia, Pennsylvania; Gregory C. Kelly, General Manager, calculates the base rates for the State of Pennsylvania.

The Workmen's Compensation Division, State Fire Insurance Commission, calculates the base rates for the State of Texas.

The California Inspections Rating Bureau of Virginia, 323-325 Broad-Grace Arcade, Richmond, Virginia; E. F. Cadmus, Manager, calculates the base rates for the State of Virginia.

The Wisconsin Rating and Inspection Bureau, 312 E. Wisconsin Avenue, Milwaukee, Wisconsin; Mr. G. F. Hayden, calculates the base rates for the State of Wisconsin.

The National Bureau of Casualty and Surety Underwriters, 60 John Street, Mr. William Leslie, General Manager, calculates the base rates for the States of Connecticut, Illinois, Iowa, Nebraska, Rhode Island and South Dakota.

The following are Monopolistic State Funds, rates calculated by and administered by the Departments listed:

- Nevada Industrial Commission, Carson City, Nevada.
- Harry H. Lee, Auditor.
- North Dakota Workmen's Compensation Bureau, Bismarck, N. D.
- P. B. Sullivan, Chairman.
- J. E. Piefer, Secretary.
- Ohio—Industrial Commission of Ohio.

**April 25, 1941 — 369**
For employments under the acts in the States of Oregon and Washington, coverage may only be secured in the State Funds administered as follows:

Oregon—State Industrial Accident Commission.
L. O. Arens, Chairman.
L. R. White, Assistant Commissioner,
Salem, Oregon.
Washington—Department of Labor and Industry
J. W. Hoover, Treasurer.
Ed. S. Franklin, Special Assistant, Attorney General,
Olympia, Washington.

SAVINGS AND LOAN GAINS

An opportunity for radio to develop revenue from the real estate and building fields and from savings and loan association is indicated in a report from Paul Endicott, president of the U. S. Savings & Loan League.

Ample home-owner credit will continue to be available to Americans. Savings and loan associations whose credit transactions are solely on residential real estate received $99,871,000 in February, a 17 per cent increase over the same month a year ago, and January had shown a 14.8 per cent increase. More of this money came from new savers than any time in the past two years.

“Many of these people had never heard of savings, building and loan associations when last they had money to save, but now they are aware of them because of the several-times expanded advertising programs of these institutions,” Mr. Endicott said.

AMERICAN MEAT INSTITUTE

The NAB Department of Broadcast Advertising has succeeded in interesting the American Meat Institute of Chicago in considering radio as a national advertising medium for its future campaigns. Specific proposals for the effective use of radio are being drafted and will be presented to the Institute within the next three weeks. As part of this presentation, any contributions from NAB member stations will be welcomed, showing the effectiveness of our medium in the advertising and selling of food products.

AFA CONVENTION, MAY 25-29

Plans for radio’s participation in the annual convention of the Advertising Federation of America are being made by the Department of Broadcast Advertising. The convention, to be held in Boston May 25-29, will be attended by important agency executives, time buyers and advertising managers, and a wide representation from radio stations is expected.

Entertainment of the delegates at a Cabaret Party May 27 will be furnished by Boston stations in coopera-
tion with the networks, with Kingsley Horton, sales manager of WEEI, as chairman of the committee.

Radio's departmental program will be held Wednesday morning, May 28, followed by an international short-wave discussion at the general luncheon between the American and British Advertising Federation presidents.

INVITATION TO CUT RATES

NAB members are advised to proceed with caution in dealing with the Golden Glint Co., Inc., of Seattle, Wash., currently querying stations for rates. While nothing has yet been reported to indicate that this company will not purchase advertising at established rates if stations adhere yet been reported to indicate that this company will not purchase advertising at established rates if stations adhere to them, it appears to be seeking special deals, writing one station in part as follows:

"If you want to make us a proposition for the time on your stations more closely in line with what we can get from other stations, we would be interested, but otherwise not!"

FREE TIME REQUESTED

Efforts are being made by its advertising agency on behalf of the Forstmann Woolen Co. to secure free radio time for interviews with a travelling representative of the company "on an extensive trip covering leading cities throughout the country. While in these cities she will visit the leading department stores and put on shows for the stores' personnel featuring the Forstmann spring line of fabrics and costumes made in these fabrics ..."

It is the opinion of NAB that such broadcasts, if carried, should be paid for at established rates either by the Forstmann Co. or by the department stores in each city featuring those products. Encouragement by stations of such free time practices will tend to make similar abuses more widespread, and set precedents that ultimately may decrease advertising revenue.

Stations have reported the request from World Broadcasting System for free announcements promoting the sale of the "You Can Defend America" booklets, available at news stands for 10 cents. Unless stations feel that they are not now devoting sufficient time to the national defense, it is the opinion of NAB that this may be considered a commercial venture, since there is sufficient margin in the price of the booklet to return a profit to the printer and news vendor. NAB is also advised that the booklet has sold in very large quantities without free help from radio.

The Fish and Wildlife Service of the Department of the Interior is furnishing fish market news to radio stations, often of genuine value in home economics programs. However, under the direction of Don Bloch, "Information Service Representative," many stations have also been asked to broadcast free plugs promoting the sale of fish.

It is NAB's opinion that this is a request for time and service that should be paid for by local fish markets and dealers. If this service is given by broadcasters free to the fish industry, stations are vulnerable to similar requests for free time from the food industry, the coal industry, and so on without end.

NAB has discussed this with Mr. Bloch, who insists that he is rendering a publicity service of value in the national defense program. He disclosed the list of stations and the free services they are now giving him, as a result of a skillfully worded request that implied governmental sanction and cooperation with the national defense program.

A careful check of the rates of all stations carrying these free plugs, as published in Standard Rate & Data, with all frequency discounts figured, show that if purchased at regular rates this service should cost the fish industry $1,886.08 per week, or $98,076.16 per year.

One hundred and thirteen stations have been giving a total of 458 free plugs per week, or 23,816 free plugs per year.

As long as this service is given free in cooperation with Mr. Bloch's publicity efforts, it is the opinion of NAB that stations will find it difficult indeed to develop commercial revenue from fish markets, dealers, processors or distributors. This campaign has no more official connection with the national defense program, we believe, than the efforts of coal dealers to sell coal (and thereby "develop national resources") or the efforts of wool growers to sell suits. All phases of the national defense program are receiving the close cooperation of NAB, and member stations will be kept advised as to the part radio should fairly be expected to play through the contribution of time and services. No broadcaster need have any fear that he will be considered "non-cooperative" if he declines to accept publicity material of the sort mentioned.

Free time from radio stations is being sought by Selvage & Smith, public relations firm in New York City, on behalf of their client, the Investment Bankers Association of America. Free quarter-hour programs called "Men, Money and Ideas" are being offered. Investigation by NAB shows no reason why these should not be considered commercial programs, and paid for at regular rates.

Federal Legislation

H. R. 4486 (Collins, D-Miss.) COPYRIGHT—To create five regional national libraries and to amend section 12 of the Act entitled "An Act to amend and consolidate the Acts respecting copyright", approved March 4, 1909, and for other purposes. Referred to Committee on the Library.

April 25, 1941 — 371
DAYLIGHT SAVING

This week Representative McLean (R-N. J.), author of the national daylight saving bill (H. R. 3789), issued the following statement:

"Because of these wartime activities," he said, "conditions are today comparable to those during the last war and all measures adopted then are needful now and should be enacted at once, including the daylight saving time act.

"The original act proved its usefulness and remained in effect until the end of the war. Its benefits were so manifest that when it was repealed, permissive or mandatory State laws were enacted, being in effect last summer in all or part of 16 States.

"Daylight is free. Artificial light is costly. Daylight saving will reduce the industrial, commercial and domestic expenditures for artificial light. Imagine the saving in fuel and electric current if all the lights of the country were turned out for one hour each day.

"Based on the statistics available from the experience during the World War, the estimated saving of fuel during the daylight saving period would be upwards of 5 per cent, which is an enormous amount in volume of materials and energy when the total consumption is considered. These resources could be advantageously diverted to the national defense program.

"The measure is fairly calculated to accomplish valuable economies in our national life; it will be of special value in the present emergency; it will contribute to the comfort, convenience and unity of the home life of many millions of our people."

Another national daylight saving bill, (H. R. 4206) introduced by Representative Keogh (D-N. Y.), is also in the legislative hopper.

In this connection, President Miller wrote to Mr. Knudsen on April 8, as follows:

"Honorable William S. Knudsen
National Defense Commission
Washington, D. C.

My dear Mr. Knudsen:

There have been introduced in Congress two bills to provide for daylight saving time on a nation-wide basis,—one H. R. 3789 by Representative McLean (R-N. J.) and the other H. R. 4206 by Representative Keogh (D-N. Y.). Our Board of Directors has voted unanimously to support national daylight saving time for the reason that it will solve the broadcasting industry's semi-annual programming problems arising out of the fact that some states operate on daylight saving time and others do not. The Association of American Railroads through its Board of Directors has also, I am informed, voted to support national daylight saving time.

I do not know what consideration, if any, the Defense Commission has given to the question of the desirability of national daylight saving time as a defense measure. Our Association, and others, deem it of transcendent importance. If you concur in our view, we urge that you make a public statement to that effect.

Very truly yours,

Neville Miller"

No reply has been received to date, nor has any public statement been noted.
tions in order that we may order a sufficient number to supply the demand. They will be furnished at the cost price of 6 cents each.

**MONOPOLY REPORT AND DEFENSE**

Monopoly report will not be made public by FCC this week or next Chairman James Lawrence Fly told newsmen at a press conference early this week in answer to a specific question.

Mr. Fly said that no dates have yet been set for hearings on newspaper FM ownership. Asked about appointment of the new head for the licensing post set up the chairman explained that just a handful of top-notch men are available for this job and he has not yet succeeded in getting one. He said that he does not want to make any compromise in his selection of the right man.

The chairman discussed the work of the Defense Communications Board generally during the course of which he was asked about the broadcasting aspect of this defense work. He said that the broadcasters wanted to delay the program by themselves taking over last summer. He said that he does not want to make any compromise in his selection of the right man.

**Defense Job Training**

The U. S. Office of Education has prepared a chart which lists complete information concerning government sponsored training courses.

To train unskilled men to fill defense jobs, training courses in public schools and other locations have been established throughout the country. They are intended to aid persons to get jobs in aircraft, shipbuilding, welding, sheet metal, machine shop, electricity, mechanics, forging, radio and other occupations.

The department is mailing a copy to all stations to enable them to answer questions that may be put to them by local listeners.

Here are questions the chart answers:

- What are the wages—or fees—, if any, in training? What wages may you earn on the job? What is the purpose of training? What age must you be? What education or work experience must you have? What are the requirements for enrolling in a course? How many weeks do the courses run? How many hours a day? Where are the courses offered? Where should you apply? What types of jobs does the training qualify you for?

**FROM THE FCC MAIL BAG**

The defense committee of a certain Massachusetts municipality contemplates the purchase, with town funds, of radio apparatus which is intended to be given or loaned to local amateurs for use in emergencies. The committee wants to know whether such service is compatible with Federal Communications Commission rules pertaining to amateurs. The Commission makes reply:

"It appears that ownership of the equipment would remain in the—Defense Committee and that the procedure outlined in your letter is contemplated to circumvent the prohibition in Section 12.62 of the Amateur Rules against issuance of amateur licenses to corporations or associations. From the information submitted it does not appear that acceptance of the radio equipment by local amateurs would constitute remuneration for their service in emergencies within the contemplation of Section 12.102 of the Amateur Rules. Attention is called, however, to the fact that it would be necessary for the amateur or amateurs operating this equipment to be in complete control thereof. In order that control may be vested in such operators, it is suggested that the equipment be leased to the amateurs at a nominal sum for a definite period of time, such as one year. Such lease agreements should contain, among others, a statement to the effect that sixty days' notice will be given to this Commission in the event of their termination, and copies thereof should be submitted with applications for station licenses. Operation of such apparatus must, of course, be carried on strictly in accordance with the Commission's Rules Governing Amateur Service.

"It is believed that police radio or special emergency radio stations licensed in the Town of — in its own name would possibly be of more benefit to the town in cases of emergency than would amateur stations furnished to individuals or organizations, as no control could be maintained by the town of the apparatus thus operated."

Several letters addressed to the Commission object to a particular language not being among those recognized for use in telegraph messages. This is not due to any action by the Commission; it arises out of precedent of long standing in international telegraph practices. No "discrimination" is intended. The carriers long ago found it impossible to handle all languages, and agreed to use the chief ones, eliminating in particular those with characters which cannot be transmitted on the machines in regular use for telegraphic purposes.

A Cincinnati resident questions the reasonableness of advertising expenditures by the American Telephone and Telegraph Co. The Commission is without statutory authority to pass on advertising costs. It can only determine whether such expenditures are properly allowable in ascertaining the reasonableness of operating expenses as a factor in fixing telephone rates.

A Missourian is informed that the Commission has no jurisdiction over the collection of damage claims or rental

April 25, 1941 — 373
for use of right-of-way by telephone companies. He is referred to the local courts for possible action.

A Wisconsin sheriff is advised that interception and use of police radio communications by a private garage for the purpose of getting towing and repair jobs on wrecked autos is a violation of Section 605 of the Communications Act.

A New York firm writes the Commission about its differences with a broadcast station resulting from a sponsored program. The Commission has no say with respect to the rates charged for broadcast time, hence it can not litigate difficulties between program sponsors and station licensees arising through the use of commercial time.

Because it functions largely as a licensing authority, the Commission cannot entertain an Idaho suggestion that radio sponsors who offer prizes be heavily taxed, or grant the appeal of a Texan organizing "prayer bands" that national networks broadcast his program, or meet a Pennsylvania listener's urge that important national programs be presented over the facilities of a single major network.

A North Carolina fan who is interested in daylight saving time for broadcast stations generally is informed that this is not in the province of the Commission, but is being considered by the broadcasters as a group. The National Association of Broadcasters is on record as favoring universal daylight saving to eliminate the present time confusion.

Broadcasts of baseball games may be rebroadcast by high frequency experimental stations, an inquirer is told, subject to provisions of Section 4.113 of the Commission's rules which prohibits charge, directly or indirectly, for such rebroadcasts, and further stipulation about identifying the originating station or stations.

"There is no rule or requirement of the Commission that individual applicants before it be represented by an attorney," a Seattle resident is advised, "and it is not possible or appropriate for the Commission to advise you whether or not you should employ counsel."

Many inquiries have been received as to opportunities for employment with the Commission. It is pointed out that this agency is required to obtain new personnel and to fill vacancies from registers of the United States Civil Service.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following hearings are scheduled to be held before the Commission in broadcast and television cases during the week beginning Monday, April 28. They are subject to change.

**Monday, April 28**

WRDO—WRDO, Incorporated, Augusta, Maine.—Renewal of license, 1370 kc., 100 watts, unlimited.

KMLB—Lincoln's Broadcasting Station, Inc., Monroe, La.—C. P., 1410 kc., 1 KW, unlimited, DA-night.

**Thursday, May 1**

To be held in U. S. Court of Appeals court room, old post office building, in Atlanta, Georgia.

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary). 390 kc., 1 KW night, 5 KW LS, unlimited time.

**FUTURE HEARINGS**

During the past week the Commission has announced the following tentative hearing and oral argument dates for broadcast cases. They are subject to change.

**May 15**

Oral Argument Before the Commission

WCV—Radiomarine Corporation of America, West Dover, Ohio.—C. P., 2182 kc., calling: 2514, 2550, 2582 kc., working; 2755 kc., distress and emergency; 600 watts day, 500 watts night; emission A-3, A-3. Time: unlimited. Pts. of Comm.: radiotelephone equipped ships operating on the Great Lakes.

WBL—Radiomarine Corporation of America, Buffalo, N. Y.—C. P., 2182 kc., calling: 2738 kc., distress and emergency; 2514, 2550, 2582 kc., working; 4282.5, 6470, 8585 kc., calling and working; 600 watts day, 500 watts night; emission A-2, A-3. Time: unlimited during season of Great Lakes navigation. Pts. of Comm.: ship stations in Great Lakes area.

WCV—Radiomarine Corporation of America, West Dover, Ohio.—C. P., 2182, 4282.5 kc., calling: 2514, 2572, 2738, 4282.5 kc., working; 600 watts day, 400 watts night; emission A-2, A-3. Time: unlimited during season of Great Lakes navigation. Pts. of Comm.: with ships operating on the Great Lakes.

WCV—Radiomarine Corporation of America, West Dover, Ohio.—C. P., 2182, 4282.5 kc., calling: 2514, 2572, 2738, 4282.5 kc., working; 600 watts day, 400 watts night; emission A-2, A-3. Time: unlimited during season of Great Lakes navigation. Pts. of Comm.: with ships operating on the Great Lakes.

WM1—The Lorain County Radio Corp., Lorain, Ohio.—C. P. for change in equipment and additional frequency, 8585 kc., (1) 750 watts, (2) 500 watts, (3) 400 watts, (4) 500 watts; emission, A1, A2, A3. Time: continuous. Pts. of Comm.: ships in Great Lakes area. Present assignment: 2550, 6470, 11370 kc.

WM1—The Lorain County Radio Corp., Lorain, Ohio.—Renewal of license, 2550, 6470, 11370 kc., (a) 750 watts, (b) 500 watts, (c) 400 watts, (d) 500 watts; emission, A1, A2, A3. Time: continuous. Pts. of Comm.: ship stations in Great Lakes area.

WM1—The Lorain County Radio Corp., Lorain, Ohio.—C. P. for additional frequency and change time of operation, 4282.5 kc., (1) 750 watts, (2) 500 watts, (3) 400 watts, (4) 500 watts.
FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

John & Marcia Arrington, d/b as Arrington and Arrington, Covington, Va.—Granted construction permit for new standard broadcast station to operate on 1340 kc., 250 watts, unlimited time (Bl-P-3066).

Columbia Broadcasting System, Inc., New York City.—Granted construction permit for new developmental broadcast station to operate on 330400, 333100, 336100 kc. on an experimental basis only, and upon the condition that this authorization is subject to change or cancellation by the Commission at any time without advance notice or hearing; power 25 watts; special emission for frequency modulation with a maximum frequency swing not to exceed 200 kc.; to operate as a developmental broadcast station for the development of an experimental program circuit between the studios and transmitter of International Broadcast Stations WCBX and WCRC; operation to be conducted in accordance with Sections 4.151, 4.153, 4.154, 4.156 and 4.157 (Bl-PRE-384).

Columbia Broadcasting System, Inc., New York City.—Granted construction permit for new developmental broadcast station to operate on 330400, 333100, 336100 kc. on an experimental basis only, and upon the condition that this authorization is subject to change or cancellation by the Commission at any time without advance notice or hearing; power 25 watts; special emission for frequency modulation with a maximum frequency swing not to exceed 200 kc.; to operate as a developmental broadcast station for the development of an experimental program circuit between the studios and transmitter of International Broadcast Stations WCBX and WCRC; operation to be conducted in accordance with Sections 4.151, 4.153, 4.154, 4.156 and 4.157 (Bl-PRE-385).

Columbia Broadcasting System, Inc., New York City.—Granted construction permit for new developmental broadcast station to operate on 330400, 333100, 336100 kc. on an experimental basis only, and upon the condition that this authorization is subject to change or cancellation by the Commission at any time without advance notice or hearing; power 25 watts; special emission for frequency modulation with a maximum frequency swing not to exceed 200 kc.; to operate as a developmental broadcast station for the development of an experimental program circuit between the studios and transmitter of International Broadcast Stations WCBX and WCRC; operation to be conducted in accordance with Sections 4.151, 4.153, 4.154, 4.156 and 4.157 (Bl-PRE-386).

The Journal Company (The Milwaukee Journal), Portable-Mobile (area of Milwaukee County, Wis.)—Granted construction permit for new television broadcast station to operate on frequencies of 330000-330000 kc. on an experimental basis only, and upon the condition that this authority is subject to change or cancellation by the Commission at any time without advance notice or hearing; A3 emission, power 6.5 watts; to operate on an experimental basis only, and upon the condition that this authorization is subject to change or cancellation by the Commission at any time without advance notice or hearing; power 25 watts; special emission for frequency modulation with a maximum frequency swing not to exceed 200 kc.; to operate as a developmental broadcast station for the development of an experimental program circuit between the studios and transmitter of International Broadcast Stations WCBX and WCRC; operation to be conducted in accordance with Sections 4.151, 4.153, 4.154, 4.156 and 4.157 (Bl-PRE-386).

WLAK—Lake Region Broadcasting Co., Lakeland, Fla.—Granted construction permit for new television broadcast station to operate on 330000-330000 kc. on an experimental basis only, and upon the condition that this authority to transfer control of corporation (Lake Region Broadcasting Co. license of WLAK) to J. P. Marchant, D. J. Carey, Melvin Meyer, W. Walter Tison and The Tribune Company to Bradley R. Eidmann (100 shares of stock interest in, security interest against, or part in the stockholders, agents or employees shall have any stock interest in, security interest against, or part in the stockholding of the license of Station WLAK, Lakeland, Florida).

WATR—The WATR Co., Inc., Waterbury, Conn.—Granted construction permit to install a new transmitter, make changes in directional antenna and increase power from 250 watts to 1,000 kw., using directional antenna; 1290 kc., unlimited time (Bl-P-3032).

DESIGNATED FOR HEARING

WENY—Elmira Star Gazette, Inc., Elmira, N. Y.—Application for construction permit to change frequency from 1290 kc. to 1300 kc., increase power from 250 watts to 1 kw., unlimited time (Bl-P-3032).

April 25, 1941 — 375
time; install new equipment and directional antenna with different adjustments for day and night use (B1-P-3070).

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Application for construction permit to change frequency from 1350 to 680 kc.; increase power from 5 to 50 KW; move transmitter site from Conduit & Logan Streets, St. Louis, Mo., to 10 miles S. of St. Louis, Bixby, Ill.; install new equipment and directional antenna with different adjustments for day and night use (2 pages).

KGFF—Hugh J. Powell, Coffeyville, Kans.—Application for construction permit to increase power from 500 watts night, 250 KW LS to 5 KW, increase hours of operation from day to local sunset at San Francisco, to unlimited time; move transmitter site; install new transmitter and install directional antenna for night use; move transmitter site; 680 kc., unlimited time (B4-P-2477).

KFFH—Colbyville, Kans.—Application for construction permit to operate on 1230 kc., 250 watts night and day, unlimited time (B3-P-2962 and B3-P-3006).

Herald Publishing Co., Klamath Falls, Ore.—Application for construction permit to operate a new station on frequency W1XSN with 100 watts LS, unlimited time; move transmitter site; install new transmitter and install directional antenna under N.A.R.B.A., for period May 1, 1941, to not later than June 29, 1941, pending completion of construction of new FM station.

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Application for construction permit to increase power from 1 KW day, 500 watts night, to 5 KW; install new transmitter and directional antenna for night use; move transmitter site; 1460 kc., unlimited time (B4-P-2883).

Scippis-Howard Radio, Inc., Houston, Tex., and Texas Star Broadcasting Co., Houston, Tex.—Joint hearing on applications of Scippis-Howard Radio, Inc., and Texas Star Broadcasting Co., for new stations at Houston, Tex., to operate on 1230 kc., 250 watts night and day, unlimited time (B3-P-323).

WOPI—Radiophone Broadcasting Station WOIT, Inc., Bristol, Conn.—Joint hearing on applications of appointees of Lake Region Broadcasting Co. (licensee of station WOPI), from the present stockholders—Marchant, Carey, Meyer, Tison and The Tribune Co., to Russell E. Baker for control of Lake Region Broadcasting Co. (licensee of station WOPI) and appointment of special temporary authority to operate a high frequency experimental broadcast station on 11716 kc., 250 watts LS, unlimited time, requesting facilities of WDLP, with 1 KW power, unlimited time. (B5-P-2951).

The Metropolis Company, Ocala, Fla.—Application for license to operate a new station on frequency experimental broadcast station 100 watts, unlimited time, requesting the facilities of WTMG (hearing to include record in the pending revocation proceedings of WTMG) (B3-L-1382).

Bay County Publishers, Inc., Panama City, Fla.—Application for license to operate a new station on frequency experimental broadcast station 100 watts, unlimited time, requesting facilities of WDLP (hearing to include record in pending revocation proceedings of WDLP) (B3-L-1383).

John C. Scippis, Ventura, Cali.—Application for new station to operate on 1180 kc, with 1 KW power, unlimited time. Exact transmitter site and antenna system to be determined with Commission’s approval (B5-P-2583).

MISCELLANEOUS

WNBI—National Broadcasting Co., Inc., New York City.—Granted special temporary authority to operate international station WNBI on frequency 17780 kc, in order to permit simultaneous operation of stations WXR1 and WRC on frequency 17780 and 9570 kc, for the period April 16, 1941, to not later than May 15, 1941.

W2XAG—Carman R. Runyon, Jr., Yonkers, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 11716 kc., 5000 watts, special emission, for frequency modulation, with transmitter located at 544 N. Broadway, Yonkers, N. Y., described as W2XAG, maximum rated carrier power 5000 watts for the period May 1, 1941, to not later than June 30, 1941.

WSXYH—WSXYH, Inc., Columbus, Ohio.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 4500 kc., 250 watts, special emission for frequency modulation with transmitter located at 50 W. Broad St., Columbus, Ohio, described as General Electric, Type 4GF1A, maximum rated carrier power 250 watts, for period May 1, 1941, to not later than June 29, 1941, pending completion of construction of new FM station.

WXSN—Westinghouse Radio Stations, Inc., E. Springfield, Mass.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 12600 kc., 1600 watts, special emission for frequency modulation with transmitter located at 625 Page Blvd., E. Springfield, Mass., described as Westinghouse, Type HE, maximum rated carrier power 1000 watts, for period May 1 to not later than June 29, 1941, pending completion of new FM station.

WXKE—Westinghouse Radio Stations, Inc., Hull, Mass.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 12600 kc., 1000 watts, special emission for frequency modulation, with transmitter located at Newport Road, Hull, Mass., described as Westinghouse, Type HE, maximum rated carrier power 1000 watts for period May 1 to not later than June 29, 1941, pending completion of new FM station.

WNXAG—WHEC, Inc., Rochester, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 12600 kc., 1000 watts, special emission for frequency modulation, with transmitter located at 979 Mt. Read Blvd., Rochester, N. Y., and described as R.E.L. Type 519, for period May 1, 1941, to not later than June 29, 1941, pending completion of new FM station.

WOR—Bamberger Broadcasting Service, Inc., New York City.—Granted special temporary authority to rebroadcast over station WOR and other stations of the Mutual System, signals from a Navy airplane between 10 and 11 a.m., EST, April 18, in connection with program “Flying with the Navy”, for period May 1 to not later than June 29, 1941.

WFGF—Neptune Broadcasting Corp., Atlantic City, N. J.—Granted authority to determine operating power by direct measurement of antenna input on 1150 kc, under NARBA (B1-Z-778).
WHB—WHB Broadcasting Co., Kansas City, Mo.—Denied authority to install automatic frequency control equipment on 1520 kc., under NARBA (B3-Z-781).

WHRB—Monmouth Broadcasting Co., Red Bank, N. J.—Granted authority to determine operating power by direct measurement of antenna power on 1400 kc. under NARBA (B3-Z-748).

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted authority to determine operating power by direct measurement of antenna power on 1210 kc. under NARBA (B3-Z-748).

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—Denied authority to transmit power by direct measurement of antenna power on 1400 kc. under NARBA and for auxiliary transmitter (B2-F-213).

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—Granted authority to operate on 1400 kc. under NARBA and for auxiliary transmitter (B2-F-213).

KFRU—KFRU, Inc., Columbia, Mo.—Granted authority to determine operating power by direct measurement of antenna power on 1400 kc. under NARBA (B3-Z-748).

KFRU—KFRU, Inc., Columbia, Mo.—Granted authority to determine operating power by direct measurement of antenna power on 1400 kc. under NARBA (B3-Z-748).

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted authority to determine operating power by direct measurement of antenna power on 1400 kc. under NARBA (B3-Z-748).

KW—Central Wilmette Broadcasting Co., Albany, Ore.—Denied authority to operate on 1400 kc. under NARBA (B4-Z-768).

WDWS—The Champaign News-Gazette, Inc., Champaign, Ill.—Granted authority to determine operating power by direct measurement of antenna power on 1210 kc. under NARBA (B3-Z-748).

KFRU—KFRU, Inc., Columbia, Mo.—Granted authority to determine operating power by direct measurement of antenna power on 1400 kc. under NARBA (B3-Z-748).

WBTJ—The Sun Publishing Co., Inc., Jackson, Tenn.—Granted modification of construction permit (B3-P-2255) for installation of DA for night use, new transmitter, change in frequency from 1310 to 1360 kc., increase in power to 1000 watts, special emission for frequency modulation, with transmitter located at North of Alpine, N. J., described as Composite, Type RCA, maximum rated carrier power 4000 watts, for the period May 1, 1941, to not later than June 29, 1941, pending completion of new FM station W31NY.

W2XMN—Edwin H. Armstrong, North of Alpine, N. J.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 1450 kc., 4000 watts power, special emission for frequency modulation, with transmitter located at North of Alpine, N. J., described as Composite, Type RCA, maximum rated carrier power 4000 watts, for the period May 1, 1941, to not later than June 29, 1941, pending completion of new FM station W31NY.

WREC—National Broadcasting Co., Inc., New York City.—Granted special temporary authority to operate on 9670 kc., with effective power of 100 kw, using separate power amplifiers feeding separate directional antenna for the period April 20, 1941, to not later than May 19, 1941.

W5XVB—Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 13200 kc., 1500 watts, special emission for frequency modulation, with transmitter located at 518 S. Ave., Rochester, N. Y., described as R.E.L., Type Cat. No. 519, maximum rated carrier power 2000 watts, for period May 1, 1941, to not later than July 1, 1941.

KDRA—Westinghouse Radio Stations, Inc., Pittsburgh, Pa.—Granted special temporary authority to broadcast the transmissions of a United States Army plane on Friday, April 10, 1941, in conjunction with a trial blackout of Allegheny County.

WIXTC—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Granted extension of special temporary authority to operate high frequency broadcast station WIXTC on 43400 kc., 1600 watts, special emission for frequency modulation, maximum band width not to exceed 10 kc., for the period May 1, 1941, to not later than August 1, 1941, at Shrewsbury St., Worcester, Mass., pending action on application for new FM station.

APPLICATIONS FILED AT FCC

570 Kilocycles

WMCA—Knickerbocker Broadcasting Co., Inc., New York, N. Y.—Modification of license to increase power from 1 KW night 5 KW day to 5 KW day and night and changes in directional antenna for day and night use.

WNAX—WNAX Broadcasting Co., Yankton, S. D.—Authority to install automatic frequency control equipment.

610 Kilocycles

WCLF—United Broadcasting Co., Cleveland, Ohio.—Authority to install automatic frequency control.

620 Kilocycles

WTMJ—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Modification of license to increase power from 1 KW night 5 KW day to 5 KW day and night and changes in directional antenna for day and night use.

710 Kilocycles

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Modification of construction permit (B3-P-2804) for approval of transmitter site, approval of directional antenna for day and night use, installation of new transmitter and increase in power from 5 to 10 KW.

770 Kilocycles

WLB—University of Minnesota, Minneapolis, Minn.—Authority to determine operating power by the direct method.

810 Kilocycles

KOAM—The Pittsburgh Broadcasting Co., Inc., Pittsburgh, Kans.—Authority to determine operating power by the direct method.

860 Kilocycles

NEW—Paducah Broadcasting Co., Inc., Paducah, Ky.—Construction permit for a new broadcast station to be operated on 860 kc., 250 watts, daytime hours.

930 Kilocycles

KJH—Don Lee Broadcasting System, Los Angeles, Calif.—Authority to determine operating power by the direct method.

940 Kilocycles

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Authority to determine operating power by the direct method.

950 Kilocycles

KPRC—Houston Printing Corp., Houston, Texas.—Modification of construction permit (B3-P-2791) to install directional antenna for night use, and increase in power from 1 KW night, 5 KW day to 5 KW day and night, requesting changes in directional antenna and 950 kc. under NARB and extension of completion date from 6-22-41 to 120 days after grant.

WWJ—The Evening News Assn., Detroit, Mich.—Modification of construction permit (B2-P-2880) as modified, for changes in directional antenna and 930 kc. under NARB and extension of completion date from 9-28-41 to 120 days after grant.

WRC—National Broadcasting Co., Inc., Washington, D. C.—Modification of construction permit (B1-P-243) as modified, for extension of completion date from 5-5-41 to 6-5-41.

970 Kilocycles

WATT—Brener Broadcasting Corp., Jersey City, Ala.—Modification of construction permit (B1-P-2704) as modified, for new transmitter, install directional antenna, change hours of operation from day to unlimited time, increase power from 500 watts to 1 KW and move transmitter, for extension of completion date from 4-25-41 to 5-25-41.

WICA—WICA, Inc., Ashtabula, Ohio.—Construction permit to install new transmitter, install directional antenna for night use, increase power from 1 KW to 1 KW night, 5 KW day.
and change hours from daytime to unlimited time. Amended: to request 570 kc. under NARBA and changes in directional antenna.

1030 Kilocycles

KOB—Albuquerque Broadcasting Co., Albuquerque, N. M.—Modification of construction permit (B5-P-2783) as modified, for new transmitter, increase in power from 10 to 50 KW, requesting extension of completion date from 5-7-41 to 7-6-41.

1050 Kilocycles

WDZ—WDZ Broadcasting Co., Tuscola, Ill.—Authority to determine operating power by direct method.

1070 Kilocycles

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Authority to determine operating power by direct method.

1110 Kilocycles

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.—Authority to determine operating power by direct method.

1230 Kilocycles

KPOW—Albert Joseph Meyer, Powell, Wyo.—License to cover construction permit (B5-P-2593) as modified for a new broadcast station.

KPOW—Albert Joseph Meyer, Powell, Wyo.—Authority to determine operating power by direct measurement of antenna power.

NEW—Bay County Publishers, Inc., Panama City, Fla.—License for a new broadcast station to be operated on 1230 kc., 100 watts night, 250 watts day and unlimited time. Facilities of Station WDLP.

WAIM—Wilton E. Hall, Anderson, S. C.—License to cover construction permit (B3-P-2935) as modified, to install new transmitter, new antenna and increase in power.

KFXJ—R. G. Howell & Charles Howell, d/b as Western Slope Broadcasting Co., Grand Junction, Colo.—Authority to determine operating power by the direct method.

WIL—Missouri Broadcasting Corp., St. Louis, Mo.—Authority to determine operating power by the direct method.

1240 Kilocycles

KIUL—The Garden City Broadcasting Co. (Homer A. Ellison and Frank D. Conard), Garden City, Kan.—Authority to determine operating power by the direct method.

KWAT—Midland National Life Insurance Co., Watertown, S. C.—Authority to determine operating power by the direct method.

1280 Kilocycles

WDSU—WDSU, Incorporated, New Orleans, La.—Modification of construction permit (B3-P-2923) for changes in directional antenna and specify 1280 kc. under NARBA.

1290 Kilocycles

KGYO—Mosby’s, Inc., Missoula, Mont.—Authority to install new automatic frequency control equipment.

KGYO—Mosby’s, Inc., Missoula, Mont.—Construction permit to increase power from 1 KW night, 5 KW day to 5 KW day and night, install directional antenna for day and night use, move transmitter and make equipment changes. Amended to make changes in directional antenna.

KHSI—Golden Empire Broadcasting Co., Chico, Calif.—Construction permit to increase power from 500 watts night, 1 KW day to 1 KW day and night, install directional antenna for day and night use. Amended to make changes in directional antenna.

1300 Kilocycles

WWNY—The Brockway Co., Watertown, N. Y.—License to cover construction permit (B1-P-937) as modified, for a new broadcast station.

WWJV—The Brockway Co., Watertown, N. Y.—Authority to determine operating power by the direct method.

WJDX—Lamar Life Insurance Co., Jackson, Miss.—Authority to determine operating power by the direct method.

1310 Kilocycles

KLS—S. W. Warner & E. N. Warner, d/b as Warner Brothers, Oakland, Calif.—License to cover construction permit (B5-P-2826) as modified for installation of new transmitter, change in antenna and increase in power.

KLS—S. W. Warner & E. N. Warner, d/b as Warner Brothers, Oakland, Calif.—Authority to determine operating power by direct measurement of antenna power.

1320 Kilocycles

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Modification of construction permit (B5-P-2721) for installation of directional antenna for day and night use, increase in power to 5 KW, for changes in directional antenna system and requesting 1320 kc. under NARBA.

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Modification of construction permit (B2-P-2947) to increase power to 1 KW night, 5 KW day to 5 KW day and night, install directional antenna for night use, for 1320 kc. under NARBA, and changes in directional antenna and extension of commencement date to 30 days after grant and completion date to 180 days thereafter.

1340 Kilocycles

KHUR—John P. Scripps, Waterville, Calif.—Authority to determine operating power by the direct method.

NEW—WBAM, Incorporated, Birmingham, Ala.—Construction permit for a new broadcast station to be operated on 1340 kc., 250 watts, unlimited time, facilities of WSGN when vacated.

1370 Kilocycles

KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kan.—Authority to determine operating power by direct method.

WMFD—Richard Austin Dunlea, Wilmington, N. C.—Modification of license to increase power from 100 watts night, 250 watts day to 250 watts day and night.

1380 Kilocycles

KIDO—Frank L. Hill & C. G. Phillips, d/b as Boise Broadcasting Station, Boise, Idaho.—Authority to determine operating power by the direct method.

1390 Kilocycles

WFBL—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Authority to install automatic frequency control.

1400 Kilocycles

KOBH—Black Hills Broadcast Company of Rapid City, Rapid City, S. D.—Authority to determine operating power by the direct method.

KIUP—San Juan Broadcasting Co., Durango, Colo.—Authority to determine operating power by direct measurement of antenna power.

WKMO—Kokomo Broadcasting Corp., Kokomo, Ind.—License to cover construction permit (B4-P-2842) as modified, for a new broadcast station specifying 1100 kc. under NARBA.

KELD—Radio Enterprises, Inc., North of El Dorado, Ark.—Construction permit to change tubes in last radio stage from four RCA 203-A to two RCA 805.

WKJ—WKJ, Inc., Johnstown, Pa.—Authority to determine operating power by the direct method.

WKMO—WKMO, Inc., Johnstown, Pa.—Authority to determine operating power by the direct method.

WEOA—Evansville On The Air, Inc., Evansville, Ind.—License to cover construction permit (B4-P-3079) for move of transmitter.

1410 Kilocycles

WALA—W. O. Pape, tr. as Pape Broadcasting Co., Mobile, Ala.—Modification of construction permit (B3-MP-932) requesting change in type of transmitter, changes in directional antenna for night use and specify 1110 kc. under NARBA.

April 25, 1941—379
1420 Kilocycles
KUI—KUI, Inc., Walla Walla, Wash.—Authority to determine operating power by the direct method.
WHK—United Broadcasting Co., Cleveland, Ohio.—Authority to install automatic frequency control equipment on 1150 kc. under NARBA.

1440 Kilocycles
KGNC—Plains Radio Broadcasting Co., Amarillo, Tex.—License to cover construction permit (B3-P-2969) for increase in power and installation of new transmitter.

1450 Kilocycles
KWBG—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kans.—Authority to transfer control of corporation from W. B. Greenwald to O. L. Taylor, 50% capital stock; Wm. Wyse, 49.9% capital stock and Wesley E. Brown, 1% capital stock. Amended to change transferees from Taylor, Wyse and Brown to Stanley Marsh, 50%, Wm. Wyse, 49.9% and Wesley E. Brown, 1%.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—许可 to cover construction permit (B2-P-2900) as modified for move of transmitter and new antenna, specifying 1450 kc. under NARBA.

WMBA—W. C. Barnes & Jonas Weiland, d/b as Martinsville, Va.—Authority to determine operating power by the direct method.

MGKA—East Texas Broadcasting Co., Tyler, Tex.—Authority to determine operating power by direct method.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Authority to determine operating power by the direct method.

1490 Kilocycles
KGKY—L. L. Hilliard, Ruth K. Hilliard and R. M. Stewart, d/b as Hilliard Co., Scottsbluff, Nebr.—Authority to determine operating power by the direct method.

WMRF—Lewiston Broadcasting Co., Lewistown, Pa.—Modification of construction permit (B2-P-2977) for a new broadcast station, requesting installation of new transmitter, changes in antenna system, move studio and extension of completion date from 10-25-41 to 130 days after grant.

KGKB—East Texas Broadcasting Co., Tyler, Tex.—Authority to determine operating power by direct method.

NEW—the Metropolis Co., Ocala, Fla.—License to cover construction permit (B2-P-2276) as modified for a new broadcast station.

KGIKL—Gila Broadcasting Co., Safford, Ariz.—Authority to determine operating power by direct method.

WLAP—American Broadcasting Corp. of Ky., Lexington, Ky.—Authority to determine operating power by the direct method.

1600 Kilocycles
WCMN—Arthur Fiske—Construction permit to install new transmitter and increase power from 100 watts night, 250 watts day to 1 kW day and night.

WWR—Long Island Broadcasting Corp., Woodside (L. I.), N. Y.—Construction permit to install new transmitter, new antenna system, change frequency from 1590 kc. to 1600 kc. (under NARBA), increase power from 250 watts to 5 kW and move transmitter from Woodside (L. I.), to New York, N. Y. Amended: To specify transmitter site as Brooklyn, N. Y.

1520 Kilocycles
WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Authority to determine operating power by the direct method.

FM APPLICATIONS
NEW—William G. H. Finch, New York, N. Y.—Modification of construction permit (B1-PH-42) for a new high frequency broadcast station, requesting change in transmitter location and approval of antenna system.
NEW—Everett L. Dillard, Jr., as Commercial Radio Equipment Co., Kansas City, Mo.—Construction permit for a new high frequency broadcast station to be operated on 14900 kc.; coverage, 2,995 square miles; population, 673,759. Amended: To change coverage to 4,410 square miles, population to 740,869, and make changes in antenna and transmitter.

MISCELLANEOUS APPLICATIONS
WBAU—Press Union Publishing Co., Atlantic City, N. J.—Modification of construction permit (B1-PRE-363) which authorized new relay broadcast station, for extension of commencement date and completion date from 11-6-40 and 5-6-41 to 5-6-41 and 8-6-41, respectively.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Maurice J. Engel, 146 West 29th St., New York, has been charged with misleading representations in the sale of knife blades used for the fur industry.

According to the complaint, the respondent advertises such knife blades as being “Tri-Forged” and “Tungsten Surgical Steel” and through these and other assertions represents that they are made of the finest tungsten alloy steel, are highly tempered, and are capable of taking and holding a fine edge and of being re-sharpened if necessary.

The complaint alleges that the respondent’s knife blades for use in the fur industry are neither tri-forged nor made of tungsten surgical steel but of rolled carbon steel, a product much inferior to tungsten steel both in price and quality (4490).

Norfolk Mattress Co., Inc., Norfolk, Va., has been served with a complaint alleging misleading representations in the sale of its products.

According to the complaint, the respondent furnishes to its retail trade advertising matter in which its products are collectively referred to as “Dr. Ezera Storm’s Supreme Quality Sleep Products,” while mattresses, springs, studio couches and pillows are given specific trade names containing the abbreviation “Dr.”

The complaint alleges that through its use of the term “Dr.” the respondent has represented, either directly or through implication, that the products so designated are made in accordance with the design of or under the supervision of a doctor, and has further represented that such products contain special or scientific features which are the result of medical advice or services, when in fact the respondent’s products are not so designed or made (4488).

Pacific Fruit & Produce Exchange—Alleging price fixing and other restraint of trade practices in the interstate sale of broadleaf spinach a complaint has been issued against Pacific Fruit & Produce Co. and four other Walla Walla, Wash., shippers, four Chicago jobbers and a Minneapolis broker operating through a Chicago branch.

The other respondents are Walla Walla Gardeners’ Association, Mojonier & Sons, Inc., Walla Walla Produce Co., and Ewing M.

Broadleaf spinach, from Walla Walla, is a distinct variety grown almost exclusively in the Walla Walla region and packed and handled only by the respondent shippers. The bulk of it, according to the complaint, is sold directly to canner although large quantities are shipped fresh to the Chicago market where a sale for this particular type of spinach is readily found.

The complaint charges that the respondent jobbers, pursuant to an agreement, understanding, combination and conspiracy of all the respondents, have fixed the resale prices at which fresh broadleaf spinach purchased by them from the respondent shippers through C. H. Robinson Co., the respondent broker firm, should be sold in the Chicago market, and that such jobbers, assisted by the respondent broker firm and its manager, the respondent Steinberg, entered into an agreement with the respondent shippers whereby they shipped all of this pack of this type of spinach to the respondent jobbers exclusively through the C. H. Robinson Co. and routed to the respondent jobbers. The complaint further alleges that the respondent jobbers purchased all of their requirements of this spinach for the Chicago market from the respondent shippers through C. H. Robinson Co., and that the respondent Steinberg actively assisted in negotiating the agreement between the respondent jobbers and shippers and cooperated in enforcing it.

The complaint alleges that the respondents' agreement, understanding, combination and conspiracy had the effect of unduly restricting competition in the purchase and sale of broadleaf spinach, and prohibited the respondents from competing with each other and in equally conspicuous type (4341).

Thrift Sales Corporation—Alleging the use of lottery methods in the sale of sales promotion plans and of watches, clocks, luggage, and other articles used in the operation of such plans, a complaint has been issued against Thrift Sales Corporation, trading as Finance Service System and as Church Extension Bureau, 192 North Clark St., Chicago, and against Gustave Heits, an officer of Thrift Sales Corporation.

The complaint charges that the respondents contact religious, charitable and fraternal organizations in various parts of the country and offer to conduct bazaars the proceeds of which are used for the purposes of the organizations, and that the respondents have tended to deceive the public by making false representations as to the sales, nature, quality and value of such articles and the manufacture or source of such articles. The respondents are ordered to cease and desist from using the above terms (4489).

CEASE AND DESIST ORDERS

Carlton Mills, Co., Inc., 341 West Wyoming Ave., Philadelphia, has been ordered to cease and desist from misleading representations in the sale of certain textile fabrics composed of combinations of ordinary wool and of cotton or of these products with rayon.

Commission findings are that the respondent has supplied to garment manufacturers and retail dealers various labels to be attached to coats and other garments manufactured from its fabrics, which are made to resemble genuine Persian lamb, Karakul and Caracul peltries; that the respondent used on these labels various trade names having the sound and appearance of names associated with Southeastern European and Southwestern Asiatic countries where the Persian lamb, the Karakul and the Caracul are found; and that the respondent's practice has tended to deceive purchasers into believing that the respondent's products and the garments manufactured therefrom are made from the peltries or wool of such animals.

The Commission order directs the respondent to cease using the words "Persian" or "Persian" or words of similar spelling or phonetic sound to describe any textile fabric which simulates the peltry of a Persian lamb, Karakul or Caracul. The respondent is further ordered to cease using or authorizing the use of the terms "Karaqura," "Pelkara," "Bashkara Lamm," or "Kosva-Lamm," separately or together, with a pictorial design of a lamb or of any other wool-bearing animal, and of the terms "Persian Royal," "Rivalamm," "Persia-laine," "Lam Kurf Persian," "Rivalamm," "Kosva-Lamm," or "Kosva-Kurl Persian," and of any description of any textile fabric which simulates in appearance, pattern or design the peltry of a Persian lamb, Karakul or Caracul.

The order directs the respondent to cease employing the terms "Babelamm," "Lam" or "Lamm" or other similar terms to refer to fabrics or products not composed of wool obtained from lambs, provided that such terms may be used as descriptive of the wool content of fabrics or products composed in part of such wool and in part of other fibers, if words truly designating each constituent fiber or material are used in immediate connection and in letters of equal conspicuousness.

Under the order, the respondent is further directed to cease advertising, offering or selling fabrics or products composed in whole or in part of rayon without clearly disclosing the rayon content, and, in the case of mixed materials, from such disclosure. Under the respondent's practice has tended to deceive the public (3711-3817).

Evens Novelty Company—A Chicago firm selling novelty merchandise and a St. Joseph, Mo., candy distributor have been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance, gift enterprise or lottery scheme. The respondents are Mitchell A. Bazelon and Jacob L. Bazelon, who were formerly in business as copartners under the names Evans Novelty Co. and Premium Sales Co. until the purchase of Mitchell A. Bazelon's interest in the business by his partner, Jacob L. Bazelon, who now conducts the business under the two trade names.

The respondents in each case are ordered to cease and desist from selling or distributing any merchandise so packed or assembled that same or such merchandise to the public may be made by means of a lottery, gift enterprise or pull cards, punch boards or other lottery devices, either with or without the public (3711-3817).

Peterson Core Oil & Mfg. Co., 704 South Kolmar Ave., Chicago, manufacturer of core oil for use in foundries, and Henry S. and Harold A. Peterson, officers of the corporation, have been ordered to cease and desist from representing, by the use of letterheads of the corporation or otherwise, that offices or branches are owned, maintained, or operated in any city or town of the state of Illinois or elsewhere.

Commission findings are that the respondents represented that they maintain branches in St. Louis, Buffalo, Philadelphia, Detroit, and Hamilton, Ont., when in fact no such offices are operated in those cities or elsewhere.

The Commission order also directs the respondents to cease representing, pictorially or otherwise, that the physical plant, equipment and facilities owned, used or occupied are greater than they are in fact (3989).

Ramsdell Packing Company—Thirteen sardine canning and packing firms operating in Maine have been ordered to discontinue violations of the brokerage provision of the Robinson-Patman Act. The respondents are: Ramsdell Packing Co., Rockland, Me.;
Commission findings are that in some instances the respondents effect sales of sardines through brokers whom they employ as selling agents. In other instances, the findings continue, the respondents sell sardines directly to purchasers among whom are some of the respondents' brokers, who sometimes buy sardines for their own account for resale.

When, according to findings, sales of sardines are effected through brokers, the respondents pay them a brokerage fee or commission usual and customary to five per cent of the price at which the respondents invoice the sardines to the purchasers.

The Commission order directs the respondents to cease and desist from paying or granting to buyers by any means, directly or indirectly, on their own purchases of sardines, any commission, brokerage or other compensation, or any allowance or discount in lieu thereof.

The respondents are further directed to cease and desist from selling sardines to customers, the sales to whom are effected directly by the respondents, at a price reflecting a reduction from the prices at which the respondents are currently selling such sardines to other customers, such reduction being an amount equivalent to brokerage currently being paid by the respondents to their brokers for effecting sales of sardines to other purchasers.

The respondents, except Union Sardine Co., which was not found to have engaged in such practices, are ordered to cease and desist from selling sardines to customers through brokers to whom the respondents do not pay the full and customary brokerage, at a price reflecting a reduction from the respondents' current prices to other customers, approximately equal to the difference between the full brokerage customarily paid and that actually paid by the respondents to such brokers for effecting such sales (4355-4362, 4410-4414).

Saks & Company—An order has been set aside to cease and desist issued April 3, 1940, against Saks & Co., New York, concerning certain representations in the sale of women's garments, and has issued a modified order to cease and desist.

The modified order is in accordance with a stipulation in which the respondent company agreed to dismiss its petition for review of the original order of April 3, 1940, pending in the United States Circuit Court of Appeals for the Second Circuit, New York, and in which the Commission agreed that upon such dismissal it would set aside its original order and issue the modified order.

Under the modified order, the respondent corporation is directed to cease and desist from representing as the customary or regular worth or value of any furs, or fur products made in whole or in part of fur, prices and values which are in excess of the regular and customary prices, and from representing as new or "brand new" any fur coat which is not in fact a new fur coat.

The respondent is further ordered to cease using the unqualified descriptive term "Satin," or any other descriptive terms indicative of silk, to designate any fabric or product not composed wholly of silk, provided that when such terms are used truthfully to designate any fabric or product composed wholly of silk, they will be followed by the use in connection therewith, in letters of equal conspicuousness, of words clearly naming the fibers or materials from which the products are made.

The modified order further directs the respondent to desist from using the term "Silk" or other similar terms indicative of silk, to describe any fabric or product not composed wholly of silk, provided that in the case of a fabric or product composed partly of silk and partly of materials other than silk, such terms may be used as descriptive of the silk content when immediately accompanied by words accurately designating such other materials (3456).

Commission findings are that the respondent disseminated price lists and trade literature setting forth his method of purchasing raw furs from trappers and dealers, the quality and grading classification of furs, and the high prices and average prices paid for such graded grades and classifications.

According to findings, the prices quoted as those to be paid by the respondents to designated furs have been so displayed as to create the misleading impression that they would approximate the high prices in the upper grades. As a matter of fact, the findings continue, the bulk of the furs received by the respondent for grading have been of medium or low quality.

Findings are further that trappers not skilled in fur grading technique have been induced to ship their furs to the respondent as a result of the emphasis he has placed on the higher grades and prices quoted by him and in the mistaken belief that they would be paid at the highest prices quoted.

The Commission order directs the respondent to cease and desist from these practices and to discontinue representing to fur trappers or distributors that the prices quoted by him and included in his price lists and trade literature setting forth his method of purchasing furs are a result of the emphasis he has placed on the higher grades and prices and that the products are made at an unusual demand for certain types and grades of furs, and have caused or will cause an increase in prices paid to trappers and dealers for such types or grades of furs, when in fact such market conditions or demand do not exist (4189).

S. & K. Sales Company, Inc.—S. & K. Sales, Inc., St. Louis distributor of merchandise, has been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance, gift enterprise or lottery scheme. Commission findings are that the respondent corporation sells to dealers trinkets, neckties, pipes, knives, fountain pens and other articles.

The respondent is ordered to cease and desist from selling or distributing any merchandise so packed or assembled that its sale to the public is to be or may be made by means of a lottery scheme, and from supplying to others push or pull cards, pull tabs, punch boards or other lottery devices, either with assortments of merchandise or separately, which devices are to be or may be used in selling or distributing such merchandise to the public (3769).

STIPULATIONS

Following stipulations have been entered into by the Commission during the past week:

Brown Shoe Co., Inc. (3078), and Johnson, Stephens & Shinkle Shoe Co. (3080), both of St. Louis, and from Marshall, Meadows & Stewart, Inc. (3079), Auburn, N. Y., all manufacturers of shoes, have entered into stipulations.

The respondents agree to cease using the word "Alligator" or other similar words to describe shoes not made from alligator hide, provided that the word "Alligator" may be used to describe the finish of shoes which are made from materials other than alligator leather and are finished or embossed to resemble it, when this word is immediately accompanied by other words clearly indicating that the designation refers only to the pattern embossed on such materials. The Marshall, Meadows & Stewart stipulation applies to shoes "or the trim or any part thereof" (3078-3079-3080).

Carbolinume Wool Preserving Co., 528 West Highland Ave., Milwaukee, entered into a stipulation to cease certain representations in the sale of "Carbolinume," advertised for use as a wood preservative and for destruction of insects. The respondent agrees to cease representing that the United States Patent Office has recognized any advantages, exclusive or otherwise, of "Carbolinume" or "Aventarius Carbolinume" as a wood preservative, a mite killer, or for any purpose or use. The respondent further stipulates it will cease advertising that the trademark "Carbolinume" was issued in the name of Carbolinume Wood Preserving Co., by the patent office (3081).

G. S. Cheney Co., 15 Union St., Boston, stipulated that in the sale of its product known as "Cheney's Nerve Phosphates" and "Cheney's Nerve Phosphates" it will cease representing, by use of the words "nerves" or "nerve" or other similar words in the preparation's name, that it is of any value for bodily ailments caused by nervous disorders; that it is a food or stimulant for the
nerves, or is beneficial in the relief of sleeplessness and fatigue, and that its lecithin content will add to the phosphorus constituent of brain and nerve substance. The respondent also agrees to cease representing that "Cheney's Vitamins Complete" is a valuable product for the deficiency of the vitamins and minerals which it contains (02778).

DeLuxe Products Company—Al B. Wolf and Max Schwartz, trading as DeLuxe Products Co., and National Business Builders, 37 West Roosevelt Road, Chicago, camera distributors, has entered into a stipulation to cease advertising that DeLuxe Products Company, or its salesmen, are the exclusive distributors of cameras manufactured by Remington Rand, Inc., "Remington" or any simulation thereof as a mark or brand for their products. The respondents also agree to cease employing the phrase "Regular $5.00 Value" as descriptive of the value of their products when in fact that amount is in excess of the regular retail price (5075).

Donna Lo Laboratories, Inc., 603 Del Monte Way, St. Louis, has entered into a stipulation to cease advertising that Donna Lo preparations, or any one of them, provide a new kind of skin care or are effective as an aid in correcting skin ailments generally; and that they permit the skin or its pores to breathe, decrease the size of the pores, and cause the blood stream to circulate through inactive areas of the face. The respondent corporation also agrees to cease representing by use of the word "Circulation" in the brand name "Circulation Emulsion" that that preparation stimulates circulation to the face or that it will remove all foreign matter from the pores. The respondent further agrees to cease stating in its advertising that excess fatty acids or waste products impede normal elimination of the skin (02776).

Grace Donohue, Inc., 640 Madison Ave., New York, entered into a stipulation to cease advertising that the preparation "Grace Donohue Cleanser" is a healing agent and constitutes an efficient method for preserving a clear, smooth or attractive complexion. The respondent also agrees to cease representing that the product is a remedy or cure for blackheads or whiteheads and is beneficial in the treatment of acne, crow's feet, lines under eyes, "jowls" and other skin conditions, or is beneficial to oily or dry skin. The respondent further agrees to cease stating in its advertising that excess fatty acids or waste products impede normal elimination of the skin (02776).

Alton W. Eldredge, trading as Melrose Eldredge Co., Melrose, Mass., has entered into a stipulation to cease representing, by use of the terms "Doctor," "Dr.," or "Approved," as a part of the brand name of "Dr. Eldredge's Approved Rectal Jelly," that that preparation has the official recommendation of any group of doctors or pharmacists or that it was formulated by a physician. The respondent further stipulates that he will cease advertising that the preparation is a cure for piles or has any therapeutic effect upon the symptoms of that ailment except to the extent that it may act as an astrigent, provide some antiseptic action, or afford the soothing effect of an emollient (02779).

European Linen Importing Corporation, 244 Fifth Ave., New York, stipulated that it will cease using the word "Tuscany" or similar words, either with or without the explanation "Made in China," as descriptive of laces or other articles which are not in fact true Tuscany lace actually made in Tuscany of linen thread. The respondent, which, according to the stipulation, does not own or control a factory, also agrees to cease from use of the word "Manufacturers" in connection with its corporate or trade name and as descriptive of its business (5074).

L. W. Ferdinand & Co., Inc., 599 Albany St., Boston, entered into a stipulation to cease using on labels or in printed matter the word "Waterproof" or similar words as descriptive of cascin glue which is not waterproof. (5075)

S. Grover Graham Co., Inc. (02781), 75 Second St., Newburgh, N. Y., has entered into a stipulation to cease certain representations in the sale of "Grover Graham Remedy" and "Grover's Butternut Pills." Also Hevenor Advertising Agency, Inc. (02775), 11 North Pearl St., Albany, N. Y., entered into a stipulation to cease certain representations in advertisements disseminated by the agency on behalf of S. Grover Graham Co., Inc., for its preparation "Grover Graham Remedy." Both the respondent corporation and advertising agency agree to cease using the word "Remedy" or similar words as a part of the trade name "Grover Graham Remedy" in any other manner implying that the preparation is anything more than a treatment to neutralize temporarily excessive gastric acidity and to relieve temporarily the pain caused thereby.

Hevenor Advertising Agency, Inc., further stipulates that it will cease disseminating advertisements on behalf of S. Grover Graham Co., Inc., which represent that Grover Graham Remedy will afford relief from acid indigestion in five minutes or any specified time and enable an individual to eat food without fear of stomach distress; that the preparation corrects or cures excessive stomach acidity and stops the pain or symptoms of acid indigestion, and that its formula was originated or used by a European specialist.

S. Grover Graham Co., Inc., also stipulates that it will cease advertising that the product "Grover's Butternut Pills" consists of a vegetable ingredient, without disclosing that it contains only the extract from a vegetable, and that it will discontinue representing that the preparation is a treatment to neutralize temporarily excessive gastric acidity and stops the pain or symptoms of acid indigestion, and that its formula was originated or used by a European specialist.

Keupper-Scott Shoe Co., a manufacturer, agrees to cease advertising that the word "Doctor" or the abbreviation "Dr." in connection with a name or with any other words as a trade name, brand or designation for its products so as to imply that they are made in accordance with the design or under the supervision of a physician and contain special scientific or orthopedic features which are the result of medical determination or services. According to the stipulation, the respondent corporation caused the words "Dr. Luther Nature Shape" to be stamped on the soles of the shoes and printed on the cartons when in fact the shoes so marked were neither made under the supervision of a physician nor did they contain special scientific or orthopedic features. (5072).

Eleanor II. Mack, trading as Mack Brothers Products, Hillcrest Station, San Diego, Calif., entered into a stipulation to cease using the word "Resuscilator" as a part of the brand name for the cosmetic preparation "Revel No. 6 Lipstick Cream," from otherwise representing that the use of this product restores life or the appearance of youth to skin, and to cease employing the phrase "Pore Cleansing" as a part of the brand name of "Revel No. 1 Pore Cleansing" or from otherwise representing that it will remove all foreign matter from the pores. The respondent also agrees to desist from representing that "Revel No. 6 Lipstick Cream" is of any appreciable benefit in the treatment of aged or creepy skin, and that "Revel No. 16 Mouth Creme" is of value in treating bleeding or receding gums. (02777)

Manning, Bowman & Co., Meriden, Conn., distributor of electrical appliances including heat pads, stipulated that it will cease employing the words "Three Heats" or "3 Heat Pad," "Three Degrees of Warmth," or "Low, Medium and High Heats," implying that its electrical heating pads are capable of maintaining three distinct temperatures. (5083)

Charles Meis Shoe Manufacturing Co., which makes women's shoes at its factory at Lebanon, Ohio, agrees to cease employing the word "Doctor" or the abbreviation "Dr." or any simulation of such abbreviation in connection with a name or with any other words as a trade name, brand or designation for its products so as to imply that they are made in accordance with the design or under the supervision of a physician and contain special scientific or orthopedic features which are the result of medical determination or services. According to the stipulation, the respondent corporation stamped certain shoes with brand names owned by its
customers, such as "Dr. Warren's Scientific Arch Support" and "Dr. Steward Arch Support Combination Last," and also employed other brand names in connection with the abbreviation "Dr." When in fact shoes so marked were neither made under the supervision of a physician nor did they contain special scientific or orthopedic features. (3066)

Miko Company—Fred Miller, trading as The Miko Co., 2521 Thirty-first Ave., Long Island City, N. Y., has entered into a stipulation to cease advertising that "Circulin Garlic Pearls" are rich in body-building materials such as manganese, sodium, calcium, iodine and phosphates; that they have value in relieving symptoms of nervousness, dizziness and tiredness in excess of temporarily relieving such symptoms when associated with high blood pressure, and that they are effective in treating coughs, bronchitis or bronchial asthma. (02771)

Newby, Peron & Filitercraft, Inc., 222 West Adams St., Chicago, an advertising agency, stipulated that in advertisements which it disseminates on behalf of Albert Laboratories, Inc., Chicago, concerning that corporation's preparation "Respirex," it will cease representing that product as comprising a competent treatment or effective remedy for asthma, bronchial coughs or bronchitis, or as doing any more with respect to these conditions than affording some temporary relief from the accompanying symptoms. The respondent agency also agrees to cease representing that the preparation relieves symptoms accompanying hay fever; that it promotes healing, and that it is unique or distinctly new or represents a discovery. (02780)

Nix Cosmetics Company—Trading as The Nix Cosmetics Co., P. Edwards, of Memphis, Tenn., stipulated that he will cease advertising that "Nix Bleach Cream" affects the skin in a new way, or in a way different from that of other preparations; that he will desist from representing, by use of a headline or otherwise, that any girls are "wanted" for sales work, and that he will cease otherwise representing or implying that he has employment to offer. (02772)

Herbst Shoe Manufacturing Co., 2367 North 29th St., Milwaukee, and A. O. Keehn, T. C. L. Keehn and Leroy D. Keehn, trading as Keehn Brothers, 219 West Monroe St., Chicago, shoe wholesalers, stipulated to cease certain representations in the sale of their products.

The respondents agree to cease employing the word "Doctor" or the abbreviation "Dr." in connection with a name or with any other words as a trade name, brand or designation for their products so as to imply that they are made in accordance with the design of or under the supervision of a physician and contain special scientific or orthopedic features which are the result of medical determination or services.

The Herbst Shoe Manufacturing Co. also agrees to cease employing the term "Official Physical Health Director" or similar words which tend to convey the impression that shoes so referred to contain special or scientific features sponsored by a director of physical health.

According to the stipulations, the respondents in each case caused certain of their shoes for boys and girls to be branded as "Dr. Cross' Health Shoe." (3076-3077)

Hilly Medicinal Products—Morris W. Hillinger, trading as Hilly Medicinal Products, 2512 East Colorado St., Pasadena, Calif., has entered into a stipulation in which he agrees to discontinue representing that "H R 5," a medicinal preparation, constitutes a preparation that should be used only as directed on the label if and when such label either contains a statement warning of the consequences of the use of the product under certain conditions or specifically directs attention to a similar caution statement in the accompanying labeling. (3065)

Palmer Bedding Co., 2300 Eighth St., Denver, Colo., manufacturer of mattresses, box springs and bedding, entered into a stipulation to cease certain representations in the sale of its products.

The respondent corporation stipulates that it will cease representing, by inference, implication or otherwise, that its products are made of or contain all new material, when in fact they are composed, either in whole or in part, of used or second-hand materials, and that it will cease failing to clearly disclose that such products are composed, either in whole or in part as the case may be, of used or second-hand materials. (3068)

Reading Hosiery Mills, trading as Reading Hosiery Mills, Joseph A. Kitzmiller, 8 South Tenth St., Reading, Pa., stipulated that he will cease using the word "Mills" as part of his trade name. According to the stipulation, the respondent does not own, operate or control a factory in which his products are made. (3082)

Redolent Products Co., West Palm Beach, Fla., stipulated that it will cease disseminating advertisements which tend to convey the impression that the local application of its product "Cur-A-Ped," a foot treatment, would have therapeutic effects other than those resulting from the preparation's analgesic properties, or that it would be of significant value in destroying the deep burrowing fungi or ringworm or have value other than as a rubefacient or emollient to afford temporary relief for tired, aching, burning, itching, tender, perspiring feet, and sore, cracked, inflamed toes or to overcome superficial infection of athlete's foot. The respondent corporation also agrees to desist from representing that such specific bodily ailments as acute rheumatic fever, Bright's disease, diabetes, cirrhosis of the liver, and other ailments are attributable to bad feet, or that treatment of foot disorders will correct such ailments. (3067)

Requa Manufacturing Co., Inc., 1193 Atlantic Ave., Brooklyn, manufacturer of proprietary preparations, entered into a stipulation in which it agrees to cease representing that the use of its unguent product called "Requa's Oil for the Ear" will result in immediate relief for stuffed-up ears; will cause wax accumulations in the ear to quickly dissolve or almost instantly soften; will do away with ear discomforts which may result in permanent deafness, or will be of any appreciable value as a massage oil for muscular pains and congestion when applied to skin surfaces, as the neck or chest. The respondent further stipulates that it will cease representing that irritations of the outer ear result from head colds. (3063)

Schwartz & Benjamin, Inc.—Three shoe manufacturing corporations have entered into stipulations to cease and desist from certain representations in the sale of their products. The respondents are Schwartz & Benjamin, Inc., 842 Broadway, New York; Charles Meis Shoe Manufacturing Co., 312 Vine St., Cincinnati, and J. M. Connell Shoe Co., Inc., South Braintree, Mass.

Each of the respondents Schwartz & Benjamin, Inc., which manufactures women's shoes, and J. M. Connell Shoe Co., Inc., which makes shoes for men, women and children, stipulates that it will cease using the word "Alligator" or other similar word to describe shoes made of alligator hide, provided that the word "Alligator" may be used to describe the finish of shoes which are made from materials other than alligator leather and are finished or embossed to resemble it, when this word is immediately accompanied by other words clearly indicating that the designation refers only to the pattern embossed on such materials. The J. M. Connell Shoe Co. stipulation applied to shoes "or any part thereof". (3064 and 3069)

Selby Shoe Co., Portsmouth, Ohio, and Kepner-Scott Shoe Co., Orwigsburgh, Pa., have entered into stipulations to cease and desist from certain representations in the sale of their products.

Selby Shoe Co., a manufacturer of women's shoes, stipulates that it will cease using the word "Alligator" or other similar word
to describe shoes not made from alligator hide, provided that the word “Alligator” may be used to describe the finish of shoes which are made from materials other than alligator leather and are finished or embossed to resemble it, when this word is immediately accompanied by other words clearly indicating that the designation refers only to the pattern embossed on such materials. (3070)

**Standard Products Company**—Parisis J. Gerogian, trading as Standard Products Co., 102-104 Commercial St., Boston, has entered into a stipulation in which he agrees to cease advertising that “Gloria Pure Olive Oil (Agorelaion)”, a food product, will be of appreciable benefit in preventing or remedying a lack of appetite; that this olive oil contains all of the vitamins or appreciable quantities of any of them, and that use of the preparation will insure good health. (02774)

**Superior Hatchery**—Mary Booth Powell, trading as Superior Hatchery, Windsor, Mo., has entered into a stipulation to cease representing that she is a “U. S. Record of Performance” poultry breeder; that she operates a poultry breeding plant under the supervision of an official State agency supervising U. S. R. O. P. work or that her chicks are R. O. P. chicks, until such time as she shall in fact become a “U. S. Record of Performance” poultry breeder and be entitled properly to represent chicks as being U. S. R. O. P. chicks in accordance with provisions of The National Poultry Improvement Plan. The respondent further stipulates that she will cease employing the words “Ozone Conditioned” or “Ozone-Vitalized” or any representation the effect of which tends to convey the impression that chicks subjected to an ozone machine thereby acquire strength, health or livability. (3071)

**James J. Walker, Jr.**, 3614 Calumet Ave., Chicago, stipulated that he will cease advertising that “Walker’s Famous Tooth Powder” stops receding or bleeding gums, makes gums firm or sound or heals them, tightens loose teeth, or makes the teeth white. The respondent also stipulates that he will desist from representing that millions of people use Walker’s Famous Tooth Powder, when such is not a fact. (02773)

**FTC CASES DISMISSED**

The Federal Trade Commission dismissed its case against National Capital Ice Institute, Washington, D. C., seven of its officers and directors and five member companies, without prejudice to its right to take other or further action in accordance with its regular procedure whenever facts shall so warrant. The respondents had been charged with a combination to fix and maintain uniform minimum prices to be exacted by them from purchasers of ice.

Besides National Capital Ice Institute, other respondents in the case were Harry Hammond, institute president; William A. Brooks and Migiel J. Uline, vice presidents; James P. Ehman, executive manager; Morris W. Bennett, Edward J. Smith and M. E. Thompson, directors; M. J. Uline Co., American Ice Co., Christian Heurich Brewing Co., and Consolidated Terminal Corporation, all of Washington, and Mutual Ice Co., Alexandria, Va.

The Commission’s dismissal order recites that it appears from a supplemental investigation that, subsequent to the conclusion of the Commission’s original investigation in the case, but before its complaint had issued, the National Capital Ice Institute, which was the central agency through which the complained of acts and practices were set in motion and directed, closed its office, discharged its officers and employees, and ceased to function or operate.

The dismissal order further recites that it appears no resumption of the association’s activities has occurred up to this time, and that since some time prior to such cessation of activities and operation and up to the present time there has been substantial and sharp competition between and among the respondents.

The Commission also announced its dismissal of a complaint charging Adolph Karl and Gertrude Karl, trading as A. & G. Karl Co., Newark, N. J., with certain representations in the sale of “Never Break,” a cosmetic for the fingernails.

The Commission dismissed a complaint charging J. O. Davies, trading as Baby Touch Hair Remover Co., St. Louis, with certain representations in the sale of a hair removing device.
ASCAP

ASCAP has submitted a proposal to the stations of the Mutual Broadcasting System, details of which were not available for this issue of the NAB Reports. They will appear in an early issue.

Neville Miller sent the following telegram to all member stations on Thursday, May 1:

"In order to enable NAB members to comprehend effect of Mutual-ASCAP proposal a factual analysis is being made. This will be transmitted to stations in time to be available for consideration at convention. Regards."

Convention Program

MONDAY

Morning Meeting of various committees.
Afternoon Golf Tournament.
Night NAB Board meeting.
(Registration all day.)

TUESDAY

10 o'clock Luncheon Speech by Vice President Wallace.
Afternoon Meetings of IRNA, Independents, Clear Channels, Regionals, Local Stations, Sales Managers.

WEDNESDAY

Morning Breakfast—Round Tables.
10 o'clock Music Situation—BMI-ASCAP, etc.
Afternoon Music Situation continued, Insurance Committee, Recording Standards, Daylight Saving Time.
Evening Open Meeting on Facsimile, Television, FM and International Broadcasting.

THURSDAY

Morning Breakfast—Round Tables.
10 o'clock Unit Volume, Code, Radio Advertising—Col. Chevalier, speaker.
Luncheon Mark Ethridge, speaker.
Afternoon Labor and other industry problems, election of Directors, selection of Convention city, report of Resolutions Committee, etc.
7:30 P. M. Annual Banquet.

FRIDAY

Morning NAB Board meeting.

With each day there comes new evidence that the Nineteenth Annual NAB Convention, to be held in St. Louis, May 12-15, will be a most successful one.

Already reservations for accommodations at St. Louis hotels involve between six and seven hundred persons. Last year at San Francisco, when the attendance reached an all-time high of just under seven hundred registrations, the advance reservations were less than half those now on file with the NAB Housing Committee.

The New Hotel Jefferson, which is to serve as Convention headquarters, is booked to capacity, but within

(Continued on page 388)

You Can’t Afford to Miss the NAB Convention

May 12, 13, 14, 15

New Jefferson Hotel St. Louis
CONVENTION PROGRAM

(Continued from page 387)

easy distance are the Statler, the Lennox, the Mayfair, the De Soto, all of which are in a position to accept additional reservations for almost any type of accommodation desired. Further removed are the Chase, Park Plaza and Coronado which offer attractive accommodations. The hotel facilities at St. Louis are adequate to accommodate all who may desire to come.

The NAB Convention Program Committee, composed of J. H. Ryan, WSPD, George H. Norton, Jr., WAVE, and Herbert Hollister, KANS, has put together a business program which promises to hold the interest of all attending. It comprehends the presentation of subjects of vital concern to all broadcasters as well as to those concerned with radio.

Vice President Henry A. Wallace heads the list of speakers. He will address the Tuesday noon luncheon session and his talk will be broadcast to the nation on all the networks. The Thursday noon luncheon is to be an executive session at which Mark Ethridge, WHAS, former President of NAB, will discuss in a most intimate manner the problems and responsibilities of the industry.

The opening business session on Tuesday morning will consist of a panel discussion of the Relation of Radio to the National Defense. Federal Communications Commission Chairman James Lawrence Fly, General Robert C. Richardson, Public Relations Director of the Army, Lowell Mellett, Special Assistant to President Roosevelt in coordinating the national defense effort, and Commandant H. R. Thurber, United States Navy, will all speak.

Music, which has been a topic of paramount interest to the radio industry, will occupy the center of the stage on Wednesday. Neville Miller, President of Broadcast Music, Inc., Sydney Kaye, Vice President and General Counsel, Merritt Thompkins, General Manager, and Carl Haverlin will outline developments and an open discussion will feature the program. At the afternoon session Universal Daylight Saving will be given an airing and the problem of uniform standards for recording will be discussed.

Thursday morning's session will be devoted to the commercial aspects of radio. Colonel Willard Chevalier, Publisher of Business Week and one of the nation's outstanding authorities of advertising, will sound the keynote. E. Y. Flannigan, WSPD, Chairman of NAB's Sales Manager's Division, and Frank Pellegrin, Director of the NAB Department of Broadcast Advertising, will present brief talks. William Scripps, WWJ, Chairman of the Research Committee, and Paul Peter, NAB Director of Research, will present the Unit Plan of Volume Measurement and its relation to commercial radio. Edgar Bill, Chairman of the Code Compliance Committee, will discuss the commercial aspects of the Code.

Following the Thursday noon luncheon there will be a panel discussion of "Labor" with Samuel Rosenbaum, WFIL, and Joseph L. Miller, NAB Labor Relations Director, participating. Then will follow the election of Directors-at-large and the advisory vote on the Convention site for the 1942 Convention.

The banquet will be held in the spacious Gold Room of the Jefferson. Through the combined efforts of the production departments of the networks a variety show of unusual merit is assured. Adolph Opfinger, MBS, Clarence Menser, NBC, and Doug Coulter, CBS, form the committee, which is directing the activity of Nat Abrahamson, WOR, who is assembling the talent. It promises to be a snappy, entertaining offering.

Group breakfast sessions will offer those attending a wide variety of choice of sessions in which topics of peculiar interest to them will be discussed.

The wives of the St. Louis broadcasters are preparing a most interesting program of entertainment for the ladies who will be in attendance.

All in all this nineteenth annual meeting gives promise of being the biggest session in every way of the broadcasting industry.

GOING BY TRAIN

Here is an abbreviated timetable for some of the principal trains between eastern cities and St. Louis:

**Baltimore & Ohio**

<table>

(All departure time shown is Eastern Standard—add an hour for "daylight")
Radio technicians, as a group, are not professional employees within the meaning of the Wage and Hour Act, and thus cannot be exempt, as a group, from the act's overtime provisions.

This was the opinion of Harold Stein, Wage and Hour Division attorney after a field trip and conferences with Joseph L. Miller, NAB labor relations director, and Lynne Smeby, director of engineering.

Chief engineers and supervisors may be exempt as executives, depending upon their duties, Mr. Stein said. Both educational requirements and duties led him to believe, however, that all technicians, as a group, could not be called professionals.

Mr. Stein and the NAB representatives visited studios and transmitters of a clear channel, regional and local station in Washington, and thoroughly canvassed the whole problem.

**SALESMEN—WRITERS—ANNouncERS**

Joseph L. Miller, NAB labor relations director, addressed the following letter this week to the Wage and Hour Division regarding the classification of salesmen-writers-announcers:

A question has arisen in the broadcasting industry in connection with Section 615(B) of the Wage and Hour Division's Rules and Regulations.

In many radio stations, especially smaller ones, time salesmen frequently prepare (write) the commercial "copy" for use in the programs which they have sold. We consider this work "incidental to and in conjunction with the employee's own outside sales or solicitations." Are we correct in this assumption? These salesmen are undoubtedly "outside salesmen" within the meaning of the definition in all other respects. It may throw some further light on the question to point out that the writing done by these outside salesmen is of the same type as that done by other employees, many of whom are classified as "professionals" and all of whom would be classified as professionals if they met the salary qualification.

The second question carries the first a step further. Some outside salesmen not only write some of their "copy" but announce the programs they sell, reading this "copy" which they have prepared. This is especially true in the case of numerous stations which devote some or most of their time to foreign language programs.

A small station, for instance, in a community which has a large Polish speaking group will engage a Polish speaking salesman. He may have perhaps one hour a day for a Polish music program sponsored by a group of merchants catering to the Polish speaking population. He sells, writes, and announces these "participating" commercials.

We certainly would appreciate your opinion on these questions as soon as possible. If any further information is needed, please do not hesitate to call on me.

**REGULAR HOURLY RATE**

An employee regularly works 40 hours a week for $20. Monday he gets a day (8 hours) off, sick leave. The employer's policy is not to dock employees for sick leave. Saturday, the employee's normal day off, he works 10 hours. How much does he have coming?

The Wage and Hour Division says $25.50 (40 hours at the regular rate, eight more hours at the regular rate, two hours at time and one-half). In other words, the Wage and Hour Division considers payment for sick leave as a "gift" and not a part of wages. Hence, the regular hourly rate is not changed by payment for sick leave, holidays, vacations, etc.

**DISCRIMINATION**

The Supreme Court upheld the Labor Relations Board this week in its contention that refusal to hire a man because of his union affiliation or activity constituted violation of the Wagner Act.

The court also held that the employer was liable for the man's salary or wages from the time he was refused employment on that ground until he was employed.

In other words, if an employer is found by the labor board to have refused employment to a union member just because he was a union member, then the employer is liable for the pay the union member would have received if he had been hired.

Making or helping to make a "black list," it might follow, might be held to constitute conspiracy.

**COST OF LIVING**

The American Federation of Labor had the following to say this week about cost of living prices:

Memories of the last war remind us that there may be no stopping a runaway price rise. Prices started upward slowly in 1915; the rise gathered speed in 1916 and 1917, swept onward in 1918 and could not be checked until two years after the war. When prices finally reached a peak in 1920, cost of living was more than double its prewar level. The collapse which followed brought a severe depression.

Fear of such price inflation led the President to set up the Office of Price Administration and Civilian Supply. This new agency has the task of stopping price increases before they go too far. It will work closely with the Division of Purchases for OPM, which buys supplies for the Army and Navy. In refusing to buy any article where the price is too high, these agencies can bring enormous pressure on anyone raising prices unduly. For they buy in huge quantities practically every kind of goods where shortages and price increases are likely to develop.

With the Price Administration to check runaway prices, experts do not expect any important general cost of living increase in the near future. They expect no more than a very gradual rise in prices. The chart below shows that, according to government figures, living costs in March 1941 were only 1% above the last quarter of 1939, and less than 1/2% above March 1940. Nevertheless, workers who go out to buy find prices up in many lines. Silks are up 9% since prewar days, woolens up 6 1/2%, blankets 14%, furniture 15 1/2%, foods almost 5%. Since last fall, dry goods and home furnishings are up 5%; men's suits may cost $2.50 to $5.00 more in the near future. In clothing, lower quality material is being substituted to avoid price increases, and workers find a hidden loss.

These things do not appear in the living cost index because they are outweighed by other items such as staple foods and some rents, which have not risen.
COOPERATION BEING RECEIVED

Cooperation to date from stations queried in a general mailing last week by the Department of Broadcast Advertising has been extremely encouraging.

The mailing advised stations of the aims and policies of this new Department; included samples of the new standard form for success stories, and asked that current and future station promotion pieces and success stories be sent here to establish a national clearing house and centralized files upon which all NAB members may draw.

Any station that has not yet mailed its return-card is cordially invited to do so promptly, so that the record may be completed before the NAB convention.

A considerable task lies ahead in assembling and editing all material for duplication on our standard forms, but this is being attacked with as much dispatch as possible and stations will soon have a wealth of success story sales ammunition to draw upon.

TO 4-A CONVENTION

NAB will be represented at the annual convention of the American Association of Advertising Agencies May 2-3 by Paul F. Peter, Director of Research, and Frank E. Pellegrin, Director of Broadcast Advertising. Matters discussed will be routed to the proper NAB committees for discussion at the NAB convention.

AFA PARTICIPATION PLANNED

Radio will occupy one of the most prominent places it has ever held on a convention program of the Advertising Federation of America, when that body meets in Boston May 25-29.

As published in last week's Reports, the Boston stations and networks will furnish topflight entertainment for the cabaret party Tuesday night, and the highlight of the Wednesday luncheon program will be an international conversation via short wave radio between the presidents of the American and British Advertising federations.

Radio's group meeting Wednesday morning will be presided over by Robert Peare, Advertising Manager of the General Electric Co., prominent in AFA circles. Invitations have been extended by the NAB Department of Broadcast Advertising to two nationally known speakers, and their acceptances are awaited. Finally, Russell Place, NAB Counsel, and Frank E. Pellegrin, Director of Broadcast Advertising, will conduct a frank discussion of problems and issues, and report on action taken at the NAB convention, as well as at the 4-A meeting, as they relate to commercial broadcasting. All radio men who can are urged to attend.

NATIONAL DEFENSE BOND CAMPAIGN

Radio stations are being asked to plug the sale of National Defense bonds on a free-time basis, as a measure of cooperation with the United States government. This cooperation has been freely given throughout the nation in very creditable fashion, and is deeply appreciated by government officials in Washington. Thus far sufficient funds have not been appropriated to enable the Treasury Department to pay for advertising in any media, but NAB is assured that in the remote event that an advertising fund is made available, radio will receive its proper share.

MOTION PICTURE PLUGS REQUESTED

An unwarranted effort to capitalize on radio's desire to cooperate in the national defense movement is reported by NAB members, whereby commercial motion picture exhibitors who have scheduled the film "I Wanted Wings" are working through recruiting offices to secure free radio advertising.

The picture, made in cooperation with the Army Air Corps, encourages the enrollment of aviation cadets. Motion picture operators are sometimes successful in persuading zealous recruiting officers to approach radio stations with the statement that "this recruiting office has been directed by the War Department to cooperate in publicity for this picture...I am taking the liberty of sending you spot announcements, etc. . . ." One appropriate answer contributed by a NAB member was to the effect that "We are quite anxious to cooperate with your office in every possible way and if any of the theaters in this territory will arrange to give free showings of this motion picture, we shall gladly do everything that we can to stimulate attendance."

We wish to repeat that NAB is working in closest harmony with national defense officials in Washington, and all worthy requests for radio's cooperation are being reported to member stations. Independent requests from scattered interested sources need place no station manager in the position of feeling that he is not cooperating adequately, and no qualms need be felt about declining such requests.

CIRCUS SEASON BEGINS

As reported in Editor & Publisher, Ringling Bros. and Barnum & Bailey Combined Shows will spend about $350,000 in newspaper advertising this year, according to circus executives.
Roland Butler, general press representative, wrote ANPA: "We are convinced that newspapers are doing an excellent job for us. Advance sales, which generally amount to as much as $3,500 per stand, are mentioned only in newspaper ads. It’s also a fact that the steady gains we’ve enjoyed since 1929 have been recorded in years when our newspaper expenditures have likewise been steadily increased. . . ."

As the circus rolls this year, it’s certain that radio stations everywhere will be asked to broadcast sustaining special-events programs, plugging the circus and covering such activities as the arrival and unloading, the parade, erection of the big top, etc., as well as interviews with star performers.

Usually, when asked to purchase this time, the radio advance contact man states that he has no authority to place orders for commercial advertising, but that in a few days he will be followed by an advertising man, and that evidence of cooperation on the part of stations will have a bearing, etc.

Circuses and other traveling shows will begin to use radio widely on a commercial basis, it is believed, only after stations have presented a united front for one season or two by discouraging the free-time abuse for disguised commercials. It took the newspaper industry many years to convert the circus press agent to the purchase of space, backed up by publicity; radio stations can accelerate the process by profiting from the newspapers’ example.

Meantime, any success stories you may have showing an effective job done by your station on behalf of circuses or any other amusement enterprises using commercial time, will be welcomed as a valuable contribution by the NAB Department of Broadcast Advertising as it prepares radio’s case for presentation to circus executives.

PER-INQUIRY EFFORT CONTINUES

The Rogers & Smith advertising agency of Dallas, Tex., continues to seek per-inquiry deals from radio stations on behalf of an unnamed nursery account. Although previously advised that it is not the policy of NAB member stations to do business on this basis, a recent letter from the agency to a station states that "eleven stations thus far have accepted it on a contingent basis. . . . All matters pertaining to any agreement that we may reach will be held in strictest confidence. . . .”

NAB is of the opinion that legitimate and ethical advertising can be carried on freely and above-board, both by the advertiser and the medium. An inference might be drawn that a more favorable deal can be secured by one station than by others. Indeed, NAB has positive proof that in a similar per-inquiry case, reported twice previously in Reports, one station received 33⅓ per cent while others, accepting the "standard" offer, received only 20 per cent. "Strictest confidence" was promised by that advertiser likewise, but nevertheless full details were quickly uncovered by an NAB investigation.

ESPERANTO REQUESTS TIME

For information of NAB members who have been approached for free time by Esperanto clubs, and who have requested data on the headquarters office of this organization in Washington, the Department of Broadcast Advertising finds that the Esperanto Association of North America operates a one-man office here, managed on a part-time volunteer basis by Joseph Leahy, who says the association "has no money." Some financial support comes through subscriptions to an Esperanto newspaper.

The association exists to promote the study of Esperanto, designed as an international language, to promote international understanding and goodwill. Study of the language was widespread in Europe before the war, and continues in South America. In Brazil, for example, the subject is required in public schools, and official papers are said to be printed both in Portuguese and Esperanto. Never considered very important by large numbers in the United States, Mr. Leahy says the association has between 25,000 and 30,000 members here, with about 50 clubs now organized chiefly in principal cities.

Radio activity, he said, is confined to local efforts by these clubs, who prepare their own scripts with no special assistance from the headquarters office. Whether stations wish to accept these as sustaining programs lies wholly within the discretion of each station, but caution is advised because of the present world situation, and the tendency of many listeners to regard with suspicion any programs conducted in a language other than English.

SUCCESS STORIES NEEDED

To fill current requests from members, additional success stories, big or little, are urgently requested on these topics:

Furniture Florists

Please send what you have to the Department of Broadcast Advertising.

TRADE SCHOOL WANTS DEALS

The Electronic Radio-Television Institute, of Omaha, Neb., is reported to be seeking cost-per-inquiry deals. Their letter states, however, "if your policy does not allow a per lead basis, send us a schedule of your rates. . . ." They are being advised that the best interests of advertisers and stations are served by adherence to published rates. Caution should also be exercised in accepting their statement that "Our school is the oldest school in this locality, and so far as we know, is the only school which has been given a high recommendation by govern-
ment authorities for the purpose of training radio operators and engineers in the armed forces.” This statement is believed to be incorrect on both counts, and is being investigated by NAB.

**BMI**

**KAYE STAYS AT BMI**

Sydney M. Kaye, BMI’s First Vice President and General Counsel, denied the report contained in Variety to the effect that he was giving up his active participation in BMI. Mr. Kaye said:

“My law firm and I have been associated with Judge Thomas D. Thacher in the preparation of the case of newspaper-radio stations and presentation of it to the Federal Communications Commission. The fact that I have undertaken this additional legal work does not in any way mean that I am going to give up my active participation in BMI. The major work of organization of BMI has been accomplished, and this, of necessity, reduces the volume of work which I must personally do. I regard BMI as a continued responsibility and I intend to give to BMI all of the time that it needs.”

**NEW HIT**

BMI announces the acquisition of the sensational hit of the West Coast, “Hut Sut Song,” through an agreement with the Schumann Music Company of Los Angeles. Both BMI’s Los Angeles and New York offices regard the song as a number one potential.

**HEMISPHERIC SOLIDARITY**

Music Week, which runs from May 3 to May 10, will be featured by the performance of the native compositions of both North America and South America, which calls for rejoicing by BMI not to mention E. B. Marks and Peer International. In addition to the very well known *Frenesi, Perfidia,* and *Amapola,* several Latin-American compositions with English lyrics are now widely heard on the air. Among them are *Two Hearts That Pass in the Night,* *Yours, Maria Elena, Rendezvous in Rio* by Alberto Domínguez, *Green Eyes,* and *Dawn (Divina Mujer).* Among the native American tunemakers, Sheriff Jimmy Davis of Shreveport, La., is the Abou Ben Adem with *You’re My Sunshine, Worried Mind,* and *It Makes No Difference.* BMI will be host during the week to groups associated with the music industry who have expressed desires to get behind the scenes of a modern music company.

**BMI EXHIBIT AT THE NAB CONVENTION**

In addition to its movie showing BMI in action, those attending the NAB Convention will see the evolution of *My Sister and I* from the first penciled manuscript through the various changes made—progress in the arranging and autographing departments, recordings and transcriptions, and the application to it of the new BMI “color cueing.” This application of two colors to music printing is a revolutionary advance in music orchestration and has met such enthusiastic reception by musicians that it looks as if it will become a permanent feature in music printing.

Broadcasters will also have an opportunity to see how it was possible for BMI to turn out in one week more music than the entire music industry had produced in a month.

**BMI FEATURE TUNES**

May 5 - May 12

1. **MY SISTER AND I**
2. **WALKIN’ BY THE RIVER**
3. **WISE OLD OWL**
4. **FRIENDLY TAVERN POLKA**
5. **G’BYE NOW**
6. **WHAT D’YA HEAR FROM YOUR HEART**
7. **HERE’S MY HEART**
8. **WITH A TWIST OF THE WRIST**
9. **TALKIN’ TO THE WIND**
10. **THE RELUCTANT DRAGON**

**BMI FEATURE TUNES**

“Going Strong,” *Billboard*’s title for the leaders in record sales and coin machine popularity, aptly describes the position of BMI published and BMI controlled tunes for the week ending April 25. The music machine lists *There’ll Be Some Changes Made, It All Comes Back To Me Now, Amapola, Look At Me Now and The Wise Old Owl* in the first division, with *Friendly Tavern Polka, G’bye Now and Do I Worry “Coming Up.” The list of best sellers in *Billboard*’s record buying guide includes the same songs in the following order: *Oh, Look At Me Now, Wise Old Owl, There’ll Be Some Changes Made, It All Comes Back To Me Now and Amapola.* Among the possibilities listed as likely prospects for music machine successes are *Number 10, Lullaby Lane, Yours,* and *Walkin’ by the River.* *Walkin’ by* Una Mae Carlisle and Bob Sour, it is predicted by *Billboard,* will become “an exceedingly profitable item for the boxes.” *Amapola,* the E. B. Marks sensational revival, continues to lead all lists with the exception of “songs with the most radio plugs,” where *Do I Worry,* which comes to BMI through Melody Lane and Peer International, has reached the top position. This torchy rhythm tune, written by two young Hollywood writers, Stanley Cowan and Bobby Worth, has caught hold in the past two weeks.

**Fast Seller**

*My Sister And I* is the fastest selling BMI song to date and the first outstanding hit since *I Hear A Rhapsody.* No other BMI song had attracted the same amount of sales five weeks after it began selling. The success of *Sister* is stimulating sales of *Walkin’ by the River, Wise Old Owl, Friendly Tavern Polka* and *G’bye Now.*

**I Went Out of My Way**

In contrast to the thousands of uninteresting songs that are submitted to BMI, there appears every now and then a “natural.” Of such was *You Walk By,* which despite necessary revisions in construction, brought forth genuine enthusiasm from the BMI Editorial Staff. Now comes a song, *I Went Out Of My Way,* by Helen Bliss which is one of those songs that pleases both expert and layman at the first hearing. BMI stopped the presses when Miss Bliss came in with this tune and went to work to turn it out in record time.

392 — May 2, 1941
Helen Bliss is a Cleveland girl, recently employed as a salesgirl in Macy's Department Store in New York City, who came to the big town about a year and a half ago determined to make her way as a songwriter. She gives full credit to Benny Goodman for launching her career as a songwriter. About two years ago, Benny was playing at the Palace Theatre in Cleveland and Miss Bliss, after hearing half a dozen of his performances, determined to meet the great Goodman. Through the kind offices of Norman Siegel, radio editor of the Cleveland Press, an appointment was arranged. Goodman liked the song and took a piano copy with him to the west coast. Some months later he played it on one of his commercial broadcasts from Hollywood and commented over the air that the writer showed marked promise. That prediction was enough to send Helen Bliss packing off to New York with another song in her handbag. Regent Music Co., Benny Goodman's own publication firm, now clearing through BMI, accepted the song Miss Bliss brought them but because of the intricate construction of the tune, suggested Charley Haithaway, an arranger, as a collaborator. That song turned out to be *The Moon Won't Talk* which is gradually climbing into the ranks of best selling sheet music and is a fast growing favorite in "juke" boxes all over the country. Records of the song are finding ready sale, especially those made by Benny Goodman, Bob Chester and Ginny Sims. Bing Crosby has also featured the song in his broadcasts. All of her songs were written without collaboration, as she finds it more convenient to work that way.

"I first think of a title," she says, "and then I pick out a tune on the piano, after which I turn my attention to the lyrics. Sometimes it takes me four or five weeks before I am satisfied that my song is ready for submission to a publisher."

**Change of Name**

The new Dr. Christian picture with 100% BMI songs will be called *They Meet Again* instead of *Interlude*. There will be four songs: *When Love Is New*, *Make Believe*, *Land of Dreams*, and *Get A' Muggin'*. Miss Bliss brought them but because of the intricate construction of the tune, suggested Charley Haithaway, an arranger, as a collaborator. That song turned out to be *The Moon Won't Talk* which is gradually climbing into the ranks of best selling sheet music and is a fast growing favorite in "juke" boxes all over the country. Records of the song are finding ready sale, especially those made by Benny Goodman, Bob Chester and Ginny Sims. Bing Crosby has also featured the song in his broadcasts. All of her songs were written without collaboration, as she finds it more convenient to work that way.

"I first think of a title," she says, "and then I pick out a tune on the piano, after which I turn my attention to the lyrics. Sometimes it takes me four or five weeks before I am satisfied that my song is ready for submission to a publisher."

**Opportunity Without Prejudice**

In addition to popularizing Una Mae Carlisle's tune, *Walkin' by the River*, within a few weeks, Broadcast Music, Inc., has promoted the work of many other colored composers. There'll Be *Some Changes Made*, a tune popular since 1929 with jazz and swing enthusiasts climbed rapidly to popularity when the name bands began playing it after BMI made it available for broadcasting. *Changes* was written by Benton Overstreet, pianist, and Billy Higgins, a comedian featured in many musical shows. Higgins died five years ago at the age of sixty.

One of the earlier BMI tunes, widely heard now in restaurants and hotels, was *Don't the Moon Look Pretty*, by Leroy "Stuff" Smith of *I've A' Muggin'*. When "Stuff" first visited the offices of BMI at 580 Fifth Avenue, he whistled the tune of *Don't the Moon Look Pretty*. Milton Rettenberg, Chief of the Editorial Staff, liked the music, transferred it to the piano, and put the notes on paper. "Stuff" is better known as an orchestra leader and violinist than he is as a composer, but he scored a hit with his BMI song.

Among the other composer-musicians to attract the attention of BMI were Count Basie, whose Kansas City style band set the nation a' jumping, Lionel Hampton, vibraphone star extraordinary; Fletcher "Smack" Henderson, one of the foremost arrangers of modern American music and Cab Calloway the "King of Hi-De-Ho." The works of these four great musicians are made available by BMI through an agreement with Regent Music.

Jimmie Lunceford signed a contract with BMI whereby all the recordings of his music and his special orchestrations are available for performance. He has his own publishing house and in announcing his allegiance to Broadcast Music, Inc., said, "This contract ought to show what I think about BMI. The BMI way of dealing with writers is the best thing that has happened to American music."

BMI has also published the highly interesting work of Sidney Bechet the "young old man of jazz" who gained fame on two continents in the early 20's and 30's, as a clarinetist and soprano saxophonist. In 1919, when Bechet was touring Europe with the Sam Wooding band, Amsermet, the celebrated French critic, went into a literary ecstasy over the technique and virtuosity of the young New Orleanian and called his performance "the greatest thing since the Brandenburg Concert." Sidney Bechet is not well known by the radio public but BMI hopes that some day he will be.

**Musical Boys and Girls**

National Boys' and Girls' Week found BMI's Vice President and General Manager, M. E. Tompkins, serving as chairman of the Greater New York Committee which included Mayor LaGuardia, Attorney General John J. Bennett, Theodore Roosevelt, Bronx Borough President, J. J. Lyons and Manhattan Borough President Stanley Isaacs. BMI shared the publicity with Benny Goodman, Gene Krupa, with the Hotels Pennsylvania, New Yorker and Governor Clinton, where the winners posed for pictures. Music Day, Thursday, May 1st, was celebrated by a special visit to BMI by the boys and girls showing outstanding promise in music, selected from thirty-one children's aid societies, boys' athletic leagues, and allied youth movement groups. Mr. Tompkins acted as host and the visitors received the inside story of the music business and how hits are made.

**Miscellaneous**

**LIST "USO" RADIO COMMITTEE**

Seventeen broadcast executives have accepted membership on the National Radio Committee of the United Service Organizations for National Defense, headed by NAB President Neville Miller.

Committee members are:

- Edgar Bill, President, WMRD, Peoria
- Burridge D. Butler, Chairman, KOY, Phoenix
- Martin Campbell, Managing Director, WFAA, Dallas
- Roger W. Clipp, General Manager, WFIL, Philadelphia
- Edwin W. Craig, President, WSM, Nashville
- Roy L. Harlow, Vice President, Yankee Network
- Jack R. Howard, President, Scripp Howard Radio, Inc.
- Henry P. Johnston, General Manager, WSGN, Birmingham
- Harold A. Lafount, WOR, New York
- Howard Lane, McClatchy Radio Stations
- Alfred J. McCosker, President, WOR, New York
- Edwin C. Noble, President, WMCA, New York
- William S. Paley, President, Columbia Broadcasting System
- William J. Scripps, General Manager, WWJ, Detroit
- Griff Thompson, Vice President, WBBR, Brooklyn
- Niles Trammell, President, National Broadcasting Company
- Lewis Allen Weiss, Vice President, Don Lee Broadcasting System

The "USO" is composed of the Young Men's Christian Association, The National Catholic Community Service, the Salvation Army, the Young Women's Christian Asso-
ciation, the Jewish Welfare Board and the National Travelers Aid Association.

Thomas E. Dewey of New York is National Chairman and Walter Hoving is President.

The campaign has the endorsement of President Roosevelt, Secretary of War Stimson, Secretary of the Navy Knox, General George C. Marshall, Chief of Staff, as well as leaders in all walks of life in the nation.

The $10,765,000 program is to provide service club facilities and recreational activities in 339 locations adjacent to camps, naval stations and defense centers throughout the United States and its overseas bases. The government will provide the buildings.

CHINA RELIEFSEEKS $5,000,000

The seven China relief agencies that heretofore have been doing the bulk of Chinese relief and rehabilitation now are combined in a united, nationwide campaign for $5,000,000 under the name United China Relief.

United China Relief is registered with the State Department. Its campaign now is developing. It will include recorded plays, statements by prominent people and spot announcements which will be distributed to radio stations for their entertainment and public service value to American listeners.

In the course of its campaign, United China Relief plans to make radio material available to station program managers both through local committees being formed in key cities throughout the country and through national headquarters, 1790 Broadway, New York City.

FORUM PROGRAMS

The American Civil Liberties Union has asked the NAB to supply it with a complete list of radio forums dealing with local problems regularly broadcast. The NAB would appreciate it if all stations carrying such programs would send in their names and brief descriptions.

CHAMBER OF COMMERCE

In taking action on final resolution here at the annual convention this week, the United States Chamber of Commerce referred the radio broadcasting situation to its Board of Directors for further consideration. The study was asked for by an unnamed member organization of the United States Chamber as follows:

Radio Broadcasting, with a declaration that the rapid growth in the use of radio for entertainment and educational purposes, as well as communications purposes, has made necessary regulation to prevent disorder and interference in the use of the air. The characteristics of radio render this essentially a problem for federal rather than state control. Regulation of radio communication should not invade private management. It should be based upon the principle that the interest of the listening public is the paramount consideration in radio broadcasting. Other forms of communication are primarily for the service of the sender, but broadcasting serves the listener. No regulation should attempt to force upon the public undesired program matter. Station owners, like newspapers and magazines, must be free to select and edit their program material.

AGAINST BOOK COLLECTIONS

The advisability of a station endeavoring to collect books and old magazines for the new Army was a question put to NAB this week.

The Army advised against such promotions. Officials reported that experience indicates that only about ten per cent of the books donated are suitable. Gift books include everything from fairy stories to subversive literature and grammars. The amount of time required for a book promotion can be more effectively employed, from both a service and civilian morale point of view, along other directions, according to Army headquarters.

Definite suggestions are available to station managers who write Ed Kirby, Radio Section, Bureau of Public Relations, War Department, Washington, D. C.

CONTEST ON WJZ-BLUE

In connection with her weekly program, Alma Kitchell's Brief Case, over WJZ-Blue, Miss Kitchell is promoting a letter writing contest. Writer of best letter on “How Radio Helps Me to be a Better Prepared Citizen” gets console radio on May 28.

WORKS WITH SERVICEMEN

Working toward a closer tie-up with radio servicemen for mutual benefit, J. B. Conley, general manager of WOWO-WGL, Fort Wayne, Ind., has made the studios available to a local servicemen's group for its monthly meeting. An entire year's program of meetings is being worked out, featuring movies, lectures, and discussions. The group held its first meeting April 25, with about 140 servicemen and “hams” in attendance. The tie-up can be attributed directly to the cooperation between servicemen and WOWO-WGL during the “Radio Movin' Day” promotion.

ASCAP CASES ARGUED

On Tuesday and Wednesday of this week the Nebraska and Florida ASCAP cases were argued before the Supreme Court of the United States. William J. Hotz, Special Assistant to the Attorney General of Nebraska, argued
for the Attorney General of Nebraska, and Lucien H. Boggs of Jacksonville, Florida, and Tyrus A. Norwood, Assistant Attorney General of Florida, made the oral argument for the Attorney General of Florida. ASCAP was represented by Judge Thomas J. Haight and Frank Wideman.

In both cases ASCAP had secured an injunction against enforcement of the state statutes declaring illegal monopolies and price-fixing combinations in the field of performing rights. The specially constituted Federal court in Nebraska had held the Nebraska statute unconstitutional; a similar court in Florida had declared the 1937 Florida statute and parts of the 1939 statute unconstitutional. Appeals were taken to the Supreme Court. The last opinion day scheduled is June 2.

COPYRIGHT AND LIBEL INSURANCE

The NAB Insurance Committee met in New York Thursday to consider two plans of copyright and libel insurance which have been submitted. It is expected that their analysis and recommendations, if any, will be released at or before the convention at St. Louis May 12.

FEDERAL LEGISLATION

HOUSE

H. R. 4521 (Kramer, D.-Calif.) COPYRIGHT—To amend section 64 of the copyright law (title 17, U.S.C.) so as to make copies or reproductions of prints and labels available upon payment of the required fee. Referred to Committee on Patents.

H. R. 4522 (Mrs. Rogers, R.-Mass.) DAYLIGHT SAVING—To provide daylight saving between the last Sunday in March and the last Sunday in October in each year. Referred to Committee on Interstate and Foreign Commerce.

STATE LEGISLATION

FLORIDA

S. 268 (Whitaker, et al.) RECORDED MUSIC—Prevents claims for additional compensation, fees or payment after sale, of phonograph records or transcriptions of any form of recorded music. Referred to Committee on Judiciary "C".

S. 269 (Whitaker, et al.) RADIO DEFAMATION—Amends Sec. 1, Chapter 19,616, Acts of 1939, relating to civil liabilities of owners, licensees and operators of radio broadcasting stations for radio defamation or libel statements. Referred to Committee on Judiciary "C".

MAINE

S. 567 (Majority of Committee of Conference). ADVERTISING—To prevent fraudulent advertising.

RHODE ISLAND

H. 1055 (Kiernan). COPYRIGHTED MUSIC—Declaring to be an unlawful monopoly and its purpose to be in restraint of trade certain combinations of persons and corporations, and the regulation thereof. Authors, composers, publishers and owners of musical compositions prohibited from charging fees for copyrighted music. Referred to Committee on Judiciary.

FEDERAL COMMUNICATIONS COMMISSION

POLICY WITH RESPECT TO NEWSPAPERS

In keeping with FCC policy not to grant new applications by newspaper interests for high frequency (FM) broadcast facilities pending determination of the general question of newspaper control of broadcast facilities, the Commission is also placing in its pending files all applications by newspaper interests for new standard broadcast stations, as well as applications for transfer of control of existing standard broadcast facilities to newspaper interests. Such action is intended to protect newspapers from incurring substantial radio expenditures prior to the Commission's fact-finding inquiry.

This supplemental action is in conformity with Order No. 79, of March 20, which provides that Commission investigation and public hearing "shall also include consideration of statement of policy or rules, if any, which should be issued concerning future acquisition of standard broadcast stations by newspapers." Date for this hearing will be set in the near future.

In the case of standard broadcast stations already licensed to newspaper interests, improvements in facilities may be permitted if the proposed increase in service is shown to be in the public interest, convenience and necessity, and in conformity with prescribed engineering requirements.

"HEIL HITLER" STATION SEIZED

Search by the National Defense Operations Section of the Federal Communications Commission for unauthorized radio transmission which trespassed on Government frequencies and purported to be in the service of "foreign agents" today culminated in the arrest at Peoria, Illinois, of Charles W. Johnson, who identified himself as a senior student in electrical engineering at a certain mid-western institute. Johnson's home revealed illegal equipment, which was seized by a United States Marshall, and Johnson was charged with violating Sections 301 and 318 of the Communications Act.

The monitoring stations in the Commission's national defense operations were originally enlisted to trace signals from an unlicensed radio station, the operator of which called himself "Fritz" and frequently concluded his transmissions with "Heil, Hitler". No identifying call letters were used.

Listening-in procedure revealed this operator to have more than average knowledge of certain codes and ciphers. In fact, he claimed on the air to be a cryptographer for a signal unit in a German army of occupation. His general procedure was to broadcast that he was a foreign agent and to attempt to engage in communications between United States Government stations. In so doing, he declared that he was relaying information from foreign agents. On one occasion he implied that Government channels were to be "jammed" by high-powered radio stations being constructed for that purpose. At another time he sent out a message in cipher which, when decoded, proved to be in German and related to certain foreign troop movements. In his transmissions "Fritz" made effort to obtain military information.

The following excerpts are typical of "Fritz's" communications:

"Staff plans are now coming in, but they are very detailed and long. Too much trouble to re-encipher again."

"Tell your cryptographer that this is a columnar position (Fritz proceeded to transmit the cipher message)."

"I am a cryptographer. You must give me some information in exchange for this stuff. Give me the location of (gave several U. S. Government station calls.)"
